

The Great Debaters Discussion Questions Answers

"A comprehensive textbook consisting of both historical and contemporary information and data about American public policy. The format and approach of the text are ideal for undergraduate students because they provide concrete examples of public policy in a way that relates to everyday life." —Linda Trautman, *Ohio University Public Policy: A Concise Introduction* is a student-friendly primer that quickly connects readers to the inner workings of public policy. The text condenses early chapters on theory and the policy-making process, allowing students to take up key policy challenges—such as immigration, education, and health care—much earlier in the semester. Structured chapter layouts of substantive policy areas allow instructors to supplement with their own examples seamlessly. The book's emphasis on policy choices asks students to look beyond simple pros and cons to examine the multifaceted dimensions of decision making and the complexities inherent in real-world problem solving. Not every student starts out engaged in public policy, so place your students—both majors and non-majors alike—in the driver's seat by fostering their analytical skills early, and spend the rest of the semester discussing policy issues, examining data, and debating current policy examples that matter most to them. Give your students the SAGE edge! SAGE edge offers a robust online environment featuring an impressive array of free tools and resources for review, study, and further exploration, keeping both instructors and students on the cutting edge of teaching and learning. Buddhism is a wisdom tradition. It asserts that we are liberated by the power of our own understanding. The three purposes of Buddhist debate are to defeat your own and others' misconceptions, to establish your own correct view, and to clear away objections to your view. It is like the approach of a physician—to remove what does not belong and to strengthen what does. Thus, for Buddhists, reasoning and debate are not ends in themselves or idle intellectual speculation. Rather, they are used as one path to spiritual wellness, taking practitioners closer to the health of liberation through these efforts to remove mistaken views and to understand and strengthen correct ones. Reading and memorization are not enough. Students must be able to verbalize their understanding and defend it under the pressure of cross-examination. This book teaches the basic analytical skills and procedures used in Buddhist debate. It is based on the author's own practice and experiences gained in the debating courtyards of Tibetan monasteries in India and matured through years of leading popular university courses on the subject. Sample debate exchanges show readers how to get started with the Buddhist style of analytical thinking to challenge and defend assertions. Learning is supported by guided reflections, practical advice, and verbal exercises to be completed in practice with a partner. By the end of the course, readers will be able to engage in unscripted, full-fledged debates with a qualified partner about Buddhist characterizations and classifications of phenomena using the format and procedures of Buddhist debate. Moreover, these skills, once mastered, can then be applied to investigating the truth and falsity of views in any other subject.

Fictional films tell true historical stories... *Film and History* is a compelling and unique overview of the cinema and its relationship with history, ranging from the ancient world to the modern day. This is the first book of its kind to offer such a broad historical and theoretical portrayal of the rapidly-growing sub field of history and film. Rosenstone introduces the varieties, types and traditions of historical films made worldwide and sets this against the changing ways in which historians and other public critics debate the portrayal of history in modern film.

Thanks to these generous donors for making the publication of this book possible: David Lerman and Shelley Wallock; D. Walter Cohen, Wendy and Leonard Cooper; Rabbi Howard Gorin; Gittel and Alan Hilibrand; Marjorie and Jeffrey Major; Jeanette Lerman Neubauer and Joe Neubauer; Gayle and David Smith; and Harriet and Donald Young. Ever since Abraham's famous argument with God, Judaism has been full of debate. Moses and Korah, David and Nathan, Hillel and Shammai, the Vilna Gaon and the Ba'al Shem Tov, Spinoza and the Amsterdam Rabbis . . . the list goes on. Jews debate justice, authority, inclusion, spirituality, resistance, evolution, Zionism, and more. No wonder that Judaism cherishes the expression *machloket l'shem shamayim*, "an argument for the sake of heaven." In this concise but important survey, Rabbi Barry L. Schwartz presents the provocative and vibrant thesis that debate and disputation are not only encouraged within Judaism but reside at the very heart of Jewish history and theology. In his graceful, engaging, and creative prose, Schwartz presents an introduction to an intellectual history of Judaism through the art of argumentation. Beyond their historical importance, what makes these disputations so compelling is that nearly all of them, regardless of their epochs, are still being argued. Schwartz builds the case that the basis of Judaism is a series of unresolved rather than resolved arguments. Drawing on primary sources, and with a bit of poetic license, Schwartz reconstructs the real or imagined dialogue of ten great debates and then analyzes their significance and legacy. This parade of characters spanning three millennia of biblical, rabbinic, and modern disputation reflects the panorama of Jewish history with its

monumental political, ethical, and spiritual challenges.

A visual history of 100 years of filmmaking in New York City, featuring exclusive interviews with NYC filmmakers Fun City Cinema gives readers an in-depth look at how the rise, fall, and resurrection of New York City was captured and chronicled in ten iconic Gotham films across ten decades: *The Jazz Singer* (1927), *King Kong* (1933), *The Naked City* (1948), *Sweet Smell of Success* (1957), *Midnight Cowboy* (1969), *Taxi Driver* (1976), *Wall Street* (1987), *Kids* (1995), *25th Hour* (2002), and *Frances Ha* (2012). A visual history of a great American city in flux, Fun City Cinema reveals how these classic films and legendary filmmakers took their inspiration from New York City's grittiness and splendor, creating what we can now view as "accidental documentaries" of the city's modes and moods. In addition to the extensively researched and reported text, the book includes both historical photographs and production materials, as well as still-frames, behind-the-scenes photos, posters, and original interviews with Noah Baumbach, Larry Clark, Greta Gerwig, Walter Hill, Jerry Schatzberg, Martin Scorsese, Susan Seidelman, Oliver Stone, and Jennifer Westfeldt. Extensive "Now Playing" sidebars spotlight a handful of each decade's additional films of note.

"The mind once enlightened cannot again become dark." As an English corset-maker's son, Thomas Paine was expected to spend his life sewing women's underwear. But as a teenager, Thomas dared to change his destiny, enduring years of struggle until a meeting with Benjamin Franklin brought Thomas to America in 1774-and into the American Revolution. Within fourteen months, Thomas would unleash the persuasive power of the written word in *Common Sense*-a brash wake-up call that rallied the American people to declare independence against the mightiest empire in the world. This fascinating and extensively researched biography, based on numerous primary sources, will immerse readers in Thomas Paine's inspiring journey of courage, failure, and resilience that led a penniless immigrant to change the world with his words.

"In February 1965, novelist and 'poet of the Black Freedom Struggle' James Baldwin and political commentator and father of the modern American conservative movement William F. Buckley met in Cambridge Union to face-off in a televised debate. The topic was 'The American Dream is at the expense of the American Negro.' Buccola uses this momentous encounter as a lens through which to deepen our understanding of two of the most important public intellectuals in twentieth century American thought. The book begins by providing intellectual biographies of each debater. As Buckley reflected on the civil rights movement, he did so from the perspective of someone who thought the dominant norms and institutions in the United States were working quite well for most people and that they would eventually work well for African-Americans. From such a perspective, any ideology, personality, or movement that seems to threaten those dominant norms and institutions must be deemed a threat. Baldwin could not bring himself to adopt such a bird's eye point of view. Instead, he focused on the 'inner lives' of those involved on all sides of the struggle. Imagine what it must be like, he told the audience at Cambridge, to have the sense that your country has not 'pledged its allegiance to you?' Buccola weaves the intellectual biographies of these two larger-than-life personalities and their fabled debate with the dramatic history of the civil rights movement that includes a supporting cast of such figures as Robert Kennedy, Martin Luther King Jr., Malcolm X, Lorraine Hansberry, and George Wallace. Buccola shows

that the subject of their debate continues to have resonance in our own time as the social mobility of blacks remains limited and racial inequality persists"--

The perceived lack of understanding of cultural diversity in the American learning community has led instructors to challenge assumptions and stereotypes while addressing misconceptions. Teachers of foreign languages and cultural studies, in particular, feel the need to redesign curricula and lesson plans to better serve the learning community of the twenty-first century. The common starting point resides in the paradox that exists in today's connected world; while global access to information makes learners aware of the infinite variety of cultural diversity, it does not, however, make them critical thinkers. For this reason, there is opportunity to reshape critical thinking within a more global perspective, while enhancing the tools to identify, interpret, and compare the different cultural models that learners encounter. The book demonstrates the theories and practical applications by which instructors use contemporary film to provide insightful readings on diverse local communities, communities that form the basis of global culture. This collection of essays will serve as a pedagogical tool and resource, offering methods and examples of a communicative approach to analyze and integrate cultural diversities, similarities, and problems in the second language curricula, methods that expose students to different cultural models while scaffolding their critical approach to multiple layers of common and specific values. This work will encourage a dialogue and long-lasting conversation on methodologies and teaching strategies rethought, reapplied, and remolded to the new learning environments.

Leonard Moore has been teaching Black history for twenty-five years, mostly to white people. Drawing on decades of experience in the classroom and on college campuses throughout the South, as well as on his own personal history, Moore illustrates how an understanding of Black

history is necessary for everyone. With *Teaching Black History to White People*, which is “part memoir, part Black history, part pedagogy, and part how-to guide,” Moore delivers an accessible and engaging primer on the Black experience in America. He poses provocative questions, such as “Why is the teaching of Black history so controversial?” and “What came first: slavery or racism?” These questions don’t have easy answers, and Moore insists that embracing discomfort is necessary for engaging in open and honest conversations about race. Moore includes a syllabus and other tools for actionable steps that white people can take to move beyond performative justice and toward racial reparations, healing, and reconciliation. Offers students an overview of the world schools style of debating, with expert advice for every stage of the process, including preparation, rebuttal, style, reply speeches, and points of information.

Small college professors from across the United States explain why liberal arts institutions remain the gold standard for higher education. The fevered controversy over America’s educational future isn’t simply academic; those who have proposed sweeping reforms include government officials, politicians, foundation officers, think-tank researchers, journalists, media pundits, and university administrators. Drowned out in that noisy debate are the voices of those who actually teach the liberal arts exclusively to undergraduates in our nation’s small liberal arts colleges, or SLACs. *The Best Kind of College* attempts to rectify that glaring oversight. As an insiders’ “guide” to the liberal arts in its truest form the volume brings together thirty award-winning professors from across the country to convey in various ways some of the virtues, the electricity, and, overall, the importance of the small-seminar, face-to-face approach to education, as typically featured in SLACs. Before we in the United States abandon or compromise our commitment to the liberal arts—oddly enough, precisely at a time when our global competitors are discovering, emulating, and founding American-style SLACs and new liberal arts programs—we need a wake-up call, namely to the fact that the nation’s SLACs provide a time-tested model of educational integrity and success. “At last, some good news about education! This collection brings together essays by professors at small liberal arts colleges, voices largely unheard in the debates raging about higher education. It ranges widely through disciplines and across colleges, taking us into classrooms where we see the creative, inventive kinds of teaching that go on when classes are kept small and professors can interact with students. This book is a welcome corrective to claims that higher education is ‘broken’ and in need of a high-tech fix, a quiet reminder that ‘innovation’ goes on as a matter of course at colleges where teaching is top priority and is kept to human scale.” — Gayle Greene, Scripps College “McWilliams and Seery have achieved something remarkable: they have found a new and interesting way to present the case for the liberal arts model in American education. More than that, they have managed to show the value of, as well as present the argument for, the model. At its best, the book recreates something of the experience of a liberal arts education in microcosm. This is a wonderful, provocative, engaging, and moving book. It is unlikely to be surpassed.” — Simon Stow, author of *Republic of Readers? The Literary Turn in Political Thought and Analysis*

In the vein of *The Glass Castle*, *Breaking Night* is the stunning memoir of a young woman who at age fifteen was living on the streets, and who eventually made it into Harvard. Liz Murray was born to loving but drug-addicted parents in the Bronx. In school she was taunted for her dirty clothing and lice-infested hair, eventually skipping so many classes that she was put into a girls’ home. At age fifteen, Liz found herself on the streets. She learned to scrape by, foraging for food and riding subways all night to have a warm place to sleep. When Liz’s mother died of AIDS, she decided to take control of her own destiny and go back to high school, often completing her assignments in the hallways and subway stations where she slept. Liz squeezed four

years of high school into two, while homeless; won a New York Times scholarship; and made it into the Ivy League. *Breaking Night* is an unforgettable and beautifully written story of one young woman's indomitable spirit to survive and prevail, against all odds. A Book that Transformed America "Friendship is first, Friendship last. But it is equally impossible to forget our Friends, and to make them answer to our ideal."- *Civil Disobedience*, Henry David Thoreau *Civil Disobedience* was Thoreau's first published book and continues to transform American discourse.
