table of contents Of all the great cities in the world, few personify their country like New York City. As America's largest city and best known immigration gateway into the country, the Big Apple represents the beauty, diversity and sheer strength of the United States, a global financial center that has enticed people chasing the "American Dream" for centuries. New York City has countless landmarks and tourist spots, but few are as old or as associated with the city as the Brooklyn Bridge, the giant suspension bridge that spans nearly 1,600 feet as it connects lower Manhattan to Brooklyn. Indeed, the bridge is so old that Manhattan and Brooklyn represented the largest and third largest cities in America at the time of its construction, and the East River posed a formidable enough challenge that taking a ferry across could be dangerous. Among America's countless monuments and landmarks, none embody the principles of the nation quite like Lady Liberty, the colossal statue that stands on Liberty Island in New York Harbor. A gift from the French that was built and transported in the late 19th century, the Statue of Liberty has been a symbol of the United States' guaranty of individual freedom, and its location took on added meaning as it welcomed millions of immigrants sailing across the Atlantic to nearby Ellis Island. When Central Park was designed, it was an ambitious project on an almost unprecedented affair. As serene as Central Park is today, it's hard to imagine that its creation was an entirely manmade affair consisting of dynamite blasts, tons of imported topsoil, and the labor of thousands of workers. Before the area's transformation, the land was swampy terrain used by impoverished squatters and people who let their livestock roam the grounds, but after nearly 15 years of work, the metamorphosis was nearly complete. Like Manhattan itself, Grand Central Station, which recently celebrated its 100th birthday, manages to be both historic and modern. Built upon the site of a former railroad depot, the current structure and layout was phased in over the course of nearly a decade in the early 20th century. Whereas the first railroad stations depressed the value of land nearby in the 19th century, the location of Grand Central was a boon that actually helped bring about construction all across Midtown, including the nearby Chrysler Building, thereby serving to transform the cityscape altogether. It's no surprise that New Yorkers have always wanted to construct the biggest and best structures possible, even in the early 1930s at the height of the Great Depression. Indeed, those years produced the Empire State Building, which remains the city's most iconic building, but New York's most famous skyscraper wouldn't have been possible without the Chrysler Building, a landmark in its own right that was the tallest building in the world for nearly a year before its more famous counterpart's completion. In fact, the spirit of competition between the groups working on the two buildings helped ensure that both look like they do today, and the Chrysler Building only reached the height it did because a large skyscraper at 40 Wall Street was also trying to claim the mantle of tallest building at the same time. The Most Famous Landmarks of New York City chronicles the story of how the Big Apple's greatest landmarks came to be. Along with pictures

of important people, places, and events, you will learn about New York City's most famous landmarks like never before.

Friedrich Engels is one of the most attractive and contradictory figures of the nineteenth century. Born to a prosperous mercantile family in west Germany, he spent his career working in the Manchester cotton industry, riding to the Cheshire hounds, and enjoying the comfortable, middle-class life of a Victorian gentleman. Yet Engels was also the co-founder of international communism - the philosophy which in the 20th century came to control one third of the human race. He was the co-author of *The Communist Manifesto*, a ruthless party tactician, and the man who sacrificed his best years so Karl Marx could write *Das Kapital*. Tristram Hunt relishes the diversity and exuberance of Engels's era: how one of the great bon viveurs of Victorian Britain reconciled his raucous personal life with this uncompromising political philosophy. Set against the backdrop of revolutionary Europe and industrializing England - of Manchester mills, Paris barricades, and East End strikes - it is a story of devoted friendship, class compromise, ideological struggle, and family betrayal.

The Empty City is a story about awakening to universal truths and one's true self. It is told in short episodes that describe a place, a dream, a question, a memory, a fantasy or an event. Urban explorer and lucid dreamer Brandon Minamoto discovers that outside his thoughts and emotions exists a world that is silent and open, surrounding him and everyone else. The silence starts picking him apart and makes him question his sense of self and his past. But behind all the noise and the stories, there is something constant and unchanging.

A history of the colonial creation of the city is told through the stories of 10 influential urban centers left in the wake of the British Empire, drawing on historical scholarship, cultural criticism and personal reportage to trace the rise of such cities as Boston, Hong Kong and New Delhi.

WHEN IT COMES TO LOVE, SOMETIMES IT TAKES THE HEAD YEARS TO DISCOVER WHAT THE HEART HAS ALWAYS KNOWN When Forbes Branson was a young man ready for something new. A senior in high school, he was the golden boy. Heir to a fortune, he knew what his life was going to be. But he wanted adventure first. A year to do what he wanted, where he wanted before college. An unexpected betrayal would change everything. Sophie Lipton was fifteen the first time she set foot on the Branson ranch. Dragged from one place to another, never having more than one pair of shoes or enough to eat, the moment she saw the wide open spaces, she felt she could breathe for the first time in her life. It was the home she always dreamed of. But her happiness came at a price. To stay in her new home, Sophie had to keep somebody else's lies. Lies that would eventually tear apart a family. And tear apart her friendship with Forbes. Coming home is never easy-especially after twelve years. Forbes isn't the same young man. He found his adventure-and more. Weary, he's ready to settle into a slower, calmer life. Working on his family's ranch and taking the job as Chief of Police sounds like a piece of cake after the things he had seen and done. Sophie isn't the quiet girl Forbes remembers. She's grown into a strong, confident woman. A woman used to being in charge. The Branson ranch is her territory now. If Forbes thinks he's going to waltz back in and take over, he's going to find out fast that Sophie is no pushover. Twelve years ago, they shared one goodbye kiss. More sweet than passionate. Now, as adults it's a whole new game. The attraction between them is undeniable. Just as they begin to move forward, the past has other ideas. Secrets rarely stay buried forever. Lies. Betrayal. Maybe even murder. Before Forbes and Sophie can think about the future, they will need to deal with the past. Together.

This is a history of the ideas that shaped not only London, but Manchester, Glasgow, Liverpool, Leeds, Birmingham, Sheffield and other power-houses of 19th-century Britain. It charts the controversies and visions that fostered Britain's greatest civic renaissance. Tristram Hunt explores the horrors of the Victorian city, as seen by Dickens, Engels and Carlyle; the influence of the medieval Gothic ideal of faith, community and order espoused by Pugin and Ruskin; the pride in self-government, identified with the Saxons as opposed to the Normans; the identification with the city republics of the Italian renaissance - commerce, trade and patronage; the change from the civic to the municipal, and greater powers over health, education and housing; and finally at the end of the century, the retreat from the urban to the rural ideal, led by William Morris and the garden-city movement of Ebenezer Howard. As Ruben Wells kneels with a gun pointed at his head all he can do is reflect on the life he spoiled. What has led him here? Was it his willingness to always try to do the right thing that has him staring at the barrel of a gun? Or was that he was too much of a people pleaser having a hard time saying no that has led to him begging for his life? Every thing begins and ends with a choice. The moment a choice is made it only takes a second for a life to change. Ruben made a choice to initiate a relationship with the alluring Bianca Jones. She makes heads turn and every man's dream. She is beautiful as a gazelle, but as dangerous as a lioness, as she's unavailable due to being unhappily married with children. Choices are a gift constantly given to everyone. The choices made lead to different paths. Illustrated with 30 maps. Few lessons are as prevalent in military history as is the adage that tanks don't perform well in cities. The notion of deliberately committing tanks to urban combat is anathema to most. In *Breaking the Mold: Tanks in the Cities*, Mr. Ken Gott disproves that notion with a timely series of five case studies from World War II to the present war in Iraq. This is not a parochial or triumphant study. These cases demonstrate that tanks must do more than merely "arrive" on the battlefield to be successful in urban combat. From Aachen in 1944 to Fallujah in 2004, the absolute need for specialized training and the use of combined arms at the lowest tactical levels are two of the most salient lessons that emerge from this study. When properly employed, well-trained and well-supported units led by tanks are decisive in urban combat. The reverse is also true. Chechen rebels taught the Russian army and the world a brutal lesson in Grozny about what happens when armored units are poorly led, poorly trained, and cavalierly employed in a city. The case studies in this monograph are high-intensity battles in conflicts ranging from limited interventions to major combat operations. It would be wrong to use them to argue for the use of tanks in every urban situation. As the intensity of the operation decreases, the second and third order effects of using tanks in cities can begin to outweigh their utility. The damage to infrastructure caused by their sheer weight and size is just one example of what can make tanks unsuitable for every mission. Even during peace operations, however, the ability to employ tanks and other heavy armored vehicles quickly can be crucial. A study on the utility of tanks in peace operations is warranted, and planned.- Timothy R. Reese Colonel, Armor

"Cities, like dreams, are made of desires and fears, even if the thread of their discourse is secret, their rules are absurd, their perspectives deceitful, and everything conceals something else." — from *Invisible Cities* In a garden sit the aged Kublai Khan and the young Marco Polo — Mongol emperor and Venetian traveler. Kublai Khan has sensed the end of his empire coming soon. Marco Polo diverts his host with stories of the cities he has seen in his travels around the empire: cities and memory, cities and desire, cities and designs, cities and the dead, cities and the sky, trading cities, hidden cities. As Marco Polo unspools his tales, the emperor detects these fantastic places are more than they appear. "Invisible Cities changed the way we read and what is possible in the balance between poetry and prose . . . The book I would choose as pillow and plate, alone on a desert island." — Jeanette Winterson

John Sutter, who left Switzerland to escape debtor's prison, came to California and built a giant land monopoly. Again, he became heavily in debt and died destitute. The entire Sacramento and San Joaquin valleys were inundated for 300 miles long and 20 miles wide by the flood of 1862. The cholera epidemic killed more than 1,000 citizens, including doctors and others who were caring for the patients. The Old City Cemetery is an exciting place. As docents are quick to remind, "People are dying to get in here." The docents know their job. It's almost as though they are trying to bring the city's cemeteries back to life. We love the epitaph on one headstone that simply reads: "See ya later."

NALI By Esther Henry In an era of darkness, mystery, tropical jungles and cannibalism, Nali tries to buck the ancient traditions, only to find herself deeply entrenched in them. As a young girl full of dreams, she is given to a tribal elder in marriage and quickly learns that her girlhood dreams could be shattered overnight. The rain forest held a secret refuge that only Nali knew, where she took her dreams and her delusions. Will she be forced to succumb to a subservient role the rest of her life, or can she overcome the hopelessness that comes with isolation, ignorance and tradition? Deep in the heart of New Guinea lies the village of Mendoka, beautifully camouflaged from the rest of the world. An interruption to their peaceful simplicity would both terrify them and cause them to search for answers. Readers will be able to follow the lives of those who lived in a much simpler time and become immersed in the culture that controlled their everyday existence.

Boston, Bridgetown, Dublin, Cape Town, Calcutta, Hong Kong, Bombay, Melbourne, New Delhi, and twentieth-century Liverpool: since the end days of Empire, Britain's colonial past has been the subject of passionate debate. Tristram Hunt goes beyond the familiar arguments about Empire being good or bad and adopts a new approach, describing the processes of exchange and adaptation that moulded the colonial experience and that, in their turn, transformed the culture, economy and identity of the British Isles. 'Ingenious and timely, a lively and cliché-busting survey of imperial history.' Maya Jasanoff, *Guardian* 'It captures a vast, sprawling enterprise so very well. This work, like the empire it describes, is something unique.' Paul Kennedy, *Financial Times* 'Lively, original, a cracking read.' Robert Service, *Observer* 'Rethinks the whole history of colonialism. From Boston to Liverpool, via Dublin, Calcutta and others, Hunt weaves a colourful account of trade and slavery, violence and aesthetic splendour.' Sinclair McKay, *Daily Telegraph*, Books of the Year 'Enthralling, superb . . . as Hunt shows in compelling tours of ten cities, whether the colonial past is celebrated or restored, ignored or eradicated, the legacy of the British Empire is indelibly stamped on the urban fabric.' Ben Wilson, *Daily Telegraph*

A nocturnal journey through local histories of clubbing in Africa and Europe The image of the DJ dragging his record case through international "non-places" and deejaying in clubs around the globe is a contemporary cliché. But these club scenes have rich, geographically differentiated local histories and cultures. This book expands the focus beyond the North Atlantic clubbing axis of Detroit-Chicago-Manchester-Berlin. It looks at ten club capitals in Africa and Europe, reporting on different scenes in Bristol, Johannesburg, Cairo, Kyiv, Lagos, Lisbon, Launda, Nairobi and Naples. The local music stories, the scenes, the subcultures and their global networks are reconstructed in 21 essays and photo sequences. The tale they tell is one of clubs as laboratories of otherness, in which people can experiment with new ways of being and assert their claim to the city. *Ten Cities* is a nocturnal, sound-driven journey through ten social and urban stories from 1960 through to the present.

10 Buildings that Changed America tells the stories of ten influential works of architecture, the people who imagined them, and the way these landmarks ushered in innovative cultural shifts throughout our society. The book takes readers on a journey across the country and inside these groundbreaking works of art and engineering. The buildings featured are remarkable not only for aesthetic and structural reasons, but also because their creators instilled in them a sense of purpose and personality that became reflected in an overarching sense the American identity. Edited by the staff of WTTW, the Chicago PBS affiliate that is the most-watched public television station in the country, 10 Buildings will be released alongside the national broadcast of an hour-long special by the same name. This television event will be promoted over digital media, on-ground events, and educational initiatives in schools, and the book will be a significant component to all of these elements. 10 Buildings retells the shocking, funny, and even sad stories of how these buildings came to be. It offers a peek inside the imaginations of ten daring architects who set out to change the way we live, work, and play. From American architectural stalwarts like Louis Sullivan and Frank Lloyd Wright, to modern revolutionaries like Frank Gehry and Robert Venturi, this book examines the most prominent buildings designed by the most noteworthy architects of our time. Also profiled are Americans less noted for their architectural acumen, but no less significant for their contributions to the field. Thomas Jefferson, a self-taught architect, is profiled for designing the iconic Virginia State Capitol. Taking its inspiration from ancient Rome, America's first major public building forged a philosophical link between America and the world's earliest democracies. Similarly, Henry Ford employed Albert Kahn to design a state-of-the-art, innovative factory for Ford's groundbreaking assembly line. Reinforced concrete supported massive, open rooms without any interior dividing walls, which yields the uninterrupted space that was essential for Ford's sprawling continuous production setups. What's more, Kahn considered the needs of workers by including astonishingly modern large windows and louvers for fresh air. The design of each of these ten buildings was completely monumental and prodigious in its time because of the architect's stylistic or functional innovations. Each was also highly influential, inspiring a generation or more of architects, who in turn made a lasting impact on the American landscape. We see the legacy of architects like Mies van der Rohe or H.H. Richardson all around us: in the homes where we live, the offices where we work, our public buildings, and our houses of worship. All have been shaped in one way or another by a handful of imaginative, audacious, and sometimes even arrogant individuals throughout history whose bold ideas have been copied far and wide. 10 Buildings is the ideal collection to detail the flashes of inspiration from these architects who dared to strike out on their own and design radical new types of buildings that permanently altered our environmental and cultural landscape.

Taking a hard look at the unprincipled lives of political bosses, police corruption, graft payments, and other political abuses of the time, the book set the style for future investigative reporting.
