The Hospitality And Tourism Kpi Dictionary 170 Key

This proceedings volume contains papers presented at the 2014 International Conference on Management and Technology in Knowledge, Service, Tourism & Hospitality (SERVE 2014), covering a wide range of topics in the fields of knowledge and service management, web intelligence, tourism and hospitality. This overview of current state of affair

By assembling the first comprehensive dictionary of Key Performance Indicators (KPIs) for the Hospitality and Tourism industry, The KPI Institute provides professionals a useful resource for novices and experts alike. It can be used in the early stages of implementing a performance management framework, in the process of selecting and documenting KPIs, but also to improve an existing performance measurement system. The KPI taxonomy presented in the dictionary covers all major functions of the Hospitality and Tourism industry, such as: - Food and Beverage Service- Tour Operator- Hotel- Travel Agency

Improving Convention Center Management Using Business Analytics and Key Performance Indicators presents sound practical advice from an author who successfully lived the experience. Transitioning from a traditional business model to one that is data driven and entrepreneurial can be difficult. This book explains

the rationale and importance of each indicator along with data collection issues and presentation advice. It guides you through that process from launch and trial, up to making analytics an indispensible part of your management strategy.
The purpose of this guide book is to give the reader a quick and effective access to the most appropriate Key Performance Indicator (KPI). The 36,000 KPIs are categorized in a logical and alphabetical order. Many organizations are spending a lot of funds on building their strategic planning and performance management capabilities. One of the current challenges is the difficulty to know what KPIs are used in similar situations. This book main objective is to acquaint the reader with available KPIs measuring performance of a specific industry, sector, international topic, and functional area. The book is divided into three sections:1) Organization Section: 32 Industries | 385 Functions | 11,000 KPIs2) Government Section: 32 Sectors | 457 Functions | 12,000 KPIs3) International Section: 24 Topics | 39 Sources | 13,000 KPIsREVIEWS: "It's very interesting book. Let me also use this opportunity to congratulate you on it" Augustine Botwe, M&E Consultant - Sweden "Thank you for this book. As an OD and performance consultant, it will be great to have a reference like this to help assist clients and not reinvent the wheel. Congratulations on making this happen with admiration" Sheri Chaney Jones - Ohio, USA"Fabulous book! I bought it for my company. Good work!"

Elizabeth Amini, CEO, Strategist - LA, USA"Congratulations for this tremendous work you have done with this book!" Roxana Goldstein, Monitoring Consultant - Argentina "This looks like a very important reference for me in my BSC consulting practice." Edy Chakra, Partner, ADDIMA Consulting - UK"Congratulations for your book, it is very comprehensive!" Rafael Lemaitre - Manager at Palladium Group - Spain"Many thanks for sharing this valuable information. I will use as reference in my work." Edi Indriyotomo - Senior IT Mgr. - Indonesia"I am reading my copy of your great book "KPI Mega Library" which I bought from Amazon. Thank you, great effort!" Basel A - Kuwait"It's a great idea, for folks who don't have a clue where to start. If you're a strategy consultant who shapes strategies for your clients, you need a tailored set of performance metrics" Shelley Somerville, Social Change Strategist - LA, USA"A very comprehensive list of KPIs across a number of functions, industries, etc. As an organizational consultant, I could use this resource as a jumping off point to discuss KPIs with a client based on their particular needs. This book could be a great tool to pick and choose the correct KPIs based on a number of criteria" Anthony Bussard - Dynamic, Innovative HR Effectiveness Consultant - Boston

Strategic Management for Tourism, Hospitality and Events is the must-have text for students approaching this subject for the first time. It introduces students to

fundamental strategic management principles in a Tourism, Hospitality and Events context and brings theory to life by integrating a host of industry-based case studies and examples throughout. Among the new features and topics included in this edition are: Extended coverage to Hospitality and Events to reflect the increasing need and importance of a combined sector approach to strategy New international Tourism, Hospitality and Events case studies from both SME's and large-scale businesses are integrated throughout to show applications of strategic management theory, such as objectives, products and markets and strategic implementation. Longer combined sector case studies are also included at the end of the book for seminar work. New content on emerging strategic issues affecting the tourism ,hospitality and events industries, such as innovation, employment, culture and sustainability Web Support for tutors and students providing explanation and guidelines for instructors on how to use the textbook and case studies, additional exercises, case studies and video links for students. This book is written in an accessible and engaging style and structured logically with useful features throughout to aid students' learning and understanding. This book is an essential resource to Tourism, Hospitality and Events students.

Will robots take over serving us in hotels? Will flight shaming prevent us travelling

in the future? How has the rise of social media impacted upon tourism marketing? – and what has been the impact of airbnb on tourism cities? For answers to these and many other contemporary tourism questions, simply turn to the third edition of Essentials of Tourism by Chris Cooper. From artificial intelligence, robotics and digital marketing to assessing the impact of events, every tourism student will find this book essential reading for not only grasping the key issues but applying them to real problems faced by professionals in the tourism industry. The book includes many new case studies from every continent around the world including cases to give you a truly global approach to how tourism theory can be applied in an international context. This is combined with a lively and accessible writing style which will support and guide you through how tourism has been affected and will continue to be shaped by technology, changing government policy and sustainability concerns. Key features of the new edition: 'Focus on Technology' and 'Focus on Employment' boxes included in every chapter. Three current case studies included in each chapter to bring context to the reader. Classic papers - introduces students to relevant academic research and refers to the selected paper throughout the chapter. Written by leading academic and industry experts actively engaged in revenue management, research and teaching this is a new and original treatment of the

whole field for students and professionals.

The Hospitality and Tourism KPI Dictionary170+ Key Performance Indicator Definitions

Performance management is key to the ongoing success of any organisation, allowing it to meet its strategic objectives by designing and implementing management control systems. This book goes beyond the usual discussion of performance management in accounting and finance, to consider strategic management, human behaviour and performance management in different countries and contexts. With a global mix of world-renowned researchers, this book systematically covers the what, the who, the where and the why of performance management and control (PMC) systems. A comprehensive, state-of-the-art collection edited by a leading expert in the field, this book is a vital resource for all scholars, students and researchers with an interest in business, management and accounting.

This book examines cross-cultural managerial competence across all managerial functions. Focusing particularly on the hospitality and tourism industry, editor Saee examines the cross-cultural implications of planning: workplace communication, recruitment/promotion, induction, training, supervision, industrial relations, management of change, customer service, financial management and marketing. Incorporating well-structured discussion, this book demonstrates an excellent balance of theory and practical application, and takes an innovative angle on the analysis of the host countries

managers, undergoing culture shock. This volume will be useful to students across many disciplines including cross-cultural studies, international business and tourism. The hospitality sector is facing increasing competition and complexity over recent decades in its development towards a global industry. The strategic response to this is still that hospitality companies try to grow outside their traditional territories and domestic markets, while the expansion patterns and M&A activities of international hotel and restaurant chains reflect this phenomenon. Yet, interestingly, the strategies, concepts, and methods of internationalization as well as the managerial and organizational challenges and impacts of globalizing the hospitality business are under-researched in this industry. While the mainstream research on international management offers an abundance of information and knowledge on topics, players, trends, concepts, frameworks, or methodologies, its ability to produce viable insights for the hospitality industry is limited, as the mainstream research is taking place outside of the service sector. Specific research directions and related cases like the international dimensions of strategy, organization, marketing, sales, staffing, control, culture, and others to the hospitality industry are rarely identifiable so far. The core rationale of this book is therefore to present newest insights from research and industry in the field of international hospitality, drawing together recent scientific knowledge and state-of-the-art expertise to suggest directions for future work. It is designed to raise awareness on the international factors influencing the strategy and performance of hospitality

organizations, while analyzing and discussing the present and future challenges for hospitality firms going or being international. This book will provide a comprehensive overview and deeper understanding of trends and issues to researchers, practitioners, and students by showing how to master current and future challenges when entering and competing in the global hospitality industry.

The tourism industry is a multi-billion dollar enterprise, with more people from all cultures and nationalities choosing to spend their leisure time traveling and visiting new locations. To exploit this burgeoning market, tourism agencies must carefully consider the desires and goals of travelers from around the world. The Handbook of Research on Global Hospitality and Tourism Management contributes to the body of knowledge on travel and tourism by presenting a global view of the hospitality industry, including theoretical research into industry trends as well as case studies from around the world. This handbook provides travel agents, owner-operators, and students and researchers in the hospitality industry with the latest research, findings, and developments in the field. Within this handbook of cutting-edge research, readers will find chapters and cases on topics such as travel and tourism in a global economy; local, glocal, and international hospitality; challenges in environmental management; cultural cuisine; and destination management, among others.

Managing Service, Education and Knowledge Management in the Knowledge Economic Era contains papers that were originally presented at the 2016 International

Congress on Management and Technology in Knowledge, Service, Tourism & Hospitality (SERVE 2016), held 8-9 October 2016 & 20-21 October 2016, in Jakarta, Indonesia & at the Vladimir State University, Vladimir, Russia. The contributions deal with various interdisciplinary research topics, particularly in the fields of social sciences, education, economics and arts. The papers focus especially on such topics as language, cultural studies, economics, behavior studies, political sciences, media and communication, psychology and human development. These proceedings should be of interest to academics and professionals in the wider field of social sciences, including disciplines such as education, psychology, tourism and knowledge management. This book describes ongoing developments in social media within the tourism and hospitality sector, highlighting impacts on both the demand and the supply side. It offers a combination of theory and practice, with discussion of real-life business experiences. The book is divided into three parts, the first of which provides an overview of recent trends in social media and user-generated content, clarifies concepts that are often used in an overlapping way and examines the "digitization of word of mouth" via online networks. The second part analyzes the impacts that social media can have on traveler behavior for each step in the travel process and also on suppliers, highlighting opportunities, threats and strategies. In the third part of the book, future potential trends deriving from the mobile marketing technologies are explored and possible methods for social monitoring by means of key performance indicators are examined. It is

considered how engaging customers and prospects by means of social media might increase customer loyalty, foster electronic word-of-mouth communication, and consequently have important effects on corporate sales and revenues. The discussion encompasses methods to measure company performance on each of the social media in order to understand the optimal mix that will support and improve business strategies.

Dr Pechlaner and Dr Innerhofer, the editors of Competence-Based Innovation in Hospitality and Tourism, argue that the industry operates within highly challenging and competitive environments. Changing environmental and market conditions continually force hotel businesses and service providers to offer their customers new and modified products and services, in order to remain competitive; those which respect value perceptions of markets and sustainable stakeholder reactions. This then raises the question of how innovations within this industry must be developed in order to achieve competitive differentiation. The book demonstrates that the development and analysis of successful innovation strategies should integrate the resource-based view and its advancements, the competence-based view, as well as the dynamic capabilities approach and the relational view. Resource-based strategic management approaches view the firm as a bundle of resources and competences. They point to the importance of firm-specific resources and competences in explaining variations in competitive positions and performance differentiation between companies. The challenge of

hospitality and tourism is to develop resources and competences that drive innovations. This book will serve to advance the status quo of tourism research literature by combining innovation theories with network theories and tourism and destination development, by illustrating the development of cooperative competences and innovations in tourism and by showing, in a tailored way, how the challenge of the development of resources and competences that drive innovations in tourism can be managed.

The gap between theory and practice in the leisure, sport and tourism studies areas seems to have widened as scholars have become more specialized. Nevertheless, it is imperative that students be as familiar as possible with a wide range of social and political theory, and also be able to reconcile that knowledge with their own current and future roles as practicing professionals. As well as extensive updating of sources, this new edition examines such topics as libertarianism, theocracy, anti-establishment politics, and the concept of generations. A new chapter presents discussions of a number of 'issues and challenges' facing the leisure, sport and tourism sector. Introducing the subject for undergraduate and postgraduate students of leisure, sport and tourism, this book is also a useful addition to the shelf of any policy maker or practitioner within the industries.

Anybody working in sport management will be involved in the operation of a sports facility at some point in their career. It is a core professional competency at the heart of

successful sport business. Sport Facility Operations Management is a comprehensive and engaging textbook which introduces cutting-edge concepts in facilities and operations management, including practical guidance from professional facility managers. Now in a fully revised and updated second edition—which introduces new chapters on capital investment and operational decision-making—the book covers all fundamental aspects of sport facility operations management from a global perspective, including: ownership structures and financing options planning, design, and construction processes organizational and human resource management financial and operations management legal concerns marketing management and event planning risk assessment and security planning benchmarking and performance management Each chapter contains newly updated real-world case studies and discussion questions, innovative 'Technology Now!' features and step-by-step guidance through every element of successful sport facilities and operations management, while an expanded companion website offers lecture slides, a sample course syllabus, a bank of multiple-choice and essay questions, glossary flashcards links to further reading, and appendices with relevant supplemental documentation. With a clear structure running from planning through to the application of core management disciplines, Sport Facility Operations Management is essential reading for any sport management course. By assembling the largest collection of KPIs in a single book, The KPI Institute provides a powerful practice based learning tool. The KPI Compendium lists over 20,000 Key

Performance Indicators (KPIs) examples listed by the smartKPIs.com team of researchers on the website with the same name. Main features: Each example has an identification number assigned to it, that can be used to look up additional KPI documentation on the website. All examples are grouped in a taxonomy structured around 3 contexts: global, organizational and personal. Contexts are grouped in further categories such as functional areas and industries Functional areas covered: Accounting Accounts Payable | Accounts Receivable Corporate Services Administration | Office Support | Corporate Travel | Facilities | Property Management | Legal Services CSR / Sustainability / Environmental Care Corporate Social Responsibility | Environmental Care Finance Asset | Portfolio management | Financial stability | Forecasts & Valuation | Liquidity | Profitability Governance, Compliance and Risk Compliance and Audit Management | Governance | Risk Management Human Resources Information Technology Application Development | Data Center | Enterprise Architecture | IT - General | IT - Security | Network Management | Service Management Knowledge and Innovation Innovation | Knowledge Management | R & D Management Marketing & Communications Advertising | Marketing | Public Relations Online Presence - eCommerce eCommerce | Email Marketing | Online Advertising | Online Publishing - Weblogs | Search Engine Optimization (SEO) | Web Analytics Portfolio and Project Management Benefits Realization Management | Portfolio Management | Project Management Production & Quality Management Maintenance | Production |

Tourism is that area of activity of contemporary man that touches on various fields of

human interest. Representatives of numerous academic disciplines find it intriguing for its exceptionally interdisciplinary character. Conditions for and consequences of the development of tourism are investigated, among others, by economists, geographers, sociologists, experts in culture, anthropologists, management and social policy specialists and even by representatives of some natural sciences. Researchers dealing with tourism need to meet strict methodological requirements, but they get access to a very interesting subject of scientific inquiry, which combines social, cultural, economic and environmental aspects to create an ontologically new quality offering epistemological challenges.

By identifying and describing the most powerful financial and non-financial KPIs, this book will make life easier for you by defining them, explaining how and when they should be used and providing a rich library of KPIs that have been proven to significantly improve performance. The book presents case examples to illustrate the selection and use of the KPIs and provides tools such as KPI selection templates and Key Performance Questions to help you apply the most appropriate KPIs effectively in your business.

The papers presented in this volume advance the state-of-the-art research on digital marketing and social media, mobile computing and responsive web design, semantic technologies and recommender systems, augmented and virtual reality, electronic distribution and online travel reviews, MOOC and eLearning, eGovernment and sharing

economy. This book covers the most significant areas contributed by prominent scholars from around the world and is suitable for both academics and practitioners who are interested in the latest developments in eTourism.

Seminar paper from the year 2013 in the subject Tourism - Hotel Management, grade: 1,0, Munich University of Applied Sciences (Tourism), course: Academic research, language: English, abstract: The article with the headline "International hotel chains and environmental protection: an analysis of Hilton's yes we care! Programme" has its main focus on the topic of corporate social responsibility (CSR) executed by international hotel chains. The article analyses and evaluates the Hilton's we care! programme that was rolled out in 70 Hilton Worldwide hotels. It outlines the close connection between CSR and term corporate environmentalism. A further connection is made between the linkage of CSR and Human Recourses Management (HRM). The relevance of the topic CSR and environmentalism is illustrated in the article.

Offering a comprehensive understanding of the implications of the COVID-19 pandemic for the tourism and hospitality industry, this book discusses the topic from economic, sociological and psychological perspectives. Critical case studies are used to explore both micro impacts on individuals involved in the industry and governmental and international responses to issues posed by the pandemic more broadly.

At last, a comprehensive, systematically organized Handbook which gives a reliable and critical guide to all aspects of one of the world's leading industries: the hospitality

industry. The book focuses on key aspects of the hospitality management curriculum, research and practice bringing together leading scholars throughout the world. Each essay examines a theme or functional aspect of hospitality management and offers a critical overview of the principle ideas and issues that have contributed, and continue to contribute, within it. Topics include: • The nature of hospitality and hospitality management • The relationship of hospitality management to tourism, leisure and education provision • The current state of development of the international hospitality business • The core activities of food, beverage and accommodation management • Research strategies in hospitality management • Innovation and entrepreneurship trends • The role of information technology The SAGE Handbook of Hospitality Management constitutes a single, comprehensive source of reference which will satisfy the information needs of both specialists in the field and non-specialists who require a contemporary introduction to the hospitality industry and its analysis. Bob Brotherton formerly taught students of Hospitality and Tourism at Manchester Metropolitan University. He has also taught Research Methods to Hospitality and Tourism students at a number of international institutions as a visiting lecturer; Roy C. Wood is based in the Oberoi Centre of Learning and Development, India

By assembling the first comprehensive dictionary of Key Performance Indicators (KPIs), The KPI Institute provides professionals a useful resource for novices and experts alike. It can be used in the early stages of implementing a performance management framework, in the

process of selecting and documenting KPIs, but also to improve an existing performance measurement system. The KPI taxonomy presented in the dictionary covers 25 different economic activities, by illustrating industry specific KPIs: Agriculture Arts and Culture Construction and Capital Works Customs Education and Training Financial Institutions Government - Local Government - State / Federal Healthcare Hospitality and Tourism Infrastructure Operations Manufacturing Media Non-profit / Non-governmental Postal and Courier Services Professional Services Publishing Real Estate / Property Resources Retail Sport Management Sports Telecommunications / Call Center Transportation Utilities Some of these KPIs can be used at strategic levels, while others can be monitored at operational level given the particularities of operations.

Facilities planning for tourism, hospitality and events (THE) is an important subject from both theoretical and applied perspectives, as land, property and resources represent major components of the foundation of the industry. As future managers, it is imperative that students have a sound basic knowledge of property and the various resources, systems and services associated with it. Covering important contemporary subjects such as sustainable planning and environmental management, this book considers the planning, development and management of facilities operations from several key perspectives, drawing upon the expertise of complementary experts in the design, management and development of THE facilities.

This unique text focuses on the application of global marketing principles specifically for small tourism businesses around the world and provides the building block for effective and practical marketing plans.

The hospitality, travel, and tourism industries play a major role in citizen wellbeing, socio-

cultural integration, and the economic advancement of a nation. The industries are increasingly complex in operation, demanding excellence across a far-reaching and diverse set of capabilities and changes in management practices across the board. With growing expectations for a better service quality from the users and endless calls for value-added service, managers are under constant pressure to improve their services across all aspects while growing customer numbers to meet various stakeholder expectations. Contemporary Management Approaches to the Global Hospitality and Tourism Industry is a key reference source that provides crucial knowledge on the application of new management practices and trends in the tourism industry. While highlighting topics such as service quality, culture sensitivity, and brand marketing, this publication explores the influence of globalization and the methods of sustainable business practices. This book is ideally designed for managers, hotel directors, restaurateurs, researchers, industry professionals, professors, and students seeking cutting-edge hospitality and tourism management strategies.

Tourism marketing is a vital tool in promoting the overall health of the global economy. This brings necessary revenue to particular regions of the world that have limited revenue producing resources and provides an opportunity for tourists to explore another culture, therefore building tolerance and overall exposure to different ways of life. Strategies for Promoting Sustainable Hospitality and Tourism Services is a crucial scholarly source that discusses interdisciplinary perspectives in the areas of global tourism and highlights cultural boundaries of strategic knowledge management through case studies. Featuring research on topics such as consumer behavior, cultural appreciation, and global economics, this book is ideally designed for academicians, research scholars, marketing professionals, graduate-level

students, and industry professionals.

Hospitality Experience offers students an exciting introduction to key aspects of hospitality management. The authors provide a refreshing focus on how hospitality experiences can be created and managed successfully. With a comprehensive overview of the hospitality industry, the textbook familiarizes students with the basics of hospitality management and offers analysis as well as cases and practical examples. Designed primarily for entry-level students at all levels, the book will also be of interest to professionals working in the business. Management Science in Hospitality and Tourism is a timely and unique book focusing on management science applications. The first section of the book introduces the concept of management science application in hospitality and tourism and related issues to set the stage for subsequent sections. Section II focuses on management science applications with conceptual pieces, empirical applications, and best practices with examples coming from different parts of the world and settings. The last section ends with a chapter focusing on challenges and future research directions. This book goes beyond revenue management topics and presents a broad range of topics in management science applications as they relate to hospitality and tourism cases. Researchers and students in hospitality and tourism will find this book very useful since it contains chapters on data analytics, e-commerce and technology, revenue and yield management, optimization methods, resource allocation, goal programming, dynamic programming, Markov chain models, trends analysis and detection, measuring potential and attractiveness in tourism development, performance measures and use of indices in hospitality and tourism, and more. There is a heightened interest in these areas of business applications in today's data-driven business environment, and this book addresses that

interest. This book is the only comprehensive text on management science applications in hospitality and tourism. It will help managers and hospitality and tourism students as future managers to develop an in-depth understanding of the importance of data analysis, interpretation, and generating information, and intelligence for decision making. It covers a broad range of applications representing different geographic regions of the world.

An organisation's most important asset is its people. And critical to an organisation's success is the extent to which its people interact effectively – both with each other as team members and with the wider organisation. This is why managing teams has become a key area for a growing number of organisations around the world. While many organisations are world-class at managing their materials and machinery, they fall short in managing the human side of their activities.This book outlines the challenges faced by both team leaders and team members in 21st-century workplaces. It proposes 13 key performance or "team health" indicators for highly effective teams based on research data collected from a large range of industry sectors, team sizes and organisations in the UK. It contributes to the understanding of the nature and functioning of team cohesiveness by describing teamwork as a multi-component variable and identifying the factors that impact on teams and the implications of teamwork for organisations.The book sets out to aid organisations by introducing a Team Performance Diagnostic (TPD) tool. The TPD enables organisations to gain an accurate and detailed insight into the real-time performance of their teams, helps team managers to understand the underlying 'people' issues within the team and how to reach higher levels of team performance quickly. The TPD has been widely used in major multinationals and the UK public sector to pinpoint hard-to-find opportunities to achieve rapid improvements.The research suggests that

the use of TPD contributes to more free-flowing feedback both within the team and in the organisation as a whole, and that successful teams are indicative of a healthy organisational culture.This book is an essential guide for senior managers and policy-makers dealing with team effectiveness, and will be highly useful for students of business and management. The rapidly changing context of the modern tourism and hospitality industry, responding to the needs of increasingly demanding consumers, coupled with the fragmenting nature of the marketing and media environment has led to an increased emphasis on communications strategies. How can marketing communication strategies meet the changing and challenging demands of modern consumers, and maintain a company's competitive edge? Marketing Communications in Tourism and Hospitality: concepts, strategies and cases discusses this vital discipline specifically for the tourism and hospitality industry. Using contemporary case studies such as South African Tourism, Travelocity and Virgin Trains, it explains and critiques the practice and theory in relation to this industry. Combining a critical theoretical overview with a practical guide to techniques and skills, it illustrates the role that communications play in the delivery and representation of hospitality and tourism services, whilst developing practical skills needed to understand, interpret and implement communications strategies within a management context. This systematic and cohesive text is essential reading for hospitality management students, and an invaluable resource for marketing practitioners in this growing area. This textbook explores the fundamental principles of marketing applied to tourism and hospitality businesses, placing special emphasis on SMEs in the international tourism industry. It includes examples from a wide range of destinations, from emerging markets to high-income

countries. Taking a comprehensive approach, the book covers the whole spectrum of tourism and hospitality marketing including destination marketing, marketing research, consumer behaviour, and digital and social media marketing. Practical in focus, it gives students the tools, techniques, and underlying theory required to design and implement successful tourism marketing plans. Chapters contain in-depth case studies, including companies like Marine Dynamics Shark Tours (South Africa), Reality Tours & Travel (Mumbai, India), and Makeover Tours (Turkey). Thematic case studies include 'Halal Tourism in Southeast Asia', and 'Marketing and Branding Rwanda'. These illustrate key concepts and theory, with definitions, key summaries, and discussion questions providing further insights. This textbook is ideal for undergraduate and postgraduate students looking for a comprehensive text with a practical orientation.

The hospitality industry is major industry. Due a steady growth, by 2030 the hospitality and tourism industry is expected to provide 380 million jobs. This title explores the challenges presented including labor shortages, containing and reducing the ecological footprint, Over tourism, and a poor industry image.

Social media is fundamentally changing the way travellers and tourists search, find, read and trust, as well as collaboratively produce information about tourism suppliers and tourism destinations. Presenting cutting-edge theory, research and case studies investigating Web 2.0 applications and tools that transform the role and behaviour of the new generation of travellers, this book also examines the ways in which tourism organisations reengineer and implement their business models and operations, such as new service development, marketing, networking and knowledge management. Written by an international group of researchers

widely known for their expertise in the field of the Internet and tourism, chapters include applications and case studies in various travel, tourism and leisure sectors.
