An inside look at the obsessive, secretive, and often bizarre world of high-profile stamp collecting, told through the journey of the world's most sought-after stamp. When it was issued in 1856, it cost a penny. In 2014, this tiny square of faded red paper sold at Sotheby's for nearly \$9.5 million, the largest amount ever paid for a postage stamp at auction. Through the stories of the eccentric characters who have bought, owned, and sold the one-cent magenta in the years in between, James Barron delivers a fascinating tale of global history and immense wealth, and of the human desire to collect. One-cent magentas were provisional stamps, printed quickly in what was then British Guiana when a shipment of official stamps from London did not arrive. They were intended for periodicals, and most were thrown out with the newspapers. But one stamp survived. The singular one-cent magenta has had only nine owners since a twelve-year-old boy discovered it in 1873 as he sorted through papers in his uncle's house. He soon sold it for what would be \$17 today. (That's been called the worst stamp deal in history.) Among later owners was a fabulously wealthy Frenchman who hid the stamp from almost everyone (even King George V of England couldn't get a peek); a businessman who traveled with the stamp in a briefcase he handcuffed to his wrist; and John E. du Pont, an heir to the chemical fortune, who died while serving a thirty-year sentence for the murder of Olympic wrestler Dave Schultz. Recommended for fans of Nicholas A. Basbanes, Susan Orlean, and Simon Winchester, The One-Cent Magenta explores the intersection of obsessive pursuits and great affluence and asks why we want most what is most rare.

The most powerful force in the world economy today is the redefinition of the relationship between state and marketplace - a process that goes by the name of privatization though this term is inadequate to express its far-reaching changes. We are moving from an era in which governments sought to seize and control the 'commanding heights' of the economy to an era in which the idea of free markets is capturing the commanding heights of world economic thinking. Basic views of how society ought to be organized are undergoing rapid change, trillions of dollars are changing hands and so is fundamental political power. Great new wealth is being created - as are huge opportunities and huge risks. Taking a worldwide perspective, including Britain, where the process began with Mrs Thatcher, Europe and the former USSR, China, Latin America and the US, THE COMMANDING HEIGHTS shows how a revolution in ideas is transforming the world economy - why it is happening, how it can go wrong and what it will mean for the global economy going into the twenty-first century.

With everything from production figures and collector values to little-known facts that have remained buried for decades, this book seeks to show that the Duck Stamp program is not only one of the best conservation programs, it is also the richest art contest.
