*Dual Transformation* Scott D. Anthony,Clark G. Gilbert,Mark W. Johnson,2017-03-28 Game-changing disruptions will likely unfold on your watch. Be ready. In *Dual Transformation*, Scott Anthony, Clark Gilbert, and Mark Johnson propose a practical and sustainable approach to one of the greatest challenges facing leaders today: transforming your business in the face of imminent disruption. *Dual Transformation* shows you how your company can come out of a market shift stronger and more profitable, because the threat of disruption is also the greatest opportunity a leadership team will ever face. Disruptive change opens a window of opportunity to create massive new markets. It is the moment when a market also-ran can become a market leader. It is the moment when business legacies are created. That moment starts with the core dual transformation framework: Transformation A: Repositioning today's business to maximize its resilience, such as how Adobe boldly shifted from selling packaged software to providing software as a service. Transformation B: Creating a new growth engine, such as how Amazon became the world's largest provider of cloud computing services. Capabilities link: Fighting unfairly by taking advantage of difficult-to-replicate assets without succumbing to the "sucking sound of the core." Anthony, Gilbert, and Johnson also address the characteristics leaders must embrace: courage, clarity, curiosity, and conviction. Without them, dual transformation efforts can founder. Building on lessons from diverse companies, such as Adobe, Manila Water, and Netflix, and a case study from Gilbert's firsthand experience transforming his own media and publishing company, *Dual Transformation* will guide executives through the journey of creating the next version of themselves, allowing them to own the future rather than be disrupted by it.

**Food systems for an urbanizing world** Food and Agriculture Organization of the United Nations,World Bank Group,2018-08-29 *Food Systems for an Urbanizing World* is a joint report prepared by the World Bank and FAO. It aims to stimulate discussion and suggest pathways to support local and national governments, and civil society and private sector actors in their efforts to improve the performance and capacity of food systems. The report describes the diversity and ever-changing nature of food systems, with interlinked traditional, modern and informal channels that respond to different market

segments and different consumer preferences. It also underscores the importance of targeting support to the type of city and food system. The task is not an easy one. Data are weak and empirical analysis is weaker. As cities' engagement in urban food issues is relatively new, the institutions, governance mechanisms and capacities needed for effective design, implementation and delivery of this agenda must be strengthened. Finding effective ways to prioritize, mobilize and coordinate contributions from multiple sectors will be essential for achieving food system goals.

*The Rise of the Corporate Economy in Southeast Asia* Rajeswary Ampalavanar Brown,2007-01-24 The Rise of the Corporate Economy in Southeast Asia surveys the growth of large corporations in Southeast Asia, focusing in particular on corporate organization, methods of finance, the business environment and corporate governance. It details the different phases of corporate and financial development, particularly liberalization and globalization from the mid-1980s, the 1997 crisis, and subsequent attempts at liberalization and the reform of corporate governance. Raj Brown considers the key themes of the rise of the Southeast Asian corporate economy, and illustrates the theoretical issues through deployment of carefully selected country-specific case studies from across the region. An examination of critical subjects include: the variety of corporate forms found in Southeast Asia issues of ethnicity the concentration of ownership, particularly among families links between the state, the military, banks and corporations state-owned enterprises and forms of state control the role of foreign capital. Providing a comprehensive analysis of the rise of the corporate economy in Southeast Asia, this study will be an important resource for students of the region and those concerned with theoretical issues of corporate governance.

**International Financial Centres after the Global Financial Crisis and Brexit** Youssef Cassis,Dariusz Wójcik,2018-07-04 As well as marking the tenth anniversary of the collapse of Lehman Brothers and the consequent unleashing of the global financial crisis, 2018 is also the year of negotiations on the terms of the UK's exit from the European Union. Within a decade the banking world has witnessed two epochal events with potential to redraw the map of international financial centres: but how much has this map actually changed since 2008, and how is it likely to change in the near future? *International Financial Centres after the Global Financial Crisis and Brexit* gathers together leading economic

historians, geographers, and other social scientists to focus on the post-2008 developments in key international financial centres. It focuses on the shifting hierarchies of New York, London, Paris, Geneva, Zurich, Frankfurt, Singapore, Hong Kong, Beijing, Shanghai, and Tokyo to question whether Asian financial centres have taken advantage of the crisis in the West. It also examines the medium-effects of the crisis, the level of regulation, and the rise of new technology (fintech). By exploring these crucial changes, it questions whether shifts in the financial industry and the global landscape will render these centres unnecessary for the functioning of the global economy, and which cities are likely to emerge as hubs of new financial technology.

**Corporate Governance and Investment Management** Roger M. Barker,Iris H.-Y. Chiu,2017-12-29 Shareholder engagement with publicly listed companies is often seen as a key means to monitor corporate malpractices. In this book, the authors examine the corporate governance roles of key institutional investors in UK corporate equity, including pension funds, insurance companies, collective investment funds, hedge and private equity funds and sovereign wealth funds. They argue that institutions' corporate governance roles are an instrument ultimately shaped by private interests and market forces, as well as law and regulatory obligations, and that policy-makers should not readily make assumptions regarding their effectiveness, or their alignment with public interest or social good.

**Singapore** International Monetary Fund,2012-08-27 Singapore's large financial sector has remained resilient. The output has shown to rebound strongly despite a drop of 9 percent in GDP during 2008-early 2009. The new challenges include consumer price inflation, income inequality, and rising housing prices. The downside risks for the Singapore economy are large, but the country has large buffers and significant policy room to dampen the immediate and longer-term effects of a sharp global slowdown. The authorities have ample policy space and instruments to address the negative impact of economic shocks.

**Business Strategy in Asia** Kulwant Singh,Nitin Pangarkar,Loizos Th Heracleous,2004 The second edition follows the highly successful first edition in filling an important under-served niche in the strategy arena: a casebook on business strategy in Asia. As a teaching tool, the usage of case studies is widespread in business strategy courses. Many case studies are focused on companies from developed economies, especially from the U.S. and Western Europe, leaving a large void in terms of understanding the strategies of Asian companies. This book aims to fill this void in the current offerings of

textbooks. Written by experts on Asian business, it is a unique and comprehensive collection of cases about the strategies of Asian firms. The cases are wide-ranging, covering a diverse range of issues, geographic contexts, industries and decision situations. The rigor and depth of information included in each of the cases provides considerable versatility to educators in terms of usage at various levels. The cases have been carefully chosen to represent the geographic and economic diversity of the different countries, industries, and firms within Asia.
