

The Oxford Illustrated Junior Dictionary

While industries such as music, newspapers, film and publishing have seen radical changes in their business models and practices as a direct result of new technologies, higher education has so far resisted the wholesale changes we have seen elsewhere. However, a gradual and fundamental shift in the practice of academics is taking place. Every aspect of scholarly practice is seeing changes effected by the adoption and possibilities of new technologies. This book will explore these changes, their implications for higher education, the possibilities for new forms of scholarly practice and what lessons can be drawn from other sectors.

Getting the right cut for the right fabric is the key to good design. One of the most challenging aspects of a fashion designer's training is learning how to create patterns that utilize the characteristics of fabrics. With an ever expanding range available, an understanding of the relationship between fabric, form and pattern shape is now the most important skill a designer has to acquire. Winifred Aldrich, a leading pattern cutting authority, explores how a garment's shape is created and discusses the factors that

need to be considered when creating patterns and offers you a practical method for solving problems. No other pattern cutting book considers the effects of individual fabrics and its approach is based on the appraisal of the fabric and body shape. *Fabrics and Patterns Cutting* is the revised and simplified edition of *Fabric, Form and Flat Pattern Cutting*. It is fully illustrated and makes use of numerous practical examples. It also takes into account important new developments in fabric – new fabrics, new methods of fabric construction and new fabric finishes. Free block patterns are available online for readers to print out for use in their classes.
