New York Times Bestseller (Humor) "The book everyone is laughing about!"--Joe Scarborough, Morning Joe From legendary comedian D.L. Hughley comes a bitingly funny send-up of the Obama years, as "told" by the key political players on both sides of the aisle. What do the Clintons, Republicans, fellow Democrats, and Obama's own family really think of President Barack Obama? Finally, the truth is revealed in this raucously funny "oral history" parody. There is no more astute—and hilarious—critic of politics, entertainment, and race in America than D. L. Hughley, famed comedian, radio star, and original member of the "Kings of Comedy." In the vein of Jon Stewart's America: The Book, Black Man, White House is an acerbic and witty take on Obama's two terms, looking at the president's accomplishments and foibles through the imagined eyes of those who saw history unfold. Hughley draws upon satirical interviews with the most notorious public figures of our day: Mitt Romney ("What's 'poverty'? Is that some sort of rap jargon?"); Nancy Pelosi ("I play F**k/Marry/Kill, and there's a lot more kills than fu**ks in Congress, believe me."); Rod Blagojevich ("You can't sell political offices on eBay; I discovered that personally."); Joe Biden ("I like wrestling."); and other politicians, media pundits, and buffoons. It is sure to be the most irreverent—and perhaps the most honest—look at American politics today.

In Not the Israel My Parents Promised Me, one of the final graphic memoirs from the man who defined the genre, Harvey Pekar explores what it means to be Jewish and what Israel means to the Jews. Pekar's mother was a Zionist by way of politics, his father by way of faith, and he inevitably grew up a staunch supporter of Israel. But as he became attuned to the wider world, Pekar began to question his parents' most fundamental beliefs. This book is the full account of that questioning. Over the course of a single day in his hometown of Cleveland, Ohio, Pekar and the illustrator JT Waldman wrestle with the mythologies passed down to them, weaving a personal and historical odyssey of uncommon wit and power. With an epilogue written by Joyce Brabner, Not the Israel My Parents Promised Me is an essential book for fans of Harvey Pekar and anyone interested in the past and future of the Jewish state.

'Essential reading for all those interested in how India will deal with its greatest strategic challenge, an increasingly powerful China'-SHIVSHANKAR MENON 'Vijay Gokhale strips away the illusion that China ever shared convergent interests with India in Asia and globally. A disconcerting read, but indispensable.'-ASHLEY J. TELLIS India's relations with the People's Republic of China have captured the popular imagination ever since the 1950s but have rarely merited a detailed understanding of the issues. Individual episodes tend to arouse lively debate, which often dissipates without a deeper exploration of the factors that shaped the outcomes. This book explores the dynamics of negotiation between the two countries, from the early years after Independence until the current times, through the prism of six historical and recent events in the India-China relationship. The purpose is to identify the strategy, tactics and tools that China employs in its diplomatic negotiations with India, and the learnings for India from its past dealings with China that may prove helpful in future negotiations with the country.

This textbook aims to develop a scientific knowledge base on spatial information technology to communicate the United Nations' Sustainable Development Goals (SDGs) among students, researchers, professionals and laymen. The book improves understanding of the spatial database and explains how to extract information from this for planning

purposes. To enhance the knowledge of geoscientists and environmentalists, the book describes the basic fundamental concepts to advance techniques for spatial data management and analysis and discusses the methodology. The Geographic Information System (GIS), remote sensing and Global Positioning System (GPS) are presented in an integrated manner for the planning of resources and infrastructure. The management of these systems is discussed in a very lucid way to develop the reader's skills. The proper procedure for map making and spatial analysis are included along with case studies to the reader. Where the first part of the book discusses the conceptual background, the second part deals with case studies using these applications in different disciplines. The presented case studies include land use, agriculture, flood, watershed characterization and infrastructure assessment for the Sustainable Development Goals.

The true story behind the film *The Nasty Girl*: A memoir by a German woman who uncovered her hometown's war crimes and complicity with the Nazis. Nestled along the Danube in southern Germany, Passau is a pleasant tourist destination known for its historic buildings and scenic views at the intersection of three rivers. But for decades, the small Bavarian city suppressed an intimate association with Adolf Hitler and the Third Reich. Born in Passau in 1960, Anna Rosmus discovered those dark secrets as a teenager—sordid stories of slave labor, forced abortions, and a massacre of Russian POWs. In 1994, she set out to commemorate the forgotten Holocaust victims who had died there, expecting little if any controversy. What she encountered instead was an obstructionist city council, a virulently resentful local population, and an unsettling degree of latent anti-Semitism in a town whose several hundred Jewish citizens had been sent to concentration camps. Eventually the death threats led to her own emigration from Germany to the United States. Anna Rosmus has been hailed by Marc Fisher of the *Washington Post* as “a rigorous researcher burning with a passion to tell the story that must be told.” In *Out of Passau*, she explores not only the disturbing World War II history of her hometown, but also the life-changing fallout that resulted from her determination to recognize those who had lost their lives.

The rapid progress in biological and biomedical sciences in the last twenty years has brought with it an extensive development of the methods of molecular genetics. This has had impacts on society in many fields. Practical applications in medicine, pharmacology, agriculture, food design and biotechnology are firmly established and will grow enormously in the years to come. The scientific views of DNA and genes which underpin these applications are challenging our fundamental concepts of life, nature, society and humanity. It is beyond doubt that these developments need to be evaluated and reflected upon, both from a scientific and philosophical point of view, as well as from a cultural and social perspective. This book provides a wide range of discussions about the effects of DNA thinking in science and society, in biology and in relation to what it is to be human. Insights are provided into trans-disciplinary approaches and divergent views are compared. The reports on the plenary discussions and the many workshops show progress towards a power-free dialogue, i.e. an exchange of thoughts, free of economic and political pressure. The viewpoints of a variety of specialists, including scientists (microbiologists, molecular geneticists and clinical researchers), clinicians, philosophers and members of NGOs are presented. The contents will be of particular interest to those involved in genetic engineering, from students to policy makers, who face the challenge of the new technology in their work and who are looking for a substantial expansion and complementation of their basis for judgement forming.

The "AYP Enlightenment Series" makes these profound practices available for the first time in a series of concise instruction books. "Tantra" is the third book in the series. 'One of the finest writers of his generation' Financial Times Thousands of islands rise from the rivers' rich silts, crowned with forests of mangrove, rising on stilts. This is the Sundarban, where great rivers give birth; to a vast jungle that joins Ocean and Earth. Jungle Nama is a beautifully illustrated verse adaptation of a legend from the Sundarbans, the world's largest mangrove forest. It tells the story of the avaricious rich merchant Dhona, the poor lad Dukhey, and his mother; it is also the story of Dokkhin Rai, a mighty spirit who appears to humans as a tiger, of Bon Bibi, the benign goddess of the forest, and her warrior brother Shah Jongoli. Jungle Nama is the story of an ancient legend with urgent relevance to today's climate crisis. Its themes of limiting greed, and of preserving the balance between the needs of humans and nature have never been more timely. Written in Amitav Ghosh's interpretation of the traditional Bengali verse meter, poyar, the poem is coupled with stunning illustrations from internationally renowned artist, Salman Toor.

Baseball is a strange sport: it consists of long periods in which little seems to be happening, punctuated by high-energy outbursts of rapid fire activity. Because of this, despite ever greater profits, Major League Baseball is bent on finding ways to shorten games, and to tailor baseball to today's shorter attention spans. But for the true fan, baseball is always compelling to watch -and intellectually fascinating. It's superficially slow-pace is an opportunity to participate in the distinctive thinking practice that defines the game. If baseball is boring, it's boring the way philosophy is boring: not because there isn't a lot going on, but because the challenge baseball poses is making sense of it all. In this deeply entertaining book, philosopher and baseball fan Alva Noë explores the many unexpected ways in which baseball is truly a philosophical kind of game. For example, he ponders how observers of baseball are less interested in what happens, than in who is responsible for what happens; every action receives praise or blame. To put it another way, in baseball - as in the law - we decide what happened based on who is responsible for what happened. Noe also explains the curious activity of keeping score: a score card is not merely a record of the game, like a video recording; it is an account of the game. Baseball requires that true fans try to tell the story of the game, in real time, as it unfolds, and thus actively participate in its creation. Some argue that baseball is fundamentally a game about numbers. Noe's wide-ranging, thoughtful observations show that, to the contrary, baseball is not only a window on language, culture, and the nature of human action, but is intertwined with deep and fundamental human truths. The book ranges from the nature of umpiring and the role of instant replay, to the nature of the strike zone, from the rampant use of surgery to controversy surrounding performance enhancing drugs. Throughout, Noe's observations are surprising and provocative. Infinite Baseball is a book for the true baseball fan.

"Not many living artists would be sufficiently brave or inspired to attempt reflecting in art what Borges constructs in words. But the detailed, evocative etchings by Erik Desmazieres provide a perfect counterpoint to the visionary prose. Like Borges, Desmazieres has created his own universe, his own definition of the meaning, topography and geography of the Library of Babel. Printed together, with the etchings reproduced in fine-line duotone, text and art unite to present an artist's book that belongs in the circle of Borges's sacrosanct Crimson Hexagon - "books smaller than natural books, books omnipotent, illustrated, and magical."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. LAMBDA LITERARY AWARD FINALIST A transgender reporter's "powerful, profoundly moving" narrative tour through the surprisingly vibrant queer communities sprouting up in red states (New York Times Book Review), offering a vision of a stronger, more humane America. Ten years ago, Samantha Allen was a suit-and-tie-wearing Mormon missionary. Now she's a GLAAD Award-winning journalist happily married to another woman. A lot in her life has changed, but what hasn't changed is her deep love of Red State America, and of queer people who stay in so-called "flyover country" rather than moving to the liberal coasts. In *Real Queer America*, Allen takes us on a cross-country road-trip stretching all the way from Provo, Utah to the Rio Grande Valley to the Bible Belt to the Deep South. Her motto for the trip: "Something gay every day." Making pit stops at drag shows, political rallies, and hubs of queer life across the heartland, she introduces us to scores of extraordinary LGBT people working for change, from the first openly transgender mayor in Texas history to the manager of the only queer night club in Bloomington, Indiana, and many more. Capturing profound cultural shifts underway in unexpected places and revealing a national network of chosen family fighting for a better world, *Real Queer America* is a treasure trove of uplifting stories and a much-needed source of hope and inspiration in these divided times. The *Surrender Paradox* peels back the cover over Chaplain (Captain) John VanderKaay's experiences in war and Hurricane Katrina, his own struggle with post-traumatic stress disorder (PTSD), and the stigma against getting mental health help. Labeled as "crazy," he was told by superiors, "Good chaplains give help. They don't need help." He spiraled downward, and the blows just kept coming. After a miraculous encounter with God, he began to fight for those struggling with unseen wounds of war, helping change Department of Defense's policies concerning those needing mental help. Going from mere seconds from surrendering to despair and ending his life to the point of total surrender to God's grace, John learned that when you are overwhelmed by circumstances, surrender is the only way out. You cannot control everything and fight your way out alone. But who or what you surrender control to is of critical importance. Do you surrender control to the despair and hopelessness that seems to come from all directions and leads to death, or do you surrender control to the God who created you and wants to sustain you and give you life? Therein lies the surrender paradox. You must not surrender, but you must surrender!

Kabir was a 15th century Indian spiritual master who left a legacy of extraordinary poems which continue to capture the imagination of a diverse audience today. The poems downplay the importance of ritual and austerity, and teach that God is not confined to centers of worship or places of pilgrimage but found everywhere in creation. Most importantly, God is within us and this is where we must meet him. Kabir elevates us into the realm of the spirit - a world of beauty, majesty, even romance, where the relationship between lovers is a recurring metaphor for our relationship to the divine. For the last century, Rabindranath Tagore's classic translation, "Songs of Kabir," has been the standard, but over the years it has suffered the ravages of time. In "Kabir Says," David Masterman has reworked Tagore's translation and breathed new life into it for the 21st century reader. But this edition goes beyond merely updating language and style; it considerably enhances the poetic form and flow of the English translation, and a new introduction and appendix have also been added to add depth to the reader's understanding.
