

The Chinese Army 1937-49 World War II And Civil War

Alejandro de Quesada

The Chinese Army 1937-49 Philip Jowett, 2005-07-13 Although the Chinese contribution to Allied victory in World War II (1939-1945) is often ignored, China fought the Japanese Empire for far longer than any other belligerent nation. By the time that the Sino-Japanese War became absorbed into the wider conflict at the end of 1941, Chinese armies had already suffered huge casualties and half the country had been lost. By fighting on with Allied support, China tied down a million Japanese troops. After Japan's defeat in 1945, China was immediately plunged back into civil war between Chiang Kai-shek's Nationalists and Mao Tse-tung's Communists; and the latter's victory in 1949 changed the world for the rest of the 20th century and beyond.

Chinese Warlord Armies 1911-30 Philip Jowett, 2012-02-20 Defeated in the Sino-Japanese War 1894-95 and the Boxer Rebellion of 1900, Imperial China collapsed into revolution and a republic was proclaimed in 1912. From the death of the first president in 1916 to the rise of the Nationalist Kuomintang government in 1926, the differing regions of this vast country were ruled by endlessly forming, breaking and re-forming alliances of regional generals who ruled as 'warlords'. These warlords acted essentially as local kings and much like Sengoku-period Japan, fewer, larger power-blocks emerged, fielding armies hundreds of thousands strong. In the mid-to-late 1920s some of these regional warlords. This book will reveal each great warlord as well as the organization of their forces which acquired much and very varied weaponry from the west including the latest French air force bombers. They were also joined by Japanese, White Russian and some Western soldiers of fortune which adds even more colour to a fascinating and oft-forgotten period.

The Japanese Home Front 1937-45 Philip Jowett, 2021-08-19 From the beginning of the Second Sino-Japanese War in 1937 until the Japanese surrender in August 1945, a multitude of military and civil-defence forces strove to support the Japanese war effort and latterly prepared to defend the Home Islands against invasion. During World War II, Japan was the world's most militarized society and by 1945 nearly every Japanese male over the age of 10 wore some kind of military attire, as did the majority of women and girls. In this volume, Philip Jowett reveals the many military and civil-defence organizations active in wartime Japan, while specially commissioned artwork and carefully chosen archive photographs depict the appearance of the men, women and children involved in the Japanese war effort in the Home Islands throughout World War II.

Chinese Civil War Armies 1911-49 Philip Jowett,1997-07-15 The fall of the Manchu Empire in 1911 ended thousands of years of Imperial rule and ushered in almost 40 years of conflict in China. From the abdication of Pu-Yi, the last emperor, the invasion of Manchuria by the Japanese, and the 'long march', to the birth of the People's Republic of China in 1949, this book looks in detail at the fighting men, and women, who fought for the communists, imperialists, republicans, nationalists, warlords and the puppet armies. The result is a comprehensive and illuminating work covering a large and complex series of combatants and conflicts.

When We Were One W.c. Heinz,c Heinz,2009-07-21 Before W. C. Heinz embarked on his illustrious career as one of the premier sports writers of the past fifty years, he served as a war correspondent for the New York Sun. Now for the first time ever, Heinz's finest work on World War II, written both during and after the war, is collected in one volume. From his first-person account aboard the U.S.S. Nevada during D-Day in 1944 to his legendary dispatches from the towns and battlefields of the European front, Heinz vividly conveys the courage, humor, and humanity of men under fire. Whether describing a battle scene or a soldier, Heinz brings home the war like few others ever have. In the second half of the book, he and his fourteen-year-old son, Bud, revisit the beaches of Normandy with D-Day veteran Major General Earl Rudder, who recounts his experiences there; in another story he describes, in his patented you-are-there style, the morning three German spies were executed; and in the concluding piece, Heinz revisits many of the towns he journeyed through as the American army fought its way across Europe twenty years before. When We Were One is a superb collection of writing on World War II that ranks with the finest ever assembled on any war.

The Chinese People's Liberation Army since 1949 Benjamin Lai,2012-11-20 The Chinese People's Liberation Army (PLA) is the largest army in the world. China is predicted to be on the brink of overtaking the USA as the world's largest economy, and China's military capabilities and global ambitions are the single greatest long-term pre-occupation of Western governments. The PLA has progressed steadily - if slowly - since its creation in 1949, from a mass army of unsophisticated infantry limited to 'human wave' tactics into a highly sophisticated force with wide capabilities. The most recent reforms (1989 to the present day) have been made possible by massive economic liberalization, and have seen not only the modernization of all the armed forces but the beginnings of global outreach, even including Chinese participation in UN peace-keeping missions to Africa, the Middle East, and Haiti. Featuring rare photographs and specially commissioned color artwork, this study explores the developing structure, organization, equipment, appearance, and character of the Chinese People's Liberation Army from its creation until today.

China's Wars Philip Jowett,2013-11-19 By the end of the first decade of the 21st century, China had become one of the great powers of the modern world. Economically, politically, and militarily, its power and international reach is only exceeded by the United States, the world's one remaining superpower. Its military spending, though dwarfed by the United States, is

over \$100 billion a year and it is busy developing an aircraft carrier, a stealth fighter jet, and missiles that can shoot down satellites - all in an effort to project its power on a global scale. This is all a far cry from its position at the end of the 19th century, when it was a ramshackle and isolated medieval empire upon whom the European colonial powers could impose their wishes at will. The period from the First Sino-Japanese War of 1894-95 through to the Communist victory in the Chinese Civil War ending in 1949 was one of near-constant conflict that saw China emerge as a fledgling new world power. Militarily at least, this is the defining period in Chinese history. This is the period that saw the breakdown of the traditional imperial system of control, under threat from a series of rebellions throughout the 19th century, and the rise of the warlords and civil war in 1911. Despite the establishment of the Republic of China in 1912, the country was still riven by internal strife as different factions sought to control the fledgling state, while much of the power in the land was exercised by regional warlords in a constant state of conflict with one another. The 1920s saw the rise of two opposing revolutionary movements, the Kuomintang, led first by Sun Yat-Sen and later Chiang Kai-Shek, and the Chinese Communist Party, one of whose early leaders was Mao Tse-Tung. The Kuomintang managed to gain control of the majority of China by the late 1920s, and started a long running conflict with the Communists at the same time. The late 1920s also saw the first significant Japanese intervention in China, and in 1931 the Japanese took control of the whole of Manchuria. By 1937 this had escalated into out and out conflict with the Chinese, a conflict which would last till the Japanese defeat in World War II in 1945. Even then China had to struggle through four years of painful civil war before the Chinese Communist Party finally established control in 1949. In this new study Philip Jowett traces the complicated military history of China during these pivotal years, describing in detail the conflicts that forge the modern superpower that is China today.

US 10th Mountain Division in World War II Gordon L. Rottman, 2012-10-20 The 10th was the only US mountain division to be raised in World War II, and still has a high profile, being involved in operations from Iraq to Somalia and from Haiti to Afghanistan. It did not arrive in Europe until winter 1944/45, but then fought hard in the harsh mountainous terrain of Northern Italy. The division was special in a number of ways. Its personnel were selected for physical fitness and experience in winter sports, mountaineering, and hunting, unlike the rest of the infantry. It was highly trained in mountain and winter warfare, including the use of skis and snowshoes, while its organization, field clothing, and some personal equipment also differed from that of the usual infantry division. The division made extensive use of pack-mules, and its reconnaissance unit was horse-mounted, conducting the last horse-mounted charge in US history in April 1945. Featuring full-color artwork and rare photographs, this is the gripping story of the US Army's only mountain division in action during the closing months of World War II.

Armies of the Balkan Wars 1912-13 Philip Jowett, 2012-03-20 In 1912, the Balkan states formed an alliance in an effort to break free from the crumbling Ottoman Empire. Forming an army of some 645,000 troops from Greece, Bulgaria,

Serbia and Montenegro, they took on a force of 400,000 Turkish soldiers. Both sides were equipped with the latest weapons technology. This book looks at the diverse and sometimes colourful uniforms worn by both sides, paying special attention to insignia, weapons and equipment. It also gives an overview of the campaigns that became a 'priming pan' of World War I.

Chinese Soldier vs Japanese Soldier Benjamin Lai, 2018-10-18 In July 1937, the Marco Polo Bridge Incident sparked a bloody conflict between Chinese and Japanese forces that would rage across China and beyond for more than eight years. The two sides' forces brought very different strengths and limitations to the conflict. In 1937 China was divided into factions, each controlled by warlords with independent forces, and there was no unified Chinese army. In order to fight the Japanese Chiang Kai-shek, the nominal leader of Nationalist China, was compelled to do deals with these regional powers. For their part, the Japanese employed ground forces broadly comparable to those fielded by Western powers, including modern artillery and tanks. Featuring specially commissioned artwork and drawing upon an array of sources, this study investigates the origins, training, doctrine and armament of the Chinese and Japanese forces who fought in the opening stages of the Second Sino-Japanese War.

German Soldiers of World War Two Jean De La Garde, 2014 Every soldier is shown on a full page, front and back with numerous detail shots of head gear, equipment etc. The chronological order of the original edition is retained, while the widest selection of types of Third Reich armed forces members is featured, from the most famous uniforms to the more obscure. In addition to land forces, this book also offers a wide selection of airmen and sailor uniforms.

Forgotten Ally Rana Mitter, 2013-09-10 A history of the Chinese experience in WWII, named a Book of the Year by both the Economist and the Financial Times: "Superb" (The New York Times Book Review). In 1937, two years before Hitler invaded Poland, Chinese troops clashed with Japanese occupiers in the first battle of World War II. Joining with the United States, the Soviet Union, and Great Britain, China became the fourth great ally in a devastating struggle for its very survival. In this book, prize-winning historian Rana Mitter unfurls China's drama of invasion, resistance, slaughter, and political intrigue as never before. Based on groundbreaking research, this gripping narrative focuses on a handful of unforgettable characters, including Chiang Kai-shek, Mao Zedong, and Chiang's American chief of staff, "Vinegar Joe" Stilwell—and also recounts the sacrifice and resilience of everyday Chinese people through the horrors of bombings, famines, and the infamous Rape of Nanking. More than any other twentieth-century event, World War II was crucial in shaping China's worldview, making *Forgotten Ally* both a definitive work of history and an indispensable guide to today's China and its relationship with the West.

Imperial Chinese Armies 1840-1911 Philip Jowett, 2016-04-21 An in-depth analysis of the Chinese Armies that fought a series of increasingly fractious wars over nearly a century. Beginning with a run through of the Chinese forces that combated the British and French during the two Opium Wars, this history goes on to trace the forces who were drawn into internal

wars and rebellions in the 1850s and 60s, the open warfare in North Vietnam, the string of defeats suffered during the First Sino-Japanese war and the Boxer Rebellion. Providing an unparalleled insight into the dizzying array of troop types and unique uniforms, this is a history of the sometimes-painful modernization of China's military forces during one of her most turbulent periods of history.

Japanese Army of World War II Philip Warner,1973

The Spanish Civil War 1936-39 (2) Alejandro de Quesada,2015-01-20 The Spanish Civil War was the curtainraiser to World War II and involved a complex collection of forces, particularly on the Republican side. This title illustrates how diverse the Republican forces were, drawn from loyal elements of the Spanish army that rejected the appeal of the rebel generals, a wide range of volunteer regional units and political militias, and supported by volunteers from many other countries, including Great Britain, France and Germany, in units known as the International Brigades. The wide range of equipment and uniforms worn by these troops is revealed, as is, the organization of militias into conventional brigades and divisions. Featuring specially commissioned full-colour artwork, this second part of a two-part study depicts the fighting men of the Republican forces and examples of their foreign comrades.

Shanghai and Nanjing 1937 Benjamin Lai,2017-06-29 From 1931, China and Japan had been embroiled in a number of small-scale conflicts that had seen vast swathes of territory being occupied by the Japanese. On 7 July 1937, the Japanese engineered the Marco Polo Bridge Incident, which led to the fall of Beijing and Tianjin and the start of a de facto state of war between the two countries. This force then moved south, landing an expeditionary force to take Shanghai and from there drive west to capture Nanjing. This fully illustrated book tells the story of the Japanese assault on these two great Chinese cities. The battle of Shanghai was the first large-scale urban warfare of World War II and one of the bloodiest battles of the entire Sino-Japanese War. The determined resistance by Chinese inflicted sizable Japanese casualties, and may well have contributed to the subsequent massacre of prisoners and civilians in the battle of Nanjing, tarnishing Japan's reputation in the eyes of the world.

US Armed Forces in China 1856-1941 John Langellier,2012-01-20 This volume reveals the little-known story of the 90-year presence of American forces in China until the fall of Peking in 1941. Included is coverage of the first operations on the Pearl River in 1856 as well as US involvement in the Boxer Rebellion of 1900. As China entered a chaotic period in her history, known as the years of the "Warlords", American marines also participated in numerous small-scale amphibious landings. Finally, during the later Sino-Japanese War and early into World War II, US volunteers of the "Flying Tigers" became renowned for their combat missions in support of Chinese Nationalist forces, and their aerial duels are also recounted by the author John P. Langellier, who has spent several years researching the subject in the US and China. Discover the history of these various actions and the different services involved, recreated in color artwork and illustrated

with rare, previously unpublished photographs.

Forgotten Ally Rana Mitter, 2013 Made possible through access to newly unsealed Chinese archives, this riveting book tells the untold story of China's devastating eight-year-war of resistance against Japan in World War II, rewriting the larger history of the war in the process. 30,000 first printing.

Axis Cavalry in World War II Jeffrey T. Fowler, 2001-11-25 It is often forgotten that the German Wehrmacht of 1939-45 relied heavily upon horses. Not only was the majority of Army transport and much of the artillery dependent on draught horse teams; the Germans also kept a horse-mounted cavalry division in the field until the end of 1941. After withdrawing it, they discovered a need to revive and greatly expand their cavalry units in 1943-45. The Army and Waffen-SS cavalry proved their worth on the Russian Front, supported by other Axis cavalry contingents - Romanian, Hungarian, Italian, and locally recruited. In this book an experienced horseman describes that last generation of horse-soldiers in a text supported by tables, photographs, and meticulous colour plates.
