A state-of-the-art weight-lifting and nutritional blueprint for "skinny" guys who want to pack on muscle Let's face it, naturally skinny guys are at a distinct genetic disadvantage when it comes to building muscle mass. But with the proper advice, these "hardgainers" definitely can realize their fitness goals. In *Scrawny to Brawny*, the authors draw on their years of practical experience as private strength and nutrition coaches to provide hardgainers with:

- A progressive, state-of-the-art program that optimizes results with shorter, less frequent workouts that maximize compound exercises
- A unique, action-based perspective on nutrition that shows how to prepare quick muscle-building meals and snacks--and how to take advantage of several critical times in the day when muscle growth can be stimulated by food intake
- Vital information on how to identify and fix any weak links in their physiques that may be precursors to injury

Designed not only for frustrated adult hardgainers but also--with its strong anti-steroid message--a terrific book for the large teen market, *Scrawny to Brawny* fills a significant gap in the weight-lifting arsenal.

The remarkable true story of a team of doctors who – through years of scientific sleuthing and observant care—discover a surprising connection between opioids and memory, one that holds promise and peril for any one of us. How could you lose your memory overnight, and what would it mean? The day neurologist Jed Barash sees the baffling brain scan of a young patient with devastating amnesia marks the beginning of a quest to answer those questions. First detected in a cluster of stigmatized opioid overdose victims in Massachusetts with severe damage to the hippocampus—the brain's memory center—this rare syndrome reveals how the tragic plight of the unfortunate few can open the door to advances in medical science. After overcoming initial skepticism that investigating the syndrome is worth the effort—and that fentanyl is the likely culprit—Barash and a growing team of dedicated doctors explore the threat that people who take opioids chronically as prescribed to treat severe pain may gradually put their memories at risk. At the same time, they begin to grasp the potential for this syndrome to shed light on the most elusive memory thief of all—Alzheimer's disease. Through the prism of this fascinating story, Aguirre goes on to examine how researchers tease out the fundamental nature of memory and the many mysteries still to be solved. Where do memories live? Why do we forget most of what happens in a day but remember some events with stunning clarity years later? How real are our memories? And what purpose do they actually serve? Perhaps the greatest mystery in *The Memory Thief* is why Alzheimer's has evaded capture for a century even though it afflicts tens of millions around the world and lies in wait for millions more. Aguirre deftly explores this question and reveals promising new strategies and developments that may finally break the long stalemate in the fight against this dreaded disease. But at its core, Aguirre's genre-bending and deeply-reported book is about paying attention to the things that initially don't make sense—like the amnesiac syndrome—and how these mysteries can move science closer to an ever-evolving version of the truth.

You don't need to grind out hours and hours of boring cardio to shed ugly belly fat and love handles and get a shredded six-pack. (How many flabby treadmillers have you come across over the years?) You don't need to completely abstain from "cheat" foods while getting down to single-digit body fat percentages. If you plan cheat meals correctly, you can actually speed your metabolism up and accelerate fat loss. (These BS lies are pushed by all the big magazines and even by many trainers.) How to get a lean, cut physique that you love (and that girls drool over) by spending no more than 5 percent of your time each day. The 4 laws of muscle growth that, when applied, turn your body into an anabolic, muscle-building machine. You'll be shocked at how easy it really is to get big once you know what you're doing... How to develop a lightning-fast metabolism that burns up fat quickly and leaves you feeling full of energy all day long. The carefully-selected exercises that deliver MAXIMUM results for your efforts, helping you build a big, full chest, a wide, tapered back, and bulging biceps. A no-BS guide to supplements that will save you hundreds if not THOUSANDS of dollars each year that you would've wasted on products that are nothing more than bunk science and marketing hype. How to get shredded while still indulging in the "cheat" foods that you love every week like pasta, pizza, and ice cream. And a whole lot more! The bottom line is you CAN achieve that "Hollywood hunk" body without having your life revolve around it--no long hours in the gym, no starving yourself, no grueling cardio that turns your stomach. Imagine, just 12 weeks from now, being constantly complimented on how you look and asked what the heck you're doing to make such startling gains. Imagine enjoying the added benefits of high energy levels, no aches and pains, better spirits, and knowing that you're getting healthier every day. SPECIAL BONUS FOR READERS! The truth about the effects of fasting and the "starvation mode" myth. Yup, it's a myth, and you may even want to incorporate some fasting into your meal schedule. Why eating a substantial amount of carbohydrates every day won't make you fat as some "experts" claim, but why going low-carb can be beneficial for some. The scientific secrets of getting a six-pack. Forget 6-minute gimmicks, doing endless crunches, and hours of grueling cardio--it's actually pretty easy when you know what you're doing. Developed by business mogul and fitness buff Strauss Zelnick--founder of the private equity firm Zelnick Media Capital and president and CEO of Take-Two Interactive, the company behind blockbuster video games such as Grand Theft Auto and NBA2K-- the strategies contained in Becoming Ageless are the same tactics that allowed Zelnick to evolve from a skinny, out-of-shape business executive (a workaholic wunderkind who headed the film studio 20th Century Fox in his early 30s) to one of the world's fittest and most physically active executives who reached his best-ever shape in his late 50s! "If you believe my fitness buddies," Zelnick writes, "I have a body that's aging in reverse...And Becoming Ageless is filled with the amazing tips and unique principles you'd find if you trained with me."

If you're short on time and sick of the same old boring cardio routine and want to kick your fat loss into high gear by working out less and...heaven forbid...actually have some fun...then you want to read this new book. Here's the deal: The "old school" of cardio has you doing grinding, grueling long-distance runs or bike rides for hours and hours each week to burn a little bit of fat and, unfortunately, eat away muscle too (giving you that "skinny and flabby" look). Fortunately, the science of exercise has progressed and the "new school" of cardio has arrived, and it's a dream come true. If you follow the rules of the "new school" of cardio, you can have a lean, toned body by working out less than 20 minutes per day (you can even get in an intense, fat-burning workout in 5 minutes if you know what you're doing!). In this book, you're going to learn how to spend less time exercising to burn more fat and build muscle, and you won't have to ever step foot in a gym if you don't want to. And it's a fast read--no fluff here. Here are some of the secrets you'll learn inside: The 4 biggest weight loss myths and mistakes that keep people fat and stuck in a rut. If you've fallen victim to any of these (and most people have), you NEED to have this information. The 3 simple laws of healthy fat loss. All workable weight-loss methods rely on the three simple rules to achieve results, and once you know them, you don't need to chase fads. Why long-distance jogging is an incredibly inefficient way to lose weight and what you should do instead to have a lean, sexy body that you're proud of. (The good news is it's easy and takes no more than 20 minutes per day!) A fat-incinerating method of cardio that you can literally do during the 2-3 minute commercial breaks of your favorite TV shows. 4 killer circuit training workouts that not only melt fat but give you hard, rippling muscles that will make people green with envy. And more... This book is for people that hate doing cardio and want to squeeze every ounce of fat loss possible out of their workouts. Forget pounding the pavement for hours and hours every week just to lose a little fat and muscle. Follow the methods taught in this book and you can torch fat in a fraction of the time and get tight, toned muscles (and you might actually have some fun too!). SPECIAL BONUS FOR READERS! With this book you'll also get a free 23-page bonus report from the author called "12 Health & Fitness Mistakes You Don't Know You're Making." In this free bonus report, you're going to learn the truth behind 12 of the most common health & fitness myths out there that ruin people's efforts to get fit. Men love shortcuts. If there's a way to accomplish a job quicker and more efficiently, they're all for it. That goes for work and working out. Now, new research shows that as little as 15 minutes of resistance training is just as effective in spiking a man's metabolism—his fat-burning furnace—as a workout lasting more than twice as long. All it takes is 15 minutes to achieve lifelong results—and men are more likely to stick to an exercise plan if it's chopped down to those 15 minutes. The Men's Health Big Book of 15-Minute Workouts contains fast-paced circuit training and interval workouts that boost calorie burn, build muscle, and fry belly fat in half the time of regular workouts. Readers can choose from at-home, body-weight-only workouts and total-body barbell programs to exercises that target major muscle groups—the chest, arms, legs, and back—and sport-specific workouts. Other highlights include: - a special section of 15-minute core workouts to build a rock-hard six-pack - an eating plan with delicious meals that take 15 minutes or less to prepare - workouts for the office or when you're traveling and can't make it to the gym - hundreds of tips from America's best trainers, nutritionists, and exercise scientists
