The word of mouth results, have been the product of years of experimentation done millenniums ago. When did grandma become the epitome of wisdom and experience? Well, we should go back millenniums, when it was the job of the oldest generation to take care of the youngest generation, while the adults generation in between went out to collect food, water and other basic necessities necessary for survival. The job of raising and training the children was left to those people who were most experienced. It is possibly this reason why the oldest and the youngest generations still find that they are more compatible and comfortable with each other, due to natural preference, instinctive selection and human psychological and social behavior. So the children of the tribe, group, gathering, and city were put in charge of the elders, who used to talk to them about their ancient traditions, talk to them by their own grandparents. The rules and regulations of living in society and getting to know one's own place in the hierarchy of a tribe was thus transmitted from generation to generation through these elders. Grandpa trained the kids with tribal knowledge and physical exercise. Grandma was in charge of their overall emotional, spiritual and physical well-being. She was responsible for their health, well-being, food and other essential things necessary to keep children healthy and well-balanced members of the family and later on the tribe. ...and that caring instinct still is present... That is why the matriarch - mother - was given the job of passing on the herbal knowledge to the girls in the family, preparing them to be future matriarchs taking care of their own families, as years went by. The boys were trained into becoming warriors, teachers, farmers, food gatherers or in other professions by the males of the tribe. So the lines were demarcated out very clearly in well-regulated times since ancient days. The house, home and hearth and other duties pertaining to a domestic nature was under the jurisdiction of the females. The land, the preservation, cultivation and protection of the area around it was under the jurisdiction of the males. So it was the man's prerogative to be the hunter and the warrior, to feed and protect his family and tribe.

\*Includes pictures \*Includes theories and explanations regarding the structures \*Includes online resources for further reading "Ten years from now nobody will remember my critics, and a million people will come to see what we have done." - Semir Osmanagich There are hundreds of pyramid-shaped hills distributed in and around central Bosnia and Herzegovina, yet one in particular has achieved worldwide attention over the last decade. Found in the small town of Visoko, located about thirty kilometres northwest from Sarajevo, the hill is the tallest point in a landscape of tremendous historical importance for the country. The region has been occupied from prehistoric times. Rich in natural resources, the area was extensively quarried for metal ore and stone over many periods. In the medieval period (twelfth to fifteenth centuries CE), this area became the centre of the Kingdom of Bosnia. It was here that the first king of Bosnia, Tvrtko I, was crowned in 1377 CE. During this time the large hill became known as Visocica, and a fortress was constructed upon its summit. From 1463, the Ottomans controlled them, and under their rule, many towns were founded, including Visoko which experienced a surge of economic development and cultural activity and became one of the richest towns in Bosnia. The town was of key importance in Bosnia's modern history, serving as a stronghold for Bosniak forces during conflict in the 1990s. However, it is not for these reasons that the hill of Visocica is so well-known today. Instead, the focus of attention has been on the controversial claim that it is the largest and oldest man-made pyramid to be found, not only in Europe, but the world. Since 2005, the Bosnian-born American businessman and self-proclaimed archaeologist Semir Osmanagich has promoted a controversial narrative of how-and why-the hill exists. He maintains that Visocica is not a natural feature, but was made by an ancient Bosniak civilization during the last Ice Age, between ten and twelve thousand years ago. Its substructure is allegedly filled with an intricate network of passageways that connect it to other structures in the surrounding landscape built during the same time. If true, the scale of these "pyramids" would have required the largest construction works to have ever been performed in prehistory. But this theory has been fiercely criticized by archaeologists, geologists, pyramid experts, journalists, and countless other academics and non-academics. Many scientific specialists and laypersons have gone to Visoko to see the site with their own eyes, and reported that there is little evidence to suggest the validity of Semir's claims. Furthermore, some of the claims made of the pyramid are borderline science fiction, featuring everything from aliens to the mythical civilization of Atlantis. Through the use of popular and journalistic media, rather than academic channels, Mr. Osmanagich has garnered the attention of many hundreds of volunteers that come to Visoko each year. Conflicting accounts testify to what takes place. Is legitimate archaeology being carried out, or the creation of a money-making theme park for tourists? Can the Bosnian pyramid be

considered genuine, or is this but one example of widespread and pseudoscientific "pyramid-mania" that occurs across the globe? Why do people believe in the fantastic stories woven around the Pyramid of the Sun, and why is the academic community so critical of this phenomenon? And who, exactly, is Semir Osmanagich, without whom this story would not exist? The Ancient Bosnian Pyramids: The History and Mystery Over the Controversial Pyramids in Bosnia and Herzegovina chronicles the theories and debates over the landmarks. Along with pictures of important people, places, and events, you will learn about the Bosnian pyramids like never before.

\*Includes pictures of art depicting important people, places, and events. \*Describes the different classes of Roman gladiators and the armor and weaponry they used. \*Describes gladiatorial combat and the myths and misconceptions about the fight. \*Includes footnotes and a bibliography for further reading. "He vows to endure to be burned, to be bound, to be beaten, and to be killed by the sword." - The gladiator's oath, according to Petronius in the Satyricon. Gladiators are somewhat synonymous with ancient Rome, and even thousands of years after they performed on the sands, when people are asked about Roman culture, many think about and refer to the bloody spectacles of men fighting to the death in the arena. Gladiatorial combat is often regarded as barbaric, and most find it very difficult to comprehend how people could have enjoyed watching something so violent, but nevertheless, the spectacle still intrigues and fascinates people today, whether in movies like Gladiator or television shows about Spartacus. Gladiatorial combat traces its origins back to the early Republican period from the 5th-3rd century B.C., but it's still unclear where these combats first appeared. Credit has been given to both the Etruscans in northern Italy and the Campanians in southern Italy, though the first recorded gladiatorial combat occurred in the 3rd century B.C. at the funeral of D. Junius Brutus Pera. His sons organized a combat between three different pairs of gladiators who fought at their father's grave, but exactly what these first gladiatorial combats were supposed to represent remains unclear. Some believe that the spilling of human blood was a way of offering a sacrifice to the dead, while others suggest that the contests themselves were a funeral offering in honor of the dead. Gladiatorial combat began in the Republican period and was associated with death and burial, but due to its popularity it became an organized form of entertainment in the Imperial Age, and even as the gladiators were considered low class, they were also admired, leading to some Roman men and women volunteering to become gladiators. Whatever the original role of gladiatorial combats, they thrilled Roman audiences for many centuries. Each match usually pitted one type of gladiator against a different type of gladiator, with each having their own kind of armor, weaponry and fighting style. For example, the retiarius was a gladiator that used a net, dagger and trident as his offensive weapons, while only wearing a protective guard over his left arm for protection. The retiarius would typically fight against the secutor, a gladiator armed with a sword, large shield, helmet and protective covering on his right arm and left leg. Therefore, a retiarius sacrificed armor for quickness in battle,

while the secutor did the opposite. Although people often think of gladiators fighting to the death, the outcome of gladiatorial combats was not always fatal for one of the participants. If a gladiator fought well, the sponsor of the show could spare him, particularly if the crowd desired it. The fact that the outcome of matches was never the same and the crowd could help determine the result of the match certainly added to the Roman public's pleasure, making it a lot less surprising that such an abhorrent spectacle still fascinated the modern world. The Roman Gladiators: The History and Legacy of Ancient Rome's Most Famous Warriors examines the history of the gladiators and the games they participated in, explaining what life and death was like for the men who fought in Rome's most famous form of entertainment. Along with pictures depicting important people, places, and events, you will learn about gladiators like you never have before.

Give yourself the best-possible odds for getting pregnant and having a baby with this concise, expert, and encouraging companion as your guide! In the only general guide to infertility written by a medical doctor who specializes in the subject, Mark Trolice, MD—who is board-certified in both OB/GYN and REI (Reproductive Endocrinology and Infertility)—shares the practical knowledge he has gained from working in infertility medicine for years, with many hundreds of patients, along with the warmth and wisdom he has acquired from getting to know prospective parents from all kind of backgrounds. The journey from infertility to fertility, from childlessness to a brand-new baby, can be long and arduous. It involves complicated medical diagnoses, a wide range of treatment options, a host of potential lifestyle changes, lots of emotional ups and downs, and—even with the best medical insurance—challenging financial decisions. Your doctors cannot decide everything for you, and that is why an authoritative and comprehensive book, written in clear and understandable language for the layperson, is essential. This is that book. The book opens with an exploration of all the possible causes of infertility, covering both couples who have never been pregnant and ones who have had recurrent losses of pregnancies. Unique among infertility guides, this volume gives roughly equal weight to male and female causes, which is important because about 40% of infertility cases are due to men's issues—and some couples need to address issues in both the prospective mother and prospective father. It covers endometriosis, fibroids, POS (Polycystic Ovarian Syndrome), tubal factor, male factor, and other possible causes. Next it looks at your treatment options. Importantly, these are not just medical interventions, but they also include lifestyle changes you alone can make, involving sleep, diet, exercise, and other forms of self-care. Among medical options, IUI (Intrauterine Insemination), IVF (In Vitro Fertilization), and various surgical procedures are covered in detail. Some couples are lucky to have a short journey to fertility. For others, the process takes years. With a gentle and sure hand, and non-judgmentally, Dr. Trolice guides you through the many decisions you need to make along the way, such as whether or not to continue treatments, whether to change practitioners or treatments, and whether it is a good idea to continue to spend money on procedures not covered by your insurance. He understands that these are emotionally weighty decisions that involve the future of your family, and he provides ample grounds for optimism and hope, empowering you as you take this journey.

The purpose of this book is to present the Kemetic tradition in its purest Kemetic, Afrikan context, and to demonstrate the fact that: despite the popular misconception about the tradition being a "dead tradition," everything that we need, that makes the tradition complete in its effectiveness, and its "Afrikaness," is available to us today, and more "supplemental information" is literally being uncovered daily. In other words, the Kemetic tradition is not lost. The ritual information in the latter half of this book is to further demonstrate and solidify these points: The Kemetic tradition is a living tradition The nTrw (deities) are real living forces In following the lead of our Ancestors, this tradition can work for us in the same manner that it worked for them. Every effort has been made to "stick to the script," as much as possible, to maintain the integrity of the tradition, and what you find in the following pages is an exegesis presented by the author, as a child of Afrika, a student and teacher of Afrikan Spirituality in general, and Kemetic spirituality in specific, and the way that this tradition is currently being practiced by the community of Henensu.

BLACK HISTORY EXTRAVAGANZA honoring Dr. Ben-Jochannan is a labor of love for someone intimately associated with the master teacher for some 40 years as student, traveling companion, mentee and friend. In repayment, this effort to help acknowledge and sustain his name, life's work and historical and philosophic outlook is necessary so the younger generation know of the enormous intellectual light this extraordinary scholar represented in those extremely challenging social and intellectual times of the last half century. As the systematic onslaught against the African (Black) personality continued, one particular scholar, lecturer, historian, publisher, archaeologist and tour guide to Egypt stood unmoved and unrelenting in defense of an entire people's history, culture and spiritual well-being. In this, Dr. Ben took on all disparaging comers as he educated and nurtured intellectual "cubs" becoming equipped to challenge historical distortion and omission manifested from the false mantle of global white supremacy. To accomplish the enormous task, Dr. Ben wrote, innovated self-publishing, lectured, and took students to museums and to Egypt pointing out contradictions between the Existential Data and the symbolic Representation of ancient Egypt. Table of Contents, viz., Introduction; The Awesome Egyptian Temple; Who were the Ancient Egyptians;? The Archaeology of Egypt; The Art of Ancient Egypt; Architecture of Ancient Egypt; The Religion of Ancient Egypt; and the History of Egypt, Dr. Ben made a substantial impact while educating students as to the utility and benefits of studying the illustrious African past, emphasizing they accentuate the positive and reject negative aspects of that memorable experience. Like the many intellectual lights, "warrior scholars," of his age, viz., Dr. John Henrik Clarke, Ivan Van Sertima, Leonard James, Carter G. Woodson, Benjamin Carruthers, J.A. Rogers, Jitu Weusi, Leonard Jeffries, among others, Dr. Ben subscribed to one unmistakable academic admonition pursuing excellence, "Publish or Perish." This continuum of praise (Celebrating Dr. Yosef Ben-Jochannan), Black History Extravaganza seeks a starting point for readers, young and old to delve deep and drink from the remarkable fountain represented in fields of study which engaged the great scholar for more than half-a-century.

When the Spanish came into contact with different tribes in the Southwest, they were so intrigued by the structure of the communities that they gave the natives the name Pueblo, a term they used to measure certain sizes for their own settlements.. Thus, while most Americans have heard of the Pueblo and Navajo, many remain unfamiliar with distinctions within the tribes. The Spaniards' interest was understandable, because the Pueblo fascinated those who came across their settlements, especially those located in desert regions and the sides of cliffs that involved the use of adobe mud, stone, carving homes out of cliffs. One such settlement, Oraibi, was created around 1100 A.D. and remains one of the oldest continuously inhabited settlements in North America, but the most famous of the cliff dwellings can be found at Mesa Verde, which was turned into a national park in the early 20th century, about 1500 years after the Ancient Pueblo established the settlement. Today's Puebloan tribes are descended from tribes known as the "Ancestral Puebloan People", one of which was the Anasazi, but anthropologists believe that the Anasazi were a common ancestor of every Pueblo group, so the Ancient Pueblo are often referred to simply as the Anasazi. The name Anasazi came from their enemies; it is a Navajo word that means "enemy ancestor". While that name understandably continues to offend the descendants of the Anasazi, it also underscores that there is still a lot of uncertainty regarding the history of the Anasazi. In fact, it is still unclear what the Anasazi called themselves, and though they resided near the "Four Corners" area of Utah, Arizona, Colorado and New Mexico for more than 700 years, they mysteriously abandoned their settlements shortly after they truly began to flourish around 1050-1150 A.D. Despite the mystery surrounding the Anasazi, it's widely agreed that they occupied Mesa Verde and its unique structures for a period of nearly 700 years, beginning as early as the 7th century. Thanks to its occupants taking advantage of the surrounding geologic formations, Mesa Verde is an amazing collection of cliff dwellings, as well as houses that utilize caves and rock overhangs, and structures consisting of adobe and sandstone. Unfortunately, the natural conditions that make Mesa Verde so special also likely played a role in its abandonment, with overpopulation and drought forcing inhabitants out near the end of the 13th century. *Mesa Verde: The History of the Ancient Pueblo Settlement* covers the establishment of Mesa Verde from its origins until its establishment as a national park. Along with pictures, footnotes, and a bibliography, you will learn about Mesa Verde like never before.

Teach your child to memorize an age old poem. It will be with her/him for life. My Grandfather taught it to my father in 1887 when he was 5. My Father taught it to me in 1940 when I was 5. I taught it to my children. Make a video of your child reciting the poem and upload it to YouTube. Let your child start a family tradition.

I'd always hoped to have at least one child. My hope died as I passed my 41st birthday but I conceived soon after and gave birth to a beautiful baby. The pregnancy was not aided by fertility treatments (though I had tried Clomid over a year earlier). Was it due to just luck or did I finally get pregnant because of several lifestyle changes I made half a year prior to conceiving? I made some simple but life-altering changes involving nutrition, walking outdoors (for Vitamin D), two short fasts and the practice of two key yoga positions at home. My monthly cycle soon became very regular for the first time in my life, my PMS symptoms disappeared and my wish for a baby came true. The first part of this account is about intimate relationships as I tried to find love and security in my life. The rest is more specifically about how my biological clock went into hyper-mode by age 35, about meeting my husband at 37 and about my three plus years of anxious infertility before conceiving at age forty-one. I hope you will also look into some simple lifestyle changes before (or even during) your trials with fertility treatments. I am so grateful as this really seemed to help me.
