Words: A User's Guide is an accessible and invaluable reference that is ideal for students, business people and advanced learners of English. The book is structured in groups of words that may be confused because they sound alike, look alike or seem to have similar meanings, and this approach makes it much more intuitive and easy to use than a dictionary. Contrasting over 5000 words (such as habitable and inhabitable, precipitation and rainfall, reigns and reins), Words: a User's Guide provides examples of usage adapted from large national databases of contemporary English, and illustrates each headword in typical contexts and phrases. This book gives you straightforward answers, and helps with pronunciation, spelling, style and levels of formality. For those working internationally it presents international standards and compares usage in Britain and the USA. Words: A User's Guide is an excellent resource for anyone who wants to communicate well in written and spoken English. "At last! A book about the use of words that clarifies and de-mystifies in an eminently usable way. I would recommend it to anyone who wants to write well. It is a book to keep." Sandy Gilkes, Head of the Centre for Academic Practice, University of Northampton "Rigorous, fresh, intriguing and downright useful, it deserves a place on

every properly stocked reference shelf." Brian Cathcart, Professor of Journalism, Kingston University "From the pedantic to the permissive, everyone who's interested in the English language and the way we speak and write it will want a copy of this practical, entertaining book." Wynford Hicks (author of Quite Literally and The Basics of English Usage)

Arranged in sixteen musical categories, provides entries for twenty thousand releases from four thousand artists, and includes a history of each musical genre.

"[A] tart, funny, lurid little bomb of a book. It's all p.c., of course, but not at all predictable, and a lot of righteous information gets dispersed in record time." -- BUST Magazine

We were Guerillas before we were Gorillas. From the beginning, the press wanted publicity photos. We needed a disguise. No one remembers, for sure, how we got our fur, but one story is that at an early meeting, an original Girl, a bad speller, wrote 'Gorilla' instead of 'Guerilla.' It was an enlightening mistake. It gave us our mask-ularity. Ever wonder about the abundance of naked male statues in the Classical section of your favorite museum? Did you know medieval convents were hotbeds of female artistic expression? And how did those "bad boy" artists of the twentieth century make it even harder for a girl to get a break? Thanks to the Guerrilla Girls, those masked feminists whose mission it is to break the white male stronghold over the art world, art history--as we know it--is history. Taking you back through the ages, the Guerrilla Girls demonstrate how males (particularly white males) have dominated the

art scene, and discouraged, belittled, or obscured women's involvement. Their skeptical and hilarious interpretations of "popular" theory are augmented by the newest research and the expertise of prominent feminist art historians. "Believe-it-or-not" quotations from some of the "experts" are sprinkled throughout, as are the Guerrilla Girls' signature masterpieces: reproductions of famous art works, slightly "altered" for historic accuracy and vindication. This colorful reinterpretation of classic and modern art, as outrageous as it is visually arresting, is a much-needed corrective to traditional art history, and an unabashed celebration of female artists.

Both an expert and a collector, James Geary has devoted his life to aphorisms-and the last few years to organizing, indexing, and even translating them. The result is Geary's Guide, featuring aphorists like Voltaire, Twain, Shakespeare, Nietzsche, Woody Allen, Muhammad Ali, Emily Dickinson, and Mae West, as well as international practitioners appearing in English for the first time. But it is more than just a conventional anthology. It is also an encyclopedia, containing brief biographies of each author in addition to a selection of his or her aphorisms. The book is a field guide, too, with aphorists organized into eight different "species," such as Comics, Critics & Satirists; Icons &

Iconoclasts; and Painters & Poets. The book's two indexes-by author and by subject-make it easily searchable, while its unique organizational structure and Geary's lively biographical entries set it apart from all previous reference works. A perfect follow-up to Geary's New York Times bestseller *The World in a Phrase*, Geary's *Guide* is eminently suitable for browsing or for sustained reading. A comprehensive guide to our most intimate, idiosyncratic literary form, the book is an indispensable tool for writers and public speakers as well as essential reading for all language lovers.

Getting Started with CNC is the definitive introduction to working with affordable desktop and benchtop CNCs, written by the creator of the popular open hardware CNC, the Shapeoko. Accessible 3D printing introduced the masses to computer-controlled additive fabrication. But the flip side of that is subtractive fabrication: instead of adding material to create a shape like a 3D printer does, a CNC starts with a solid piece of material and takes away from it. Although inexpensive 3D printers can make great things with plastic, a CNC can carve highly durable pieces out of a block of aluminum, wood, and other materials. This book covers the fundamentals of designing for--and working with--affordable (\$500-\$3000) CNCs.

"This edition of the U. S. Army War College guide to national security policy and strategy continues to reflect the structure and approach of the core national security strategy and policy curriculum at the War College. The fifth edition is published in two volumes that correspond roughly to the Department of National Security and Strategy's core courses: "Theory of war and strategy" and "National security policy and strategy." Like previous editions, this one is based on its predecessor, but contains both updates and new scholarship. Over a third of the chapters are new or have undergone significant rewrites. Many chapters, some of which appeared for years in this work, have been removed. Nevertheless, the book remains unchanged in intent and purpose. Although this is not primarily a textbook, it does reflect both the method and manner that the U.S. Army War College uses to teach strategy formulation to America's future senior leaders. The book is not a comprehensive or exhaustive treatment of either strategic theory or the policymaking process. Both volumes are organized to proceed from the general to the specific. Thus, the first volume opens with general thoughts on the nature and theory of war and strategy, proceeds to look at the complex aspect of power, and concludes with specific theoretical issues. Similarly, the second volume begins by examining the policy/strategy process, moves to a look at the strategic environment, and concludes with some specific issues. This edition continues the effort begun in the 4th edition to include several short case studies to illustrate the primary material in the volume"--Introd.

This finding aid will help researchers interested in Japanese war crimes, war criminals, and war crimes trials to navigate the vast holdings of the U.S. National Archives and Records Administration at College Park (NARA). It will also be useful to anyone interested in military,

intelligence, political, diplomatic, economic, financial, social, and cultural activities in the Far East during 1931-1951, as well as to those searching for information regarding Allied prisoners of war; the organization, functions, and activities of American and Allied agencies; and the Japanese occupation of countries and the American occupation of Japan. While not aimed at researchers interested in the strategic and tactical military and naval history of the war in the Far East, this finding aid may nevertheless be useful to those with such interests, if only to identify record groups and series of records that may bear on those topics. This finding aid covers records from over twenty record groups and includes materials declassified under the Japanese Imperial Government Disclosure Act of 2000 (P.L. 106-567) as well as records that were never classified and those declassified before the passage of the Disclosure Act. Because the process of identifying, declassifying, accessioning, and processing of records under the Act is taking place as this finding is being compiled, late arriving records may not be identified in this finding aid. Researchers should consult the IWG Web site (<http://www.archives.gov/iwg/>) for a complete and up-to-date list of records declassified under the Japanese Imperial Government Disclosure Act. Federal agencies involved in the identification and declassification of relevant classified records ascertained that there were relatively few pertinent records that were still classified. Most relevant records were either never classified or were declassified decades before the Act and were already in NARA's custody. While this finding aid's coverage is broad, it is not comprehensive. Researchers may find other relevant series of records within the record groups mentioned or not mentioned. Researchers are encouraged to use other finding aids and consult with NARA staff to locate records of interest. In addition, the National Archives at College Park holds nontextual records

(such as still photographs and motion pictures) that researchers may want to examine. Other NARA facilities hold many records and donated material related to World War II, including records related to the subjects covered in this finding aid. This is particularly true of the Franklin D. Roosevelt, the Harry S. Truman, and the Dwight D. Think of archives as vast mountain ranges of records with the archivists guiding the expeditions.
