'My favourite book' Tinchy Stryder BA Business Life Book of the Month The ultimate hustle is to move freely between the street and corporate worlds, to find your flow and never stay locked in the same position. This is a manifesto for how to operate in the twenty-first century, where everything has been turned on its head. Building on the runaway success of Robert Greene's *The 48 Laws of Power* (almost five million copies sold), the 'modern Machiavelli' teams up with rapper 50 Cent to show how the power game of success can be played to your advantage. Drawing on the lore of gangsters, hustlers, and hip-hop artists, as well as 50 Cent's business and artistic dealings, the authors present the 'Laws of 50', revealing how to become a master strategist and supreme realist. Success comes from seeking an advantage in each and every encounter, and The 50th Law offers indispensable advice on how to win in business - and in life.

Selected as a Financial Times Best Book of 2013 In *Strategy: A History*, Sir Lawrence Freedman, one of the world's leading authorities on war and international politics, captures the vast history of strategic thinking, in a consistently engaging and insightful account of how strategy came to pervade every aspect of our lives. The range of Freedman's narrative is extraordinary, moving from the surprisingly advanced strategy practiced in primate groups, to the opposing strategies of Achilles

and Odysseus in The Iliad, the strategic advice of Sun Tzu and Machiavelli, the great military innovations of Baron Henri de Jomini and Carl von Clausewitz, the grounding of revolutionary strategy in class struggles by Marx, the insights into corporate strategy found in Peter Drucker and Alfred Sloan, and the contributions of the leading social scientists working on strategy today. The core issue at the heart of strategy, the author notes, is whether it is possible to manipulate and shape our environment rather than simply become the victim of forces beyond one's control. Time and again, Freedman demonstrates that the inherent unpredictability of this environment-subject to chance events, the efforts of opponents, the missteps of friends-provides strategy with its challenge and its drama. Armies or corporations or nations rarely move from one predictable state of affairs to another, but instead feel their way through a series of states, each one not quite what was anticipated, requiring a reappraisal of the original strategy, including its ultimate objective. Thus the picture of strategy that emerges in this book is one that is fluid and flexible, governed by the starting point, not the end point. A brilliant overview of the most prominent strategic theories in history, from David's use of deception against Goliath, to the modern use of game theory in economics, this masterful volume sums up a lifetime of reflection on strategy.

Axelrod seeks to answer this question. In 1980, he organized the famed Computer Prisoners Dilemma Tournament, which sought to find the optimal strategy for survival in a particular game. Over and over, the simplest strategy, a cooperative program called Tit for Tat, shut out the competition. In other words, cooperation, not unfettered competition, turns out to be our best chance for survival. A vital book for leaders and decision makers, *The Evolution of Cooperation* reveals how cooperative principles help us think better about everything from military strategy, to political elections, to family dynamics. *The Game is Afoot!* A collection of art, poetry and writing from fans of the great detective Sherlock Holmes and his companion Doctor Watson. From the deadly Moriarty to domestic life of Holmes and Watson, *The Art of Deduction* showcases some of the greatest talent from arguably the oldest fan base in the world.

Luther King Jr, and many others, Greene teaches us how to detach ourselves from our own emotions and master self-control, how to develop the empathy that leads to insight, how to look behind people's masks, and how to resist conformity to develop your singular sense of purpose. Whether at work, in relationships, or in shaping the world around you, *The Laws of Human Nature* offers brilliant tactics for success, self-improvement, and self-defense.

This concise version of the business classic *Mastery* provides a shortcut to Greene's powerful new tools for achieving greatness. Around the globe, people are facing the same problem - that we are born as individuals but are forced to conform to the rules of society if we want to succeed. To see our uniqueness expressed in our achievements, we must first learn the rules - and then change them completely. Charles Darwin began as an underachieving schoolboy, Leonardo da Vinci as an illegitimate outcast. The secret of their eventual greatness lies in a 'rigorous apprenticeship': they learnt to master the 'hidden codes' which determine ultimate success or failure. Then, they rewrote the rules as a reflection of their own individuality. Drawing on interviews with world leaders, this book builds on the strategies outlined in *The 48 Laws of Power* to provide a practical guide to greatness - and learn how to start living by your own rules.

From the bestselling author of *The 48 Laws of Power* and *The Laws of Human Nature*, a vital work revealing that the secret to mastery is already within you. Each one of us has within us the potential to be a Master.

immediately start to think about their goals. They look at their life and start to measure their accomplishments. I then ask these people, of their goals, how many they would say they accomplish in a year or month. In most cases, they have set goals but they have no idea of the steps or work it takes to accomplish them. I tell you, although we set goals, the outcome we desire is a specific set of results. Let's look at the big picture: the reason why we set goals is because we would like an immediate result, so instead of focusing on the goal, let's focus on the result we want. To me, when I hear the word "goal" I mainly think of wishful thinking. I have no idea how to make this goal a reality, and I know plenty of people who work hard and don't get the result they wanted. Is it possible that, in the process of working toward that goal, they lost sight of the result intended? Or is it possible that they didn't plan the necessary steps to reach the goal/result?

The Art of War is an enduring classic that holds a special place in the culture and history of East Asia. An ancient Chinese text on the philosophy and politics of warfare and military strategy, the treatise was written in 6th century B.C. by a warrior-philosopher now famous all over the world as Sun Tzu. Sun Tzu's teachings remain as relevant to leaders and strategists today as they were to rulers and military generals in ancient times. Divided into thirteen chapters and written succinctly, The Art of War is a must-read for anybody who works in a competitive environment.

There is no room for timidity or confusion. Although the CEO and the board decide a company's overall direction, it is the managers at all levels of the organization who will determine how the vision can be transformed into action. In short, everyone is involved in strategy. But getting it right involves difficult choices: which customers to target, what products to offer, and the best way to keep costs low and service high. And constantly changing business conditions inevitably bring risks. Even after business strategy has been developed, a company must remain nimble and alert to change, and view strategy as an ongoing and evolving process. The message of this guide is simple: strategy matters, and getting it right is fundamental to business success.
