

The Astrological World Of Jung S Liber Novus Daimons Gods And The Planetary Journey

The Planets Within asks us to return to antiquity with new eyes. It centers on one of the most psychological movements of the prescientific age--Renaissance Italy, where a group of "inner Columbuses" charted territories that still give us today a much-needed sense of who we are and where we have come from, and the right routes to take toward fertile and unexplored places. Chief among these masters of the interior life was Marsilio Ficino, presiding genius of the Florentine Academy, who taught that all things exist in soul and must be lived in its light. This study of Ficino broadens and deepens our understanding of psyche, for Ficino was a doctor of soul, and his insights teach us the care and nurture of soul. Moore takes as his guide Ficino's own fundamental tool--imagination. Respecting the integrity and autonomy of images, The Planets Within unfolds a poetics of soul in a kind of dialogue between the laconic remarks of Ficino and the need to give these remarks a life and context for our day. In The Heavens Declare, author and astrologer Alice O. Howell proclaims, "We are not confronting the end of the world, but the end of the Age of Pisces!" Integrating two major disciplines of astrology and Jungian depth psychology, Howell's latest title reveals the fascinating connection between astrology and the evolution of the Collective Unconscious, C.G. Jung's theory that the unconscious mind is shared by all humans and contains archetypes and universal mental predispositions not grounded in physical experience. Written in the form of thought-provoking letters to her analyst friend, Howell's natural wit and charm compliment the text. Exploring the synchronicity between myth, history, religion, and the evolution of humankind over the past five astrological ages—spanning some 12,000 years—she presents the current tasks and the potential traps humanity now faces. Howell also provides her audience with a deeper understanding and method of healing the individual psyche. She illustrates that an astrologer serves as a type of psychologist who analyzes the position of the stars and planets within an individual's astrological chart for the purpose of understanding his or her psychological makeup, the personal challenges he or she may face, and the possible solutions to overcoming those obstacles.

Letters to an analyst explore signs and ages and their equivalence in your psyche.

Making the Gods Work for You presents internationally renowned author Caroline W. Casey's remarkable doctrine of Visionary Activist Astrology. In this reverently irreverent mystery school disguised as a book (in which each of the planetary gods is a professor), we are invited to think of our lives as spiritual detective novels. For example, Venus teaches us that our affinities and quirks are clues to our unique mission and contribution to the world. The astrological language of the psyche is a tool for deciphering and revitalizing this sense of mission. Casey teaches you how to expand your range of intimacy with the ten parts of yourself represented by the planets, here called gods. You will learn how to use this language to reverence and feed the forces of your psyche that connect you to very real external forces. This book intends to catalyze a movement to engage the imagination of all people with a sense of humor and a desire to do collaborative good in the world. Expanding on the ideas first presented in her popular audiotope series, Inner and Outer Space, Casey explores the archetypes at the heart of human relationships, aspirations, and spiritual quests. In an engaging narrative enlivened by stories, fables, exercises, and meditations developed through her work as an astrological counselor, she provides a practical system of personal and collective liberation. Making the Gods Work for You provides us with innovative principles to live by and rituals inviting us to become active, dynamic participants in the dance of life. We can then become increasingly conscious players on the team of creation, capable of sharing our gifts with the world at this crucial historical time. From the Trade Paperback edition.

Explains how to use archetypal psychology as a guide to the transpersonal journey.

Each sign of the zodiac is a gateway to individual behaviour and psychological traits. In turn, these are represented in Jung's theory of archetypes -- the common experiences of the human race. Combining traditional astrology with Jung's theories, Karen Hamaker-Zondag gives students of astrology a firm foundation for interpreting charts. Planetary Symbolism in the Horoscope guides astrologers who want to understand the horoscope's psychological implications.

This book focuses on some of the main aspects and importance of The Red Book for the understanding of the work of C.G. Jung. It sheds light on the great mysteries of human nature and the new dimension uncovered by Jung and Freud: the universe of the unconscious and the possible ways to approach it.

To Jung, synchronicity is a meaningful coincidence in time, a psychic factor which is independent of space and time. This revolutionary concept of synchronicity both challenges and complements the physicist's classical view of causality. It also forces us to a basic reconsideration of the meaning of chance, probability, coincidence and the singular events in our lives.

Combining an understanding of astrological symbolism and the psychological processes involved in the pursuit of individuality, the author shares insights about how the concept of fate evolves. Through myths, fairy tales, and zodiacal signs, she shows us this mythological journey.

Some call the imaginal the realm of the archetypes, the home of the gods and goddesses, the land of the daimon, or the source of creativity. Others simply call it the soul. The daimon of the imaginal world facilitates the incarnation of soul into the physical body, and transforming these dark energies allows us to progress as spiritual beings, to live life from a more conscious view. Sandra Dennis suggests that attitudes devaluing the erotic, feminine, instinctual energies particularly those of sexuality, and destructiveness and the marginalization of bodily sensation itself, block these daimonic soul images from incarnating. She discusses our tendency to block these transforming forces and offers suggestions on how to embrace and reclaim them to allow for a more integrated existence. She explains sensations associated with daimonic imagery fragmentation, rage, anxiety, pain, also the other side ecstasy, bliss, orgasmic release understanding that all of these sensations form the basis for profound change in the sense of self. Jung on Astrology brings together C. G. Jung's thoughts on astrology in a single volume for the first time, significantly adding to our understanding of Jung's work. Jung's Collected Works, seminars, and letters contain numerous discussions of this ancient divinatory system, and Jung himself used astrological horoscopes as a diagnostic tool in his analytic practice. Understood in terms of his own psychology as a symbolic representation of the archetypes of the collective unconscious, Jung found in astrology a wealth of spiritual and psychological meaning and suggested it represents the "sum of all the psychological knowledge of antiquity." The selections and editorial introductions by Safron Rossi and Keiron Le Grice address topics that were of critical importance to Jung—such as the archetypal symbolism in astrology, the precession of the equinoxes and astrological ages, astrology as a form of synchronicity and acausal correspondence, the qualitative nature of time, and the experience of astrological fate—allowing readers to assess astrology's place within the larger corpus of Jung's work and its value as a source of symbolic meaning for our time. The book will be of great interest to analytical psychologists, Jungian psychotherapists and academics and students of depth psychology, Jungian and post-Jungian studies, as well as to astrologers and therapists of other orientations, especially transpersonal.

Jung's Studies in Astrology is an historical survey of his astrological work from the time he began to study the subject. It is based not only on his published writings, but also on the correspondence and documents found in his private archives, many of which have never previously seen the light of day. Liz Greene addresses with thoroughness and detailed scholarship the nature of Jung's involvement with

astrology: the ancient, medieval, and modern sources he drew on, the individuals from whom he learned, his ideas about how and why it worked, its religious and philosophical implications, and its applications in the treatment of his patients as well as in his own self-understanding. Greene clearly demonstrates that any serious effort to understand the development of Jung's psychological theories, as well as the nature of his world-view, needs to involve a thorough exploration of his astrological work. In *The Astrological World of Jung's Liber Novus*, Liz Greene explores the planetary journey Jung portrayed in this remarkable work and investigates the ways in which he used astrological images and themes as an interpretive lens to help him understand the nature of his visions and the deeper psychological meaning behind them. Greene's analysis includes a number of mythic and archetypal elements, including the stories of Salome, Siegfried and Elijah, and demonstrates that astrology, as Jung understood and worked with it, is unquestionably one of the most important foundation stones of analytical psychology, and an essential part of understanding his legacy.

The author uses basic astrological concepts symbolically and practically in a framework of Jungian psychology to show how people relate to one another on both conscious and unconscious levels.

Essays which state the fundamentals of Jung's psychological system: "On the Psychology of the Unconscious" and "The Relations Between the Ego and the Unconscious," with their original versions in an appendix.

Examines the traditional wisdom of astrology in the light of Jungian psychology, revealing the horoscope as a picture of our psychic structure and a key to self-knowledge and personal growth. Beginning with an analysis of Jung's terminology, including archetypes, the collective unconscious, and the theory of synchronicity, the author explores the striking correspondence between Jung's theory of psychological types and the traditional astrological elements.

Jung's lifelong interest in the paranormal contributed significantly to the development of his influential but controversial theory of synchronicity. In this volume Roderick Main brings together a selection of Jung's writings on topics from well-known and less accessible sources to explore the close relationship between them. In a searching introduction he addresses all the main aspects of synchronicity and clarifies the confusions and difficulties commonly experienced by readers interested in achieving a real understanding of what Jung had to say. This book provides an excellent companion to Jung's *Synchronicity: An Acausal Connecting Principle* (Routledge) and reveals the full extent and range of Jung's researches into a range of psychic phenomena which are still not yet adequately explained. For the first time, psychological strategies for surviving the astrological fallout of turning the big 3-0! Many young women approach their 30th birthdays with anxiety. They suddenly notice every tiny wrinkle, question the speed of their corporate ladder climb, or suffer from a biological clock that rivals Big Ben. Is it vanity, fear of aging, early midlife crisis, or insanity? It's actually the result of what astrologers call the "Saturn Return," a phenomenon occurring every 28 years, when Saturn completes its cycle through an individual's birth chart. At this crucial juncture, women often experience a crisis of self, unexplained chaotic feelings, or the uncertainty of personal and professional crossroads. In *Surviving Saturn's Return*, the first book to explore the subject, the authors combine their psychological and astrological expertise to demystify this cosmic source of strife and offer self-help strategies for surviving, even thriving, during this "quarterlife" crisis. In a fun, friendly, and reassuring tone, they explain how to deal with everything from the father complex to money to marriage to maturing confidently into adulthood.

Winner of the IAJS award for best authored book of 2018! C. G. Jung had a profound interest in and involvement with astrology, which he made clear in virtually every volume of the *Collected Works*, as well as in many of his letters. This ancient symbolic system was of primary importance in his understanding of the nature of time, the archetypes, synchronicity, and human fate. *Jung's Studies in Astrology* is an historical survey of his astrological work from the time he began to study the subject. It is based not only on his published writings, but also on the correspondence and documents found in his private archives, many of which have never previously seen the light of day. Liz Greene addresses with thoroughness and detailed scholarship the nature of Jung's involvement with astrology: the ancient, medieval, and modern sources he drew on, the individuals from whom he learned, his ideas about how and why it worked, its religious and philosophical implications, and its applications in the treatment of his patients as well as in his own self-understanding. Greene clearly demonstrates that any serious effort to understand the development of Jung's psychological theories, as well as the nature of his world-view, needs to involve a thorough exploration of his astrological work. This thorough investigation of a central theme in Jung's work will appeal to analytical psychologists and Jungian psychotherapists, students and academics of Jungian and post-Jungian theory, the history of psychology, archetypal thought, mythology and folklore, the history of New Age movements, esotericism, and psychological astrology.

Aion is one of a number of major works that Jung wrote during his seventies that were concerned with the relations between psychology, alchemy and religion. He is particularly concerned in this volume with the rise of Christianity and with the figure of Christ. He explores how Christianity came about when it did, the importance of the figure of Christ and the identification of the figure of Christ with the archetype of the Self. A matter of special importance to Jung in his seventies - the problem of opposites, particularly good and evil - is further discussed and the importance of the symbolism of the fish, which recurs as a symbol of both Christ and the devil, is examined. As a study of the archetype of the self, *Aion* complements *The Archetypes* and *The Collective Unconscious*, which is also published in paperback.

Using Jungian archetypes, the I-Ching, and color/number combinations, Hamaker-Zondag shows you how to interpret the tarot without having to refer to a guidebook for definitions. Her methods will help you use the tarot to understand your personal innerchanges and their potential manifestations in daily life. She also makes an engaging

comparison of the imagery in various decks, so that you can choose the deck that you like the best.

The figure of the alchemical Mercurius features ubiquitously and radically in Jung's later works, but despite this, there has been little research concerning Mercurius in Jungian studies to date. In this book, Mathew Mather explores the figure of the alchemical Mercurius and contextualises and clarifies its significance in Jung's life and works. Placing the alchemical Mercurius as a central concern reveals a Jungian interpretation in which the grail legend, alchemy and precessional astrology, as three thematic threads, converge. In such a treatment, Jung's belief in the dawning of a new platonic month emerges as a central consideration and an esoteric perspective on Jung's life and works is brought more fully to light, constructing a life-myth interpretation. The book is comprised of three parts: Aurea Catena: locating the figure of the alchemical Mercurius within the Western esoteric tradition Daimonic Encounter: the relevance of this figure in Jung's personal life Magnum Opus: Jung's portrayal of this figure in key texts such as Synchronicity, Aion, Mysterium Coniunctionis; and Emma Jung and von Franz's The Grail Legend. The Alchemical Mercurius is a unique contribution to analytical psychology, substantially revealing 'esoteric Jung' and providing valuable perspectives on the theme of his myth for our times. The book will appeal to researchers and academics in the field of analytical psychology as well as postgraduate students.

Arthur miler tells the story of the unlikely friendship between polar opposites - the brilliant but disturbed physicist Wolfgang Pauli and the famous psychoanalyst Carl Jung. Pauli was fascinated by the inner reaches of his own psyche and not afraid to dabble in the occult, while Jung looked to science for answers to the psychological questions that tormented him. Their rich friendship led them, in Jung's words, into 'the no-man's land between physics and the psychology of the unconscious..... the most fascinating yet the darkest hunting ground of our times.' Both were obsessed with the far-reaching significance of number '137' - a primal number that seemed to hint at the origins of the universe itself. Their quest to solve its enigma led them on a journey into the ancient secrets of alchemy, the work of Johannes Kepler, and the Chinese Book of Changes. This captivating dual biography not only narrates the extraordinary collaboration between two of the greatest thinkers of the twentieth century but it also probes the very roots of modern science. Seeks to demonstrate the existence of a direct connection between the planetary movements and human history, and examines such ancient and modern events as the French Revolution and September 11th.

Archetypal Process is a pioneering study linking the ideas of process philosophy, as developed by Alfred North Whitehead and Charles Hartshorne, with the archetypal psychology of C. G. Jung and James Hillman. This is the first work to examine the interconnections of these two modes of thought. Archetypal Process examines the importance of cosmological thinking and the need to ground archetypal psychology in a metaphysical, philosophical framework. It treats the necessity for symbol and myth, the nature of the spirit, and language as a metaphorical vehicle of thought, and finally, it adds a much-needed feminist perspective to the debate.

Edited by Murray Stein and Thomas Arzt, the essays in the series Jung's Red Book for Our Time: Searching for Soul under Postmodern Conditions are geared to the recognition that the posthumous publication of The Red Book: Liber Novus by C. G. Jung in 2009 was a meaningful gift to our contemporary world. "To give birth to the ancient in a new time is creation," Jung inscribed in his Red Book. The essays in this volume continue what was begun in Volume 1 of Jung's Red Book for Our Time: Searching for Soul under Postmodern Conditions by further contextualizing The Red Book culturally and interpreting it for our time. It is significant that this long sequestered work was published during a period in human history marked by disruption, cultural disintegration, broken boundaries, and acute anxiety. The Red Book offers an antidote for this collective illness and can be seen as a link in the aurea catena, the "golden chain" of spiritual wisdom extending down through the ages from biblical times, ancient Greek philosophy, early Christian and Jewish Gnosis, and alchemy. The Red Book is itself a work of creation that gives birth to the old in a new time. This is the second volume of a three-volume series set up on a global and multicultural level and includes essays from the following distinguished Jungian analysts and scholars: - Murray Stein and Thomas Arzt Introduction - John Beebe The Way Cultural Attitudes are Developed in Jung's Red Book - An "Interview" - Kate Burns Soul's Desire to become New: Jung's Journey, Our Initiation - QiRe Ching Aging with The Red Book - Al Collins Dreaming The Red Book Onward: What Do the Dead Seek Today? - Lionel Corbett The Red Book as a Religious d104 - John Dourley Jung, the Nothing and the All - Randy Fertel Trickster, His Apocalyptic Brother, and a World's Unmaking: An Archetypal Reading of Donald Trump - Noa Schwartz Feuerstein India in The Red Book Overtones and Undertones - Grazina Gudaite Integrating Horizontal and Vertical Dimensions of Experience under Postmodern Conditions - Lev Khagai The Red Book of C.G. The longing for redemption is a many-headed daimon that dwells within the most earthbound and prosaic of souls. Neptune is the astrological symbol that describes this energy. Liz Greene, an internationally known astrologer, has given us the most complete and accessible book about Neptune ever written! She explores Neptune themes in literature, myth, politics, religion, fashion, and art to show how this energy manifests.

With Jung's Red Book as their point of departure, two leading scholars explore issues relevant to our thinking today. In this book of dialogues, James Hillman and Sonu Shamdasani reassess psychology, history, and creativity through the lens of Carl Jung's Red Book. Hillman, the founder of Archetypal Psychology, was one of the most prominent psychologists in America and is widely acknowledged as the most original figure to emerge from Jung's school. Shamdasani, editor and cotranslator of Jung's Red Book, is regarded as the leading Jung historian. Hillman and Shamdasani explore a number of the issues in the Red Book—such as our relation with the dead, the figures of our dreams and fantasies, the nature of creative expression, the relation of psychology to art, narrative and storytelling, the significance of depth psychology as a cultural form, the legacy of Christianity, and our relation to the past—and examine the implications these have for our thinking today.

Over the centuries astrology has been a source of help to many people. Today, Jungian depth psychology has proven to be of great value in the therapy process. In this book, Alice O. Howell has successfully merged the wisdom of both disciplines, forming a warm and symbiotic relationship between them. Presented as a series of semi-autobiographical letters to an analyst friend, the author presents her ideas with a rare combination of humor and wisdom. It is an exciting, landmark work that brings into play the insights of Carl Jung alongside those of respected astrologers such as Marc Edmund Jones and Dane Rudhyar. Why and how astrology connects to the spiritual dimension is the underlying thrust of this book in which each chapter presents insightful, thought-provoking ideas and concepts that will help the reader better understand the chart from an esoteric perspective. Specific chapters focus on each of the planets, chart symbolism, karma, causality and synchronicity, ego and self, and the meaning of the chart. About this book, reviewers wrote: ".Jungian Symbolism in Astrology has an intimate and personal flavor that makes it an extraordinary pleasure to read." Richard Nolle, Dell Horoscope ..".it can be enjoyed and understood by anyone with an interest in either Jung, astrology, or both."

C. G. Jung's The Red Book: Liber Novus, published posthumously in 2009, explores Jung's own journey from an inner state of alienation and depression to the restoration of his soul, as well as offering a prophetic narrative of the collective human psyche as it journeys from unconsciousness to a greater awareness of its own inner dichotomy of good and evil. Jung utilised astrological symbols throughout to help him comprehend the personal as well as universal meanings of his visions. In The Astrological World of Jung's Liber Novus, Liz Greene explores the planetary journey Jung portrayed in this remarkable work and investigates the ways in which he used astrological images and themes as an interpretive lens to help him understand the nature of his visions and the deeper psychological meaning behind them. Greene's analysis includes a number of mythic and archetypal elements, including the stories of Salome, Siegfried and Elijah, and demonstrates that astrology, as Jung understood and worked with it, is unquestionably one of the most important foundation stones of analytical psychology, and an essential part of understanding his legacy. This unique study will appeal to analytical psychologists and Jungian psychotherapists, students and academics of Jungian and post-Jungian theory, the history of psychology, archetypal thought, mythology and folklore, the history of New Age movements, esotericism and psychological astrology.
