"If you're raising a boy, you need this brilliant book. It is clear, wise, and eye-opening." --Lisa Damour, Ph.D., author of *Untangled* When boys enter puberty, they tend to get quiet--or at least quieter than before--and parents often misread their signals. Here's how to navigate their retreat and steer them through this confusing passage, by the bestselling author of *The Care and Keeping of You* series and *Guy Stuff: The Body Book for Boys*. What is my son doing behind his constantly closed door? What's with his curt responses, impulsiveness, newfound obsession with gaming, and . . . that funky smell? As pediatrician and mother of two teenagers Cara Natterson explains, puberty starts in boys long before any visible signs appear, and that causes confusion about their changing temperaments for boys and parents alike. Often, they also grow quieter as they grow taller, which leads to less parent-child communication. But, as Natterson warns in *Decoding Boys*, we respect their increasing "need" for privacy, monosyllabic conversations, and alone time at their peril. Explaining how modern culture mixes badly with male adolescent biology, Natterson offers science, strategies, scripts, and tips for getting it right: * recognizing the first signs of puberty and talking to our sons about the wide range of "normal" through the whole developmental process * why teenagers make irrational decisions even though they look mature--and how to steer them toward better choices * managing video game and screen time, including discussing the unrealistic and dangerous nature of pornography * why boys need emotional and physical contact with parents--and how to give it in ways they'll accept * how to prepare boys to resist both old and new social pressures--drugs, alcohol, vaping, and sexting * teaching consent and sensitivity in the #MeToo culture *Decoding Boys* is a powerful and validating lifeline, a book that will help today's parents keep their sons safe, healthy, and resilient, as well as ensure they will become emotionally secure young men. Praise for *Decoding Boys* "Comforting . . . a common-sensical and gently humorous exploration of male puberty's many trials."--Kirkus Reviews

Then Meg Hickling, a guest speaker, comes to talk to them about a new type of science. Hickling talks about the "science names" for the children's body parts, about good and bad touches and about making babies. She coaches the children not to be embarrassed or shy about body science: "We are going to make this just like a science lesson, we will learn to think like a scientist and we will learn the scientific names for our private parts," she says. Hickling is a Registered Nurse who has been teaching sexual education for over 25 years. She is an outstanding educator, and her ability to convey difficult material with sensitivity, gentle humour and warmth distinguishes her as a remarkable teacher and role model.
