The first English translation and examination of secret Japanese writings dating from the paleolithic to classical eras • Examines four suppressed and secret texts to discover the deeper truths beneath Japanese mythology • Introduces evidence of ancient civilizations in Japan, the sacred geometry of primitive times, and claims of a non-Earthly origin of the Emperors • Explores how these texts convey the sacred spiritual science of Japan's Golden Age with parallels in ancient India, Europe, and Egypt In Japan there are roughly two dozen secret manuscripts originally dating back to the paleolithic era, the age of heroes and gods, that have been handed down by the ruling families for centuries. Rejected by orthodox Japanese scholars and never before translated into English, these documents speak of primeval alphabets, lost languages, forgotten technologies, and the sacred spiritual science. Some even refer to UFOs, Atlantis, and Jesus coming to Japan. Translating directly from the original Japanese, Avery Morrow explores four of these manuscripts in full as well as reviewing the key stories of the other Golden Age chronicles. In the Kujiki manuscript Morrow uncovers the secret symbolism of a Buddhist saint and the origin of a modern prophecy of apocalypse. In the Hotsuma Tsutaye manuscript he reveals the exploits of a noble tribe who defeated a million-strong army without violence. In the Takenouchi Documents he shows us how the first Japanese emperor came from another world and ruled at a time when Atlantis and Mu still existed. And in the Katakamuna Documents the author unveils the sacred geometries of the universe from the symbolic songs of the 10,000-year-old Ashiya tribe. He also discusses the lost scripts known as the Kamiyo Moji and the magic spiritual science that underlies all of these texts, which enabled initiates to ascend to higher emotional states and increase their life force. Taking a spiritual approach à la Julius Evola to these "parahistorical" chronicles, Morrow shows how they access a higher order of knowledge and demonstrate direct parallels to many ancient texts of India, Europe, and Egypt.

The story of the Princes in the Tower is one of history's most enduring, poignant and romanticised tales. But were the princes really murdered? David Baldwin presents a fresh new approach to the mystery and reveals, for the first time, the true fate of the younger prince, Richard, Duke of York. David Baldwin has searched contemporary documents to unearth the clues that underpin his radical new theory and has visited all the places associated with Richard Plantagenet. In doing so, he has opened up an entirely new line of investigation and exonerated Richard III of the greatest of the crimes imputed to him. Dead princes were a potential embarrassment, but a living prince would have been a real danger and a closely guarded secret, not only in Richard's reign but in the reigns of Henry VII and Henry VIII.

Toward the end of the year 1920 the Government of the United States had practically completed the programme, adopted during the last months of President Winthrop's administration. The country was apparently tranquil. Everybody knows how the Tariff and Labour questions were settled. The war with Germany, incident on that country's seizure of the Samoan Islands, had left no visible scars upon the republic, and the temporary occupation of Norfolk by the invading army had been forgotten in the joy over repeated naval victories, and the subsequent ridiculous plight of General Von Gartenlaube's forces in the State of New Jersey. The Cuban and Hawaiian investments had paid one hundred per cent and the territory of Samoa was well worth its cost as a coaling station. The country was in a superb state of defence. Every coast city had been well supplied with land fortifications; the army under the parental eye of the General Staff, organized according to the Prussian system, had been increased to 300,000 men, with a territorial reserve of a million; and six magnificent squadrons of cruisers and battle-ships patrolled the six stations of the navigable seas, leaving a steam reserve amply fitted to control home waters. The gentlemen from the West had at last been constrained to acknowledge that a college for the training of diplomats was as necessary as law schools are for the training of barristers; consequently we were no longer represented abroad by incompetent patriots. The nation was prosperous; Chicago, for a moment paralyzed after a second great fire, had risen from its ruins, white and imperial, and more beautiful than the white city which had been built for its plaything in 1893. Everywhere good architecture was replacing bad, and even in New York, a sudden craving for decency had swept away a great portion of the existing horrors. Streets had been widened, properly paved and lighted, trees had been planted, squares laid out, elevated structures demolished and underground roads built to replace them. The new government buildings and barracks were fine bits of architecture, and the long system of stone quays which completely surrounded the island had been turned into parks which proved a god-send to the population. The subsidizing of the state theatre and state opera brought its own reward. The United States National Academy of Design was much like European institutions of the same kind. Nobody envied the Secretary of Fine Arts, either his cabinet position or his portfolio. The Secretary of Forestry and Game Preservation had a much easier time, thanks to the new system of National Mounted Police. We had profited well by the latest treaties with France and England; the exclusion of foreign-born Jews as a measure of self-preservation, the settlement of the new independent negro state of Suanee, the checking of immigration, the new laws concerning naturalization, and the gradual centralization of power in the executive all contributed to national calm and prosperity. When the Government solved the Indian problem and squadrons of Indian cavalry scouts in native costume were substituted for the pitiable organizations tacked on to the tail of skeletonized regiments by a former Secretary of War, the nation drew a long sigh of relief. When, after the colossal Congress of Religions, bigotry and intolerance were laid in their graves and kindness and charity began to draw warring sects together, many thought the millennium had arrived, at least in the new world which after all is a world by itself.

"The Making of a Marchioness" is a novel by Frances Hodgson Burnett. It was followed by a sequel, *The Methods of Lady Walderhurst*, but both have been subsequently published together, either under the original name "The Making of a Marchioness" or as "Emily Fox-Seton". Emily Fox-Seton is a young woman of good birth but no money who works as a companion and assistant for various members of the upper class. Her chief employer is Lady Maria Bayne, who is both very selfish and very funny, although she does come to care for Emily. In a "Cinderella-like" ending, Emily eventually marries a much older man, James, the Marquess of Walderhurst, thus herself becoming a marchioness. In the sequel, originally "*The Methods of Lady Walderhurst*", Emily has Walderhurst's child, and his former heir, Alec Osborn, attempts to regain what he sees as his birthright.

First published in 1943, *The Little Prince* by Antoine de Saint-Exupéry has been translated into more than 250 languages, becoming a global phenomenon. The Sahara desert is the scenery of Little Prince's story. The narrator's plane has crashed there and he has scarcely some food and water to survive. Trying to comprehend what caused the crash, the Little Prince appears. The serious blonde little boy asks to draw him a sheep. The narrator consents to the strange fellow's request. They soon become friends and the Little Prince informs the pilot that he is from a small planet, the asteroid 325, talks to him about the baobabs, his planet volcanoes and the mysterious rose that grew on his planet. He also talks to him about their friendship and the lie that evoked his journey to other planets. Often puzzled by the grown-ups' behavior, the little traveler becomes a total and eternal symbol of innocence and love, of responsibility and devotion. Through him we get to see how insightful children are and how grown-ups aren't. Children use their heart to feel what's really important, not the eyes. Heart-breaking, funny and thought-provoking, it is an enchanting and endlessly wise fable about the human condition and the power of imagination. A book about both childhood and adulthood, it can be read as a parable, a war story, a classic children's fairy-tale, and many more things besides: *The Little Prince* is a book for everyone; after all, all grown-ups were children once.

Frances Hodgson Burnett, née Frances Eliza Hodgson, (born Nov. 24, 1849, Manchester, Eng.--died Oct. 29, 1924, Plandome, N.Y., U.S.), American playwright and author who wrote the popular novel *Little Lord Fauntleroy*. Frances Hodgson grew up in increasingly straitened circumstances after the death of her father in 1854. In 1865 the family immigrated to the United States and settled in New Market, near Knoxville, Tennessee, where the promise of support from a maternal uncle failed to materialize. In 1868 Hodgson managed to place a story with Godey's *Lady's Book*. Within a few years she was being published regularly in Godey's, Peterson's *Ladies' Magazine*, Scribner's *Monthly*, and Harper's. In 1873, after a year's visit to England, she married Dr. Swan Moses Burnett of New Market (divorced 1898). Burnett's first novel, *That Lass o' Lowrie's*, which had been serialized in Scribner's, was published in 1877. Like her short stories, the book combined a remarkable gift for realistic detail in portraying scenes of working-class life--unusual in that day--with a plot consisting of the most romantic and improbable of turns. After moving with her husband to Washington, D.C., Burnett wrote the novels *Haworth's* (1879), *Louisiana* (1880), *A Fair Barbarian* (1881), and *Through One Administration* (1883), as well as a play, *Esmeralda* (1881), written with actor-playwright William Gillette. In 1886 Burnett's most famous and successful book appeared. First serialized in *St. Nicholas* magazine, *Little Lord Fauntleroy* was

intended as a children's book, but it had its greatest appeal to mothers. It established the main character's long curls (based on her son Vivian's) and velvet suit with lace collar (based on Oscar Wilde's attire) as a mother's model for small boys, who generally hated it. The book sold more than half a million copies, and Burnett's income was increased by her dramatized version, which quickly became a repertory standard on the order of Uncle Tom's Cabin. In 1888 she won a lawsuit in England over the dramatic rights to Little Lord Fauntleroy, establishing a precedent that was incorporated into British copyright law in 1911. Her later books include Sara Crewe (1888), dramatized as The Little Princess (1905), and The Secret Garden (1909), both of which were also written for children. The Lady of Quality (1896) has been considered the best of her other plays. These, like most of her 40-odd novels, stress sentimental, romantic themes. In 1893 she published a memoir of her youth, The One I Knew Best of All. From the mid-1890s she lived mainly in England, but in 1909 she built a house in Plandome, Long Island, New York, where she died in 1924. Her son Vivian Burnett, the model for Little Lord Fauntleroy, wrote a biography of her in 1927 entitled The Romantick Lady.
