

The Killing Of Karen Silkwood The Story Behind The Kerr Mcgee Plutonium Case

On June 3, 1991, an abandoned car was found on a busy stretch of highway near Newport Beach, California. Its owner, Denise Huber, seemed to have vanished off the face of the earth. For three years, her disappearance remained a mystery, inspiring one of the most intensive missing-persons searches in history. All to no avail. Because the only man who knew what happened to Denise wasn't talking. He wasn't through with her yet. On July 3, 1994, in an affluent suburb of Prescott, Arizona, a padlocked truck parked in the driveway of 37-year-old John Famalaro provoked suspicion. When authorities finally pried open its doors, they found the nude, handcuffed corpse of Denise Huber stuffed into a freezer--preserved forever in the throes of death. Inside Famalaro's home were Denise's personal belongings along with neatly arranged "trophies" of other female prey. But it was the revelations at Famalaro's trial that would truly stagger the imagination, laying bare the terrifying details of Denise's final hours, and exposing the dark past of a merciless killer consumed by perversity and unfathomable evil. How does America, founded on the promise of freedom for all, find itself poised to become a police state? In Police State, legendary "country lawyer" Gerry Spence reveals the unnerving truth of our criminal justice system. In his more than sixty years in the courtroom, Spence has never represented a person charged with a crime in which the police hadn't themselves violated the law. Whether by hiding, tampering with, or manufacturing evidence; by gratuitous violence and even murder, those who are charged with upholding the law too often break it. Spence points to the explosion of brutality leading up to the murder of Freddie Gray in Baltimore, insisting that this is the way it has always been: cops get away with murder. Nothing changes. Police State narrates the shocking account of the Madrid train bombings -how the FBI accused an innocent man of treasonous acts they knew he hadn't committed. It details the rampant racism within Chicago's police department, which landed teenager Dennis Williams on death row. It unveils the deliberately coercive efforts of two cops to extract a false murder confession from frightened and mentally fragile Albert Hancock, along with other appalling evidence from eight of Spence's most famous cases. We all want to feel safe. But how can we be safe when the very police we pay to protect us instead kill us, maim us, and falsify evidence

against us. Can we accept the argument that cops may occasionally overstep their boundaries, but only when handling guilty criminals and never with us? Can we expect them to investigate and prosecute themselves when faced with allegations of misconduct? Can we believe that they are acting for our own good? Too many innocent are convicted; too many are wrongly executed. The cost has become too high for a free people to bear. In *Police State*, Spence issues a stinging indictment of the American justice system. Demonstrating that the way we select and train our police guarantees fatal abuses of justice, he also prescribes a challenging cure that stands to restore America's promise of liberty and justice for all.

A captivating and inspiring portrait of legendary actress Meryl Streep and her work, Queen Meryl explores the fearless icon's trailblazing roles in film, her feminist activism, and the indelible mark she's left on pop culture. Meryl Streep is the most celebrated actress of our time. She's a chameleon who disappears fully into each character she plays. She never tackles the same role twice. Instead, she leverages her rarified platform to channel a range of dynamic, complicated women--Joanna Kramer, Karen Silkwood, Julia Child, Margaret Thatcher, Katharine Graham--rather than limit herself to marginal roles for which other actresses must settle: Supportive Wife. Supportive Mother. Supportive Yet Utterly Disposable Love Interest. Streep will have none of that. The once-awkward, frizzy-haired suburban teen blossomed into a rising ingénue on the stage at Vassar College and the Yale School of Drama. She came of age during the women's movement of the '60s and '70s, and has worn her activism on her sleeve even when it was unfashionable. When she reached 40, the age when many leading ladies fade away, Streep plunged forward, taking her pick of parts that interested her and winning a pile of awards along the way. Meanwhile, she remained an unlikely box-office draw, her clout even managing to grow with age: The Devil Wears Prada, starring Streep as the Anna Wintour avatar Miranda Priestly, scored \$326 million worldwide. Journalist and author Erin Carlson documents all of Streep's Oscars, accents, causes, memes, friendships, and feuds; also exploring the "off-brand" forays into action-adventure (The River Wild) and musicals (Mamma Mia!), and how Streep managed to sneak her feminism into each character. In the spirit of nontraditional bestsellers like Notorious RBG and The Tao of Bill Murray, Queen Meryl is illustrated by artist Justin Teodoro and filled with fascinating lists and sidebars, delivering joy in homage to its unique and brilliant subject.

A fictionalised account of the true story of Karen Silkwood, a nuclear plant employee in Oklahoma who died under mysterious circumstances.

A look at Edward Snowden, Karen Silkwood, and government and corporate whistleblowing, by an author praised for his "first-rate reporting" (Kirkus Reviews). In June of 2013, Edward Snowden, a twenty-nine-year-old former CIA employee, leaked thousands of top secret National Security Agency (NSA) documents to journalist Glen Greenwald. Branded as a whistleblower, Snowden reignited a debate about private citizens who reveal government secrets that should be exposed but may endanger the lives of others. Like the late Karen Silkwood, whose death in a car accident while bringing incriminating evidence against her employer to a meeting with a New York Times reporter is still a mystery, Snowden was intent upon revealing the controversial

practices of his employer, a government contractor. Rightly or wrongly, Snowden and Silkwood believed that their revelations would save lives. In his riveting, thought-provoking book, Richard Rashke weaves between the lives of these two controversial figures and creates a narrative context for a discussion of what constitutes a citizen's duty to reveal or not to reveal.

ReAction! gives a scientist's and artist's response to the dark and bright sides of chemistry found in 140 films, most of them contemporary Hollywood feature films but also a few documentaries, shorts, silents, and international films. Even though there are some examples of screen chemistry between the actors and of behind-the-scenes special effects, this book is really about the chemistry when it is part of the narrative. It is about the dualities of Dr. Jekyll vs. inventor chemists, the invisible man vs. forensic chemists, chemical weapons vs. classroom chemistry, chemical companies that knowingly pollute the environment vs. altruistic research chemists trying to make the world a better place to live, and, finally, about people who choose to experiment with mind-altering drugs vs. the drug discovery process. Little did Jekyll know when he brought the Hyde formula to his lips that his personality split would provide the central metaphor that would come to describe chemistry in the movies. This book explores the two movie faces of this supposedly neutral science. Watching films with chemical eyes, Dr. Jekyll is recast as a chemist engaged in psychopharmaceutical research but who becomes addicted to his own formula. He is balanced by the often wacky inventor chemists who make their discoveries by trial-and-error.

This true story of a courageous whistleblower is "as fascinating and gripping as anything John Le Carr[é] or Agatha C[h]ristie could devise" (*The Christian Science Monitor*). On November 13, 1974, Karen Silkwood was driving on a deserted Oklahoma highway when her car crashed into a cement wall and she was killed. On the seat next to her were doctored quality-control negatives showing that her employer, Kerr-McGee, was manufacturing defective fuel rods filled with plutonium. She had recently discovered that more than forty pounds of plutonium were missing from the Kerr-McGee plant. Forty years later, her death is still steeped in mystery. Did she fall asleep before the accident, or did someone force her off the road? And what happened to the missing plutonium? *The Killing of Karen Silkwood* meticulously lays out the facts and encourages the readers to decide. Updated with the author's chilling new introduction that discusses the similarities with Edward Snowden's recent revelations, Silkwood's story is as relevant today as it was forty years ago. For this updated edition, the author has added the latest information as to what happened to the various people involved in the Silkwood case and news of the lasting effects of this underreported piece of the history of the antinuclear movement.

How the United States protected John Demjanjuk: "A richly researched, gripping narrative about war, suffering, survival, corruption, injustice and morality" (*Kirkus Reviews*, starred). John "Iwan" Demjanjuk was at the center of one of history's most complex war crimes trials. But why did it take almost sixty years for the United States to bring him to justice as a Nazi collaborator? The answer lies in the annals of the Cold War, when fear and paranoia drove American politicians

and the U.S. military to recruit “useful” Nazi war criminals to work for the United States in Europe as spies and saboteurs and to slip them into America through loopholes in U.S. immigration policy. During and after the war, that same immigration policy was used to prevent thousands of Jewish refugees from reaching the shores of America. The long and twisted saga of John Demjanjuk, a postwar immigrant and auto mechanic living a quiet life in Cleveland until 1977, is the final piece in the puzzle of American government deceit. The White House, the Departments of War and State, the FBI, and the CIA supported policies that harbored Nazi war criminals and actively worked to hide and shelter them from those who dared to investigate and deport them. The heroes in this story are men and women such as Congresswoman Elizabeth Holtzman and Justice Department prosecutor Eli Rosenbaum, who worked for decades to hold hearings, find and investigate alleged Nazi war criminals, and successfully prosecute them for visa fraud. But it was not until the conviction of John Demjanjuk in Munich in 2011 as an SS camp guard serving at the Sobibor death camp that this story of deceit can be told for what it is: a shameful chapter in American history. Riveting and deeply researched, *Useful Enemies* is the account of one man’s criminal past and its devastating consequences, and the story of how America sacrificed its moral authority in the wake of history’s darkest moment.

From Gerry Spence, one of America’s greatest trial attorneys and the New York Times bestselling author of *How to Argue and Win Every Time*, comes an explosive courtroom thriller of murder, passion, and the twists and treachery of law and justice. Gerry Spence is one of the greatest trial lawyers of our time. He has not lost a jury trial in fifty years and has never lost a criminal or a capital case. He has also represented many celebrated defendants and appeared on countless national TV talk shows. Spence now presents us with beautiful Lillian Adams, who is going on trial for the murder of her wealthy husband before Judge John Murray. The prosecutor, Haskins Sewell, however, is consumed by political ambition. He plans to advance his own career by framing Lillian for murder one and by railroading the judge into prison. A fast-paced, up-all-night courtroom thriller, *Court of Lies* is also a harsh indictment of today’s legal system. The country has 2.3 million people behind bars and 7.5 million more on parole or probation. A major reason for so much mass incarceration is the dominance of politically motivated prosecutors, who over-sentence defendants for the sake of winning votes in their own elections and advancing their careers.

From skinny scholar to muscle-bound showman. “Easily the best memoir ever written about weight training, steroids and all” (*Men’s Journal*). When blue-blooded, storklike Samuel Wilson Fussell arrived in New York City fresh from the University of Oxford, the ethereal young graduate seemed like the last person on Earth who would be interested in bodybuilding. But he was intimidated by the dangers of the city—and decided to do something about it. At twenty-six, Fussell walked into the YMCA gym. Four solid years of intensive training, protein

powders, and steroid injections later, he had gained eighty pounds of pure muscle and was competing for bodybuilding titles. And yet, with forearms like bowling pins and calves like watermelons, Fussell felt weaker than ever before. His punishing regimen of workouts, drugs, and diet had reduced him to near-infant-like helplessness and immobility, leaving him hungry, nauseated, and prone to outbursts of “roid rage.” But he had come to succeed, and there was no backing down now. Alternately funny and fascinating, *Muscle* is the true story of one man's obsession with the pursuit of perfection. With insight, wit, and refreshing candor, Fussell ushers readers into the wild world of juicers and gym rats who sacrifice their lives, minds, bodies, and souls to their dreams of glory in Southern California's so-called iron mecca.

The bestselling account of one of South Australia's worst series of crimes - the bodies in the barrels. A disused bank vault holding eight dismembered bodies immersed in barrels of acid. Two bodies buried in a suburban backyard. A further two found in the bush. Such was the findings of one of South Australia's most horrific murder trials. Informed by material never seen before - an interview with Bunting's last lover Elizabeth Harvey, and with the Crown's key eye-witness James Vlassakis and with details of the torture and crimes not previously released - this is a tensely woven and microscopic examination of tawdry lives and tragic deaths. Four men who tortured and killed for fun, for power. Four men who kept each other's dark secrets for years. By the time the police investigation concluded, the story had invited comparison with the nightmare of Rosemary and Fred West, the British House of Horrors. Details of what the killers did to their victims before and after their deaths were deemed so depraved that suppression orders were in place throughout the trial. But the killers were not insane. They made deliberate choices to kill and lived in a culture of complete anarchy, sadistic violence, deviance and chaos. Journalist and author Debi Marshall explores the killers' psychopathic makeup in minute and harrowing detail. She charts the victims' exposure to generational paedophilia, incest, unemployment and hopelessness. Marshall covers the exhaustive trials and interviews the lawyers who ran them. Through interviews, she captures the voices of the victim's families and examines the police and forensic investigation and then wades into the social structure that spawned the people in this story. This book was used as a primary source for the acclaimed Australian feature film, Snowtown.

Yakuza Moon is the shocking, yet intensely moving memoir of 37-yearold Shoko Tendo, who grew up the daughter of a yakuza boss. Tendo lived her life in luxury until the age of six, when her father was sent to prison, and her family fell into terrible debt. Bullied by classmates who called her "the yakuza girl," and terrorized at home by a father who became a drunken, violent monster after his release from prison, Tendo rebelled. A regular visitor to nightclubs at the age of 12, she soon became a drug addict and a member of a girl gang. By the age of 15 she found herself sentenced to eight months in a juvenile detention center. Adulthood brought big bucks and glamour when Tendo started working as a bar hostess during Japan's booming bubble economy of the nineteen- eighties. But among her many rich and loyal patrons there were also abusive clients, one of whom beat her so badly that her face was left permanently scarred. When her mother died, Tendo plunged into such a deep depression that she tried to commit

suicide twice. Tendo takes us through the bad times with warmth and candor, and gives a moving and inspiring account of how she overcame a lifetime of discrimination and hardship. Getting tattooed, from the base of her neck to the tips of her toes, with a design centered on a geisha with a dagger in her mouth, was an act that empowered her to start making changes in her life. She quit her job as a hostess. On her last day at the bar she looked up at the full moon, a sight she never forgot. The moon became a symbol of her struggle to become whole, and the title of the book she wrote as an epitaph for herself and her family.

From National Book Award–winner Michael J. Arlen and screenwriter Alice Arlen, here is the fascinating, adventurous life of Alicia Patterson, who became, at age thirty-four, one of the youngest and most successful newspaper publishers in America when she founded Newsday. With *The Huntress*, the Arlens give us a revealing picture of the lifestyle and traditions of the Patterson-Medill publishing dynasty—one of the country’s most powerful and influential newspaper families—but also Alicia’s rebellious early years and her dominating father, Joseph Patterson. Founder and editor of the *New York Daily News*, Patterson was a complicated and glamorous figure who in his youth had reported on Pancho Villa in Mexico and had outraged his conservative Chicago family by briefly espousing socialism. Not once but twice, first at age twenty, Alicia agreed to marry men her father chose, despite having her own more interesting suitors. He encouraged her to do the difficult training required for an aviation transport license; in 1934 she became only the tenth woman in America to receive one. Patterson brought her along to London to meet with Lord Beaverbrook, to Rome to meet Mussolini, and to Moscow in 1937, at the time of Stalin’s “show trials,” where a young George Kennan took her under his wing. Alicia caught the journalism bug writing for *Liberty* magazine, an offshoot of the *Daily News*. A trip to French Indochina highlighted her hunting skills and made the sultan of Johor an ardent admirer; another trip would involve India, the dangerous sport of pigsticking, several maharajas, and a tiger hunt. A third marriage, to Harry Guggenheim, blew hot and cold but it did last; it was with him that she started Newsday in a former car dealership on Long Island. Governor Adlai E. Stevenson, two-time Democratic candidate for president, would be one of her last admirers. With access to family archives of journals and letters, Michael and Alice Arlen have written an astonishing portrait of a maverick newspaperwoman and an intrepid adventurer, told with humor, compassion, and a profound understanding of a time and place.
