Posthuman Folklore Tok Thompson, 2019-09-25 Can a monkey own a selfie? Can a chimp use habeas corpus to sue for freedom? Can androids be citizens? Increasingly, such difficult questions have moved from the realm of science fiction into the realm of everyday life, and scholars and laypeople alike are struggling to find ways to grasp new notions of personhood. *Posthuman Folklore* is the first work of its kind: both an overview of posthumanism as it applies to folklore studies and an investigation of “vernacular posthumanisms”—the ways in which people are increasingly performing the posthuman. Posthumanism calls for a close investigation of what is meant by the term “human” and a rethinking of this, our most basic ontological category. What, exactly, is human? What, exactly, am I? There are two main threads of posthumanism: the first dealing with the increasingly slippery slope between “human” and “animal,” and the second dealing with artificial intelligences and the growing cyborg quality of human culture. This work deals with both these threads, seeking to understand the cultural roles of this shifting notion of “human” by centering its investigation into the performances of everyday life. From funerals for AIBOs, to furrries, to ghost stories told by Alexa, people are increasingly engaging with the posthuman in myriad everyday practices, setting the stage for a wholesale rethinking of our humanity. In *Posthuman Folklore*, author Tok Thompson traces both the philosophies behind these shifts, and the ways in which people increasingly are enacting such ideas to better understand the posthuman experience of contemporary life.

Intercultural Education Nektaria Palaiologou, 2024-11-01 This edited collection highlights the diversity of perspectives within the broad field of intercultural education, focusing on education in modern multicultural societies, as well as exploring the role of migrant populations as modern citizens. Transforming Trauma Philip Tedeschi, Molly Anne Jenkins, 2019-07-15 Have you ever looked deep into the eyes of an animal and felt entirely known? Often, the connections we share with non-human animals represent our safest and most reliable relationships, offering unique and profound opportunities for healing in periods of hardship. This book focuses on research developments, models, and practical applications of human-animal connection and animal-assisted intervention for diverse populations who have experienced trauma. Physiological and psychological trauma are explored across three broad and interconnected domains: 1) child maltreatment and family violence; 2) acute and post-traumatic stress, including military service, war, and developmental trauma; and 3) times of crisis, such as the ever-increasing occurrence of natural disasters, community violence, terrorism, and anticipated or actual grief and loss. Contributing authors, who include international experts in the fields of trauma and human-animal connection, examine how our relationships with animals can help build resiliency and foster healing to transform trauma. A myriad of animal species and roles, including companion, therapy, and service animals are discussed. Authors also consider how animals are included in a variety of formal and informal models of trauma recovery across the human lifespan, with special attention paid to canine- and equine-assisted interventions and psychotherapy. In addition, authors emphasize the potential impacts to animals who provide trauma-informed services, and

discuss how we can respect their participation and implement best practices and ethical standards to ensure their well-being. The reader is offered a comprehensive understanding of the history of research in this field, as well as the latest advancements and areas in need of further or refined investigation. Likewise, authors explore, in depth, emerging practices and methodologies for helping people and communities thrive in the face of traumatic events and their long-term impacts. As animals are important in cultures all over the world, cross-cultural and often overlooked animal-assisted and animal welfare applications are also highlighted throughout the text.

Studies in Global Animal Law Anne Peters, 2020-01-01 This open access book contains 13 contributions on global animal law, preceded by an introduction which explains key concepts and methods. Global Animal Law refers to the sum of legal rules and principles (both state-made and non-state-made) governing the interaction between humans and other animals, on a domestic, local, regional, and international level. Global animal law is the response to the mismatch between almost exclusively national animal-related legislation on the one hand, and the global dimension of the animal issue on the other hand. The chapters lay some historical foundations in the *ius naturae et gentium*, examine various aspects of how national and international law traditionally deals with animals as commodity; and finally suggest new legal concepts and protective strategies. The book shows numerous entry points for animal issues in international law and at the same time shifts the focus and scope of inquiry.

The Cambridge Handbook of Play Peter K. Smith, Jaipaul L. Roopnarine, 2018-11-15 Play takes up much of the time budget of young children, and many animals, but its importance in development remains contested. Like an Animal: Critical Animal Studies Approaches to Borders, Displacement, and Othering ,2021-06-17 The contributors of Like an Animal challenge most fundamental concepts in the fields of racism, dehumanization, borders, displacement, and refugees that rest on the assumption of humanism. They show how we can bend the arc of the moral universe toward justice at the border. The goal of this interdisciplinary collection is twofold. First, to invite border/migration studies to consider a broader social justice perspective that includes nonhuman animals. Second, to start a discussion if nonhumans maybe refugees of a kind and how humans can address nonhumans' interests and needs from the perspective of addressing refugee issues. As capitalism and the climate crisis are taking a catastrophic toll on the planet, this timely volume exposes the alternative origins of violence that lie at the heart of the planet's destruction.

The Educational Significance of Human and Non-Human Animal Interactions Suzanne Rice,A. G. Rud,2016-04-29 The Educational Significance of Human and Non-Human Animal Interactions explores human animal/non-human animal interactions from different disciplinary perspectives, from education policy to philosophy of education and ecopedagogy. The authors refute the idea of anthropocentrism (the belief that human beings are the central or most significant species on the planet) through an ethical investigation into animal and human interactions, and 'real-life' examples of humans and animals living and learning together. In doing so, Rice and Rud outline the idea that interactions between animals and humans are educationally significant and vital in the classroom.

Children and Animals Frank R. Ascione, 2005 Animal abuse has been an acknowledged problem for centuries, but only within the past few decades has scientific research provided evidence that the maltreatment of animals often overlaps with violence toward people. The variants of violence, including bullying or assaults in a schoolyard, child abuse in homes, violence between adult intimate partners, community hostility in our streets and neighborhoods, and even the context of war, are now the subject of concerted research efforts. Very often, the association of these forms of violence with cruelty to animals has been found. The perpetrators of such inhumane treatment are often children and adolescents. How common are these incidents? What motivates human maltreatment of animals? Are there cultural, societal, neighborhood, and family contexts that contribute to cruelty to animals? How early in a child's life does cruelty to animals emerge and are these incidents always a sign of future interpersonal violence? Are there ways of preventing such cruelty? Can we intervene effectively with children who already have a history of abuse and violence? *Children and Animals: Exploring the Roots of Kindness and Cruelty* presents the current scientific and professional wisdom about the relation between the maltreatment of animals and interpersonal violence directed toward other human beings. However, the author, Frank R. Ascione, a noted expert in these areas, writes in a style and presents the findings in a language that will be understandable to parents, teachers, counselors, clergy, animal welfare professionals, foster parents, mental health professionals, youth workers, law enforcement professionals, and anyone else whose work or interest crosses into the lives of children and adolescents.

Kafka's Zoopoetics Naama Harel, 2020-05-04 Nonhuman figures are ubiquitous in the work of Franz Kafka, from his early stories down to his very last one. Despite their prominence throughout his oeuvre, Kafka's animal representations have been considered first and foremost as mere allegories of intrahuman matters. In recent years, the allegorization of Kafka's animals has been poetically dismissed by Kafka's commentators and politically rejected by posthumanist scholars. Such critique, however, has yet to inspire either an overarching or an interdiscursive account. This book aims to fill this lacuna. Positing animal stories as a distinct and significant corpus within Kafka's entire poetics, and closely examining them in dialogue with both literary and posthumanist analysis, *Kafka's Zoopoetics* critically revisits animality, interspecies relations, and the very human-animal contradistinction in the writings of Franz Kafka. Kafka's animals typically stand at the threshold between humanity and animality, fusing together human and nonhuman features. Among his liminal creatures we find a human transformed into vermin (in "The Metamorphosis"), an ape turned into a human being (in "A Report to an Academy"), talking jackals (in "Jackals and Arabs"), a philosophical dog (in "Researches of a Dog"), a contemplative mole-like creature (in "The Burrow"), and indiscernible beings (in "Josefine, the Singer or the Mouse People"). Depicting species boundaries as mutable and obscure, Kafka creates a fluid human-animal space, which can be described as "humanimal." The constitution of a humanimal space radically undermines the stark barrier between human and other animals, dictated by the anthropocentric paradigm. Through denying animalistic elements in humans, and disavowing the agency of nonhuman animals, excluding

them from social life, and neutralizing compassion for them, this barrier has been designed to regularize both humanity and animality. The contextualization of Kafka's animals within posthumanist theory engenders a post-anthropocentric arena, which is simultaneously both imagined and very real.

Strengthening Forensic Science in the United States National Research Council, Division on Engineering and Physical Sciences, Committee on Applied and Theoretical Statistics, Policy and Global Affairs, Committee on Science, Technology, and Law, Committee on Identifying the Needs of the Forensic Sciences Community, 2009-07-29 Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. *Strengthening Forensic Science in the United States: A Path Forward* provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. *Strengthening Forensic Science in the United States* gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.
