Success and the personal freedom that it brings have nothing to do with good luck. It involves taking control of and using the power you already have in order to get much of what you want from life; and doing this in a manner that doesn't hurt others. Successful people have developed special skills in dealing with the people they work for as well as with their coworkers and others they encounter in their everyday lives. And now you can learn these skills too. Dr. Jack Rosenfeld's new book, Powertake, is a condensed, easy-to-follow course that explains how to tap your incredible personal power. You don't need aggression, intimidation, or manipulation to get what you need from others. Dr. Rosenfeld shows you how to do it step by step, in a series of easy-to-follow exercises. Your only investment is a little time every day learning and practicing the powertake skills. Before you know it, you'll be amazed at the results. People will see the change in you, and respond to you differently than before. If you've been looking for a way to improve your life and your relationships, Powertake is for you.

Human Relationship Skills: Coaching and Self-Coaching presents a practical 'how to' guide to relationship skills, showing how readers can improve and, where necessary, repair relationships. This thoroughly revised and updated fourth edition reflects the increased interest in

coaching, showing how it can be applied to everyday life. In this essential book, Richard Nelson-Jones takes a cognitive-behavioural approach to coaching people in relationship skills. These skills are viewed as sequences of choices that people can make well or poorly; covering a range of skill areas the book assists readers to make affirming rather than destructive choices in their relationships. It begins by addressing the questions of "what are relationship skills?" and "what are coaching skills?", and follows with a series of chapters which thoroughly detail and illuminate various relationship skills including: - listening and showing understanding - managing shyness - intimacy and companionship - assertiveness and managing anger - managing relationship problems and ending relationships The book concludes with a chapter on how users can maintain and improve their skills by coaching themselves. Accessibly written and using activities, the book will be appropriate for those involved in 'life coaching' as well as general counselling and therapy. It will be essential reading for lecturers, coaches and trainers as well as students and anyone who wishes to improve their relationship skills.

The Seventh Edition of Zumdahl and DeCoste's best-selling INTRODUCTORY CHEMISTRY: A FOUNDATION that combines enhanced problem-solving structure with substantial pedagogy to enable students to become strong independent problem solvers in the introductory course and beyond. Capturing student interest through early coverage of chemical reactions, accessible explanations and visualizations, and an emphasis on everyday applications, the authors explain chemical concepts by starting with the basics, using symbols or diagrams, and conclude by encouraging students to test their own understanding of the solution. This step-by-step approach has already helped hundreds of thousands of students master chemical concepts and develop problem-solving skills. The book is known for its focus on conceptual learning and for the way it motivates students by connecting chemical principles to real-life experiences in chapter-opening discussions and Chemistry in Focus boxes. The Seventh Edition now adds a questioning pedagogy to in-text examples to help students learn what questions they should be asking themselves while solving problems, offers a revamped art program to better serve visual learners, and includes a significant number of revised end-of-chapter questions. The Challenge and Skills Builders are differentiated activity books to be used alongside the Cambridge Primary Science course. Cambridge Primary Science is a flexible and engaging course written specifically for the Cambridge Primary Science Curriculum Stages 1 to 6. The course uses an enquiry-led approach that helps pupils to think and work scientifically. Skills Builders provide consolidation activities for children who need extra learning opportunities to meet the standard for success. They also focus on scientific literacy for ESL children who find this a barrier to learning. A full range of activities help raise a child's scientific literacy and understanding to match their peers, with teacher/parental guidance on key scientific methods and concepts before each exercise.

If most pastors were pressed to describe an average day of ministry, they'd have trouble doing it. In a single day, a pastor may fill many different roles in quick succession, from counselor to theologian to student to CEO to custodian (well, let's hope there's usually someone else available to perform that last role). Some roles come more naturally than others, but every pastor wants to perform each role to the best of their ability. In *The 10 Key Roles of a Pastor*, church consultant Gary L. McIntosh shows pastors how to - understand and juggle their many essential roles - prioritize their time and energy - manage their people's expectations of them - and empower others to take up the vital work of the church body Pastors just starting out in ministry, as well as those who have been at it a while and find themselves overworked and overwhelmed, will value this practical resource. It is also an enlightening read for those in church leadership who would benefit from understanding the pressures their pastor faces on a daily basis.
