Five years in the writing by one of science fiction's most honored authors, *Doomsday Book* is a storytelling triumph. Connie Willis draws upon her understanding of the universalities of human nature to explore the ageless issues of evil, suffering and the indomitable will of the human spirit. For Kivrin, preparing an on-site study of one of the deadliest eras in humanity's history was as simple as receiving inoculations against the diseases of the fourteenth century and inventing an alibi for a woman traveling alone. For her

instructors in the twenty-first century, it meant painstaking calculations and careful monitoring of the rendezvous location where Kivrin would be received. But a crisis strangely linking past and future strands Kivrin in a bygone age as her fellows try desperately to rescue her. In a time of superstition and fear, Kivrin—barely of age herself—finds she has become an unlikely angel of hope during one of history's darkest hours. Praise for *Doomsday Book* “A stunning novel that encompasses both suffering and hope. . . . The best work yet from one of science fiction’s best writers.”—The Denver Post “Splendid work—brutal, gripping and genuinely harrowing, the product of diligent research, fine writing and well-honed instincts, that should appeal far beyond the normal science-fiction constituency.”—Kirkus Reviews (starred review) “The world of 1348 burns in the mind’s eye, and every character alive that year is a fully recognized being. . . . It becomes possible to feel . . . that Connie Willis did, in fact, over the five years *Doomsday Book* took her to write, open a window to another world, and that she saw something there.”—The Washington Post Book World

In *Critique of Black Reason* eminent critic Achille Mbembe offers a capacious genealogy of the category of Blackness—from the Atlantic slave trade to the present—to critically reevaluate history, racism, and the future of humanity. Mbembe teases out the intellectual consequences of the reality that Europe is no longer the world's center of gravity while mapping the relations among colonialism, slavery, and contemporary financial and extractive capital. Tracing the conjunction of Blackness with the biological fiction of race, he theorizes Black reason as the collection of discourses and practices that equated Blackness with the nonhuman in order to uphold forms of oppression. Mbembe powerfully argues that this equation of Blackness with the nonhuman will serve as the template for all new forms of

exclusion. With *Critique of Black Reason*, Mbembe offers nothing less than a map of the world as it has been constituted through colonialism and racial thinking while providing the first glimpses of a more just future.

--Cheryl Strayed From travel writer Jedidiah Jenkins comes a long-awaited memoir of adventure, struggle, and lessons learned while bicycling the 14,000 miles from Oregon to Patagonia. On the eve of turning thirty, terrified of being funneled into a life he didn't choose, Jedidiah Jenkins quit his dream job and spent the next sixteen months cycling from Oregon to Patagonia. He chronicled the trip on Instagram, where his photos and profound reflections on life soon attracted hundreds of thousands of followers and got him featured by National Geographic and The Paris Review. In this unflinchingly honest memoir, Jed narrates the

adventure that started it all: the people and places he encountered on his way to the bottom of the world, and the internal journey that prompted it. As he traverses cities, mountains, and inner boundaries, Jenkins grapples with the questions of what it means to be an adult, his struggle to reconcile his sexual identity with his conservative Christian upbringing, and his belief in travel as a way to "wake us up" to life back home. A soul-stirring read for the wanderer in each of us, *To Shake the Sleeping Self* is an unforgettable reflection on adventure, identity, and a life lived without regret.

The books in the Florida and the Caribbean Open Books Series demonstrate the University Press of Florida's long history of publishing Latin American and Caribbean studies titles that connect in and through Florida, highlighting the connections between the Sunshine State and its neighboring islands. Books in this series show how early explorers found and settled Florida and the Caribbean. They tell the tales of early pioneers, both foreign and domestic. They examine topics critical to the area such as travel, migration, economic opportunity, and tourism. They look at the growth of Florida and the Caribbean and the attendant pressures on the environment, culture, urban development, and the movement of peoples, both forced and voluntary. The Florida and the Caribbean Open Books Series gathers the rich data available in

these architectural, archaeological, cultural, and historical works, as well as the travelogues and naturalists' sketches of the area in prior to the twentieth century, making it accessible for scholars and the general public alike. The Florida and the Caribbean Open Books Series is made possible through a grant from the National Endowment for the Humanities and the Andrew W. Mellon Foundation, under the Humanities Open Books program.

25th Anniversary Edition "A magnificent treasure for all cultures and all time." --St. Petersburg Times It is November 25, 1960, and three beautiful sisters have been found near their wrecked Jeep at the bottom of a 150-foot cliff on the north coast of the Dominican Republic. The official state newspaper reports their deaths as accidental. It does not mention that a fourth sister lives. Nor does it explain that the sisters were among the leading opponents of Gen. Rafael Leónidas Trujillo's dictatorship. It doesn't have to. Everybody knows of Las Mariposas--the Butterflies. In this extraordinary novel, the voices of all four sisters--Minerva, Patria, María Teresa, and the survivor, Dedé--speak across the decades to tell their own stories, from secret crushes to gunrunning, and to describe the everyday horrors of life under Trujillo's rule. Through the art and magic of Julia Alvarez's imagination, the martyred Butterflies live again in this novel of courage and love, and the human costs of political oppression.

"The Australian Constitution contains no guarantee of freedom of religion or freedom of conscience. Indeed, it contains very few provisions dealing with rights — in essence, it is a Constitution that confines itself mainly to prescribing a framework for federal government, setting out the various powers of government and limiting them as between federal and state governments and the three branches of government without attempting to define the rights of citizens except in minor respects. [...] Whether Australia should have a national bill of rights has been a controversial issue for quite some time. This is despite the fact that Australia has acceded to the ICCPR, as well as the First Optional Protocol to the ICCPR, thereby accepting an international obligation to bring Australian law into line with the ICCPR, an obligation that Australia has not discharged.

Australia is the only country in the Western world without a national bill of rights.<sup>4</sup> The chapters that follow in this book debate the situation in Australia and in various other Western jurisdictions.' From Foreword by The Hon Sir Anthony Mason AC KBE: Human Rights and Courts

"What caused the Industrial Revolution? Gregory Clark has a brilliant and fascinating explanation for this event which permanently changed the life of humankind after 100,000 years of stagnation."--George Akerlof, Nobel Laureate in Economics and Koshland Professor of Economics,

University of California, Berkeley "This is a very important book. Gregory Clark argues that the Industrial Revolution was the gradual but inevitable result of a kind of natural selection during the harsh struggle for existence in the pre-industrial era, in which economically successful families were also more reproductively successful. They transmitted to their descendants, culturally and perhaps genetically, such productive attitudes as foresight, thrift, and devotion to hard work. This audacious thesis, which dismisses rival explanations in terms of prior ideological, technological, or institutional revolutions, will be debated by historians for many years to come."--Paul Seabright, author of "The Company of Strangers: A Natural History of Economic Life" "Challenging the prevailing wisdom that institutions explain why some societies become rich, Gregory Clark's "A Farewell to Alms" will appeal to a broad audience. I can think of nothing else like it."--Philip T. Hoffman, author of "Growth in a Traditional Society" "You may not always agree with Gregory Clark, but he will capture your attention, make you think, and make you reconsider. He is a provocative and imaginative scholar and a true original. As an economic historian, he engages with economists in general; as an economist, he is parsimonious with high-tech algebra and unnecessarily complex models. Occam would approve."--Cormac Grda, author of "Jewish Ireland

in the Age of Joyce" "This should rapidly become a standard work on the history of economic development. It should start whole industries trying to test, refine, and refute its explanations. And Gregory Clark's views on the economic merits of imperialism and the fact that labor gained the most from industrialization will infuriate all the right people."--Eric L. Jones, author of "Cultures Merging" and "The European Miracle" "While many books on the Industrial Revolution tend to focus narrowly either on the event itself, or on one explanation for it, Gregory Clark does neither. He takes an extremely long-run view, covering significant periods before and after the Industrial Revolution, without getting bogged down in long or detailed exposition. This is an extremely important contribution to the subject."--Clifford Bekar, Lewis and Clark College

In *Parish Clergy Wives in Elizabethan England*, Anne Thompson demonstrates that the first ministers' wives are not entirely lost to the record and, in offering an insight into their lived experience, challenges many existing preconceptions about their role and reception.

Revolutions are often seen in terms of a spontaneous burst of intense political activity; less attention usually is given to the structures, processes, and perceptions that make such activity possible. This innovative book examines such long-term transformations as they relate to the revolution in the Central African nation of Rwanda, which culminated in its independence in July 1962. While much of the previous work on Rwanda has focused on the royal court and central state institutions, *The Cohesion of Oppression* instead focuses on politics outside the central heartland. Adopting a "view from below," it explores the interaction of central and local power bases and delineates the transformations introduced into the system by German and Belgian colonial policies that consciously sought to bolster one ethnic group as agents of colonial administration. In the three years before

independence, violent conflict in Rwanda resulted in the abolition of the monarchy, the expulsion of the ruling Tuutsi ethnic group from power, and the installation of rival Hutu authorities to take control of a presidential regime with an elected Assembly. While basic Rwandan cultural norms persisted during and after the revolution, significant alterations had taken place in the locus of political power and social categories that had access to high office. This book considers both the internal and the non-Rwandan influences that substantially affected these alterations but concentrates on the former, since such an approach has in general been more neglected.

De proprietatibus rerum, 'On the properties of things', has long been referred to by scholars as a medieval encyclopedia, but evidence suggests that it has been many things to many people. The sheer number of extant manuscript copies and printed editions, along with translations, adaptations, and mentions in poems and sermons, testify to its continuous significance for Europeans of all estates and different walks of life, from the thirteenth to the seventeenth centuries. While first compiled soon after the time of St Francis by a humble continental friar to meet the needs of his expanding religious brotherhood, by 1600 English men of letters had claimed Bartholomew as a noble compatriot and national treasure. What was it about the work that

propelled it through a progression of medieval cultures and into an exalted position in the world of English letters? This reception history traces evidence for the journey of 'Properties' over four centuries of social, political and religious change. Reveals how the voyages of Columbus reintroduced plants and animals that had been separated millions of years earlier, documenting how the ensuing exchange of flora and fauna between Eurasia and the Americas fostered a European rise, decimated imperial China and rendered Manila and Mexico City the center of the world for two centuries. Reprint.

'Life is not all beer and skittles,' said a reflective sportsman, and all books are not fairy tales. In an imperfect state of existence, 'the peety of it is that we cannot have all things as we would like them.' Undeniably we would like all books to be fairy tales or novels, and at present most of them are. But there is another side to things, and we must face it. "'Life is real, life is earnest," as Tennyson tells us,' said an orator to whom I listened lately, and though Longfellow, not Tennyson, wrote the famous line quoted by the earnest speaker, yet there is a good deal of truth in it. The word 'earnest,' like many other good words, has been overdone. It is common to sneer at 'earnest workers,' yet where would we be without them, especially in our climate? In a Polynesian island, where the skies for ever smile, and the blacks for ever dance, earnestness is superfluous. The bread-fruit tree delivers its rolls punctually every morning, strawberries or other fruits, as nice, spring beneath the feet of the dancers; the cavern in the forest provides a roof and shelter from the sun; the sea supplies a swimming-bath, and man, in time of peace, has only to enjoy himself, eat and drink, laugh and love, sing songs and tell fairy tales. His drapery is woven of fragrant flowers, nobody is poor and anxious about food, nobody is

rich and afraid of losing his money, nobody needs to think of helping others; he has only to put forth his hand, or draw his bow or swing his fishing-rod, and help himself. To be sure, in time of war, man has just got to be earnest, and think out plans for catching and spearing his enemies, and drill his troops and improve his weapons, in fact to do some work, or have his throat cut, and be put in the oven and eaten. Thus it is really hard for the most fortunate people to avoid being earnest now and then. The people whose stories are told in this book were very different from each other in many ways. The child abbess, Mre AngŽlique, ruling her convent, and at war with naughty abbesses who hated being earnest, does not at once remind us of Hannibal. The great Montrose, with his poems and his scented love-locks, his devotion to his cause, his chivalry, his death, to which he went gaily clad like a bridegroom to meet his bride, does not seem a companion for Palissy the Potter, all black and shrunk and wrinkled, and bowed over his furnaces. It is a long way from gentle Miss Nightingale, tending wounded dogs when a child, and wounded soldiers when a woman, to Charles Gordon playing wild tricks at school, leading a Chinese army, watching alone at Khartoum, in a circle of cruel foes, for the sight of the British colours, and the sounds of the bagpipes that never met his eyes and ears.

An assessment of cancer addresses both the courageous battles against the disease and the misperceptions and hubris that have compromised modern understandings, providing coverage of such topics as ancient-world surgeries and the development of present-day treatments.
