Affirmations for Addictions, Brain Training and Business. Best practice to shift your beliefs, retrain your thinking and uplift your energy. These positive affirmation statements support you at every level to unleash inner peace, freedom and success, personally and professionally. We believe that positive affirmations are an amazing tool which can transform your life beyond all recognition. They are so simple that anyone can use them, even a child, they are easy to learn how to use (there isn't even really a best way to use them), and even if you don't know what that are yet, you could be using them within 5 minutes, feeling positive, warm, and happy inside too! What is affirmation and why it is so powerful? Affirmation is simply a process of thinking, listening, saying or writing a statement to yourself or other people repeatedly. For example, when you wake up every morning, you may affirm by saying aloud "Today is a great day!" It will have great impact to the rest of your day. Trust me! Before I explain to you the power of affirmation, I think it's important that you understand the power of belief. Perhaps one of the great truths in life is that your belief creates your reality. In other words, your reality is generally a reflection of the beliefs of your subconscious mind. By the way, what is a belief? A belief is simply a thought that is accepted by your subconscious mind. Actually not all thoughts are turned into realities. Only thoughts that are believed by the subconscious mind are turned into realities. The reason why belief turns into reality is because of the universal and natural Law of Attraction. Don't forget to leave a review. Positive reviews for this book will be highly

FXstreet.Com's 2013 Best Book Award! The Sensible Guide to Forex: Safer, Smarter Ways to Survive and Prosper from the Start is written for the risk averse, mainstream retail investor or trader seeking a more effective way to tap forex markets to improve returns and hedge currency risk. As the most widely held currencies are being devalued, they're taking your portfolio down with them—unless you're prepared. For traders, the book focuses on reducing the high risk, complexity, and time demands normally associated with forex trading. For long-term investors, it concentrates on how to hedge currency risk by diversifying portfolios into the strongest currencies for lower risk and higher capital gains and income. The usual forex materials don't provide practical answers for most retail traders or longer term investors. Virtually all forex trading materials focus on time-consuming, high-leverage, high-risk methods at which most traders fail. Materials about long-term investing in foreign assets rarely take into account the prospects of the related currency. A falling currency can turn an otherwise good investment into a bad one. Throughout the book, the emphasis is on planning and executing only low risk, high potential yield trades or investments and avoiding serious losses at all costs. Packed with richly illustrated examples every step of the way and including additional

appendices and references to online resources, the book is the ultimate guide to forex for retail traders and investors seeking to tap forex markets for better currency diversification and income. Provides traders with safer, smarter, less complex and time-consuming ways to trade forex with higher odds of success. These include the use of such increasingly popular new instruments like forex binary options and social trading accounts that mimic expert traders. Shows investors how to identify the currencies most likely to hold or increase their value, and provides a wealth of ideas about how to apply that knowledge to a long-term, low-maintenance portfolio for both income and capital appreciation. Helps anyone seeking an asset class with low correlation to other markets by explaining how the very nature of forex markets means that regardless of market conditions there's always a playable trend somewhere, regardless of what other asset markets are doing, and how to find and exploit it for a short-term trade or a long-term investment in a currency pair, stock, bond, or other asset The Sensible Guide to Forex is only book that teaches mainstream risk averse investors and traders how to build a portfolio that's diversified by currency exposure as well as by asset class and sector, via a variety of safer, simpler methods to suit different needs, risk tolerances, and levels of expertise. Written by Cliff Wachtel, a 30+ year financial market writer, advisor, and analyst, The Sensible Guide to Forex offers practical solutions to the above dilemmas faced by every serious, prudent investor. nonetheless. I don't possess any special talents; yet, I am able to return consistent profits, year after year, in an endeavor where most people fail. My name is Yvan Byeajee, I am a trader. Not the kind you see in the movies - those who partake in lavish lifestyles; snort lines of coke off of some hooker's behind; or threaten the very health of our economy - no, I am more modest than that. And I have my reasons. Durable success in the markets is the only logical outcome of the kind of consistency you cultivate in your day-to-day life. Furthermore, it is a function of your ability to tame that voice in your head that is constantly nagging at you and forcing you to make poor decisions, whether in the markets or in your personal life. After having lost everything in the markets because of my inability to calm that inner voice, I knew I had to make some changes. Eventually, I stumbled upon an effective way to calm the zoo that is my mind, something I always assumed to be either impossible or useless. For the price of a cocktail, in this short book, you will learn the secret to my success in the markets! I will show you the one exercise that I think all traders should be doing on a daily basis. This exercise has not only changed my trading, but it has also changed my life - and I am confident it can change yours as well!

FX Bootcamp's Guide to Strategic and Tactical Forex Trading skillfully explains how to combine popular technical indicators to formulate a comprehensive market strategy. Along the way, McDonell takes the time to discuss the various challenges a Forex trader faces, such as greed, fear, loss, and isolation.

Praise for The Three Skills of Top Trading "Professor Pruden's new book, The Three Skills of Top Trading, is unquestionably the best book on a specific trading method and the necessary attributes for trading that I have read. Kirkpatrick, II, CMT, coauthor of Technical Analysis: The Complete Resource for Financial Market Technicians, Editor of the Journal of Technical Analysis, and board member of the Market Technicians Association "At long last, someone has taken the time and effort to bring the work and insight of Wyckoff to wider public attention-and Hank Pruden has done so masterfully, with great clarity and eloquence. Hank has taken the best of Wyckoff's work, combining it with the essential aspects of trader discipline and psychology, to provide a highly readable and particularly useful guide to trading. leaders. They must re-examine their educational paradigm, course structure and pedagogy, and realign the competencies and disposition of their faculty. The basics of the Forex markets e-book, video tutorials and website content was put together by myself to teach regular people how to trade the markets. I am not a banker, I am not an x-Wall street guy, and I have never traded in large institutions with thousands to spend on their training programmes! I am just like you, I used to be an employee, working as a chef for 17 years, covering 60 – 70 hours a week, split shifts, weekends and all of the holidays! I stumbled across Forex trading and knew that is my way out, It was not easy! It took me over a year before I got any real education on Forex, it looked so easy at the start! But once I had blown 2 accounts by this point, it was time to get educated or quit! I didn't want to quit because I saw the opportunity Forex trading can offer, so I persevered and never stopped learning to this day, I make it my mission to always educate myself further, every day I will learn something new and it is not just about Forex, I learn about business, real estate investing and sales marketing. You should make that one of your missions to always educate yourself, it is the only way to get on in life! Anyway, it took me a while to realise that the markets are a little bit harder to read than initially perceived, with all of the news events, manipulation and uncertainty. It took many more months of

learning and practice to become consistent in my trading, but persevere and you can get there! So if you are like me, like many others out there trying to learn on their own, I have been there, I have struggled on, dealt with all of the emotions of being a retail trader, no boss to give you a hard time if your trading performance does not meet up with the institutions demands. You have to learn to be your own boss, research your trading performance, kick your but if you deviate from the plan and push yourself to the next level! I am self taught and you are going do the same, so why not learn from somebody that has walked down the road you are about to embark on, but I'll help you shorten your learning curve! We all know what opportunities Forex trading can bring, every benefit is unique to you. It is up to you how these rewards will manifest into your life, you must put in some effort to see any rewards. Success is the pay off in exchange for the amount of time and effort devoted to a task, it is said that you will need to devote 10,000 hours of practice before becoming a master of your endeavor! I remember my first Forex training course, it was \$900 and it only covered the basics, it was O.K at the time, but there was so much more I had to learn! I later subscribed with another guy for \$650 one off fee and a recurring \$90 monthly subscription charge to trade with him twice a week, I did this for one and a half years! That is my two main ones, but I have done a trading psychology course and many many more.

Looking back, thinking that the amount of money I have actually paid for fragments of information is kind of sickening. I am a firm believer of that you should pay for your education and pay well when you can, because you have to be cautious about the free information out there, but we want information for a reasonable price, have it all in one place and have life time updates on new trading techniques. So this is what I propose; Learn from somebody that came from the bottom and had nobody to help but his eagerness and drive. If you become one of my loyal members, I will teach you about the basics of the Forex markets, with lifetime updates. This is my website, Forex trading and teaching is my life! In exchange for a small one off fee, for the time and effort devoted to building the tactical trader boot camp website, I will devote to giving you everything you need to know getting started in Forex trading, it will give you the insights into Forex trading. I won't teach you every single thing, I do not use every single indicator, I will not explain every single indicator, trading patterns, or trading algorithms. I will simply teach you what you need to know and give you the tools you need to become your own success story! I cut out all of the fluff, no B.S, and as long as you can put up with my Scottish accent, I think we will be just fine! So become a member of the boot camp and start learning today!
