

The Candle Making Manual

Ayurvedic medicine (also called Ayurveda) is one of the world's oldest medical systems. It originated in India and has evolved there over thousands of years. It is a holistic healing science. Ayurvedic practice involves the use of medications that typically contain herbs, metals, minerals, or other materials. Now-a-days people are attracted more towards Ayurvedic medicines as the allopathic medicines are costlier and have side effects. There is more and more scientific research being conducted in our country for treatment of various diseases by Ayurvedic and herbal therapy. Research on medicinal and cosmetic uses of herbs is contributing to the growth of herbal industry. A large number of ailments have Ayurvedic treatment much superior to the other system of medicines and this has been recognized world over. Medicine has become an increasingly accepted alternative medical treatment in America during the last two decades. Up to 80% of people in India use either Ayurveda or other traditional medicines. It is believed that building a healthy metabolic system, attaining good digestion and proper excretion leads to vitality. India is said to have advantage of well recorded and well practiced knowledge of traditional herbal medicines. Herbal products are in huge demand in the developed world for health care, for the reason that they are efficient, safe and have lesser side effects. Efforts have been made on this book to enable readers to explore details regarding medicinal plants and their processing, learn about the unique composition of Rooh Afza, a clinical study of Chyavanaprash produced by Ayurveda rasashala, a clinical assessment of effect of triphala inlipoma, formulae and processes of different types of Ayurvedic Medicines like churan, capsules, syrup, sharbat, pastes etc that are used in various ailments. This book has something for everyone.

Before the foundation of academies of art in London in 1758 and Philadelphia in 1805, most individuals who were to emerge as artists trained in workshops of varying degrees of relevance. Easel painters began their careers apprenticed to carriage, house, sign or ship painters, whilst a few were placed with those who made pictures. Sculptors emerged from a training as ornamental plasterers or carvers. Of the many other trades in a position to offer an appropriate background were limning, staining, engraving, surveying, chasing and die-sinking. In addition, plumbers gained the right to use oil painting and, for plasterers, the application of distemper was an extension of their trade. Central to the theme of this book is the notion that, for those who were to become either painters or sculptor, a training in a trade met their practical needs. This training was of an altogether different nature to an education in an art school. In the past, prospective artists were offered, by means of apprenticeships, an empirical rather than a theoretical understanding of their ultimate vocation. James Ayres provides a lively account of the inter-relationship between art and trade in the late seventeenth to early nineteenth centuries, in both Britain and North America. He demonstrates with numerous, illustrated examples, the many cross-overs in the art and mystery of artistic training, and, to modern eyes, the sometimes incongruous relationships between the various trades that contributed to the blossoming of many artistic careers, including some of the most illustrious names of the long eighteenth century.

Candle Making Manual Complete Knowledge and Easy-to-make Recipes

Cosmetics have been in utilization for more than thousands years. More commonly known as make-up, it includes a host of skin products like foundation, lip colors etc. The international market for skincare and color cosmetics surpassed a sale of 53 billion dollars in 2002. The quantity and number of latest products brought to market both nationally and internationally continues to develop at a fast pace. Cosmetic chemists all the time are looking for attractive and striking material that enhances skin's appearance and healthiness. A huge collection of compounds is required to supply these products. The newest edition of the Cosmetics Toiletries and Fragrance Association (CTFA) Dictionary displays more than 10,000 raw materials and the list continues to increase with every year hundreds of new ingredients being added. The cosmetic chemistry has encompasses a vast area of study and one such is Herbal Cosmetics. Herbal cosmetics are the product of cosmetic chemistry, a science that combines the skills of

specialists in chemistry, physics, biology, medicine and herbs. Since cosmetics are applied mostly to the skin, hair and nails, a brief description of the anatomy of these is desirable. Herbal cosmetic major users are girls and women who are very much peculiar about their skin type and requirement. Synthetic cosmetic being harsh and prone to more side- effects, herbal cosmetic is quickly replacing it and gaining a lot of popularity. As a result it has created an enormous market for itself both domestic as well as export market. Herbal Cosmetics Handbook has been featured as best seller. The book contains formulae, manufacturing processes of different herbal cosmetics like cosmetics for skin, nails, hair etc. It also covers analysis method of cosmetics, toxicity and test method.
