Are you just hanging in there? Have life's curveballs thrown you off balance? Do you feel as if your life is going sideways? Bestselling author, leadership coach, and former Yahoo! executive Tim Sanders knows how you feel. His father's unexpected death put him in a downward spiral for fifteen years—what he calls his “sideways years.” In 1996, a photo of a dusty water tower in Texas finally got his attention. That's when he realized he needed to go home to his rock—his grandmother Billye, who had taken him in when he was four and raised him as her own. Rediscovering the lessons she had taught him as a child turned Tim's life around and, in less than four years, catapulted him to financial security and an officer-level role at an S&P 500 company at the center of the Internet revolution. Today, his promise to himself is “I will never forget those lessons. The price is too high.” Join Tim as he rediscovers the classic principles of confident living that some of the most successful and joyful people you know live by.

Fuel success and grow your team at every level of leadership. True leadership isn't a matter of having a certain job or title. In fact, being chosen for a position is only the first of the five levels every effective leader achieves. To become more than “the boss” people follow only because they are required to, you have to master the ability to invest in people and inspire them. To grow further in your role, you must achieve results and build a team that produces. You need to help people to develop their skills to become leaders in their own right. And if you have the skill and dedication, you can reach the pinnacle of leadership—where experience will allow you to extend your influence beyond your immediate reach and time for the benefit of others. The 5 Levels of Leadership are: 1. Position - People follow because they have to. 2. Permission - People follow because they want to. 3. Production - People follow because of what you have done for the organization. 4. People Development - People follow because of what you have done for them personally. 5. Pinnacle - People follow because of who you are and what you represent.

A compendium of straightforward techniques on how to accentuate the positive and redirect the negative, increasing productivity at work and at home. What do your people at work and your spouse and kids at home have in common with a five-ton killer whale? Probably a whole lot more than you think, according to top business consultant and mega-bestselling author Ken Blanchard and his coauthors from SeaWorld. In this moving and inspirational new book, Blanchard explains that both whales and people perform better when you accentuate the positive. He shows how using the techniques of animal trainers -- specifically those responsible for the killer whales of SeaWorld -- can supercharge your effectiveness at work and at home. When gruff business manager and family man Wes Kingsley visited SeaWorld, he marveled at the ability of the trainers to get these huge killer whales, among the most feared predators in the ocean, to perform amazing acrobatic leaps and dives. Later, talking to the chief trainer, he learned their techniques of building trust, accentuating the positive, and redirecting negative behavior -- all of which make these extraordinary performances possible. Kingsley took a hard look at his own often accusatory management style and recognized how some of his shortcomings as a manager, spouse, and father actually diminish trust and damage relationships. He began to see the difference between "GOTcha" (catching people doing things wrong) and "Whale Done!" (catching people doing things right). In Whale Done!, Ken Blanchard shows how to make accentuating the positive and redirecting the negative the best tools to increase productivity, instead of creating situations that demoralize people. These techniques are remarkably easy to master and can be applied equally well at home, allowing readers to become better parents and more committed spouses in their happier and more successful personal lives.

The plan guides the reader through the "Five Levels of Influence" Learning: a leader must be able to learn from anyone Performing: persevere through failure to find success Leading: extend your ability by expanding your team Developing Leaders: learn to trust your people Develop Leaders Who Develop Leaders: create a legacy

A look at how new technologies can be put to use in the creation of a more just society. Artificial Intelligence (AI) is not likely to make humans redundant. Nor will it create superintelligence anytime soon. But it will make huge advances in the next two decades, revolutionize medicine, entertainment, and transport, transform jobs and markets, and vastly increase the amount of information that governments and companies have about individuals. AI for Good leads off with economist and best-selling author Daron Acemoglu, who argues that there are reasons to be concerned about these developments. AI research today pays too much attention to the technological hurdles ahead without enough attention to its disruptive effects on the fabric of society: displacing workers while failing to create new opportunities for them and threatening to undermine democratic governance itself. But the direction of AI development is not preordained. Acemoglu argues for its potential to create shared prosperity and bolster democratic freedoms. But directing it to that task will take great effort: It will require new funding and regulation, new norms and priorities for developers themselves, and regulations over new technologies and their applications. At the intersection of technology and economic justice, this book will bring together experts--economists, legal scholars, policy makers, and developers--to debate these challenges and consider what steps tech companies can do take to ensure the advancement of AI does not further diminish economic prospects of the most

vulnerable groups of population.

The authors of this book set out a system of safety strategies and interventions for managing patient safety on a day-to-day basis and improving safety over the long term. These strategies are applicable at all levels of the healthcare system from the frontline to the regulation and governance of the system. There have been many advances in patient safety, but we now need a new and broader vision that encompasses care throughout the patient's journey. The authors argue that we need to see safety through the patient's eyes, to consider how safety is managed in different contexts and to develop a wider strategic and practical vision in which patient safety is recast as the management of risk over time. Most safety improvement strategies aim to improve reliability and move closer toward optimal care. However, healthcare will always be under pressure and we also require ways of managing safety when conditions are difficult. We need to make more use of strategies concerned with detecting, controlling, managing and responding to risk. Strategies for managing safety in highly standardised and controlled environments are necessarily different from those in which clinicians constantly have to adapt and respond to changing circumstances. This work is supported by the Health Foundation. The Health Foundation is an independent charity committed to bringing about better health and health care for people in the UK. An exploration of why people all over the world love to engage in pain on purpose—from dominatrices, religious ascetics, and ultramarathoners to ballerinas, icy ocean bathers, and sideshow performers Masochism is sexy, human, reviled, worshipped, and can be delightfully bizarre. Deliberate and consensual pain has been with us for millennia, encompassing everyone from Black Plague flagellants to ballerinas dancing on broken bones to competitive eaters choking down hot peppers while they cry. Masochism is a part of us. It lives inside workaholics, tattoo enthusiasts, and all manner of garden variety pain-seekers. At its core, masochism is about feeling bad, then better—a phenomenon that is long overdue for a heartfelt and hilarious investigation. And Leigh Cowart would know: they are not just a researcher and science writer—they're an inveterate, high-sensation seeking masochist. And they have a few questions: Why do people engage in masochism? What are the benefits and the costs? And what does masochism have to say about the human experience? By participating in many of these activities themselves, and through conversations with psychologists, fellow scientists, and people who seek pain for pleasure, Cowart unveils how our minds and bodies find meaning and relief in pain—a quirk in our programming that drives discipline and innovation even as it threatens to swallow us whole.

#1 New York Times bestselling author John C. Maxwell's latest book will enhance the lives of leaders, professionals, and anyone who wants to achieve success and personal growth. We often treat the word capacity as if it were a natural law of limitation. Unfortunately, most of us are much more comfortable defining what we perceive as off limits rather than what's really possible. Could it be that many of us have failed to expand our potential because we have allowed what we perceive as capacity to define us? What if our limits are not really our limits? In his newest book, John Maxwell identifies 17 core capacities. Some of these are abilities we all already possess, such as energy, creativity and leadership. Others are aspects of our lives controlled by our choices, like our attitudes, character, and intentionality. Maxwell examines each of these capacities, and provides clear and actionable advice on how you can increase your potential in each. He will guide you on how to identify, grow, and apply your critical capacities. Once you've blown the "cap" off your capacities, you'll find yourself more successful—and fulfilled—in your daily life.

Diversity initiatives are falling short. This book shows leaders how to develop the skills needed to build sustainably inclusive organizations using a tested, research-based model developed by the global organizational consulting firm Korn Ferry. According to the journal Human Resource Management, companies are spending over \$8 billion a year on diversity programs. Yet today, the senior leadership teams at Fortune 500 companies are far from mirroring the diversity of its workforce and its customers. Andrés Tapia and Alina Polonskaia, senior leaders at Korn Ferry, argue that to build sustainable diversity and inclusion, organizations need to have inclusive leaders at all levels. In this book, Tapia and Polonskaia draw on Korn Ferry's massive database of 3 million leadership assessments to reveal the essential qualities of inclusive leaders. They discuss the personality traits these leaders share and detail how to develop what they call the five disciplines of inclusive leadership: building interpersonal trust, integrating diverse perspectives, optimizing talent, applying an adaptive mindset, and achieving transformation. Tapia and Polonskaia also outline the competencies behind each discipline, describe individual and organizational exemplars of inclusive leadership, and show how the five disciplines enable leaders to unleash the power of all people and to build both structurally and behaviorally inclusive organizations. This book will help leaders foster the skills to deal with today's complex challenges and create a more inclusive, sustainable, and prosperous future for all of us.
