Using examples from Poland, El?bieta Dr??kiewicz explores the question of why states become donors and individuals decide to share their wealth with others through foreign aid. She comes to the conclusion that the concept of foreign aid requires the establishment of a specific moral economy which links national ideologies and local cultures of charitable giving with broader ideas about the global political economy. It is through these processes that faith in foreign aid interventions as a solution to global issues is generated. The book also explores the relationship linking a state institution with its NGO partners, as well as international players such as the EU or OECD.

This new second edition of 'Managing People' provides a practical approach to applying up-to-the-minute management techniques, and is a vital source of information for professionals in the hotel and catering industry responsible for personnel and training. Riley explores how aspects such as labour cost, utilization, labour market behaviour and pay are inseparable from the skills of people management. In the new edition he extends his ideas on productivity so as to encompass its relationship with functional flexibility. In a similar manner, thinking about motivating people is extended to include modern ideas about commitment. We all loosely refer to peoples' attitude but here he shows the complexity that lies behind them. It is especially of relevance for managers with responsibility for personnel and training,

and degree-level students will also find its non-prescriptive, user-friendly approach helpful. Michael Riley has extensive experience in the hotel and tourism industry and communicates in a way that reflects that experience.

Praise for Structured Finance & Insurance "More and more each year, the modern corporation must decide what risks to keep and what risks to shed to remain competitive and to maximize its value for the capital employed. Culp explains the theory and practice of risk transfer through either balance sheet mechanism such as structured finance, derivative transactions, or insurance. Equity is expensive and risk transfer is expensive. As understanding grows, and, as a result, costs continue to fall, ART will continue to replace equity as the means to cushion knowable risks. This book enhances our understanding of ART." --Myron S.

Scholes, Frank E. Buck Professor of Finance, Emeritus, Graduate School of Business, Stanford University "A must-read for everyone offering structured finance as a business, and arguably even more valuable to any one expected to pay for such service." --Norbert Johanning, Managing Director, DaimlerChrysler Financial Services

"Culp's latest book provides a comprehensive account of the most important financing and risk management innovations in both insurance and capital markets. And it does so by fitting these innovative solutions and products into a single, unified theory of financial markets that integrates the once largely separate disciplines of insurance and risk management with the current theory and practice of corporate finance." --Don Chew, Editor, Journal of Applied Corporate Finance (a Morgan Stanley publication) "This exciting book is a comprehensive read on alternative insurance solutions available to corporations. It focuses on the real benefits, economical and practical, of alternatives such as captives, rent-a-captive, and mutuals. An excellent introduction to the very complex field of alternative risk transfer (ART)."

--Paul Wohrmann, PhD, Head of the Center of Excellence ART and member of the Executive Management of Global Corporate in Europe, Zurich Financial Services "Structured Finance and Insurance transcends Silos to reach the Enterprise Mountaintop. Culp superbly details integrated, captive, multiple triggers and capital market products, and provides the architectural blueprints for enterprise risk innovation."

Managing in the New Team Environment is essential reading for all managers in contemporary business organizations who are attempting to work productively in today's challenging economic environment. As the organizational model based on hierarchy and conformity has increasingly revealed its inability to meet competitive challenges, a new team environment has evolved. Larry Hirschhorn's *Managing in the New Team Environment* presents an overview of the skills and techniques required to manage successfully in this new environment and focuses in particular on the ways in which the manager's role should change in response to changes in the nature of the team. The book, which includes extensive case studies, is designed to help managers understand the social and psychological realities that shape their choices and behaviors. The manager in the new team environment is at once a member of the team and the leader of the team. Hirschhorn presents guidelines to help the manager adapt to this dual role, to become a "learner" as well as a "controller," and thereby ensure that the team functions at optimal effectiveness. Divided into five chapters and a summary, the book introduces the manager to the nature of the new team. Motivate, engage, and achieve lasting success with more effective performance management *Managing Business Performance* offers a unique blueprint for achieving organisational excellence through improved productivity, efficiency, engagement, and morale. With a unique

approach that acknowledges the human aspect of performance management, this book combines technical and social know-how to give you a solid framework for designing, configuring, and managing performance improvement initiatives with sustainable results. You'll find practical models, techniques, and tools that take you beyond management theory into advice that you can use, with clear explanations that steer you toward the customisations that would best suit your organisation. International case studies illustrate these ideas in action, providing an intimate look at how cultural differences impact management strategies, and insight into how they can be managed. Organisational performance tools and techniques are well established, but many organisations will never realise their full benefit. This book helps you get more out of your performance strategy by showing you how the organisation's complex social nature impacts real-world outcomes, and how it can be used to drive better performance. Blend technical and social management strategies Keep people motivated and engaged See better results with more staying power Get the very best from your organisation Performance management strategies that fail to take people into account are counterproductive. There's no better way to de-motivate, demoralise, and disengage the people upon whom the organisation depends. Sustainable success requires a blended approach that utilizes the most effective science within the art of people management, and *Managing Business Performance* gives you a solid foundation for better business performance strategy. Greenwood Plantation in the Red Hills region of southwest Georgia includes a rare one-thousand-acre stand of old-growth longleaf pine woodlands, a remnant of an ecosystem that once covered close to ninety million acres across the Southeast. The Art of Managing Longleaf documents the sometimes controversial management system that not only has protected Greenwood's "Big Woods" but also has been practiced on a substantial acreage of the remnant longleaf pine woodlands in the Red Hills and other parts of the Coastal Plain. Often described as an art informed by science, the Stoddard-Neel Approach combines frequent prescribed burning, highly selective logging, a commitment to a particular woodland aesthetic, intimate knowledge of the

ecosystem and its processes, and other strategies to manage the longleaf pine ecosystem in a sustainable way. The namesakes of this method are Herbert Stoddard (who developed it) and his colleague and successor, Leon Neel (who has refined it). In addition to presenting a detailed, illustrated outline of the Stoddard-Neel Approach, the book—based on an extensive oral history project undertaken by Paul S. Sutter and Albert G. Way, with Neel as its major subject—discusses Neel's deep familial and cultural roots in the Red Hills; his years of work with Stoddard; and the formation and early years of the Tall Timbers Research Station, which Stoddard and Neel helped found in the pinelands near Tallahassee, Florida, in 1958. In their introduction, environmental historians Sutter and Way provide an overview of the longleaf ecosystem's natural and human history, and in his afterword, forest ecologist Jerry F. Franklin affirms the value of the Stoddard-Neel Approach.

Stanley Bing follows his enormously successful *What Would Machiavelli Do?* with another subversively humorous exploration of how work would be different—if the Buddha were your personal consultant. What would the Buddha do—if he had to deal with a rampaging elephant of a boss every day? That is the premise of Stanley Bing's wickedly funny guide to finding inner peace in the face of relentlessly obnoxious, huge, and sometimes smelly

bosses. Taking the concept of managing up to a new cosmic plateau, Bing urges no less than a revolution of the spirit in the American workplace, turning overwrought, oppressed, stressed-out employees into models of Zen-like powers of concentration, able to take their elephant-like bosses and grey, lumbering companies and twirl them around the little finger of their consciousness. In Bing's unique tradition of social criticism cum business self-help, *Throwing the Elephant* presents Four Truths (or possibly Five), a Ninefold Path, and one useful, hilarious guide to workplace sanity, success, and enlightenment that surpasses all understanding, survival.

Trying to do good deeds does not guarantee that a nonprofit organization will succeed. The organization must do good deeds well. This textbook offers a blueprint for nonprofit success, adopting a strategic perspective that assumes vision, mission, strategy, and execution as the pillars upon which success is built. While many experts on nonprofits argue that fundraising is the single key to success, William B. Werther Jr., and Evan M. Berman show that effective fundraising depends largely on how the nonprofit is positioned and how it performs. They address such issues as leadership and board development, strategic planning, staffing, fundraising, partnering,

productivity improvement, and accountability. Emphasizing the context of nonprofits and detailing improvements than can be made by managers at all levels, the book strikes a balance between policy discussion and practical usefulness. Written for use in graduate courses in nonprofit management, Third Sector Management will also be invaluable to directors, staff, volunteers, and board members of nonprofit organizations.

Mastering the Art Managing Money is an unconventional book. It teaches that success in money matters is more art than science. The book begins with introductory lessons on why we all need to manage money properly. Chapter two reveals that the science of financial management is simply not enough. The role of emotions in financial decision making was x-rayed in addition to a presentation of different concepts of success. The main body of the book focused on a series of five connected steps or phases of activity that is required for the mastery of money management matters.

The author researched highly successful senior managers to discover what is behind their Managing Genius and boiled down the common denominators to provide essentials for managing excellence. Managing Genius features everything you need to manage people.

The song of organisational change goes: 'Ready or not, here I come. You can't hide...' But is change collapsonomics - everything - or have some things not changed? Managing Value in Organisations argues that traditional business thinking has produced low trust with

high cost in increased disengagement: the 100 year old management model still accrues organisational debt, the business model privileges producers, and the learning model pretends individual learning produces collective learning. All are now barriers to development. Working with five organisations, Donal Carroll reinvents the management model to multiply trust, the business model for more complex customer value, and learning model for significant collective learning. He provides evidence that together, these get organisations to their next stage of development faster. In a climate of perceived increasing uncertainty and 'more for less' it invites organisations to move from default models and choose their models to 'live on purpose'. This applied business research has many new ideas: value creating research method, three new models, 'techniques' for organisations to self-assess and construct their next stage, as well as 'fecund argument, productive interference, organisational orphans' and 'facing down Facebook '. It invites readers on a risky narrative, testing one idea in five organisations, over one year through two journeys - the organisations' and writer's. A different business book, it seeks to capture the 'poetry and plumbing' excitement of management innovation. Managers at every level, coaches, consultants, business scholars, researchers, anyone seeking sustainable improvement, or who thinks the impossible can't be reached will find something here. Prioritizing your time and your life, you'll be able to manage a bustling home in a way that honors God and builds up family relationships. By following the clear model of Proverbs 31:10, and adapting the

characteristics that make up a faithful homekeeper, you too can become an "Excellent Wife."

Renowned executive coaches and global leadership strategists Jane Hyun and Audrey S. Lee offer lessons on the vital skill of "Flexing"—the art of switching leadership styles to more effectively lead people who are different from you, allowing managers to successfully manage the multicultural workers of today and tomorrow. Flex offers a proactive strategy for managers to navigate and leverage diversity effectively in this new global economy, showing managers how to: understand the power gap, the social distance between you and those in the workplace of different cultures, ages, and gender; flex your management style, by stretching how you work and communicate with others, and bridging the gap with more effective communication, feedback tools and building healthy teams; and multiply the effect, by teaching these skills to others and closing the power gap with clients, customers, and partners to create innovative solutions. Creating flex in a company's management style will impact all aspects of developing the talent you have, attracting future talent and building relationships with customers in this competitive marketplace. Now, *Flex: The New Playbook for Managing Across Differences* shows you how.

Human Power is exponential and immeasurable. Effective utilization of the same is a great art indeed and involves lots of techniques. Handling the power within us and with others is not as easy as handling other resources (land, capital & entrepreneurship). No wonder, human resource functions have assumed greater

significance in every organization in recent times. If a failure occurs in any of the aforesaid 3 resources, the root-cause for such failure is the human resources and that is why they are called live-wire. There has been a total paradigm shift in organizations' perspective –the amount spent on people towards training which was hitherto considered as an expense is now being viewed as an investment on Human Capital. That is how the emergence of Human Resource Department has taken place who acts as a link & fulcrum to all other activities in any business enterprise. The sole objective of this book The Art of Managing Human Power is to develop every individual as a productive Human Capital. Hopefully this would not only meet the requirement of every manager in an organization and all students of business schools but also would prove to be a simple guide for people management.

Professional service firms differ from other business enterprises in two distinct ways: first they provide highly customised services thus cannot apply many of the management principles developed for product-based industries. Second, professional services are highly personalised, involving the skills of individuals. Such firms must therefore compete not only for clients but also for

talented professionals. Drawing on more than ten years of research and consulting to these unique and creative companies, David Maister explores issues ranging from marketing and business development to multinational strategies, human resources policies to profit improvement, strategic planning to effective leadership. The creative and cultural industries are a dynamic and rapidly expanding field of enterprise. Yet all too often the dominant narrative about arts organisations is one of crisis, collapse, and closure. This edited collection seeks to challenge that narrative through pursuing a focus on organisational success in the management of creative and cultural organisations. This book offers a robust and in-depth analysis of nine international case studies exploring how different organisations have achieved their objectives through effectively managing their resources. Spanning a broad cross section of the cultural sector including Theatres; Multi-Arts Venues; Performing Arts Companies; Museums and Galleries; and Festivals and Events, these cases highlight the importance of examining an individual organisation's success in relation to its environmental context, revealing not only how

arts organisations work in practice, but also providing inspiration and encouragement for those wishing to emulate such success. With an explicit focus on examining theory in practice, this unique collection will be of great interest to students, academics, and practitioners alike. While traditional approaches have often been overly theoretical, this pragmatic approach will help students to gain a richer understanding of how to manage cultural and creative organisations more effectively.
