An epic adventure full of incredible characters, death-defying athletic achievement, and bleeding edge science, *The Fear Project* began with one question: how can we overcome our fears to reach our full potential? Who among us has not been paralyzed by fear? In *The Fear Project*, award-winning journalist and surfer Jaimal Yogis sets out to better understand fear-why does it so often dominate our lives, what makes it tick, and is there even a way to use it to our advantage? In the process, he plunges readers into great white shark-infested waters, brings them along to surf 40+ foot waves in the dead of winter, and gives them access to some of the world's best

neuroscience labs, psychologists, and extreme athletes. In this entertaining, often laugh-out-loud narrative, Yogis also treats himself like a guinea pig for all of his research, pushing his own fears repeatedly to the limits-in his sport, in his life, and in love. Ultimately, Yogis shares with his readers the best strategies to emerge triumphant from even the most paralyzing of fears. The Fear Project gives you insight into: - How fear evolved in the human brain - How to tell the difference between "good fear" and "bad fear" - How to use the latest neuroscience to transform fear memories - Why fear spreads between us and how to counteract fearful "group think" - How to turn fear into a performance enhancer - athletically and at work In pursuing this terrifying-and often thrilling-journey with Yogis, we learn how to move through fear and unlock a sense of renewed possibility and a more rewarding life. Presenting the first critical analysis of Carl Schmitt's *The Nomos of the Earth* and how it relates to the epochal changes in the international system that have risen from the collapse of the 'Westphalian' international order. There is an emerging recognition in political theory circles that core issues, such as order, social justice, rights, need to be studied in their global context. Schmitt's international political thought provides a stepping stone in these related paths, offering an alternative history of international relations, of the genesis, achievements and demise

of the 'Westphalian system.' Writing at a time when he believed that the spatial, political and legal order—the nomos of the earth—had collapsed, he highlighted the advent of the modern state as the vehicle of secularization, tracing how this interstate order was able to limit and 'rationalize and humanize' war. Providing a large number of case studies including: global terrorism, humanitarian intervention and US hegemony, this book will give further impetus to, and expand, the nascent debate on the significance of Schmitt's legal and political thought for international politics. The International Political Thought of Carl Schmitt will be of interest to students and scholars of international relations, law and history.

For the past six years, Stephanie Nolen has traced AIDS across Africa, and 28 is the result: an unprecedented, uniquely human portrait of the continent in crisis. Through riveting, anecdotal stories, she brings to life men, women, and children involved in every AIDS arena, making them familiar. And she explores the effects of an epidemic that well exceeds the Black Plague in scope, and the reasons why we must care about what happens. In every instance, Nolen has borne witness to the stories she relates, whether riding with truck driver Mohammed Ali on a journey across Kenya; following Tigist Haile Michael, a smart, shy fourteen-year-old Ethiopian orphan fending for herself and her baby brother on

the slum streets of Addis Ababa; chronicling the efforts of Alice Kadzanja, an HIV-positive nurse in Malawi; or interviewing Nelson Mandela's family about coming to terms with his own son's death from AIDS. Nolen's stories reveal how the disease works and spreads; how it is inextricably tied to conflict and famine and to the diverse cultures it has ravaged; how treatment works, and how people who can't get treatment fight to stay alive with courage and dignity against huge odds. Imagine the entire population of New York, Chicago, and Los Angeles combined infected with HIV, and its magnitude in Africa is clear. Writing with power and simplicity, Stephanie Nolen makes us listen, allows us to understand, and inspires us to care. Timely and transformative, 28: Stories of AIDS in Africa is essential reading for anyone concerned about the fate of humankind. Spanning 500 years of British history, a revealing look at the secret lives of some great (and not-so-great) Britons, courtesy of one of the world's most engaging royal historians Beleaguered by scandal, betrayed by faithless spouses, bedeviled by ambitious children, the kings and queens of Great Britain have been many things, but they have never been dull. Some sacrificed everything for love, while others met a cruel fate at the edge of an axman's blade. From the truth behind the supposed madness of King George to Queen Victoria's surprisingly daring taste in sculpture, Behind the Palace Doors ventures beyond the rumors to tell the unvarnished history of Britain's monarchs, highlighting the unique mix of tragedy, comedy, romance, heroism, and incompetence that has made the British throne a seat of such unparalleled fascination. Featuring: • stories covering every monarch, from randy Henry VIII to reserved Elizabeth II • historical myths debunked and surprising "Did you know . . . ?" anecdotes • four family trees spanning every royal house, from the Tudors to the Windsors

Cutting the Fuse offers a wealth of new knowledge about the origins of suicide terrorism and strategies to stop it. Robert A. Pape and James K. Feldman have examined every suicide terrorist attack worldwide from 1980 to 2009, and the insights they have gleaned from that data fundamentally challenge how we understand the root causes of terrorist campaigns today—and reveal why the War on Terror has been ultimately counterproductive. Through a close analysis of suicide campaigns by Al Qaeda and other terrorist organizations in Iraq, Afghanistan, Pakistan, Lebanon, Israel, Chechnya, and Sri Lanka, the authors provide powerful new evidence that, contrary to popular and dangerously mistaken belief, only a tiny minority of these attacks are motivated solely by religion. Instead, the root cause is foreign military occupation, which triggers secular and religious people alike to carry out suicide attacks. Cutting the Fuse calls for new, effective solutions that America and its allies can sustain for decades, relying less on ground troops in Muslim countries and more on offshore, over-
