Intended for undergraduate (and postgraduate) students studying property investment and development, this book provides an overview of the application of finance to property assets. The role of key developments and players in the market - the institutions, banks, investors and property companies - are examined. The book also aims to provide a financial perspective for those in the property and construction industry and, for those in finance, a view of real estate investment and development.

Each year, the Reinsurance Association of America (RAA) receives countless inquiries regarding the mechanisms and technicalities of the reinsurance business. This publication should answer many of those questions. First published in 1972, this booklet reflects the efforts and input of several of the most experienced reinsurance terminology experts in the industry. It is only through their efforts that we are able to produce such a complete and accurate publication, and we thank them for their time, patience and willingness to contribute. As in the case of previous editions, the RAA is publishing this booklet in the belief that it will be both an informative educational tool and a convenient reference for practitioners. While we have attempted to ensure that definitions reflect current industry practices, we do not suggest that it be considered authoritative for the resolution of legal disputes.

As real estate investment trusts continue to grow exponentially in Asia and Europe - being already well established in the USA and Australasia - a comprehensive guide to the issues involved in REIT property investment decision making is badly needed. This book draws together the most recent developments in REIT management from academic research and professional practice. It is based on current, original academic research, including structured interviews with the managers of a wide range of different types of REITs as well as the research and publications of others, together with the author's 25 years experience in REIT management. It provides a theoretically robust and practically relevant up to date guide to the property investment decision making process for REITs. Presenting new insights, the author breaks the REIT property investment decision making process down into three phases comprising six stages with 30 sequential steps. Each chapter focuses on one stage of the property investment decision making process and introduces the key people in the REIT management team relevant to the activities in that chapter. The theory and principles are considered and illustrated by application to Super REIT, a \$15bn diversified REIT. *Global Real Estate Investment Trusts: People, Process and Management* fuses not only how REITs should undertake property investment decision making - based on how it is undertaken and the underlying property theory, capital market theory and finance theory - but also why each part of the decision making process is important. This book provides the first sole-authored scholarly work specifically on REITs as a business enterprise and REIT property investment decision making as an holistic and cyclical process. The focus is on principles, making it relevant in each of the four major REIT markets around the world: USA, Europe, Asia and Australasia. An essential book for REIT managers and all those practising professionals involved in the REIT industry - including property practitioners, researchers, lawyers, accountants, bankers and directors around the world. The book is intended to be an introduction for those whose involvement in property requires them to understand or have insights into the ways in which property functions and processes are carried out. It will also help in understanding common expressions and jargon.
