"I don't think I've ever read a book that paints such a complex and accurate landscape of what it is like to live with the legacy of trauma as this book does, while offering a comprehensive approach to healing." --from the foreword by Bessel van der Kolk A pioneering researcher gives us a new understanding of stress and trauma, as well as the tools to heal and thrive Stress is our internal response to an experience that our brain perceives as threatening or challenging. Trauma is our response to an experience in which we feel powerless or lacking agency. Until now, researchers have treated these conditions as different, but they actually lie along a continuum. Dr. Elizabeth Stanley explains the significance of this continuum, how it affects our resilience in the face of challenge, and why an event that's stressful for one person can be traumatizing for another. This groundbreaking book examines the cultural norms that impede resilience in America, especially our collective tendency to disconnect stress from its potentially extreme consequences and override our need to recover. It explains the science of how to direct our attention to perform under stress and recover from trauma. With training, we can access agency, even in extreme-stress environments. In fact, any maladaptive behavior or response conditioned through stress or trauma can, with intentionality and understanding, be reconditioned and healed. The key is to use strategies that access not just the thinking brain but also the survival brain. By directing our attention in particular ways, we can widen the window within which our thinking brain and survival brain work together cooperatively. When we use awareness to regulate our biology this way, we can access our best, uniquely human qualities: our compassion, courage, curiosity, creativity, and connection with others. By building our resilience, we can train ourselves to make wise decisions and access choice--even during times of incredible stress, uncertainty, and change. With stories from men and women Dr. Stanley has trained in settings as varied as military bases, healthcare facilities, and Capitol Hill, as well as her own striking experiences with stress and trauma, she gives readers hands-on strategies they can use themselves, whether they want to perform under pressure or heal from traumatic experience, while at the same time pointing our understanding in a new direction. Krakauer's page-turning bestseller explores a famed missing person mystery while unraveling the larger riddles it holds: the profound pull of the American wilderness on our imagination; the allure of high-risk activities to young men of a certain cast of mind; the complex, charged bond between fathers and sons. "Terrifying... Eloquent... A heart-rending drama of human yearning." —New York Times In April 1992 a young man from a well-to-do family hitchhiked to Alaska and walked alone into the wilderness north of Mt. McKinley. He had given \$25,000 in savings to charity, abandoned his car and most of his possessions, burned all the cash in his wallet, and invented a new life for himself. Four months later, his decomposed body was found by a moose hunter. How Christopher Johnson McCandless came to die is the unforgettable story of Into the Wild. Immediately after graduating from college in 1991, McCandless had roamed through the West and Southwest on a vision quest like those made by his heroes Jack

London and John Muir. In the Mojave Desert he abandoned his car, stripped it of its license plates, and burned all of his cash. He would give himself a new name, Alexander Supertramp, and, unencumbered by money and belongings, he would be free to wallow in the raw, unfiltered experiences that nature presented. Craving a blank spot on the map, McCandless simply threw the maps away. Leaving behind his desperate parents and sister, he vanished into the wild. Jon Krakauer constructs a clarifying prism through which he reassembles the disquieting facts of McCandless's short life. Admitting an interest that borders on obsession, he searches for the clues to the drives and desires that propelled McCandless. When McCandless's innocent mistakes turn out to be irreversible and fatal, he becomes the stuff of tabloid headlines and is dismissed for his naiveté, pretensions, and hubris. He is said to have had a death wish but wanting to die is a very different thing from being compelled to look over the edge. Krakauer brings McCandless's uncompromising pilgrimage out of the shadows, and the peril, adversity, and renunciation sought by this enigmatic young man are illuminated with a rare understanding--and not an ounce of sentimentality. Mesmerizing, heartbreaking, *Into the Wild* is a tour de force. The power and luminosity of Jon Krakauer's stoytelling blaze through every page.

"From the beloved books editor at *Glamour* magazine comes a heartfelt and painfully funny debut about what happens when a wife and mother of three leaps at the chance to fulfill her professional destiny--only to learn every opportunity comes at a price. In *A Window Opens*, Elisabeth Egan brings us Alice Pearse, a compulsively honest, longing-to-have-it-all, sandwich generation heroine for our social-media-obsessed, lean in (or opt out) age. Like her fictional forebears Kate Reddy and Bridget Jones, Alice plays many roles (which she never refers to as "wearing many hats" and wishes you wouldn't, either). She is a mostly-happily married mother of three, an attentive daughter, an ambivalent dog-owner, a part-time editor, a loyal neighbor, and a Zen commuter. She is not: a cook, a craftswoman, a decorator, an active PTA member, a natural caretaker, or the breadwinner. But when her husband makes a radical career change, Alice is ready to lean in--and she knows exactly how lucky she is to land a job at *Scroll*, a hip young start-up which promises to be the future of reading, with its chain of chic literary lounges and dedication to beloved classics. The Holy Grail of working mothers--an intellectually satisfying job and a happy personal life--seems suddenly within reach. Despite the disapproval of her best friend, who owns the local bookstore, Alice is proud of her new "balancing act" (which is more like a three-ring circus) until her dad gets sick, her marriage flounders, her babysitter gets fed up, her kids start to grow up, and her work takes an unexpected turn. Fans of *I Don't Know How She Does It*, *Where'd You Go Bernadette*, and *The Storied Life of A.J. Fikry* will cheer as Alice realizes the question is not whether it's possible to have it all, but what does she--Alice Pearse--really want?"--

Post-traumatic stress disorder (PTSD) is an extremely debilitating anxiety condition that can occur after exposure to a terrifying event or ordeal. Although many know that this mental health issue affects veterans of war, many may not know that it also affects victims of domestic violence, sexual violence, natural disasters, crime, car accidents and accidents in the workplace. No matter the cause of their illness, people with PTSD will often relive their traumatic experience in the form of flashbacks, memories, nightmares, and frightening thoughts. This is especially true when they are exposed to events or objects that remind them of their

trauma. Left untreated, PTSD can lead to emotional numbness, insomnia, addiction, anxiety, depression, and even suicide. In *The PTSD Workbook, Second Edition*, psychologists and trauma experts Mary Beth Williams and Soili Poijula outline techniques and interventions used by PTSD experts from around the world to offer trauma survivors the most effective tools available to conquer their most distressing trauma-related symptoms, whether they are a veteran, a rape survivor, or a crime victim. Based in cognitive behavioral therapy (CBT), the book is extremely accessible and easy-to-use, offering evidence-based therapy at a low cost. This new edition features chapters focusing on veterans with PTSD, the link between cortisol and adrenaline and its role in PTSD and overall mental health, and the mind-body component of PTSD. This book is designed to arm PTSD survivors with the emotional resilience they need to get their lives back together after a traumatic event.

In this New York Times–bestselling book, Dr. Daniel Siegel shows parents how to turn one of the most challenging developmental periods in their children’s lives into one of the most rewarding. Between the ages of twelve and twenty-four, the brain changes in important and, at times, challenging ways. In *Brainstorm*, Dr. Daniel Siegel busts a number of commonly held myths about adolescence—for example, that it is merely a stage of “immaturity” filled with often “crazy” behavior. According to Siegel, during adolescence we learn vital skills, such as how to leave home and enter the larger world, connect deeply with others, and safely experiment and take risks. Drawing on important new research in the field of interpersonal neurobiology, Siegel explores exciting ways in which understanding how the brain functions can improve the lives of adolescents, making their relationships more fulfilling and less lonely and distressing on both sides of the generational divide.

The Body Keeps the Score Brain, Mind, and Body in the Healing of Trauma

Survivors of trauma—whether abuse, accidents, or war—can end up profoundly wounded, betrayed by their bodies that failed to get

them to safety and that are a source of pain. In order to fully heal from trauma, a connection must be made with oneself, including one's body. The trauma-sensitive yoga described in this book moves beyond traditional talk therapies that focus on the mind, by bringing the body actively into the healing process. This allows trauma survivors to cultivate a more positive relationship to their body through gentle breath, mindfulness, and movement practices. *Overcoming Trauma through Yoga* is a book for survivors, clinicians, and yoga instructors who are interested in mind/body healing. It introduces trauma-sensitive yoga, a modified approach to yoga developed in collaboration between yoga teachers and clinicians at the Trauma Center at Justice Resource Institute, led by yoga teacher David Emerson, along with medical doctor Bessel van der Kolk. The book begins with an in-depth description of trauma and post-traumatic stress disorder (PTSD), including a description of how trauma is held in the body and the need for body-based treatment. It offers a brief history of yoga, describes various styles of yoga commonly found in Western practice, and identifies four key themes of trauma-sensitive yoga. Chair-based exercises are described that can be incorporated into individual or group therapy, targeting specific treatment goals, and modifications are offered for mat-based yoga classes. Each exercise includes trauma-sensitive language to introduce the practice, as well as photographs to illustrate the poses. The practices have been offered to a wide range of individuals and groups, including men and women, teens, returning veterans, and others. Rounded out by valuable quotes and case stories, the book presents mindfulness, breathing, and yoga exercises that can be used by home practitioners, yoga teachers, and therapists as a way to cultivate awareness, tolerance, and an increased acceptance of the self.

What causes people to continually relive what they most want to forget, and what treatments could help restore them to a life with purpose and joy? Here, Dr Bessel van der Kolk offers a new paradigm for effectively treating traumatic stress. Neither talking nor drug therapies have proven entirely satisfactory. With stories of his own work and those of specialists around the globe, *The Body Keeps the Score* sheds new light on the routes away from trauma - which lie in the regulation and syncing of body and mind, using sport, drama, yoga, mindfulness, meditation and other routes to equilibrium.

Trauma happens in everyday life. Veterans and their families experience the aftermath of combat, one in five Americans has been molested, one in four grew up as alcoholic, one in three couples have engaged in physical violence. One of the pioneers on

trauma, Dr. Bessel van der Kolk has spent three decades studying how trauma shapes the body and the brain which affects the trauma victim's capacity for pleasure, engagement, self-control, and trust. He leads us through innovative treatments that offer alternative paths to recovery by activating the brain's neuroplasticity. *The Body Keeps the Score* shows various studies by leading experts where they expose the power relationships have in hurting and healing—and it shows hope for regaining control over our own lives.

**\*\*Unraveling Trauma in the Body, Brain and Mind—a Revolution in Treatment\*\*** In this culmination of his life's work, Peter A. Levine draws on his broad experience as a clinician, a student of comparative brain research, a stress scientist and a keen observer of the naturalistic animal world to explain the nature and transformation of trauma in the body, brain and psyche. *An Unspoken Voice* is based on the idea that trauma is neither a disease nor a disorder, but rather an injury caused by fright, helplessness and loss that can be healed by engaging our innate capacity to self-regulate high states of arousal and intense emotions. Enriched with a coherent theoretical framework and compelling case examples, the book elegantly blends the latest findings in biology, neuroscience and body-oriented psychotherapy to show that when we bring together animal instinct and reason, we can become more whole human beings.

“This groundbreaking book offers a compelling understanding of inherited trauma and fresh, powerful tools for relieving its suffering. Mark Wolynn is a wise and trustworthy guide on the journey toward healing.” —Tara Brach, PhD, author of *Radical Acceptance* and *True Refuge* A groundbreaking approach to transforming traumatic legacies passed down in families over generations, by an acclaimed expert in the field Depression. Anxiety. Chronic Pain. Phobias. Obsessive thoughts. The evidence is

compelling: the roots of these difficulties may not reside in our immediate life experience or in chemical imbalances in our brains—but in the lives of our parents, grandparents, and even great-grandparents. The latest scientific research, now making headlines, supports what many have long intuited—that traumatic experience can be passed down through generations. *It Didn't Start with You* builds on the work of leading experts in post-traumatic stress, including Mount Sinai School of Medicine neuroscientist Rachel Yehuda and psychiatrist Bessel van der Kolk, author of *The Body Keeps the Score*. Even if the person who suffered the original trauma has died, or the story has been forgotten or silenced, memory and feelings can live on. These emotional legacies are often hidden, encoded in everything from gene expression to everyday language, and they play a far greater role in our emotional and physical health than has ever before been understood. As a pioneer in the field of inherited family trauma, Mark Wolynn has worked with individuals and groups on a therapeutic level for over twenty years. *It Didn't Start with You* offers a pragmatic and prescriptive guide to his method, the Core Language Approach. Diagnostic self-inventories provide a way to uncover the fears and anxieties conveyed through everyday words, behaviors, and physical symptoms. Techniques for developing a genogram or extended family tree create a map of experiences going back through the generations. And visualization, active imagination, and direct dialogue create pathways to reconnection, integration, and reclaiming life and health. *It Didn't Start With You* is a transformative approach to resolving longstanding difficulties that in many cases, traditional therapy, drugs, or other interventions have not had the capacity to touch.

Hailed by critics and readers alike, Jessica Stern's riveting memoir examines the horrors of trauma and denial as she investigates her own unsolved adolescent sexual assault at the hands of a serial rapist. Alone in an unlocked house, in a safe suburban Massachusetts town, two good, obedient girls, Jessica Stern, fifteen, and her sister, fourteen, were raped on the night of October 1, 1973. The rapist was never caught. For over thirty years, Stern denied the pain and the trauma of the assault. Following the example of her family, Stern—who lost her mother at the age of three, and whose father was a Holocaust survivor—focused on her work instead of her terror. She became a world-class expert on terrorism and post-traumatic stress disorder who interviewed extremists around the globe. But while her career took off, her success hinged on her symptoms. After her ordeal, she no longer felt fear in normally frightening situations. Stern believed she'd disassociated from the trauma altogether, until a dedicated police lieutenant reopened the case. With the help of the lieutenant, Stern began her own investigation to uncover the truth about the town of Concord, her own family, and her own mind. The result is *Denial*, a candid, courageous, and ultimately hopeful look at a trauma and its aftermath.

She's a romantic at heart, living in the most unromantic of worlds . . . Nicknamed Sweet Abelli for her docile nature, Elena smiles on cue and has a charming response for everything. She's the favored daughter, the perfect mafia principessa . . . or was. Now, all she can see in the mirror's reflection is blood staining her hands like crimson paint. They say first impressions are everything . . . In the murky waters of New York's underworld, Elena's sister is arranged to marry Nicolas

Russo. A Made Man, a boss, a cheat-even measured against mafia standards. His reputation stretches far and wide and is darker than his black suits and ties. After his and Elena's first encounter ends with an accidental glare on her part, she realizes he's just as rude as he is handsome. She doesn't like the man or anything he stands for, though that doesn't stop her heart from pattering like rain against glass when he's near, nor the shiver that ghosts down her spine at the sound of his voice. And he's always near. Telling her what to do. Making her feel hotter than any future brother-in-law should. Elena may be the Sweet Abelli on the outside, but she's beginning to learn she has a taste for the darkness, for rough hands, cigarettes, and whiskey-colored eyes. Having already escaped one scandal, however, she can hardly afford to be swept up in another. Besides, even if he were hers, everyone knows you don't fall in love with a Made Man . . . right? This is a standalone forbidden romance.

Trauma is the response to a deeply distressing or disturbing event that overwhelms an individual's ability to cope, causes feelings of helplessness, diminishes their sense of self and their ability to feel the full range of emotions and experiences. The effects of trauma can be devastating for sufferers, their families and future generations. Here one of the world's experts on traumatic stress offers a bold new paradigm for treatment, moving away from standard talking and drug therapies and towards an alternative approach that heals mind, brain and body. 'Van der Kolk draws on thirty years of experience to argue powerfully that trauma is one of the West's most urgent public health issues ... Packed with science and human stories' New Scientist 'Breathtaking in its scope and breadth, a seminal work by one of the preeminent pioneers in trauma research and treatment' Peter A. Levine, author of In An Unspoken Voice. In Learning The Body Keeps the Score, he uses recent scientific advances to show how trauma literally reshapes both body and brain, compromising sufferers' capacities for pleasure, engagement, self-control, and trust. He explores innovative treatments-from neurofeedback and meditation to sports, drama, and yoga-that offer new paths to recovery by activating the brain's natural neuroplasticity. Based on Dr. van der Kolk's own research and that of other leading specialists, The Body Keeps the Score exposes the tremendous power of our relationships both to hurt and to heal-and offers new hope for reclaiming lives.

of Archimedes when he hopped out of his tub butt naked and into the streets screaming Eureka! The author, Dr. Bessel Van Der Kolk, lets us know in this book that trauma doesn't only happen to a specific group of people. It isn't limited to a particular area. It happens everywhere around us: to combat soldiers, to our friends and family, and maybe even to you. Did you know that if there are five people in a room one of them was sexually molested as a child? It would be an outrageous claim to make if it weren't backed up by research done by the Centre for Disease Control and Prevention which revealed that: one in five Americans was sexually molested as a child; one in four was beaten by a parent to the point of a mark being left on their body; and one in three couples engages in physical violence. A quarter of us grew up with alcoholic relatives, and one out of eight people have witnessed their mother being beaten or hit. These are trauma facts, the ones we know of in America. Who knows the values in other continents? Trauma has always existed throughout time, through wars, plagues and famine, leaving traces of its effect everywhere: in our histories and cultures, in our minds and emotions, on our bodies, on our ability to feel love and joy, on our ability to be intimate. As humans we are resilient, continuing to move through time and evolution no matter the event or struggle. But the effects of trauma are not just suffered by those who go through traumatic events, it spreads: to friends and family, especially to family. No one wants to hear their sister got raped. Now updated with new material throughout, Alicia F. Lieberman's *The Emotional Life of the Toddler* is the seminal, detailed look into the varied and intense emotional life of children aged one to three. Hailed as "groundbreaking" by *The Boston Globe* after its initial publication, the new edition includes the latest research on this crucial stage of development. Anyone who has followed an active toddler around for a day knows that a child of this age is a whirlwind of explosive, contradictory, and ever-changing emotions. Alicia F. Lieberman offers an in-depth examination of toddlers' emotional development, and illuminates how to optimize this crucial stage so that toddlers can develop into emotionally healthy children and adults. Drawing on her lifelong research, Dr. Lieberman addresses commonly asked questions and issues. Why, for example, is "no" often the favorite response of the toddler? How should parents deal with the anger they might feel when their toddler is being aggressively stubborn? Why does a crying toddler run to his mother for a hug only to push himself vigorously away as soon as she begins to embrace him? This updated edition also addresses twenty-first century concerns such as how to handle screen time on devices and parenting in a post-internet world. With the help of numerous examples and vivid cases, Lieberman answers these and other questions, providing, in the process, a rich, insightful profile of the roller coaster emotional world of the toddler.

More than 100,000 copies sold! Millions of Americans know yoga as a superb form of exercise and as a potent source of calm in the midst of our stress-filled lives. Far fewer are aware of the full promise of yoga as "the way of the fully alive human being"--a 4,000-year-old practical path of liberation that fits the needs of modern Western seekers with startling

precision. Now one of America's leading scholars of yoga psychology--who is also a Western-trained psychotherapist--offers this marvelously lively and personal account of an ancient tradition that promises "the soul awake in this lifetime." Drawing on the vivid stories of practitioners at the largest yoga center in America, where he has lived and taught for more than ten years, Stephen Cope describes the philosophy, psychology, and practice of yoga--a practical science of development that urges us not to transcend or dissolve the self, but rather to encounter it more deeply. In this irreverent modern-day Pilgrim's Progress, Cope introduces us to an unforgettable cast of contemporary seekers--on the road to enlightenment carrying all the baggage of the human condition: confusion, loss, disappointment, addiction, and the eternal conflicts around sex and relationship. As he describes the subtle shifts of energy and consciousness that happen at each stage of the path, we discover that in yoga, "liberation" does not require us to leave life in the world for some transcendent spiritual plane. Life itself is the path. Above all, Cope shows how yoga can heal the suffering of self-estrangement that pervades our society, leading us to a new sense of purpose and to a deeper, more satisfying life in the world.

In this groundbreaking book, a leading clinical psychiatrist redefines how we think about and treat victims of trauma. A "stunning achievement" that remains a "classic for our generation." (Bessel van der Kolk, M.D., author of *The Body Keeps the Score*).

Trauma and Recovery is revered as the seminal text on understanding trauma survivors. By placing individual experience in a broader political frame, Harvard psychiatrist Judith Herman argues that psychological trauma is inseparable from its social and political context. Drawing on her own research on incest, as well as a vast literature on combat veterans and victims of political terror, she shows surprising parallels between private horrors like child abuse and public horrors like war. Hailed by the *New York Times* as "one of the most important psychiatry works to be published since Freud," *Trauma and Recovery* is essential reading for anyone who seeks to understand how we heal and are healed.

A top expert on human trauma argues that we vastly overestimate how common PTSD is and fail to recognize how resilient people really are After 9/11, mental health professionals flocked to New York to handle what everyone assumed would be a flood of trauma cases. Oddly, the flood never came. In *The End of Trauma*, pioneering psychologist George A. Bonanno argues that we failed to predict the psychological response to 9/11 because most of what we understand about trauma is wrong. For starters, it's not nearly as common as we think. In fact, people are overwhelmingly resilient to adversity. What we often interpret as PTSD are signs of a natural process of learning how to deal with a specific situation. We can cope far more effectively if we understand how this process works. Drawing on four decades of research, Bonanno explains what makes us resilient, why we sometimes aren't, and how we can better handle traumatic stress. Hopeful and humane, *The End of Trauma* overturns everything we thought we knew about how people respond to hardship.

Researchers have shown that survivors of accidents, disaster, and childhood trauma often endure lifelong symptoms ranging from anxiety and depression to unexplained physical pain, fatigue, illness, and harmful "acting out" behaviors. Today, professionals and clients in both the bodywork and the psychotherapeutic fields nationwide are turning to Peter A. Levine's breakthrough Somatic Experiencing® methods to actively overcome these challenges. In *Healing Trauma*, Dr. Levine gives you the personal how-to guide for using the theory he first introduced in his highly acclaimed work *Waking the Tiger*. Join him to discover: how to develop body awareness to "renegotiate" and heal traumas by "revisiting" them rather than reliving them; emergency "first-aid" measures for times of distress; and nature's lessons for uncovering the physiological roots of your emotions." Trauma is a fact of life," teaches Peter Levine, "but it doesn't have to be a life sentence." Now, with one fully integrated self-healing tool, he shares his essential methods to address unexplained symptoms of trauma at their source—the body—to return us to the natural state in which we are meant to live in.

and untreated cause of human suffering. When I use the word trauma, I am talking here about the often debilitating symptoms that many people suffer from in the aftermath of perceived life-threatening or overwhelming experiences. Recently, trauma has been used as a buzzword to replace everyday stress, as in, "I had a traumatic day at work." However, this use is completely misleading. While it is true that all traumatic events are stressful, all stressful events are not traumatic. Unique to Each Individual When it comes to trauma, no two people are exactly alike. What proves harmful over the long term to one person may be exhilarating to another. There are many factors involved in the wide range of response to threat. These responses depend upon genetic make-up, an individual's history of trauma, even his or her family dynamics. It is vital that we appreciate these differences. Simply knowing that certain kinds of early childhood experiences can severely diminish our ability to cope and be present in the world may elicit compassion and support rather than harsh judgment, both for ourselves and for others. Perhaps the most important thing I have learned about trauma is that people, especially children, can be overwhelmed by what we usually think of as common everyday events. Until recently, our understanding of trauma was limited to "shell-shocked" soldiers who have been devastated by war, victims of severe abuse or violence, and those who have suffered catastrophic accidents and injuries. This narrow view could not be further from the truth. The fact is that, over time, a series of seemingly minor mishaps can have a damaging effect on a person. Trauma does not have to stem from a major catastrophe. Some common triggering events include: • Automobile accidents (even fender benders) • Routine invasive medical procedures • Loss of loved ones • Natural disasters, such as earthquakes and hurricanes Even falling off a bicycle can be overwhelming to a child under certain circumstances. We will discuss those circumstances later. For now, I will simply say that almost all of us have experienced some form of trauma, either directly or indirectly.

The murder of a world-famous physicist raises fears that the Illuminati are operating again after centuries of silence, and religion professor Robert Langdon is called in to assist with the case.

Many men have the skills to lead a church, but only some are called. Dave Harvey helps men considering pastoral ministry to see God's active role in the process of discerning their calling. God's Word offers a clear framework for evaluating one's call, especially within the context of community. Harvey offers six diagnostic questions to help prospective pastors process their calling, and what they should be doing now if they aren't sure. Illustrated with personal and historical stories, Harvey explores biblical and practical principles for determining the pastoral call. Over the past twenty-four years of ministry, Harvey has enjoyed assisting many men in discerning whether they are called into ministry. This book will guide you through that all-important process with wisdom and confidence in God's faithfulness in your life.

An examination of childhood trauma and its surreptitious, debilitating effects by one of the world's leading psychoanalysts. Never before has world-renowned psychoanalyst Alice Miller examined so persuasively the long-range consequences of childhood abuse on the body. Using the experiences of her patients along with the biographical stories of literary giants such as Virginia Woolf, Franz Kafka, and Marcel Proust, Miller shows how a child's humiliation, impotence, and bottled rage will manifest itself as adult

illness—be it cancer, stroke, or other debilitating diseases. Never one to shy away from controversy, Miller urges society as a whole to jettison its belief in the Fourth Commandment and not to extend forgiveness to parents whose tyrannical childrearing methods have resulted in unhappy, and often ruined, adult lives. In this empowering work, writes Rutgers professor Philip Greven, "readers will learn how to confront the overt and covert traumas of their own childhoods with the enlightened guidance of Alice Miller."

"A heartfelt, subversively funny memoir and a bold personal manifesto that pushes back against the superficial expectations of motherhood -- and challenges the idea that there's a "right" way to raise kids. With hard-won knowledge gained from having four kids in four years, Kristen Howerton navigates the emotional and sometimes messy waters of motherhood, sharing valuable lessons from her journey through infertility, adoption, pregnancy, toddler tantrums, divorce, and the shock and awe of parenting teens. Howerton recounts how she learned to opt out from the pressure to do it all perfectly. As a mom of both white and black children and a licensed therapist, Howerton talks frankly about the thorny issues parents face today, whether it's finding good mom friends, confronting racism, disciplining other people's kids, or falling short of that elusive work/life balance. Howerton's experience--the expectations, the stress, the total lack of control, and yes, the indignities of driving a minivan (which now sits in her driveway littered with crushed Cheetos and the remnants of her self-esteem)--along with her ability to laugh at herself, reminds parents they are not alone on this unpredictable ride"--
