Bestselling authors and world-renowned marketing strategists Al and Laura Ries usher in the new era of public relations. Today's major brands are born with publicity, not advertising. A closer look at the history of the most successful modern brands shows this to be true. In fact, an astonishing number of brands, including Palm, Starbucks, the Body Shop, Wal-Mart, Red Bull and Zara have been built with virtually no advertising. Using in-depth case histories of successful PR campaigns coupled with those of unsuccessful advertising campaigns, The Fall of Advertising provides valuable ideas for marketers -- all the while demonstrating why advertising lacks credibility, the crucial ingredient in brand building, and how only PR can supply that credibility; the big bang approach advocated by advertising people should be abandoned in favor of a slow build-up by PR; advertising should only be used to maintain brands once they have been established through publicity. Bold and accessible, The Fall of Advertising is bound to turn the world of marketing upside down.

What if there are some rules to living? What if these "laws" are frequently broken? In fact, you probably are breaking some of them right now. Anyone struggling or feeling stuck in life is breaking at least one of these laws. Just like gravity, these laws affect every person, whether that person understands them or not. Instead of breaking the laws (even without realizing it), readers discover how to obey the laws. They learn how to get "unstuck," find success without chasing it, and finally, obtain peace. The Immutable Laws of Living helps readers understand: Why life isn't fair, and why that isn't the problem. How to deal with life challenges, and come out ahead. How your thoughts keep you stuck, and how to free yourself. Why fighting change won't work, and why you don't have to. How to deal with your fears and get them to help you. How to make a real and lasting impact. If you believe there are hidden rules or laws to living a great life, there are. And you can learn them for yourself. Follow the laws and learn to thrive!

Two world-renowned marketing consultants and bestselling authors present the definitive rules of marketing.

A veteran Wall Street Journal editor and authority on branding, marketing and reputation provides the 18 crucial rules for companies to follow in developing and protecting their reputation, which can be their most valuable asset or their worst nightmare. A must read book for senior executives, consultants, advertising, public relations, and marketing professionals. From Enron and WorldCom to the Catholic Church and Major League Baseball, reputation crises have never been more widespread. Now Ronald J. Alsop, a veteran Wall Street Journal authority on branding and reputation management, explains the dangers—and gives organizations the eighteen crucial laws to follow in developing and protecting their reputations. Consider this example of a simple decision made by a low-ranking employee: When rescue workers at the site of the World Trade Center

disaster sought bottled water from a nearby Starbucks outlet, they complained that an employee charged them for it. In a matter of hours, the Internet had picked up the story and Starbucks' carefully cultivated worldwide reputation was quickly besmirched. This is just one instance among many of how the business world, ever more global and competitive, has become increasingly difficult to navigate. Studies have demonstrated the powerful impact of reputation on profits and stock prices, and yet less than half of all companies have a formal system for measuring reputation. Clearly, companies in every industry—from Dow Chemical to Disney to DaimlerChrysler—have much more to learn. It is still the rare company that realizes the full value of its reputation: how corporate reputation can enhance business in good times, become a protective halo in turbulent times, and be destroyed in an instant by people at the lowest or highest levels of the corporate ladder. Mr. Alsop provides eighteen thoroughly documented lessons based on years of experience covering every aspect of corporate reputation, with a clear distillation of the complex principles at the heart of a reputation. He explains:

- How to protect your reputation when the inevitable crisis hits
- How to cope with the many hazards in cyberspace
- How to create a reputation for vision and industry leadership
- How to establish a culture of ethical behavior
- How to measure and monitor your ever-changing public image
- How to make employees your reputation champions
- How to decide when it's time to change your name

The result is a book that is important not only for business executives, consultants, and advertising, public relations, and marketing professionals but also for anyone eager to learn more about the companies they work for, buy from, and invest in.

What Charles Darwin did for biology, Al and Laura Ries do for branding. In their exciting new book, *The Origin of Brands*, the Rieses take Darwin's revolutionary idea of evolution and apply it to the branding process. What results is a new and strikingly effective strategy for creating innovative products, building a successful brand, and, in turn, achieving business success. Here, the Rieses explain how changing conditions in the marketplace create endless opportunities to build new brands and accumulate riches. But these opportunities cannot be found where most people and most companies look. That is, in the convergence of existing categories like television and the computer, the cellphone and the Internet. Instead, opportunity lies in the opposite direction—in divergence. By following Darwin's brilliant deduction that new species arise from divergence of an existing species, the Rieses outline an effective strategy for creating and taking to market an effective brand. In *The Origin of Brands*, you will learn how to: Divide and conquer Exploit divergence Use the theories of survival of the fittest and survival of the second best Harness the power of pruning Using insightful studies of failed convergence products and engaging success stories of products that have achieved worldwide success through divergence, the Rieses have written the definitive book on branding. *The Origin of Brands* will show you in depth how to build a great brand and will lead you to success in the high-stakes world of branding.

Until this book was written, the phrase "brands are stories" was merely a marketing cliché. Having delved into how stories influence our behavior, however, the author asserts that the association between stories and brands deserves far more than that stock phrase. Among the many books about branding directed toward marketing and advertising practitioners and students, none is like *StoryBranding*. Modeled after the way stories work, this book provides a unique planning process for creating authentic brand identities. It also reveals a number of concealed traps that other branding approaches often overlook. Drawing on the persuasive power of stories, the author argues that a great deal of wasted effort is put into creating advertising messages that do too much "telling" and too little "showing." To help brands resonate with their audiences, the author takes you step-by-step through *StoryBranding's* six C's—a process that shows how to approach the development of all brand communications the way story writers approach their characters, plots, and themes. He includes sample "Story Briefs" and "I AM" statements that help brands achieve a greater degree of authenticity than traditional creative or brand briefs have.

How maverick companies have passed up the growth treadmill — and focused on greatness instead. It's an axiom of business that great companies grow their revenues and profits year after year. Yet quietly, under the radar, a small number of companies have rejected the pressure of endless growth to focus on more satisfying business goals. Goals like being great at what they do, creating a great place to work, providing great customer service, making great contributions to their communities, and finding great ways to lead their lives. In *Small Giants*, veteran journalist Bo Burlingham takes us deep inside fourteen remarkable companies that have chosen to march to their own drummer. They include Anchor Brewing, the original microbrewer; CitiStorage Inc., the premier independent records-storage business; Clif Bar & Co., maker of organic energy bars and other nutrition foods; Righteous Babe Records, the record company founded by singer-songwriter Ani DiFranco; Union Square Hospitality Group, the company of restaurateur Danny Meyer; and Zingerman's Community of Businesses, including the world-famous Zingerman's Deli of Ann Arbor. Burlingham shows how the leaders of these small giants recognized the full range of choices they had about the type of company they could create. And he shows how we can all benefit by questioning the usual definitions of business success. In his new afterward, Burlingham reflects on the similarities and learning lessons from the small giants he covers in the book.

#1 NEW YORK TIMES BESTSELLER When and how did the universe begin? Why are we here? What is the nature of reality? Is the apparent "grand design" of our universe evidence of a benevolent creator who set things in motion—or does science offer another explanation? In this startling and lavishly illustrated book, Stephen Hawking and Leonard Mlodinow present the most recent scientific thinking about these and other abiding mysteries of the universe, in nontechnical language marked by brilliance and simplicity. According to quantum theory, the cosmos does not have just a single existence or history. The authors explain that we ourselves are the product of quantum fluctuations in the early universe, and show how quantum theory predicts the "multiverse"—the idea that ours is just one of many universes that appeared spontaneously out of nothing, each with different laws of nature. They conclude with a riveting assessment of M-theory, an explanation of the laws governing our universe that is currently the only viable candidate for a "theory of everything": the unified theory that Einstein was looking for, which, if confirmed, would represent the ultimate triumph of human reason.

Why are most slogans and taglines ineffective? Because they're just words and a mind cannot understand words. A mind can only understand sounds. Why do most Americans remember the battlecry of the French Revolution (Libert , galit , fraternit ) when they cannot remember the battlecry of the American Revolution? Because the sounds of the words "Libert , galit , fraternit " rhyme and that's one of the powerful techniques for creating a memorable slogan. In addition to "rhyme," there are four other techniques outlined in my new book, *Battlecry*. (1) Rhyme: "Roto-Rooter, that's the name. And away go troubles down the drain." (2) Alliteration: "M&Ms melt in your mouth, not in your hands." (3) Repetition: "The few. The proud. The Marines." (4) Reversals: "Two great tastes that taste great together. Reese's peanut butter cups." (5) Double-entendre: "A diamond is forever." You might think companies and their ad agencies would be wise to these techniques. But few slogans actually use any of these memory-building tactics. In a recent survey of 266 advertising slogans, only 19 used any one of them. *Battlecry* is a companion book to my previous book, *Visual Hammer*, and should be read together. Creating a slogan is only half the battle. The other half of the battle is a visual that will help drive your slogan into prospects' minds. The contour bottle helps drive "The real thing" into the minds of cola drinkers. The duck helps drive the Aflac name into prospects' minds. The straw-in-the-orange helps drive "Not from concentrate" into the minds of Tropicana buyers. Even "The ultimate driving machine" would not have been effective, in my opinion, without a visual hammer. And what was BMW's visual hammer? It was the television commercials showing BMWs being driven over winding road by happy owners. Over the years, there have been many advertising campaigns showing beautiful automobiles being driven over lush, winding roads. The hammers are terrific, but the nails are missing. The trick is to find the right combination of a visual hammer and a verbal nail. And my two books, *Battlecry* and *Visual Hammer*, can help you do exactly that.
