For Ireland the seventeenth and eighteenth centuries were an era marked by war, economic transformation, and the making and remaking of identities. By the 1630s the era of wars of conquest seemed firmly in the past. But the British civil wars of the mid-seventeenth century fractured both Protestant and Catholic Ireland along lines defined by different combinations of religious and political allegiance. Later, after 1688, Ireland became the battlefield for what was otherwise Britain's bloodless (and so Glorious) Revolution. The eighteenth century, by contrast, was a period of peace, permitting Ireland to emerge, first as a dynamic actor in the growing Atlantic economy, then as the breadbasket for industrialising Britain. But at the end of the century, against a background of international revolution, new forms of religious and political conflict came together to produce another period of multi-sided conflict. The Act of Union, hastily introduced in the aftermath of civil war, ensured that Ireland entered the nineteenth century still divided, but no longer a kingdom.

Any research that involves the use of the Rorschach or focuses on the nature of the Rorschach must be framed in the context of the basic principles that mark any scientific investigation. However, most texts concerning research design or data analysis do not deal directly with many of the unusual issues that confront investigators who use the Rorschach in their research. The nature of the test and test procedures are somewhat different than for most psychological tests, and, often, these special characteristics become critical when research designs are formulated. Similarly, some of the data of the tests are quite different from the customary distributions yielded by other psychological tests. Thus special care must be exercised when considering the variety of tactics that might be used in analyzing the test data. This text is unique in that it is specific to the Rorschach. Bringing together experts on Rorschach research, this volume presents in-depth treatments of every facet of methodology -- from design to analysis -- as well as more conceptual issues. It is designed to aid investigators in contending effectively with the many difficult challenges that are often encountered in Rorschach research. This work adds to the information already available to the accomplished researcher as well as provide some enlightenment for the Rorschach research novice. It dispels the notion that rote methodology or analyses can be applied routinely to studies involving the Rorschach. And it helps to improve the quality of investigations in which the test is included, and contribute in some way to the improvement of the overall research yield in the Rorschach community.

Many of the earliest books, particularly those dating back to the 1900s and before, are now extremely scarce and increasingly expensive. We are republishing these classic works in affordable, high quality, modern editions, using the original text and artwork.

The Flowers of Evil (Les Fleurs du Mal) may speak of the carnal, depraved, and decaying in human life and the city, but Charles Baudelaire's poetry so infuses even the most grotesque with beauty and a kind of innocence that the reader is moved beyond the rubric of the sacred and profane, into sublimity. This new edition, which features the English translation by F.P. Sturm and W.J. Robertson, also includes artwork by Lester Banzuelo.

'What is the nature of mind?' This question, propounded when man first became conscious of himself, still remains but inadequately answered. Nevertheless, some evident progress has been made. The light of scientific progress is gradually penetrating the various nooks and recesses of our mental life, and the machinery of thought, although dimly revealed, is becoming more apparent in its operation. This monograph is but a mere fragment, explaining little if anything regarding the dynamics of mental process, yet it hopes to place a variety of perplexing problems in a new perspective. We shall have occasion, for example, to examine some current definitions of intelligence, and we shall indicate wherein our research into the value and significance of completion and combination tests forces us to a reconsideration of the criteria of intelligence and to a restatement and a redefining of some fundamental principles.

Corporate accountability is never far from the front page, and as one of the world's most elite business schools, Harvard Business School trains many of the future leaders of Fortune 500 companies. But how does HBS formally and informally ensure faculty and students embrace proper business standards? Relying on his first-hand experience as a Harvard Business School faculty member, Michel Anteby takes readers inside HBS in order to draw vivid parallels between the socialization of faculty and of students. In an era when many organizations are focused on principles of responsibility, Harvard Business School has long tried to promote better business standards. Anteby's rich account reveals the surprising role of silence and ambiguity in HBS's process of codifying morals and business values. As Anteby describes, at HBS specifics are often left unspoken; for example, teaching notes given to faculty provide much guidance on how to teach but are largely silent on what to teach. Manufacturing Morals demonstrates how faculty and students are exposed to a system that operates on open-ended directives that require significant decision-making on the part of those involved, with little overt guidance from the hierarchy. Anteby suggests that this model—which tolerates moral complexity—is perhaps one of the few that can adapt and endure over time. Manufacturing Morals is a perceptive must-read for anyone looking for insight into the moral decision-making of today's business leaders and those influenced by and

working for them.

How can otherwise normal, moral persons - as citizens, voters, and jurors - participate in a process that is designed to take the life of another? In DEATH BY DESIGN, research psychologist Craig Haney argues that capital punishment, and particularly the sequence of events that lead to death sentencing itself, is maintained through a complex and elaborate social psychological system that distances and disengages us from the true nature of the task. Relying heavily on his own research and that of other social scientists, Haney suggests that these social psychological forces enable persons to engage in behavior from which many of them otherwise would refrain. However, by facilitating death sentencing in these ways, this inter-related set of social psychological forces also undermines the reliability and authenticity of the process, and compromises the fairness of its outcomes. Because these social psychological forces are systemic in nature - built into the very system of death sentencing itself - Haney concludes by suggesting a number of inter-locking reforms, derived directly from empirical research on capital punishment, that are needed to increase the fairness and reliability of the process. The historic and ongoing public debate over the death penalty takes place not only in courtrooms, but also in classrooms, offices, and living rooms. This timely book offers stimulating insights into capital punishment for professionals and students working in psychology, law, criminology, sociology, and cultural area studies. As capital punishment receives continued attention in the media, it is also a necessary and provocative guide that empowers all readers to come to their own conclusions about the death penalty.

Perhaps no other challenge preoccupies governments and citizens in the Mediterranean region than the mass unemployment of young people, many of who have invested in higher education in the hope that ability and effort lead to fulfilling lives. Transitions to independent adulthood are, however, frustratingly long drawn-out, and often jeopardised by labour markets that are neither youth-friendly nor meritocratic. While such challenges require structural responses at the macro-economic level, career education and guidance have an important role to play in addressing both the public and private good, and in furthering the social justice agenda. This volume provides a state-of-the-art review of career education and guidance in Southern Europe and the Middle East and North Africa Region, presenting a multi-faceted portrayal of the situation in each country as well as overviews of cross-cutting themes that are especially relevant to context, such as women's career development in the Arab states, job placement support for

refugees, and the impact of faith on livelihood planning. “This book is a major achievement, focusing on a pivotal part of the world.” – Tony Watts, Cambridge, UK “This book challenges career guidance to truly think in a contextual, localised, plural and dialogical way. In providing an opportunity for the South to speak on its own terms it helps renew the field through different ways of thinking and doing career guidance.” – Marcelo Afonso Ribeiro, University of São Paulo, Brazil “This wonderful new book furnishes a way forward in helping people and communities establish practices that will support our natural striving for work that is decent, dignified, and meaningful.” – David L. Blustein, Boston College, USA “This book is packed with fresh ideas based on lucid arguments that draw from a substantial evidence base. This work is essential reading.” – Gideon Arulmani, The Promise Foundation, Bangalore, India “This publication is a must-read for every individual involved in policy, research and practice activities in the career guidance field.” – Rènette du Toit, Independent Research Services, South Africa

The 'Canzoniere', a sequence of sonnets and other verse forms, were written over a period of about 40 years. They describe Petrarch's intense love for Laura, whom he first met in Avignon in 1327, and her effect on him after she died in 1348. The collection is an examination of the poet's growing spiritual crisis, and also explores important contemporary issues such as the role of the papacy and religion.

The fifth book in the New York Times new adult series that began with Real. When an angry, heartbroken girl is forced to be near her rocker ex-boyfriend, only time will tell if the fire between them will consume them both. Pandora, the gothic friend of Brooke (Real, Mine, Remy) and Melanie (Rogue), thought that getting her heart broken by her bad boy rocker ex could only happen once. But now, he's back in town with the biggest concert of the year. Pandora hates him so much that she gets Melanie to come with her and play a prank on him at his gig. But when they're caught by security, and her ex himself is summoned, Pandora is not prepared for the feelings that seeing him again—beautiful and in the flesh—awaken in her. She's also wholly unprepared for the conditions his manager sets in order for her and Melanie to be released; especially since these conditions only allow Melanie to return home, while at the same time, they put Pandora in perilously close contact with her ex again. The torturous physical closeness between them reignites the passion they once shared, and soon no matter how much she wants to hate him, it's clear she's still hung up on him. And worse: he knows it too.

Similarities and differences between speech and writing have been the subject of innumerable studies, but until now there has been no attempt to provide a unified linguistic analysis of the whole range of spoken and written registers in English. In this widely acclaimed empirical study, Douglas Biber uses computational techniques to analyse the linguistic

characteristics of twenty three spoken and written genres, enabling identification of the basic, underlying dimensions of variation in English. In *Variation Across Speech and Writing*, six dimensions of variation are identified through a factor analysis, on the basis of linguistic co-occurrence patterns. The resulting model of variation provides for the description of the distinctive linguistic characteristics of any spoken or written text and demonstrates the ways in which the polarization of speech and writing has been misleading, and thus enables reconciliation of the contradictory conclusions reached in previous research.

These days, almost everyone complains about the hectic pace of their lives. We live in a world where speed rules and everyone is under pressure to go faster. But when speed is king, anyone or anything that gets in our way, that slows us down, becomes an enemy. Thanks to speed, we are living in the age of rage. Carl Honore has discovered a movement that is quickly working its way into the mainstream. Groups of people are developing a recipe for living better in a fast-paced, modern environment by striving for a new balance between fast and slow. In an entertaining and hands-on investigation of this new movement, Honore takes us from a Tantric sex workshop in a trendy neighbourhood in London, England to Bra, Italy, the home of the Slow Food, Slow Cities and Slow Sex movements. He examines how we can continue to live productive lives by embracing the tenets of the slow movement. A challenging take on the cult of speed, as well as a corrective look at how we can approach our lives with new understanding, *In Praise of Slow* uncovers a movement whose time has come.

In *Sociology of Culture and of Cultural Practices*, Laurent Fleury presents a synthesis of research and debate from France and the United States. He traces the development of the sociology of culture from its origins (Weber and Simmel) and examines the major trends that have emerged in this branch of sociology. Fleury also raises issues of cultural hierarchy, distinction, and legitimate culture and mass culture and focuses on new areas of research, including the role of institutions, the reception of works of art, aesthetic experience, and emancipation through art.

One of the most widely recognized and controversial artists of the 20th century, Salvador Dalí was also an avant-garde filmmaker, collaborating with such giants as Luis Buñuel, Walt Disney, and Alfred Hitchcock. Influenced by the Marx Brothers, Buster Keaton, and Stanley Kubrick, Dalí used the cinema to bring the "dream subjects" of his paintings to life, providing the groundwork for revolutionary forays into television, video, photography, and holography. From a moviegoing experience that would incorporate all five senses to the tale of a woman's hapless love affair with a wheelbarrow, Dalí's hallucinatory vision never fails to leave its indelible mark, while his writings continue to be relevant to discourses surrounding film and surrealism.
