Nikola Tesla was a genius who revolutionized how the world looks at electricity.

Discover the wonderful secret the Earth holds for us—that the stars of the galaxy live on our planet. Holograms of high-magnitude stars over holy mountains. Physical travel to other planets through stargates on the Earth's surface. Near instantaneous transportation across the planet through quick-way portals. Outrageous science fiction or sober geomantic fact? Earth Mysteries researcher Richard Leviton takes you on a wild tour of three geomantic features of our planet and reveals that what science fiction has dreamed the Earth in fact offers us. Stars on the Earth combines scholarship, clairvoyance, and field experience with the latest discoveries of geology and astrophysics and the timeless insights of the world's myths to open the planetary door to the stars. It's all part of the Earth's unsuspected but staggeringly rich endowment as a designer planet. Our planet was precisely designed and implemented for us, and it's equipped with a visionary geography that mirrors features of the galaxy and Heavens. Why are so many of the Earth's mountains said to be holy, producing visions and encounters with the "gods?" They all have canopies of light called domes, each transmitting the presence of a galactic star. What is the geomantic origin of the Bermuda Triangle? Two dysfunctional stargates. If working properly, they and the Earth's other two million stargates could transport us rapidly to other planets. Is there a way to travel quickly across the planet without using cars, airplanes, boats, or trains? Yes, and it's called a traversable wormhole, and the Earth has thousands of them awaiting our discovery and use. Come join the tour of a planet you've never seen before: our own star-infused Earth.

Due to his demonstration of wireless communication through radio, Nikola Tesla was widely respected as one of the greatest electrical engineers in America. In the United States, Tesla's fame rivaled that of any other inventor or scientist in history or popular culture. This book consists of Tesla's research for the practical development of a system for wireless transmission of power (electricity) -- the transmission of power from station to station. The notes are highly detailed, and clearly show his transmitting electricity without wires by means of his magnifying transmitter. A must-read for anyone interested in Tesla's revolutionary experiments with transmitters.

The immense genius of Tesla resulted from a mind that could see an invention in 3-D, from every angle, within his mind before it was easily built. Tesla's inventions were complete down to dimensions and part sizes in his visionary process. Tesla would envision his electromagnetic devices as he stared into the sky, or into a corner of his laboratory. His inventions on rotating magnetic fields creating AC current as we know it today, have changed the world—yet most people have never heard of this great inventor. Is he a suppressed inventor, as many historians contend? Many of Tesla's

concepts and inventions are still thought of as science fiction today—over 60 years later! Includes: Tesla's fantastic vision of the future, his wireless transmission of power, Tesla's Magnifying Transmitter, the testing and building of his towers for wireless power, tons more. The genius of Nikola Tesla is being realized by millions all over the world!

**THE DIVINE MATRIX** Are the miracles that we see in the quantum world actually showing us our greatest possibilities rather than our scientific limits? Could the spontaneous healing of disease, an instant connection with everyone and everything, and even time travel, be our true heritage in the universe? There is a place where all things begin, the place of pure energy that simply "is." In this quantum incubator for reality, everything is possible. In 1944, Max Planck, the father of quantum theory, shocked the world by saying that this "matrix" is where the birth of stars, the DNA of life, and everything between originates. Recent discoveries reveal dramatic evidence that Planck's matrix - The Divine Matrix - is real. It is this missing link in our understanding that provides the container for the universe, the bridge between our imagination and our reality, and the mirror in our world for what we create in our beliefs. To unleash the power of this matrix in our lives, we must understand how it works and speak the language that it recognizes. For more than 20 years, Gregg Braden, a former senior aerospace computer systems designer, has searched for the understanding to do just that. From the remote monasteries of Egypt, Peru, and Tibet to the forgotten texts that were edited by the early Christian church, the secret of the Divine Matrix was left in the coded language of our most cherished traditions. It is verified in today's science. In this paradigm-shattering book, Gregg shares what he's found. Through 20 keys of conscious creation, we're shown how to translate the miracles of our imagination into what is real in our lives. With easy-to-understand science and real-life stories, Gregg shows us that we're limited only by our beliefs, and what we once believed is about to change!

Tap into the extraordinary power of electricity to heal your body and empower your life Everything is electric. This seemingly simple observation has transformational repercussions on the way we think about and approach physical, mental, and emotional health. **Electric Body, Electric Health** is a manifesto for personal empowerment based on an electrical view of life. Author of **Tuning the Human Biofield**, Eileen Day McKusick is an expert in the emerging field of electric health and has taught thousands how to transform effortlessly through learning to "think electrically." By illuminating the biological nature of our electrical bodies, McKusick empowers readers to clear the static, noise, and resistance from this system and experience greater energy, clarity, and order. **Electric Body, Electric Health** makes use of simple, easy-to-implement practices such as: - Awareness practices - Perspective shifts - Breathing practices - Simple lifestyle changes - Improved emotional management - and more... in order to help readers improve their health and enhance their daily lives. It will give you the tools to transform your relationship with your body, your mind, your emotions,

A New York Times Notable Book of the Year, a Washington Post Best Book of the Year Spanning the era between the Chicago World's Fair of 1893 and the years just after World War I, and constantly moving between locations across the globe (and to a few places not strictly speaking on the map at all), *Against the Day* unfolds with a phantasmagoria of characters that includes anarchists, balloonists, gamblers, drug enthusiasts, mathematicians, mad scientists, shamans, spies, and hired guns. As an era of uncertainty comes crashing down around their ears and an unpredictable future commences, these folks are mostly just trying to pursue their lives. Sometimes they manage to catch up; sometimes it's their lives that pursue them.

In this paper, we explore the reasons why Hilbert's axiomatic program to unify gravitation theory and electromagnetism failed and outline a plausible resolution of this problem. The latter is based on Gödel's incompleteness theorem and Newton's aether stream model

"Nikola Tesla on free energy & wireless transmission of power"--Cover.

"The progressive development of man is vitally dependent on invention." Visionary, pioneer, and eccentric genius, Nikola Tesla was the quintessential scientist of the late 19th and early 20th centuries. Two of his creations, the induction motor and the Tesla coil, underpin the technology of the modern world. First published as six articles in the *Electrical Experimenter* magazine, *My Inventions* tells the story of Tesla's life, from his humble beginnings in Croatia to his migration to the United States, and describes his revolutionary feats of invention and pivotal breakthroughs in the world of engineering. This book takes you on an inspirational journey into one of the world's greatest and most unconventional minds.

A scientist with a revolutionary cure for AIDS is incarcerated without explanation. Valuable artifacts are mysteriously misplaced by a prominent archaeological institution. Three celebrated astronauts perish in a suspicious fire after voicing their criticism of the US space program. Yet our world's most powerful agencies hastily dispel these alarming reports as conspiracy theories, and bury them in padlocked archives. The fact is that a suppression syndrome exists in our society. *Suppressed Inventions and Other Discoveries* exposes the startling degree of truth behind the rumors. Jonathan Eisen has collected over forty intriguing stories of scientific cover-ups and programs of misinformation concocted to conceal some of the most phenomenal innovations in mankind's history. These no-holds-barred accounts force us to confront the naiveté—and danger—of trusting our academic and political leaders to act always for the common good. *Suppressed Inventions and Other Discoveries* presents documented evidence that corporate self-interest, scientific arrogance, and political savvy have contrived to keep us in the dark about technological breakthroughs or interplanetary contact that may shift the current balance of power. Prepare yourself for a revealing look at the research and development to which we've been denied access. *Suppressed Inventions and Other Discoveries* begins by examining the ties that bind the medical establishment to powerful pharmaceutical corporations. Then it details the struggle of the independent research against Orthodox Science and its code of conduct, the Scientific Method. Next, the book investigates the cover-up of information concerning UFOs and extraterrestrial life that's certain to make you reconsider what you thought was science fiction. The final section discusses just a few of the numerous alternate energy resources and fuel savers that, if put on the market today, would soon run the fossil fuel monopolies out of business.

Reveals the cutting edge of New Science and shows how established science disallows inquiry that challenges the status quo--even when it produces verifiable results • Contains 43 essays by 19 researchers denoting cutting-edge, heretical, or suppressed scientific research, including Immanuel Velikovsky, Nikola Tesla, Rupert Sheldrake, and Masaru Emoto • Edited by Atlantis Rising publisher, J. Douglas Kenyon Following the model of his bestselling Forbidden History and Forbidden Religion, J. Douglas Kenyon has assembled from his bimonthly journal, Atlantis Rising, material that explores science and technology that has been suppressed by the orthodox scientific community--from the true function of the Great Pyramid and the megaliths at Nabta Playa to Immanuel Velikovsky's astronomical insights, free energy from space, cold fusion, and Rupert Sheldrake's research into telepathy and ESP. There is an organized war going on in science between materialistic theory and anything that could be termed spiritual or metaphysical. For example, Masaru Emoto's research into the energetics of water, although supported by photographic evidence, has been scoffed at by mainstream science because he has asserted that humans affect their surroundings with their thoughts. The materialism or absolute skepticism of the scientific establishment is detrimental to any scientific inquiry that thinks outside the box. This mentality is interested in preserving funding for its own projects, those that will not rock the establishment. From Tesla's discovery of alternating current to Robert Schoch's re-dating of the Sphinx, this book serves as a compelling introduction to the true history of alternative and New Science research.

"The U.S. Government has a new ground based "Star Wars" weapon which is being tested in the remote bush country of Alaska. This new system manipulates the environment which can: Disrupt human mental processes. Jam all global communications systems. Change weather patterns over large areas. Interfere with wildlife migration patterns. Negatively affect your health. Unnaturally impact the Earth's upper atmosphere. The U.S. military calls its zapper HAARP (High-frequency Active Auroral Research Project). But this skybuster is not about the Northern Lights. This device will turn on lights never intended to be artificially manipulated. Their first target is the electrojet - a river of electricity that flows thousands of miles through the sky and down into the polar icecap. The electrojet will become a vibrating artificial antenna for sending electromagnetic radiation raining down on the earth. The U.S. military can then "X-ray" the earth and talk to submarines. But there's much more they can do with HAARP. This book reveals surprises from secret meetings"--Back cover.

This book is a personal account of some aspects of the emergence of modern science, mostly from the viewpoint of those branches of physics which provided the much needed paradigm shift of "more is different" that heralded the advent of complexity science as an antidote to the purely reductionist approach in fundamental physics. It is also about the humans that have helped to shape these developments, including personal reminiscences and the realization that the so-called exact sciences are inevitably also a social endeavour with all its facets. Served by the razor-sharp wit of the author, this erudite ramble is meant to be neither comprehensive nor systematic, but its generous insights will give the inquisitive academically trained mind a better understanding of what science, and physics in particular, could or should be about.

The Problem of Increasing Human Energy GENERAL PRESS

If you live as a purpose, objective driven person, a human being of persistence and substance, you will find this book very informative, a perspective of how to be successful in any of your positive endeavours, spiritual in objectivity, scientific in perspective and written with a real eye for service to other people. If your desires are only material in nature, this may not fit your profile as this book is a combination of success of spiritually and scientifically driven people, materially and spiritually with a major touch of helping other people as this is the real intention of the writer, learning and knowing how to serve others as service to others is service to the CREATOR. Abundance is a positive way of helping

people and the Universe supplies everyone this wealth continuously, endlessly and without exhaustion!! Chapters I, II and III are devoted to our Maker, the Infinite Creator, Infinity, the Source Energy and names he is often called ALL THERE IS/ALL THAT IS. God gave us free will and no one, not even the Angels and the Higher Beings, RA, Christ or other Icons can violate this, otherwise they will come back to the Wisdom vibration and density of soul development. We have guardians, confederates and spiritual guides who are always there to guide us but they can never violate this rule, FREE WILL is given to us humans and all the entities of creation be they at the 4th or the seventh density of existence. Human beings have a penchant for discovery of things that have been discovered in the past. We always say we discovered, innovated or created when in fact as you read from artifacts of yore or the libraries of Nineveh discovered in Southern Iraq or Mesopotamia, almost everything we have today have been discovered or are in use during those times including lap tops, geodetic laser measuring devices, jet planes, helicopters, airplanes even tractors. Tractors are described as roaring machines that cultivates the soil in Africa. Take it from author Zechariah Sitchin and you will wonder. Thus the human being is a Creator itself created by the Maker to create beautiful things so Infinity can experience it thru us. We even duplicated and know and applied in our power systems the basic creation of God, Fusion. The olden civilizations, that in Egypt, and the Americas are filled with facts that detail achievements of the human race and teachings that are truth but today have been adulterated to appear as possible witchcraft when in fact are real descriptions of the Law of One taught by the golden people of Venus, that of RA social memory complex and the higher beings of nearby stars which can be seen at our dark night stars of Arcturus and Sirius. Again these are the teachings of Thou Shalt Not as it gives to you the negatives. Why would you teach thou shalt not kill! You can simply say Though shall love thy neighbour as you love thyself! This is the positive way, never an inkling of bad that will definitely sink in our one year old brain, always a year old so says the adept. Our world has been a belligerent, troubled civilization as far as my memories can remember, World War I, II and the Cold War, from my childhood to the present. The New York Times bestselling author of *The Physics of Wall Street* “deftly explains all you wanted to know about nothingness—a.k.a. the quantum vacuum” (Priyamvada Natarajan, author of *Mapping the Heavens*). James Owen Weatherall’s bestselling book, *The Physics of Wall Street*, was named one of *Physics Today*’s five most intriguing books of 2013. In this work, he takes on a fundamental concept of modern physics: nothing. The physics of stuff—protons, neutrons, electrons, and even quarks and gluons—is at least somewhat familiar to most of us. But what about the physics of nothing? Isaac Newton thought of empty space as nothingness extended in all directions, a kind of theater in which physics could unfold. But both quantum theory and relativity tell us that Newton’s picture can’t be right. Nothing, it turns out, is an awful lot like something, with a structure and properties every bit as complex and mysterious as matter. In his signature lively prose, Weatherall explores the very nature of empty space—and solidifies his reputation as a science writer to watch. Included on the 2017 Best Book List by the American Association for the Advancement of Science (AAAS) “An engaging and interesting account.”—*The Economist* “Readers get a dose of biography while following such figures as Einstein, Dirac, and Newton to see how top theories about the void have been discovered, developed, and debunked. Weatherall’s clear language and skillful organization adroitly combines history and physics to show readers just how much ‘nothing really matters.’”—*Publishers Weekly*

There, a great battle ensues and, at extreme cost to herself, The Chosen is forced to use her powers and make a devastating decision about the outcome of the battle.

In Famous Scientific Illusions Nikola Tesla addresses "exceptionally interesting errors in the interpretation and application of physical phenomena which have for years dominated the minds of experts and men of science." Among these are the Moons rotation, Interplanetary Communication, Signals to Mars and others.

Part philosophical ponderings on humanity's relationship to the universe, part scientific extrapolation on what technological advancement might bring to that understanding, this long essay, first published in Century Illustrated Magazine in June 1900, is yet another example of the genius of Serbian inventor NIKOLA TESLA (1857-1943), the revolutionary scientist who forever changed the scientific fields of electricity and magnetism.

This book took an unconventional theme because we submit an unorthodox theme too. Karl Popper's epistemology suggests that when the theory is refuted by observation, then it is time to look for a set of new approaches. In the first chapter, it is shown that Hilbert's axiomatic program has failed not only by experiment (Mie theory does not agree with experiment) but also in terms of logic (Gödel theorem). Therefore we set out a new approach, starting from an old theory of Isaac Newton. Dilbert cartoon series often offer surprising for old problems, especially in this era of corporatocracy. Now we would call such an out-of-the-box solution to the old Hilbert axiomatic program as Dilbert way (or Dilbertian, if you wish). Readers may ask : but what can physicists learn from Dilbert cartoons? While it seems not obvious at first glance, yes we believe there is a great character of Dilbert cartoon, i.e. to put it in one phrase: "out-of-thebox and brutally honest." From managers who tend to criticize other folks, only to make him/her looks smart. Or people who often send "FYI emails" only to make him/her looks managing well. We do think that such a brutal honesty is also needed in many fields of physics: from theoretical physics to applied physics, as will be discussed throughout this book.

This is a new explanation of the experimental physics of mass, space, time, gravity, and Big Bang theory. It shows that Einstein's metaphysical assumptions of equivalence, massless photons, and relative motion are not necessary to explain the measured dynamics of matter, energy, gravity and the creation of the universe with a Big Bang. The principle of the Living Universe describes the evolution of matter and energy in the Cosmos from its beginning and resolves the many paradoxes and contradictions in Big Bang theory.

In the late 1800s John Ernst Worrell Keely claimed to have discovered a source of unlimited energy. For over 30 years his company survived, but never produced a product. This biography (originally published in 1893) seeks to explain the Keely mystery. The author, Clara Bloomfield Moore, financed his work for many years. Opinions on Keely are still sharply divided over a century later - those who call him a free energy pioneer versus those who refer to the "Keely Motor Bubble" as a stock fraud. Chapter XIX, "Latent Force in Interstitial Spaces - Electro-Magnetic Radiation - Molecular Dissociation," was written by Keely. "It is not to be wondered at that the magical nature of his demonstrations, more inexplicable than any feats of legerdemain, should have brought upon him the suspicion of fraudulent representation, concerning the production of the force and its manipulation; but his persistency alone in seeking to unravel the mysteries of nature, ought to have brought around him sooner men who, like the revered and great Leidy, were able to appreciate his researches in sympathetic vibration, the laws of which govern everything in creation, from the movements of the planets, down to the movements of atoms. ... In Keely's theories all is mechanical in nature. A molecule of steel, a molecule of gas, a molecule of brain matter are all of the one primeval substance - the Ether." - Clara Bloomfield Moore

Author David Thomson and Jim Bourassa have founded the Quantum AetherDynamics Institute, an organization dedicated to understanding the Aether. For the first time in human history, the Aether is fully quantified based upon empirical data. Through a very simple observation noted nearly 200 years ago by Charles Coulomb, the electromagnetic units have been corrected of an error that has led physics astray for so long. Now, electrodynamics expresses in simple dimensional equations, the neurosciences unite with quantum and classical physics, and we can precisely model the geometry of subatomic particles.

Clean, sustainable energy solutions from the geniuses of our past and the visionaries of our future • Explores five great but nearly forgotten minds of the past--John Worrell Keely, Nikola Tesla, Viktor Schauburger, Royal Raymond Rife, and T. Townsend Brown--and their revolutionary discoveries • Reveals information from leading experts on cold fusion, zero-point energy, power from water, antigravity, and the free-energy potential of the Searl Effect Generator As the global need for clean, renewable energy grows and the shortage of viable large-scale solutions continues, it is time to look to the geniuses of our past and the visionaries of our future for answers. Taking inspiration from Albert Einstein's statement that "Problems cannot be solved by the same level of thinking that created them," Finley Eversole explains that the key to a pollution- and poverty-free future of infinite energy lies not in pursuing one single method, but in investigating all the possibilities--in uniting as a world in creative pursuit of global transformation. Exploring five nearly unknown geniuses of our past--John Worrell Keely, Nikola Tesla, Viktor Schauburger, Royal Raymond Rife, and T. Townsend Brown--and their revolutionary discoveries about free energy, electricity, water vortex motion, electric ray and super-microscope technology, and antigravity, this book helps to restore their long-suppressed scientific legacies and bring us one step closer to the destiny they foresaw. Eversole has gathered research from leading experts on cold fusion, zero-point energy, power from water, and the free-energy potential of the Searl Effect Generator to reveal technologies that work with Nature's laws and that, if fully implemented, could establish sustainable energy systems in a single generation.

Synoptic Anticipation My five-fold discourse commences with an outback Trek to a somewhat supernatural setting. This preparatory destination, by echelon, anticipates my nicer, statelier but more unendurable big Energy Center; designated as the glorious “Glib” megalopolis... Then, the reader is catapulted to its enormous “counterpart chorus” of something so inexpressible, and yet inchoate, as to render yardstick usage of vocabulary inadequate! But not only so- rather- in that the Plot of such outbursts skids to a standstill at the dilated disclosure of a Hypersphere! Accordingly addressed, as it were, a romantic and surreal tale of the personified Divinity- shared by my primitive gliff of Her- follows suit (instantaneously) until to no reservation. And finally- to conclude this Vision- I embark upon an ultimate frontier with that selfsame Hypersphere paramount. Precedent to deployment of The Yard Lamp of Gloria storyboard, I noticed interlink of the 1990’s at the LILCO, or Long Island Lighting Company with its fine public works of innovative energy distribution along New York’s industrial peninsula. Therein, I perused the early inception of its very vast framework of infrastructure, and how that the 120 mile “long” island has reached a zenith of such classical reputation. By this diorama- inter alia- I was able to reconsider well enough the future ramifications of street lighting, and that perhaps for its very own sake... As such, imagine a brighter Tomorrow of unparalleled “lamp entities” designed to energize us into Immortality. Indeed, the cornerstone of which paves parking lots of sacrosanct cessation; or- as shown in yon Yard Lamp of Gloria- some radiant respite to fulfill today’s anticipation still! Wherefore, our precarious din of affairs need be altered- drastically- nonetheless, if ever we are to attain the upper rung via Jacob’s Ladder! Not an impending cliché, I say, but a requisite pioneer spirit for all. Aglaia Marusin August 11, 2015

In this paper, we explore a new electron model based on Helmholtz’s electron vortex and Kolmogorov theory of turbulence. We also discuss a new model of origination of charge and matter.

It is widely known among the Frontiers of physics, that “sweeping under the rug” practice has been quite the norm rather than exception. In other words, the leading paradigms have strong tendency to be hailed as the only game in town.

In a fascinating, unique and alternative history, author of The Philosophers' Stone Joseph P. Farrell outlines the consistent pattern and strategy of bankers in ancient and modern times, and their desire to suppress the public development of alternative physics and energy technologies. He unravels how financiers usurped the money creating power of the state to substitute a facsimile of money-as-debt. Here, Farrell peels back the layers of deception to reveal the possible deep physics that the 'banksters' have used in their financial policies.
