When gladiator Atretes locates his missing son, his plans to return to Germania are upset by Rizpah, the young widow who adopted his abandoned baby and who will fight to keep the child she loves.

IN the beginning the world appeared to mankind like a fairy tale; everything that lay beyond the circle of familiar experience was a shifting cloudland of the fancy, a playground for all the fabled beings of mythology; but in the farthest distance, towards the west and north, was the region of darkness and mists, where sea, land and sky were merged into a congealed mass—and at the end of all gaped the immeasurable mouth of the abyss, the awful void of space. Out of this fairy world, in course of time, the calm and sober lines of the northern landscape appeared. With unspeakable labour the eye of man has forced its way gradually towards the north, over mountains and forests, and tundra, onward through the mists along the vacant shores of the polar sea—the vast stillness, where so much struggle and suffering, so many bitter failures, so many proud victories, have vanished without a trace, muffled beneath the mantle of snow. When our thoughts go back through the ages in a waking dream, an endless procession passes before us—like a single mighty epic of the human mind's power of devotion to an idea, right or wrong—a procession of struggling, frost-covered figures in heavy clothes, some erect and powerful, others weak and bent so that

they can scarcely drag themselves along before the sledges, many of them emaciated and dying of hunger, cold and scurvy; but all looking out before them towards the unknown, beyond the sunset, where the goal of their struggle is to be found. We see a Pytheas, intelligent and courageous, steering northward from the Pillars of Hercules for the discovery of Britain and Northern Europe; we see hardy Vikings, with an Ottar, a Leif Ericson at their head, sailing in undecked boats across the ocean into ice and tempest and clearing the mists from an unseen world; we see a Davis, a Baffin forcing their way to the north-west and opening up new routes, while a Hudson, unconquered by ice and winter, finds a lonely grave on a deserted shore, a victim of shabby pilfering. We see the bright form of a Parry surpassing all as he forces himself on; a Nordenskiöld, broad-shouldered and confident, leading the way to new visions; a Toll mysteriously disappearing in the drifting ice. We see men driven to despair, shooting and eating each other; but at the same time we see noble figures, like a De Long, trying to save their journals from destruction, until they sink and die. Midway in the procession comes a long file of a hundred and thirty men hauling heavy boats and sledges back to the south, but they are falling in their tracks; one after another they lie there, marking the line of route with their corpses—they are Franklin's men.

Nearly 50 students, colleagues, and friends of Nicholas Postgate join in tribute to an Assyriologist and Archaeologist who has had a profound influence on both disciplines. His work and scholarship are strongly felt in Iraq, where he was the Director of the British School of Archaeology, in the United Kingdom, where he is Emeritus Professor of Assyriology in the University of Cambridge, and in the subject internationally. He has fostered close collaboration with colleagues in Turkey and Iraq, where he has been involved in archaeological investigation, always seeking to meld the study of texts with that of material remains. The essays embrace the full range of Postgate's interests, including government and administration, art history, population studies, the economy, religion and divination, foodstuffs, ceramics, and Akkadian and Sumerian language—in a word, all of ancient Mesopotamian civilisation.

"Meaty, well-written." —Kirkus Reviews "Timely and informative." —The New York Times Book Review "By far the best book I have ever read on humanity's deep history." —E. O. Wilson, biologist and author of *The Ants* and *On Human Nature* Nicholas Wade's articles are a major reason why the science section has become the most popular, nationwide, in the New York Times. In his groundbreaking *Before the Dawn*, Wade reveals humanity's origins as never before—a journey made possible only recently by genetic science, whose incredible findings have answered such questions as: What was the first human language like? How large were the first societies, and how warlike were they? When did our ancestors first leave Africa, and by what route did they leave? By eloquently solving these and numerous other mysteries, Wade offers nothing less than a uniquely complete retelling of a story that began 500 centuries ago.

Chronologically traces the course of human history and civilization from prehistoric times to the present day, covering key events, people, inventions and discoveries, and ideas and beliefs.

In 1898, documentary footage of a yacht race was shot by Robert A. Mitchell, making him the first Irishman to shoot a film within Ireland. Despite early exposure to the filmmaking process, Ireland did not develop a regular film industry until the late 1910s when James Mark Sullivan established the Film Company of Ireland. Since that time, Ireland has played host to many famous films about the country—*Man of Aran*, *The Quiet Man*, *The Crying Game*, *My Left Foot*, and *Bloody Sunday*—as well as others not about the country—*Braveheart* and *Saving Private Ryan*. It has also produced great directors such as Neil Jordan and Jim Sheridan, as well as throngs of exceptional actors and actresses: Colin Farrel, Colm Meaney, Cillian Murphy, Liam Neeson, Maureen O'Hara, and Peter O'Toole. The Historical Dictionary of Irish Cinema provides essential facts on the history of Irish cinema through a list of acronyms and abbreviation; a chronology; an introduction; a

A modern, magic adventure with a difference. The Key element is humour. The delivery is pacey, direct and very action based. Characters are believable, with quirky personalities. Donkeys carried Christ into Jerusalem while in Greek myth they transported Hephaistos up to Mount Olympos and Dionysos into battle against the Giants. They were probably the first animals that people ever rode, as well as the first used on a large-scale as beasts of burden. Associated with kingship and the gods in the ancient Near East, they have been (and in many places still are) a core technology for moving people and goods over both short and long distances, as well as a supplier of muscle power for threshing and grinding grain, pressing olives, raising water, ploughing fields, and pulling carts, to name just a few of the uses to which they have been put. Yet despite this, they remain one of the least studied, and most widely ignored, of all domestic animals, consigned to the margins of history like so many of those who still depend upon them. Spanning the globe and extending from the donkey's initial domestication up to the present, this book seeks to remedy this situation by using archaeological evidence, in combination with insights from history and anthropology, to resituate the donkey (and its hybrid offspring such as the mule) in the unfolding of human history, looking not just at what donkeys and mules did, but also at how people have thought about and understood them. Intended in part for university researchers and students working in the broad fields of world history, archaeology, animal history, and anthropology, but it should also interest anyone keen to learn more about one of the most widespread and important of the animals that people have domesticated.

- Explores the five periods of runic revival: the Renaissance, the Enlightenment, the Romantic period, the early 20th century, and the late 20th century
- Examines the use of runes by the foremost magicians and scholars of each era, including mystic and scholar Johannes Bureus, who developed his own integrated system of runology known as Adalruna
- Reveals how the Nazi misguided use of the runes showed a lack of comprehension of what was being discovered by scientific rune scholars of the day

In this exploration of the history of the runes from 1500 CE to the present day, Stephen Edred Flowers examines the five periods of runic revival: the Renaissance, the Enlightenment, the Romantic period, the early 20th century, and the late 20th century. For each period, he discusses both the scholarly studies and those focused on the esoteric mysteries of the runes--and how these two branches of study were at first intertwined yet diverged in later revivals. Focusing in particular on the first runic revival, Flowers examines the use of runes during the Renaissance by the foremost magicians and scholars of the era, including mystic and scholar Johannes Bureus, the "grandfather of integral runology," who developed his own system known as Adalruna. In his examination of the runic reawakenings of the early and late 20th century, Flowers looks at how the runes were employed as part of a reassessment of Germanic identity, one school of which led to Nazi Germany. He explains how the Nazi use and abuse of the runes was misguided and revealed a lack of comprehension of what earlier rune scholars had discovered through their extensive studies of the past. He also offers a fresh look at the work of Guido von List and clears him of his guilt by association with the Nazis. Detailing the multilayered history of the runes, the author reveals the integrated way the predecessors of today's rune workers thought and conceived of the runes, highlighting how their discoveries helped shape modern magical practices and scholarly studies. He calls for a return of integral runology as was practiced during the Renaissance and before. By reuniting the two branches of runic study, blending the scientific with the magical, we make way for new discoveries in runology and a chance for a full-scale reawakening of integrated runic

The surprise Japanese dawn air raid on the American naval fleet at Pearl Harbour on 7 December 1941 was one of the major turning points in history. It caused massive devastation, caught the United States unaware and plunged them into the Second World War, turning it into a truly global conflict. This gripping study scrupulously reconstructs the attack, from its meticulously planned conception, to its lightning execution and the bitter political controversy that followed. It is a story of Japan's daring, tactical brilliance and fanatical dedication, and of America's blind disbelief in a threat from the Far East that led it to ignore advance warnings from its own intelligence sources.

This new edition of Norman Davies's classic study of the history of Poland has been revised and fully updated with two new chapters to bring the story to the end of the twentieth century. The writing of Polish history, like Poland itself, has frequently fallen prey to interested parties. Professor Norman Davies adopts a sceptical stance towards all existing interpretations and attempts to bring a strong dose of common sense to his theme. He presents the most comprehensive survey in English of this frequently maligned and usually misunderstood country.

From a recognized authority on the High Plains Indians wars comes this narrative history blending both American Indian and U.S. Army perspectives on the attack that destroyed the village of Northern Cheyenne chief Morning Star. Of momentous significance for the Cheyennes as well as the army, this November 1876 encounter, coming exactly six months to the day after the Custer debacle at the Little Bighorn, was part of the Powder River Expedition waged by Brigadier General George Crook against the Indians. Vital to the larger context of the Great Sioux War, the attack on Morning Star's village encouraged the eventual surrender of Crazy Horse and his Sioux followers. Unbiased in its delivery, *Morning Star Dawn* offers the most thorough modern scholarly assessment of the Powder River Expedition. It incorporates previously unsynthesized data from the National Archives, the Library of Congress, the U.S. Army Military History Institute, and other repositories, and provides an examination of all facets of the campaign leading to and following the destruction of Morning Star's village.
