Entrusted by the Board of Management of the Pacific Rim Objective Measurement Symposium (PROMS), PROMS2012 is held in Jiaxing, China from August 6-9, 2012. Over the past years, PROMS has been hosted in many parts of the Pacific Rim, in Singapore, Malaysia, Hong Kong, Taiwan and Tokyo, which has greatly promoted the research of and contributed to the development of Rasch Model in one way or another. As early as in 1980s, the ideas and concepts regarding IRT was first introduced into China by Prof. Gui Shichun, my Ph.D supervisor, and it is Prof. Gui who first conducted with great success the ten-year long (1990-1999) Equating Project for Matriculation English Test (MET) in China. MET is the most influential entrance examination for higher education administered annually to over 3.3 million candidates then. The Equating Project won recognition by Charles Alderson and other foreign counterparts during 1990s. Academically, those were Good Old Days for Chinese testing experts and psychometricians. Then for certain reasons, the equating practice abruptly discontinued. Therefore, in China nowadays, the application of IRT-based software like BILOG, Parscale, IteMan 4 and others to real testing problem solving is confined to an extremely small 'band' of people. In this sense, PROMS2012 meets an important need in that it provides an excellent introduction of IRT and its application. And anyone who is seriously interested in research and development in the field of psychometrics or language testing will find such a symposium and related workshops to be an excellent source of information about the application of Rasch Model. PROMS2012 focuses on recent advances in objective measurement and provides an international forum on both the latest research in using Rasch measurement and non-Rasch practice.

Designed to accompany Carol J. Buck's ICD-10-CM Online Training Modules, *Transitioning to ICD-10-CM Coding* makes it easy to learn ICD-10-CM coding and prepare for the AAPC's ICD-10 certification exam. The book provides a step-by-step guide to coding rules and concepts, while the Online Training Modules provide practice with realistic coding exercises. After you've read the chapters in the book and completed the online modules, you will be ready to take a practice exam simulating the 75-question AAPC ICD-10 exam (also located in the Online Training Modules). Best of all, you can use this integrated course of study to earn continuing education credits! CEUs from AAPC and AHIMA may be earned when the book is used with ICD-10-CM Online Training Modules. A step-by-step approach makes it easier to learn and remember important information. A practice exam at the beginning of the online modules measures your familiarity with ICD-10-CM coding. A 75-question mock exam for the AAPC ICD-10 certification exam follows in the online modules. Complete coverage of the new ICD-10-CM code set includes practice activities at the end of each chapter and assigned exercises in the online modules. Online module exercises, Quick Checks, and Toolbox features reinforce the coding rules and concepts, reflect the book's step-by-step organization, and enhance your comprehension. Real-life coding reports simulate the reports that coders encounter on the job and challenge you to apply important coding principles to actual cases from the field. From the Trenches and Caution! boxes provide important tips and helpful advice that will be useful when you are working in the field. Official Guidelines for Coding and Reporting boxes include excerpts of actual coding guidelines, each accompanied by in-text explanations.
