Congratulations! You're on Mars Base Alpha, the first human outpost on the red planet. Don't relax, though. It's not all roses and unicorns up here. Mars isn't called "The Bringer of War" for nothing! You've just been rained on by a meteor shower and it's up to you—you!—to put your LEGO MINDSTORMS NXT robotics skills to work to save the day, and the base! And that's only the beginning of the challenges that lie ahead. LEGO MINDSTORMS NXT: Mars Base Command is a book of challenge. It's about challenging yourself to design and build robots to solve problems, tough problems. Taking a similar approach to best-selling LEGO author James Kelly's other books, this book presents a series of four challenges in the setting of mankind's first-ever manned base on the planet Mars. Each challenge begins with a backstory to set the scene. You're given instructions for constructing a playing field, including devices that your eventual robot must manipulate. Your job is to build a robot that will execute the challenge and garner you the most points. The book requires the LEGO MINDSTORMS NXT Education Resource Set. Scoring sheets are included that allow for the book's use in educational and group settings. Teachers can base lesson plans around the different concepts taught in each challenge. Groups and clubs can choose to run mini-competitions in which teams or individuals compete against each other in a race to save the base. LEGO MINDSTORMS NXT: Mars Base Command is an excellent choice for an individual, a group, or a teacher wishing to learn about and have more fun with LEGO's best-selling robotics platform. Please note: the print version of this title is black & white; the eBook is full color.

Through the use of a fictional story, this book details how to build and design robots. Max, the story's main character, is part of an archaeological expedition investigating a newly discovered Mayan pyramid. During the expedition, the team encounters various problems, each solved with the help of a unique robot that Max creates using the Lego Mindstorms NXT kit. Although the book reveals possible robotic solutions and offers detailed information on how to build and program each robot, readers are encouraged to come up with their own. The book includes complete building theory information and provides worksheets for brainstorming.

"Different from any knitting book I've ever seen! Think of it as a journal of your life, not with pen and paper, but with knitting needles" (Lisa Congdon, author of Find Your Artistic Voice). Record the beauty, emotions, and experiences of everyday life—with your knitting needles! Author Lea Redmond offers thirty-two enchanting projects that will inspire you to create beautiful finished pieces full of personal meaning and memories. Stock up on shades of blue, gray, and white and knit one strip of a scarf each day for a year, using the color that matches the

sky on that day. When you're done, you'll have a unique memento of your year better than anything you can keep in a scrapbook. Or when you're traveling, knit postcard-size swatches at each place you visit, using the colors you see around you. When the trip is over, piece the swatches together into a throw or scarf that will remind you of your journey every time you use it. Or knit a height-chart scarf for a beloved baby, starting with her length at birth, then add inches each year until you have the perfect gift for her eighteenth birthday. These are knitting projects like no other, resulting in one-of-a-kind heirlooms that tell a story only you can tell. Redmond provides instructions for all the stitches and techniques you need, as well as required patterns. "In this charming book, Lea Redmond puts her big heart into creative knitting projects. She reminds us that the sky's the limit—in knitting and in life." —Ann Hood, author of *The Knitting Circle* "Not your usual book about knitting . . . [It] aspires to turn on your creativity, to awaken the designer within you." —*In Stitches*

Program Lego® My Blocks to accurately perform navigation functions on competition mats, such as moving forward and backward quickly and precisely, turning, following walls, and following lines. This book features extensive illustrations help to bring each step and concept to life so that you can easily follow along. You'll start by moving your creations forward and backward accurate distances while maintaining directional accuracy. You'll then build My Blocks to turn left and right at precise angles. After that you're creations will be ready to find, follow, and otherwise use lines on the mat to improve navigation accuracy. Finally, you'll delve into using game board border walls to navigate and advanced topics, such as handoffs at speed and accelerating/decelerating to enable higher speed while maintaining navigation accuracy. This book addresses EV3 programming in the specific context of FLL® competition. With Programming Lego® EV3 My Blocks, you will be game-ready to manage the season, prepare for competition, and compete! What You'll Learn Construct and use My Blocks to improve robot performance in the FLL® Robot Game Develop basic programming skills, including feedback, troubleshooting techniques, and unit conversion Comment programs appropriately to note errors and consistency Who This Book Is For The book is targeted at the many FLL® coaches, mentors, and students who need help with programming the EV3, as well as the students they coach. A secondary audience is teachers who want to use the EV3 to teach programming concepts.

Provides instructions for building seven robots, complete descriptions of each of them, and the theories behind their design.
