How to Tell the Time introduces kids to how we measure time using seconds, minutes, hours, days, months, and years. It gets kids learning to tell and write the time to the nearest five minutes. There is a flap attached to the front jacket that opens to reveal an amazing clock with moveable hands. Quiz questions that relate to the clock are found sprinkled throughout the book, encouraging kids to move the hands on the clock face and tell the correct time.

It is an adaptation of the age-old Biblical tale of David and Goliath and opens the door for discussions on self-confidence and faith in the face of great obstacles. It is also an excellent book for schools, day cares and Sunday Schools. It is simple, inviting story, and is widely available in print and e-book for easy access.

The Reading With Giggles & Games Learn-To-Read System works in a dramatically effective way because it uses several proprietary learning strategies, in combination, that create an ideal learning state in the mind and body of the student. No other system combines these learning strategies in the same way and no other system has been able to demonstrate more effective learning results. The children are happier, they learn faster and their teachers and parents

are amazed at how much more quickly these students learn to read than other students who are taught with other outmoded, traditional teaching methods. When your child starts to recognize letters, numbers and their associated sounds they are ready for the Reading With Giggles and Games program. This wonderful system can help you, as a parent, be much more effective in your mission to help your child to learn to read without the hassle and frustration that often accompanies the process with other traditional learn to read methods. Telling time becomes clear and easy for young readers in this bright and lively introduction to measurements of time. From seconds to minutes, hours to days, exploring what time is and discovering why we need to tell time, helps young readers understand more than 'the big hand is on the one and the little hand is on the two'. Megan Halsey's playful illustrations depict imaginative digital and analog clocks that range in design. With the help of a whole lot of clocks, a dash of humor, and a few familiar circumstances, learning to tell time is a lot of fun. It's about time.

Teach your child the basics of grouping and sharing by converting the concept to math. In this workbook, he/she will be exposed to as many examples as possible. This trial and error approach encourages learning and memory that will be easily recalled. Start training your child to love math. Get a copy of this book today! A child compares pets in this silly look at cats and dogs. "My cat can sleep. My dog can sleep. My cat can sleep on top of my dog." 100 days of practice counting money, learning fractions, and telling the time. Three core areas of math that students often need additional help to master. Start by counting groups of coins that have a value of a dollar or less. Slowly learn to count greater amounts of money that include small and large bills too. Add and subtract values, and even learn to make change. Learn fractions one step at a time. Start with simple fractions and eventually learn to add and subtract mixed numbers. Telling the time is one of the more difficult concepts for children to learn. Gradually progress from learning to tell hours, to quarter hours. Eventually tell time in five minute and minute increments. This is a great workbook to start out with. Most students will grasp the concepts within each of the three sections. If a student still needs more practice, Humble Math has workbooks that provide additional practice for these concepts too.

Reading clocks is especially hard for some children. Completing practice problems on a regular basis can help students learn this important skill. This practice book will build basic abilities through action stuffed fun. The activities are intended to give children a genuine feeling of accomplishment .It is recommended for students to attempt at least one page daily for consistent practice .This workbook is composed remembering that encouraging children to have the option to peruse simple timekeepers and read a clock is a difficult errand and with ordinary and steady practice they would increase an aptitude that would be perpetually rewarding . Answer to each problem is given at the end of the book.

Teachers, especially those in nursery and pre-primary schools, know that it takes specialized learning aids to help children learn how to identify objects, develop eye-hand and fine motor coordination, improve attention span, and learn to focus on the activity in which they are participating. The aim of BEE CLEVER Activity Books Keeping these important learning factors in mind, a pre-school educator and counsellor has created a series of simple and stimulating activity books. These help develop the skills a child needs, plus contribute to the further development of the child's 'writing readiness'. Pallavi Dalal - the creator of BEE CLEVER Activity Books - has spent over 25 years working with pre-school children. She says, "There has been much thought, care, understanding, laughter and joy that has gone into creating these books. I can only hope that they will bring children many 'magical moments' of learning, and spending time with each other in a happy and relaxed frame of mind." Two Important Factors While planning any activity for children, two important principles of learning are always uppermost in her mind: 1. "I see and I remember." 2. "I do and I understand." She has designed these books to develop differentiating and logical thinking skills in children and evaluate their interests in certain areas, without making them feel

like they are being 'tested'! How BEE CLEVER books are DIFFERENT - Objects illustrated are those a child is generally familiar with. - Instructions can be read to a child without having to simplify them. - Illustrations are bold and clear for the child to see and work comfortably. - Accurate use of grammar, punctuation and spelling. - Each book in the series explains the value of doing that specific activity. - Simple 'Do's and Don'ts' create a 'win-win' situation for the child. BEE CLEVER SERIES: - Colouring 1 - Colouring 2 - Join the Dots 1 - Join the Dots 2 Matching - Mazes 1 - Mazes 2 - Numbers 1 - Numbers 2 - Odd One Out - Opposites 1 - Opposites 2 - Pattern & Letter Writing 1 - Pattern & Letter Writing 2 - Phonics 1 - Phonics 2 - Shapes 1 - Shapes 2 - Story Sequence - What's Different? - What's Next? - What's Wrong? "[An] impressive history of timekeeping."—Horn Book Bruce Koscielniak, in this Common Core text exemplar, tells the intriguing story of the many years spent tinkering and inventing to perfect the art of telling time. When time itself was undefined, no one knew the difference between a minute, an hour, and a day. Then people started creating tools to measure time. First they used the sun, the moon, and the water, but soon after people began using their knowledge about the natural world to build clocks and to create calendars made up of months and years. Centuries later, we have clocks and calendars all around us! This title has been selected as a Common Core Text Exemplar (Grades 4-5, Informational Texts)
