Providing a series of chapters, written by teacher educators in three continents, this edited volume explores the concepts, challenges, possibilities, and implementations of competency-based instruction for developing English competencies in English as a foreign language (EFL) contexts. Recent trends in education have emphasized the need to develop competencies that connect learning with real-life performances. This need has brought about a massive increase in the number of studies and scholarly works devoted to research into competency-based education. However, for teachers and learners of EFL, it is challenging to develop competencies for using a language that does not seem to connect with their real-life scenarios. The chapters apply the concept of competency-based instruction in different EFL contexts and are structured around three themes: Theory: current thoughts on theories of competency-based education Research: empirical research on competency-based teacher education Practice: integrating competency-based instruction into teacher education This book offers examples of competency-based EFL teacher education through both research and practical applications. In addition to the innovation in competency approaches, the inclusion of language learning in virtual environments offers a valuable resource for scholars, educators, researchers, and all those concerned with current and future education.

The New York Times best-selling book exploring the counterproductive reactions white people have when their assumptions about race are challenged, and how these reactions maintain racial inequality. In this “vital, necessary, and beautiful book” (Michael Eric Dyson), antiracist educator Robin DiAngelo deftly illuminates the phenomenon of white fragility and “allows us to understand racism as a practice not restricted to ‘bad people’ (Claudia Rankine). Referring to the defensive moves that white people make when challenged racially, white fragility is characterized by emotions such as anger, fear, and guilt, and by behaviors including argumentation and silence. These behaviors, in turn, function to reinstate white racial equilibrium and prevent any meaningful cross-racial dialogue. In this in-depth exploration, DiAngelo examines how white fragility develops, how it protects racial inequality, and what we can do to engage more constructively.
