This densely illustrated, hands-on guide to diesel engine maintenance, troubleshooting, and repair renders its subject more user-friendly than ever before. Finally, boatowners who grew up with gas engines can set aside their fears about tinkering with diesels, which are safer and increasingly more prevalent. As in other volumes in the International Marine Sailboat Library, every step of every procedure is illustrated, so that users can work from the illustrations alone. The troubleshooting charts in the second chapter--probably the most comprehensive ever published--are followed by system-specific chapters, allowing readers to quickly diagnose problems, then turn to the chapter with solutions. Diesel engine systems covered include: mechanical; oil; fresh- and raw-water cooling; low- and high-pressure fuel; exhaust; starting; charging; transmission and stern gear.

This book presents a dynamic history of the ways in which translators are trusted and distrusted. Working from this premise, the authors develop an approach to translation that speaks to historians of literature, language, culture, society, science, translation and interpreting. By examining theories of trust from sociological, philosophical, and historical studies, and with reference to interdisciplinarity, the authors outline a methodology for approaching translation history and intercultural mediation from three discrete, concurrent perspectives on trust and translation: the interpersonal, the institutional and the regime-enacted. This book will be of particular interest to students and scholars of translation studies, as well as historians working on mediation and cultural transfer.

The Mark of Cain makes available for the first time the accumulated psychoanalytic understanding of the psychopathic mind. Editor Reid Meloy, a leading authority on the psychology of the psychopath, has brought together in a single collection the most historically important psychoanalytic papers on the psychopath and delineated their continuing relevance to contemporary understanding. According to Meloy, two theoretical traditions flow into the psychoanalytic understanding of psychopathy. The first tributary focuses on the early development of the psychopath in order to illuminate how a profound alteration in self-regard leads both to a denigration of the other and to an impulsive search for gratification in the present. The second tributary seeks to locate the psychopathic miscarriage of human potentiality within analytic theories of personality structure and clinically grounded differential diagnosis. Meloy presents the major contributions associated with both of these traditions. Included within this body of literature are the original formulations of concepts that have long since become part of the psychoanalytic nomenclature: the "affectionless" juvenile offender, the diagnostic significance of "affect hunger," the behavioral consequences of "superego lacunae," the recourse to promiscuous identification in "the impostor," and the paradoxically lethal lure of "malignant narcissism." Of special interest are Meloy's historical notes to each chapter and two section introductions, the latter major essays in their own right. The explosion of empirical research on psychopathy over the past two decades masks the fact that much contemporary work in this area is grounded in the clinical formulations of leading psychoanalysts of the twentieth century. The Mark of Cain rescues this intimate understanding of the inner world of the psychopath and thereby contributes to

clinical realism in the face of deception, manipulation, exploitation, and even frank dangerousness.

London Goes To Sea is Peter J. Baumgartner's candid and captivating account of restoring an ageing fibreglass sailing boat over the course of four years and then introducing it to his native New England waters. His precise records illustrate every trial and triumph of the restoration process, and his careful attention to errors made along the way provides crucial insight for anyone considering a similar project. His writing combines the best elements of a brisk, entertaining narrative and a thoroughly practical handbook, making for a truly unique story that embraces every experience of the coastal sailor. His unflagging joy and enthusiasm for his old Cape Dory shine through on every page.

Plunkett's Automobile Industry Almanac 2007 Plunkett Research, Ltd.

John Lahr's stunning and complex biography of his father, the legendary actor and comedian Bert Lahr Notes on a Cowardly Lion is John Lahr's masterwork: an all-encompassing biography of his father, the comedian and performer Bert Lahr. Best known as the Cowardly Lion in MGM's classic The Wizard of Oz, Lahr was a consummate artist whose career spanned burlesque, vaudeville, Broadway, and Hollywood. While he could be equally raucous and polished in public, Lahr was painfully insecure and self-absorbed in private, keeping his family at arm's length as he quietly battled his inner demons. Told with an impressive objectivity and keen understanding of the construction—and destruction—of the performer, Notes on a Cowardly Lion is more than one man's quest to understand his father; it is an extraordinary examination of a life in American show business.

By the turn of the twentieth century, Paris was the capital of the art world. While this is usually understood to mean that Paris was the center of art production and trading, this book examines a phenomenon that has received little attention thus far: Paris-based dealers relied on an ever-expanding international network of peers. Many of the city's galleries capitalized on foreign collectors' interest by expanding globally and proactively cultivating transnational alliances. If the French capital drew artists from around the world—from Cassatt to Picasso—the contemporary-art market was international in scope. Art dealers deliberately tapped into a growing pool of discerning collectors in northern and eastern Europe, the UK, and the USA. International trade was rendered not just desirable but necessary by the devastating effects of wars, revolutions, currency devaluation and market crashes which stalled collecting in Europe. Pioneers of the Global Art Market assembles original scholarship based on a close inspection of and fresh perspective on extant dealer records. It caters to an amplified curiosity concerning the emergence and workings of our unprecedented contemporary-centric and global art market. This anthology fills a significant gap in the expanding field of art market studies by addressing how,

initially, contemporary art, which is now known as historical modernism, made its way into collections: who validated what by promoting and selling it, where, and how. It includes unpublished material, concrete examples, bibliographical and archival references, and should appeal to academics, curators, educators, dealers, collectors, artists and art lovers alike. It celebrates the modern art dealer as transnational impresario, the global reach of the modern-art market, and the impact of traders on the history of collecting, and ultimately on the history of art.

Children who claim to remember a previous life have been found in many parts of the world, particularly in the Buddhist and Hindu countries of South Asia, among the Shiite peoples of Lebanon and Turkey, the tribes of West Africa, and the American northwest. Stevenson has collected over 2,600 reported cases of past-life memories of which 65 detailed reports have been published. Specific information from the children's memories has been collected and matched with the data of their claimed former identity, family, residence, and manner of death. Birthmarks or other physiological manifestations have been found to relate to experiences of the remembered past life, particularly violent death. Writing as a specialist in psychiatry and as a world-renowned scientific investigator of reported paranormal events, Stevenson asks us to suspend our Western tendencies to disbelieve in reincarnation and consider the reality of the burgeoning record of cases now available. This book summarizes Stevenson's findings which are presented in full in the multi-volume work entitled *Reincarnation and Biology: A Contribution to the Etiology of Birthmarks and Birth Defects*, also published by Praeger.

First published in 1981, *Education and the Individual* presents a reasoned case for maintaining the maximum freedom of choice in education in those areas where the interests of the individual and the state conflict. The book argues that ultimately the freedom to opt out of the education system altogether must be protected, as well as the freedom to choose a religious education in a secular state, or a secular education in a religious state, and freedom from political indoctrination. It analyses what is required of education in a liberal society, and explores its implications for the wider international context of human rights. It also promotes the basic rights of freedom of choice in education and, wherever conflict is inevitable, it argues for the issue to be settled in favour of the individual, rather than the state. *Education and the Individual* will appeal to those with an interest in the history of education, the philosophy of education, and the relationship between education and politics.

* Outboard motor repair for the average guy * Fix up an old outboard and SAVE \$1000 or more compared to buying a new motor! Wawrzyniak III is an outboard motor guru. He advises you to find an old motor at a yard sale for \$100 or so (and he tells you exactly which ones to look for), and fix it up—rather than spending \$1500 or more on
