

The Creation Inequality Prehistoric Ancestors

Jacob K. Olupona

The Creation of Inequality Kent Flannery, Joyce Marcus, 2012-05-15 Flannery and Marcus demonstrate that the rise of inequality was not simply the result of population increase, food surplus, or the accumulation of valuables but resulted from conscious manipulation of the unique social logic that lies at the core of every human group. Reversing the social logic can reverse inequality, they argue, without violence.

Applied Anthropology Satish Kedia, John van Willigen, 2005-10-30 Applied Anthropology: Domains of Application, edited by Satish Kedia and John van Willigen, comprises essays by prominent scholars on the potential, accomplishments, and methods of applied anthropology. Domains covered in the volume include development, agriculture, environment, health and medicine, nutrition, population displacement and resettlement, business and industry, education, and aging. The contributors demonstrate in compelling ways how anthropological knowledge, skills, and methodologies can be put to work in addressing social, economic, health, and technical problems facing societies today. With their genuine commitment to protecting the diversity and vitality of human communities, applied anthropologists working in real-life settings have and will continue to have a lasting impact on people around the world. The editors enrich the volume by providing introductory and concluding chapters that offer a detailed historical context for applied anthropology and an exploration of its future directions.

The Dawn of Everything David Graeber, David Wengrow, 2021-11-09 INSTANT NEW YORK TIMES BESTSELLER A dramatically new understanding of human history, challenging our most fundamental assumptions about social evolution—from the development of agriculture and cities to the origins of the state, democracy, and inequality—and revealing new possibilities for human emancipation. For generations, our remote ancestors have been cast as primitive and childlike—either free and equal innocents, or thuggish and warlike. Civilization, we are told, could be achieved only by sacrificing those original freedoms or, alternatively, by taming our baser instincts. David Graeber and David Wengrow show how such theories first emerged in the eighteenth century as a conservative reaction to powerful critiques of European society posed by Indigenous observers and intellectuals. Revisiting this encounter has startling implications for how we make sense of human history today, including the origins of farming, property, cities, democracy, slavery, and civilization itself. Drawing on pathbreaking research in archaeology and anthropology, the authors show how history becomes a far more interesting place once we learn to throw off our conceptual shackles and perceive what's really there. If humans did not

spend 95 percent of their evolutionary past in tiny bands of hunter-gatherers, what were they doing all that time? If agriculture, and cities, did not mean a plunge into hierarchy and domination, then what kinds of social and economic organization did they lead to? The answers are often unexpected, and suggest that the course of human history may be less set in stone, and more full of playful, hopeful possibilities, than we tend to assume. The Dawn of Everything fundamentally transforms our understanding of the human past and offers a path toward imagining new forms of freedom, new ways of organizing society. This is a monumental book of formidable intellectual range, animated by curiosity, moral vision, and a faith in the power of direct action. Includes Black-and-White Illustrations

The Rise of Bronze Age Society Kristian Kristiansen, Thomas B. Larsson, 2005-12-08 Publisher Description

A Prehistory of Ordinary People Monica L. Smith, 2021-11-23 For the past million years, individuals have engaged in multitasking as they interact with the surrounding environment and with each other for the acquisition of daily necessities such as food and goods. Although culture is often perceived as a collective process, it is individual people who use language, experience illness, expend energy, perceive landscapes, and create memories. These processes were sustained at the individual and household level from the time of the earliest social groups to the beginnings of settled agricultural communities and the eventual development of complex societies in the form of chiefdoms, states, and empires. Even after the advent of “civilization” about 6,000 years ago, human culture has for the most part been created and maintained not by the actions of elites—as is commonly proclaimed by many archaeological theorists—but by the many thousands of daily actions carried out by average citizens. With this book, Monica L. Smith examines how the archaeological record of ordinary objects—used by ordinary people—constitutes a manifestation of humankind’s cognitive and social development. A Prehistory of Ordinary People offers an impressive synthesis and accessible style that will appeal to archaeologists, cultural anthropologists, and others interested in the long history of human decision-making.

Prehistoric Myths in Modern Political Philosophy Karl Widerquist, 2016-12-05 How modern philosophers use and perpetuate myths about prehistory The state of nature, the origin of property, the origin of government, the primordial nature of inequality and war why do political philosophers talk so much about the Stone Age? And are they talking about a Stone Age that really happened, or is it just a convenient thought experiment to illustrate their points? Karl Widerquist and Grant S. McCall take a philosophical look at the origin of civilisation, examining political theories to show how claims about prehistory are used. Drawing on the best available evidence from archaeology and anthropology, they show that much of what we think we know about human origins comes from philosophers imagination, not scientific investigation. Key Features Shows how modern political theories employ ambiguous factual claims about prehistory Brings archaeological and anthropological evidence to bear on those claims Tells the story of human origins in a way that reveals many commonly held misconceptions

The Archaeology of Ancestors Hill/Hageman, Hageman, Jon B, 2016-03-23 Contributors to this landmark volume

demonstrate that ancestor veneration was about much more than claiming property rights: the spirits of the dead were central to domestic disputes, displays of wealth, and power and status relationships. Case studies from China, Africa, Europe, and Mesoamerica use the evidence of art, architecture, ritual, and burial practices to explore the complex roles of ancestors in the past. Including a comprehensive overview of nearly two hundred years of anthropological research, *The Archaeology of Ancestors* reveals how and why societies remember and revere the dead. Through analyses of human remains, ritual deposits, and historical documents, contributors explain how ancestors were woven into the social fabric of the living.

Death Rituals and Social Order in the Ancient World Colin Renfrew, Michael J. Boyd, Iain Morley, 2016 This volume, with essays by leading archaeologists and prehistorians, considers how prehistoric humans attempted to recognise, understand and conceptualise death.

Prehistory Chris Gosden, 2018 Recent archaeological discoveries from China and central Asia have changed our understanding of how human civilization developed in the period of some 4 million years before the start of written history. In this new edition of his *Very Short Introduction*, Chris Gosden explores the current theories on the ebb and flow of human cultural variety.

Religion and Economics Resit Ergener, 2020-04-29 This book allows the reader to have an overview of the relations between religion and economics throughout history. It starts with the beginnings of early modern humans, when dreams (of dead ancestors), animism, synchronous movements and a propensity to exchange, led to the emergence of religion, which then contributed to the coordination and pooling of labor and to the definition of groups. This book surveys the various roles played by religion in economic life through the ages, which include the justification of the exploitation of nature, the expansion of trade, the emergence of inequality and of charity, the definition, enhancement and attenuation of hierarchies of dominance, the provision of various services and of the impact religion has had on economic performance at the micro and macro levels.

Human Evolution Beyond Biology and Culture Jeroen C. J. M. van den Bergh, 2018-10-18 A complete account of evolutionary thought in the social, environmental and policy sciences, creating bridges with biology.

Sex at Dawn Christopher Ryan, Cacilda Jetha, 2011-07-05 In this controversial, thought-provoking, and brilliant book, renegade thinkers Christopher Ryan and Cacilda Jetha debunk almost everything we “know” about sex, weaving together convergent, frequently overlooked evidence from anthropology, archaeology, primatology, anatomy, and psychosexuality to show how far from human nature monogamy really is. In *Sex at Dawn*, the authors expose the ancient roots of human sexuality while pointing toward a more optimistic future illuminated by our innate capacities for love, cooperation, and generosity.

Dispersals and Diversification , 2019-12-16 *Dispersals and diversification* offers linguistic and archaeological

perspectives on the disintegration of Proto-Indo-European, the ancestor of the Indo-European language family. Two chapters discuss the early phases of the disintegration of Proto-Indo-European from an archaeological perspective, integrating and interpreting the new evidence from ancient DNA. Six chapters analyse the intricate relationship between the Anatolian branch of Indo-European, probably the first one to separate, and the remaining branches. Three chapters are concerned with the most important unsolved problems of Indo-European subgrouping, namely the status of the postulated Italo-Celtic and Graeco-Armenian subgroups. Two chapters discuss methodological problems with linguistic subgrouping and with the attempt to correlate linguistics and archaeology. Contributors are David W. Anthony, Rasmus Bjørn, José L. García Ramón, Riccardo Ginevra, Adam Hyllested, James A. Johnson, Kristian Kristiansen, H. Craig Melchert, Matthew Scarborough, Peter Schrijver, Matilde Serangeli, Zsolt Simon, Rasmus Thorsø, Michael Weiss.

The Oxford Handbook of the Archaeology of Death and Burial Sarah Tarlow, Liv Nilsson Stutz, 2013-06-06 The Oxford Handbook of the Archaeology of Death and Burial reviews the current state of mortuary archaeology and its practice, highlighting its often contentious place in the modern socio-politics of archaeology. It contains forty-four chapters which focus on the history of the discipline and its current scientific techniques and methods. Written by leading, international scholars in the field, it derives its examples and case studies from a wide range of time periods, such as the middle palaeolithic to the twentieth century, and geographical areas which include Europe, North and South America, Africa, and Asia. Combining up-to-date knowledge of relevant archaeological research with critical assessments of the theme and an evaluation of future research trajectories, it draws attention to the social, symbolic, and theoretical aspects of interpreting mortuary archaeology. The volume is well-illustrated with maps, plans, photographs, and illustrations and is ideally suited for students and researchers.

Order, Legitimacy, and Wealth in Ancient States Janet Richards, Mary Van Buren, 2000-12-07 Three terms, Order, Legitimacy and Wealth, delineate a comparative approach to ancient civilizations initially developed by John Baines, Professor of Egyptology at the University of Oxford, and Norman Yoffee, Professor of Archaeology and Near Eastern Studies at the University of Michigan, in 1992. In an influential paper, they compared and contrasted the nature of social and political power in Egypt and Mesopotamia. This was the first analysis of the impact of wealth and high culture on the development of states. The contributors to the present book, first published in 2000, apply the classic Baines/Yoffee model to a range of ancient states around the world, providing documentary and archaeological evidence on the production and uses of 'high culture', literature and monumental architecture. There are chapters on Mesoamerica, the Andes, the Indus Valley, the Han Dynasty of China, and Greece during the Roman empire, while others expand on the original Egypt-Mesopotamia comparison.

A Discourse on Inequality Jean-Jacques Rousseau, 2016-04-26 A fascinating examination of the relationship between

civilization and inequality from one of history's greatest minds The first man to erect a fence around a piece of land and declare it his own founded civil society—and doomed mankind to millennia of war and famine. The dawn of modern civilization, argues Jean-Jacques Rousseau in this essential treatise on human nature, was also the beginning of inequality. One of the great thinkers of the Enlightenment, Rousseau based his work in compassion for his fellow man. The great crime of despotism, he believed, was the raising of the cruel above the weak. In this landmark text, he spells out the antidote for man's ills: a compassionate revolution to pull up the fences and restore the balance of mankind. This ebook has been professionally proofread to ensure accuracy and readability on all devices.

First Farmers Peter Bellwood,2004-11-30 First Farmers: the Origins of Agricultural Societies offers readers an understanding of the origins and histories of early agricultural populations in all parts of the world. Uses data from archaeology, comparative linguistics, and biological anthropology to cover developments over the past 12,000 years Examines the reasons for the multiple primary origins of agriculture Focuses on agricultural origins in and dispersals out of the Middle East, central Africa, China, New Guinea, Mesoamerica and the northern Andes Covers the origins and dispersals of major language families such as Indo-European, Austronesian, Sino-Tibetan, Niger-Congo and Uto-Aztecan

The Oxford Handbook of Southwest Archaeology Barbara Mills,Severin Fowles,2017-08-15 The American Southwest is one of the most important archaeological regions in the world, with many of the best-studied examples of hunter-gatherer and village-based societies. Research has been carried out in the region for well over a century, and during this time the Southwest has repeatedly stood at the forefront of the development of new archaeological methods and theories. Moreover, research in the Southwest has long been a key site of collaboration between archaeologists, ethnographers, historians, linguists, biological anthropologists, and indigenous intellectuals. This volume marks the most ambitious effort to take stock of the empirical evidence, theoretical orientations, and historical reconstructions of the American Southwest. Over seventy top scholars have joined forces to produce an unparalleled survey of state of archaeological knowledge in the region. Themed chapters on particular methods and theories are accompanied by comprehensive overviews of the culture histories of particular archaeological sequences, from the initial Paleoindian occupation, to the rise of a major ritual center in Chaco Canyon, to the onset of the Spanish and American imperial projects. The result is an essential volume for any researcher working in the region as well as any archaeologist looking to take the pulse of contemporary trends in this key research tradition.

African Religions Jacob K. Olupona,2014 This book connects traditional religions to the thriving religious activity in Africa today.

Ritual and Domestic Life in Prehistoric Europe Richard Bradley,2012-10-12 This fascinating study explores how our prehistoric ancestors developed rituals from everyday life and domestic activities. Richard Bradley contends that for much of

the prehistoric period, ritual was not a distinct sphere of activity. Rather it was the way in which different features of the domestic world were played out until they took on qualities of theatrical performance. With extensive illustrated case-studies, this book examines farming, craft production and the occupation of houses, all of which were ritualized in prehistoric Europe. Successive chapters discuss the ways in which ritual has been studied, drawing on a series of examples that range from Greece to Norway and from Romania to Portugal. They consider practices that extend from the Mesolithic period to the Early Middle Ages and discuss the ways in which ritual and domestic life were intertwined.
