When the group relocates to Turkey and scholars begin disappearing, Matthew realizes he has little power to flight the deadly hands of corrupt political leaders that can wipe him off the face of the earth with the touch of a phone. When the chance arrives to be heroic, Matthew must decide whether he can plunge into history and new love without looking back or retreat into a life of anonymity. Drawing from different 'fields' such as philosophy, psychology, literature, and theology, Joseph Bikart uses decades of experience as a business coach for senior executives around the globe to explore how and why we make the decisions we do. What is it that makes some of us better - or worse - than others at committing to a choice?

What are the forces that hold us back, and how can we successfully overcome them? Every facet of our lives depends on the decisions we make. Yet, how often do we pause to reflect on our ability to make the best and smartest choices? The key is how we confront and refine the decision making process. Joseph Bikart explores the intricacies of decision making, challenging us to understand why we make the choices we do. He explores how the true power of decisions, especially the toughest among them, help us to face our fears and may in turn change how we think about ourselves. The book is broken into four clear parts and punctuated with short practical essays Bikart presents a lively and compelling exploration of the process of decision making covering;

Indecision, indecision - what makes us indecisive? What holds us back and why? Where Art Thou? How and where we get stuck and the importance of relaxing one's grip.

The Momentum of Decisiveness - Keeping our focus and

proactivity. The Deciding Mind - making our smartest choices. Drawing from such different fields as philosophy, psychology, neurology, literature, art history and theology, we are taken on a journey from the depths of procrastination to the elation of decision making. Presenting a fresh perspective on what to do at the proverbial fork in the road, Bikart's unique philosophy is insightful, thought provoking, and potentially life-changing.

Mothering Mennonite marks the first scholarly attempt to incorporate religious groundings in interpretations of motherhood. The essays included here broaden our understanding of maternal identity as something not only constructed within the family and by society at large, but also influenced significantly by historical traditions and contemporary belief systems of religious communities. A multidisciplinary compilation of essays, this volume joins narrative and scholarly voices to address both the roles of mothering in Mennonite contexts and the ways in which Mennonite mothering intersects with and is shaped by the world at large. Contributors address cultural constructions of motherhood within ethnoreligious Mennonite communities, examining mother-daughter relationships and intergenerational influences, analyzing visual and literary representations of Mennonite mothers, challenging cultural constructions and expectations of motherhood, and tracing the effects of specific religious and cultural contexts on mothering in North and South America.'

Buried in the bowels of one of the several intelligence agencies in the US government is an office of clandestine medical personnel. Their mission is to analyze the health and mental state of international persons of interest and report their findings to America's policymakers. The team is on call 24/7 to comment on and analyze any written observations, pictures or videos of such persons of interest that may come into the hands of the U.S. government. The goal is to provide timely information to policymakers and negotiators so that the United States of America may achieve maximum success in dealing with the people concerned. Usually this is done in the safe confines of the Agency walls, but sometimes the analysts are forced to place themselves in harms way. Through it all and despite the circumstances, their Code of Honor is to Do No Harm.

A planet plagued with tumult from outsiders and divided by its own religious dichotomy could face extinction if their faiths are not united and an unholy artifact is destroyed. Safiro, the God of Death, and Sanguina, the Goddess of Life, created two heroes (Vytametas) -- mirror twins separated at birth yet destined to meet in a place where the future of their world will be decided by their powers. The only people who know not the ultimate purpose of the legendary Vytametas are the young heroes themselves. While the teenage Vytametas learn of their world and of their mission, they will be turned against each other by the two faiths they are meant to save: the demented Safiric Brotherhood and the shady Sanguinic Sisterhood.

The world had fallen. The mostly vacant cities were silent now. For those who had not been turned or consumed, remote locations proved the best chance to live a while longer before the inevitable end landed its teeth marks on their flesh or its disease in their blood. To eat or be eaten was the last imperative of the once noble species. All the accoutrements of being the most civilized of creatures had faded away and the human beast had been returned to the savagery of the primordial forest. This was the truth everywhere in the world, except one place—a small island, forgotten before and after

Plato's legendary account of a sunken island civilization called Atlantis has fascinated adventurers for centuries. Recent efforts to find Plato's lost island have culminated in two exciting underwater surveys in the Eastern Mediterranean that were staged in 2004 and 2006—both of which uncovered tantalizing evidence that strongly merits additional inquiry. In this color-illustrated book, Commodore Robert S. Bates sifts through the acquired evidence and argues that our search for Atlantis—or what some call Eden—may now be narrowed to a sunken continent adjacent to Cyprus that geologists located decades ago. The History Channel funded and filmed the second expedition to this site, but you will learn in this book why a third expedition may now be warranted. In recognition of the likely confluence of the two great legends of Atlantis and Eden, Bates calls the ongoing research into this sunken land the Eden-Atlantis Project. This short book offers you a thorough review of the recently obtained archeological evidence pointing to an

Eastern Mediterranean location for Eden-Atlantis. It also links these new scientific facts with the historical evidence that a proto-civilization may have preceded the known civilizations of the ancient Near East.
