The Film Photography Handbook, 2nd Edition Rediscovering Photography in 35mm, Medium, and Large Format Rocky Nook, Inc.

An invaluable record of African American lives in the aftermath of Emancipation and Reconstruction This book presents a photographic narrative of African American and Native American migration and resettlement in the aftermath of Emancipation and Reconstruction. Taken between 1897 and 1917 by itinerant photographer William Bullard of Worcester, Massachusetts, these photographs address larger themes involving race in American history, many of which remain relevant today: the story of people of color claiming their rightful place in society and creating a community in new surroundings. William Bullard's heretofore unpublished collection of more than 230 glass negatives presenting the African American and Nipmuc communities of Worcester, Massachusetts, at the turn of the century provides an exceptional opportunity to significantly deepen our understanding of the use of photography at a political and personal level. Unlike most extant photographic collections of black Americans taken in this period, the subjects in Bullard's photographs are identified in his logbook, allowing this book to tell specific stories about individuals and re-create a more accurate historical context. In addition, though most publications engaging with African American history focus on the Gilded Age or the Civil Rights eras, this collection of Bullard's photographs exposes a critical gap in many visual histories. Predating the Great Migration, these photographs portray a moment seldom stressed in the historical narrative, replacing stereotypical notions of poverty and dysfunction with accomplishment and respectability.

Three-dimensional stereoviews were wildly popular in Europe and America in the mid-19th century. Yet public infatuation fueled highbrow scorn, and even when the cards fell from favor critics remained disdainful of the format. Thus a dazzling body of photographic work has unjustly been buried. This book unearths the stereograph as an artistic medium and explores the subjects, composition, lighting, tonality, blocking and depth that make the best images so compelling. Overlooked photographers are celebrated, such as one who refused to play favorites during a bitter war and found humanity on both sides. Another took a favorite American glen and uncovered menace at every turn. Another found strange parallels among trees, rocks, waterfalls and tourists, anticipating the formal inventions of Modernist pioneers Cezanne and Seurat. Stereographers are not measured against "high art" photographers--the best practitioners, like film directors or television producers, fused artistry with commercial appeal. Provides a complete guide for all photographers to necessary equipment and set-up procedures for a darkroom and explains how to process film, make prints and slides, and perform other essential functions

was one, to undertake a gruelling hike along the world's longest continuous footpath—The Appalachian Trail. The 2,000-plus-mile trail winds through 14 states, stretching along the east coast of the United States, from Georgia to Maine. With the popularity of digital photography growing by leaps and bounds over the last decade, some say film has been dying a slow death ever since – or is already dead. The reality is that film has never gone away, and in recent years has experienced a surging, renewed popularity – sometimes simply for its retro, analog status, but mostly for film's ability to create a look and feel that many believe digital can still not achieve. If anyone can attest to this, it's Utah photographer Jonathan Canlas, who exclusively shoots with film, and has both an extremely successful wedding photography business as well as a series of popular workshops held numerous times per year around the world. In *Film Is Not Dead: A Digital Photographer's Guide to Shooting Film*, Canlas teams up with co-author Kristen Kalp to open the doors for anyone who wants to begin—or return to—shooting film. Casual, irreverent, fun, inspiring, and beautiful, this unique 10x8 hardcover book teaches the reader the basics of film, cameras, and shooting in this medium. Whether it's discussing the different tone and color characteristics of different films (Kodak, Fuji, etc.), how to load a medium-format camera back, how to create proper exposures, how and where to get film

processed, or how Jonathan uses fun, plastic cameras like the Holga in his commercial and personal work, *Film Is Not Dead* appeals to anyone who is searching to finally begin creating that film look, but until now hasn't known where to start.

The Great War was a turning point of the twentieth century, giving birth to a new, modern, and industrial approach to warfare that changed the world forever. The remembrance, awareness, and knowledge of the conflict and, most importantly, of those who participated and were affected by it, altered from country to country, and in some cases has been almost entirely forgotten. New research strategies have emerged to help broaden our understanding of the First World War. Multidisciplinary approaches have been applied to material culture and conflict landscapes, from archive sources analysis and aerial photography to remote sensing, GIS and field research. Working within the context of a material and archival understanding of war, this book combines papers from different study fields that present interdisciplinary and multidisciplinary approaches towards researching the First World War and its legacies, with particular concentration on the central and eastern European theatres of war.

In recent years, film photography has witnessed a significant renaissance—and not just

among those who have previously shot with film. Interest in film photography and analog photography has also grown enormously among those who only have experience shooting digitally. In *The Film Photography Handbook, 2nd Edition*, authors Chris Marquardt and Monika Andrae speak to both types of film photographers as they offer an easy-to-understand, complete resource to shooting film. In this updated and expanded edition, they address today's working climate, including such topics as the hybrid film/digital workflow, the digitization of negatives, and using smartphones for light metering and to assist in film processing. This book is intended for anyone who is curious about film and analog photography, whether you need a refresher course or are discovering this wonderful format for the first time. You'll learn how easy it is to shoot and process black-and-white film at home, and that just a little special equipment is needed to get into film photography. You'll learn all about:

- The important differences between film and digital photography
- Numerous film cameras, as well as how to buy a second-hand camera
- Film formats, from 35 mm to medium format and large format
- Exposure settings, tonal values, and tonal representations in different types of film, from color negatives and slides to the enormous spectrum of black-and-white films
- Processing film, covering everything you need to know: equipment, chemicals, and workflow
- Scanning negatives to bring your analog photography into a digital workflow
- Both presenting and archiving your prints and negatives

Working in such an "analog" medium requires a unique approach to photography, and it fosters a completely different form of creativity. Working in film and embracing analog photography can also prove to be a great inspiration for your own digital photography, as well. *The Film Photography Handbook, 2nd Edition* covers it all—from the technical to the creative—and will have you shooting film in no time, whether it's with an old rangefinder, an inexpensive Holga, or a medium-format Rolleiflex or Hasselblad.

Jacob Riis (1849-1914) was the author of *How the Other Half Lives* (1890). This study of his life and work includes excerpts from Riis's diary, chronicling romance, poverty, temptation,

and, after many false starts, employment as a writer and reformer. In the second half, Yochelson describes how Riis used photography to shock and influence his readers. The authors describe Riis's intellectual education and discuss the influence of *How the Other Half Lives* on urban history. It shows that Riis argued for charity rather than social justice; but the fact that he understood what it was to be homeless did humanize Riis's work, and that work has continued to inspire reformers. Yochelson focuses on how Riis came to obtain his now famous images, how they were manipulated for publication, and their influence on the young field of photography."

The *Film Developing Cookbook* is an up-to-date manual for modern film development techniques. While the original *Darkroom Cookbook* focused entirely on photographic chemicals and formulae, this book concentrates on films, their characteristics, and the developers each requires for maximum control of the resulting image. The *Film Developing Cookbook* specifically addresses the difficult subject of T-grain film development. It includes rarely found information on film development and the nature of film developers. The authors take bold and controversial stances on many widely accepted film developing dogmas. They tackle many of the widely accepted "myths" of film development. They reject the trend toward 'scientific evaluation' of films and developers in favor of the photographer developing a personal aesthetic without relying exclusively on densitometry or H&D curves. Steve Anchell is a contributing editor to *Outdoor Photographer* and *PhotoWork* magazines. He has written columns, feature articles, and interviews for *Camera & Darkroom*, *View Camera*, *PIC*, *Shutterbug*, *Photo Shopper*, and *PhotoPro* magazines. His previous two books with Focal Press, *The Darkroom Cookbook* and *The Variable Contrast Printing Manual* are photography best-sellers. Steve's photographs have been exhibited in galleries and are shown in private collections. He photographs and prints both color and black-and-white with 35mm, 21/4 and large-format cameras. He has conducted over 80 photographic and darkroom workshops since 1979. Steve is currently the program director for the *Photographer's Formulary Workshops* in Condon, Montana. In early 1998, the first collection of his personal work, entitled *The Nude at Big Sur*, will be published by Whitefish Editions. Bill Troop is a highly respected independent photochemist.

From the Pulitzer Prize-winning photojournalist and New York Times bestselling author, a stunning and personally curated selection of her work across the Middle East, South Asia, and Africa
Pulitzer Prize-winning photojournalist and MacArthur Fellow Lynsey Addario has spent the last two decades bearing witness to the world's most urgent humanitarian and human rights crises. Traveling to the most dangerous and remote corners to document crucial moments such as Afghanistan under the Taliban immediately before and after the 9/11 attacks, Iraq following the US-led invasion and dismantlement of Saddam Hussein's government, and western Sudan in the aftermath of the genocide in Darfur, she has captured through her photographs visual testimony not only of war and injustice but also of humanity, dignity, and resilience. In this compelling collection of more than two hundred photographs, Addario's commitment to exposing the devastating consequences of human conflict is on full display. Her subjects include the lives of female members of the military, as well as the trauma and abuse inflicted on women in male-dominated societies; American soldiers rescuing comrades in the Korengal Valley of Afghanistan, and Libyan opposition troops trading fire in Benghazi. Interspersed between her commanding and arresting images are personal journal entries and letters, as well as revelatory essays from esteemed writers such as Dexter Filkins, Suzy Hansen, and Lydia Polgreen. A powerful and singular work from one of the most brilliant and influential photojournalists working today, *Of Love & War* is a breathtaking record of our complex world in all its inescapable chaos, conflict, and beauty.

Challenges the idea that photographs of political violence exploit their subjects and pander to the voyeuristic tendencies of their viewers. Instead, the author argues that looking at such images is an ethically and politically necessary act that connects us to our modern history of violence and probes the human capacity for cruelty.

How would you go about rebuilding a technological society from scratch? If our technological society collapsed tomorrow what would be the one book you would want to press into the hands of the postapocalyptic survivors? What crucial knowledge would they need to survive in the immediate aftermath and to rebuild civilization as quickly as possible? Human knowledge is collective, distributed across the population. It has built on itself for centuries, becoming vast and increasingly specialized. Most of us are ignorant about the fundamental principles of the civilization that supports us, happily utilizing the latest—or even the most basic—technology without having the slightest idea of why it works or how it came to be. If you had to go back to absolute basics, like some sort of postcataclysmic Robinson Crusoe, would you know how to re-create an internal combustion engine, put together a microscope, get metals out of rock, or even how to produce food for yourself? Lewis Dartnell proposes that the key to preserving civilization in an apocalyptic scenario is to provide a quickstart guide, adapted to cataclysmic circumstances. *The Knowledge* describes many of the modern technologies we employ, but first it explains the fundamentals upon which they are built. Every piece of technology rests on an enormous support network of other technologies, all interlinked and mutually dependent. You can’t hope to build a radio, for example, without understanding how to acquire the raw

materials it requires, as well as generate the electricity needed to run it. But Dartnell doesn't just provide specific information for starting over; he also reveals the greatest invention of them all—the phenomenal knowledge-generating machine that is the scientific method itself. The Knowledge is a brilliantly original guide to the fundamentals of science and how it built our modern world.

The twentieth century generated tens of thousands of hours of American newsfilm but not the scholarly apparatus necessary to analyze and contextualize them. Assembling new approaches to the study of U.S. newsfilm in cinema and television, this book makes a long overdue critical intervention in the field of film and media studies by addressing the format's inherent intermediality; its mediation of "events" for local, national, and transnational communities; its distinctive archival legacies; and, consequently, its integral place in film and television studies more broadly. This collection brings fresh, contemporary methodologies and analysis to bear on a vast amount of material that has languished in relative obscurity for far too long.

"Examining the themes of presence and absence, the relationship between photography and theatre, history and death, these 'reflections on photography' begin as an investigation into the nature of photographs. Then, as Barthes contemplates a photograph of his mother as a child, the book becomes an exposition of his own mind."--Alibris.

From #1 New York Times bestselling author and radio host Mark R. Levin comes a searing plea for a return to America's most sacred values. In *Rediscovering Americanism*, Mark R. Levin revisits the founders' warnings about the perils of overreach by the federal government and concludes that the men who created our country would be outraged and disappointed to see where we've ended up. Levin returns to the impassioned question he's explored in each of his bestselling books: How do we save our exceptional country? Because our values are in such a precarious state, he argues that a restoration to the essential truths on which our country was founded has never been more urgent. Understanding these principles, in Levin's words, can "serve as the antidote to tyrannical regimes and governments." *Rediscovering Americanism* is not an exercise in nostalgia, but an appeal to his fellow citizens to reverse course. This essential book brings Levin's celebrated, sophisticated analysis to the troubling question of America's future, and reminds us what we must restore for the sake of our children and our children's children.

These vintage and contemporary images of Baltimore movie palaces explore the changing face of Charm City with stories and commentary by filmmakers. Since the dawn of popular cinema, Baltimore has been home to hundreds of movie theaters, many of which became legendary monuments to popular culture. But by 2016, the number of cinemas had dwindled to only three. Many theaters have been boarded up, burned out, or repurposed. In this volume, Baltimore Sun photojournalist Amy Davis pairs vintage black-and-white images of downtown movie palaces and modest neighborhood theaters with her own contemporary color photos. *Flickering Treasures* delves into Baltimore's cultural and cinematic history, from its troubling legacy of racial segregation to the technological changes that have shaped both American cities and the movie exhibition business. Images of Electric Park, the Century, the Hippodrome, and scores of other beloved venues are punctuated by stories and interviews, as well as commentary from celebrated Baltimore filmmakers Barry Levinson and John Waters. A map and timeline reveal the one-time presence of movie houses in every corner of the city, and fact boxes include the years of operation, address, architect, and seating capacity for each of the 72 theaters profiled, along with a brief description of each theater's distinct character.
