America has a long and complicated fascination with serial killers. When we think about the most infamous of these killers, we generally think of men like Ted Bundy, Jeffrey Dahmer, or John Wayne Gacy. Those names make headlines while there's the often-repeated myth that suggests there are no female serial killers. After all, most of us couldn't name a woman on the same scale of infamy as BTK or the elusive Zodiac Killer, can we? As it so often is, the truth is far more complicated. Women kill. While they are less sensationalized than their male counterparts, they are no less deadly. At time of publication, current research shows that one in six serial killers are female, bringing their number to fifteen percent of confirmed serial killers. This reference book includes background information on the killers, their victims, methods, and - where relevant - their arrests, trials, and convictions.

Over 800 entries examine the facts, evidence, and leading theories of a variety of unsolved murders, robberies, kidnappings, serial killings, disappearances, and other crimes.

Over the course of twenty-five years, Dr. Helen Morrison has profiled more than eighty serial killers around the world. What she learned about them will shatter every assumption you've ever had about the most notorious criminals known to man. Judging by appearances, Dr. Helen Morrison has an ordinary life in the suburbs of a major city. She has a physician husband, two children, and a thriving psychiatric clinic. But her life is much more than that. She is one of the country's leading experts on serial killers, and has spent as many as four hundred hours alone in a room with depraved murderers, digging deep into killers' psyches in ways no profiler before ever has. In *My Life Among the Serial Killers*, Dr. Morrison relates how she profiled the Mad Biter, Richard Otto Macek, who chewed on his victims' body parts, stalked Dr. Morrison, then believed she was his wife. She did the last interview with Ed Gein, who was the inspiration for Alfred Hitchcock's *Psycho*. John Wayne Gacy, the clown-obsessed killer of young men, sent her crazed Christmas cards and gave her his paintings as presents. Then there was

Atlanta child killer Wayne Williams; rapist turned murderer Bobby Joe Long; England's Fred and Rosemary West, who killed girls and women in their "House of Horrors"; and Brazil's deadliest killer of children, Marcelo Costa de Andrade. Dr. Morrison has received hundreds of letters from killers, read their diaries and journals, evaluated crime scenes, testified at their trials, and studied photos of the gruesome carnage. She has interviewed the families of the victims -- and the spouses and parents of the killers -- to gain a deeper understanding of the killer's environment and the public persona he adopts. She has also studied serial killers throughout history and shows how this is not a recent phenomenon with psychological autopsies of the fifteenth-century French war hero Gilles de Rais, the sixteenth-century Hungarian Countess Bathory, H. H. Holmes of the late nineteenth century, and Albert Fish of the Roaring Twenties. Through it all, Dr. Morrison has been on a mission to discover the reasons why serial killers are compelled to murder, how they choose their victims, and what we can do to prevent their crimes in the future. Her provocative conclusions will stun you.

There is little more terrifying than those who hunt, stalk and snatch their prey under the cloak of darkness. These hunters search not for animals, but for the touch, taste, and empowerment of human flesh. They are cannibals, vampires and monsters, and they walk among us. These serial killers are not mythical beasts with horns and shaggy hair. They are people living among society, going about their day to day activities until nightfall. They are the Dennis Rader's, the fathers, husbands, church going members of the community. This A-Z encyclopedia of 150 serial killers is the ideal reference book. Included are the most famous true crime serial killers, like Jeffrey Dahmer, John Wayne Gacy, and Richard Ramirez, and not to mention the women who kill, such as Aileen Wuornos and Martha Rendell. There are also lesser known serial killers, covering many countries around the world, so the range is broad. Each of the serial killer files includes information on when and how they killed the victims, the background of each killer, or the suspects in some cases such as the Zodiac killer, their trials and punishments. For some there are chilling quotes by the killers themselves. The Big Book of Serial Killers is an easy to follow collection of information on the world's most heinous murderers.

The Encyclopedia of Mass Murder is a remarkable, revelatory exploration of the world's worst cases of mass murder. This comprehensive guide has been recently revised and updated for its U.S. debut from two true-crime experts. From this chilling collection, a significantly

consistent pattern emerges of the person who commits mass murder: almost always male, a loner lacking in social skills, unable to form stable relationships. Bearing a grudge against society in general or blaming certain individuals in particular, he seeks revenge in the most extreme way. Among the 200 notorious cases profiled are Timothy McVeigh, responsible for the deaths of 168 people in the Oklahoma City bombing, Eric Harris and Dylan Klebold, two heavily armed students who opened fire at Columbine High School, killing 13 students, and Brenda Spencer, a rare instance of a female mass murderer, who shot dead eleven junior high classmates "because," she said, "I don't like Mondays." Eight pages of black-and-white photographs are included.

Covering figures ranging from Catherine Monvoisin to Vlad the Impaler, and describing murders committed in ancient aristocracies to those attributed to vampires, witches, and werewolves, this book documents the historic reality of serial murder.

In 1974, Dennis Lynn Rader stalked and murdered a family of four in Wichita, Kansas. Since adolescence, he had read about serial killers and imagined becoming one. Soon after killing the family, he murdered a young woman and then another, until he had ten victims. He named himself "B.T.K." (bind, torture, kill) and wrote notes that terrorized the city. He remained on the loose for thirty years. No one who knew him guessed his dark secret. He nearly got away with his crimes, but in 2004, he began to play risky games with the police. He made a mistake. When he was arrested, Rader's family, friends, and coworkers were shocked to discover that B.T.K. had been among them, going to work, raising his children, and acting normal. This case stands out both for the brutal treatment of victims and for the ordinary public face that Rader, a church council president, had shown to the outside world. Through jailhouse visits, telephone calls, and written correspondence, Katherine Ramsland worked with Rader himself to analyze the layers of his psyche. Using his drawings, letters, interviews, and Rader's unique codes, she presents in meticulous detail the childhood roots and development of one man's motivation to stalk, torture, and kill. She reveals aspects of the dark motivations of this most famous of living serial killers that have never before been revealed. In this book Katherine Ramsland presents an intelligent, original, and rare glimpse into the making of a serial killer and the potential darkness that lives next door.
