Horrible neighbours, a wizarding sister, and a schoolyard bully -- essential ingredients in this very funny story of modern family life! Lizzie, Max and Dan have never liked their neighbours, the fussy and nagging Potwards, so when it appears that Lizzie's magic potion has made them move out, the children should be delighted. Their glee is short-lived, however, as they worry over who might move in, and more magic seems necessary. Soon the three children are caught in a web of secrecy and conspiracy as one spell leads to another, each more powerful than the last. And then Max decides to cast a spell of his own, on his very worst enemy. From the winner of the Costa Children's Book Award 2018. It's a long hot summer - to Permanent Rose it seems never ending. A low hut built of turf roughly thatched with rushes and standing on the highest spot of some slightly raised ground. It was surrounded by a tangled growth of bushes and low trees, through which a narrow and winding path gave admission to the narrow space on which the hut stood. The ground sloped rapidly. Twenty yards from the house the trees ceased, and a rank vegetation of reeds and rushes took the place of the bushes, and the ground became soft and swampy. A little further pools of stagnant water appeared among the rushes, and the path abruptly stopped at the edge of a stagnant swamp, though the passage could be followed by the eye for some distance among the tall rushes. The hut, in fact, stood on a hummock in the midst of a wide swamp where the water sometimes

deepened into lakes connected by sluggish streams.

A cybersecurity expert and former Google privacy analyst's urgent call to protect devices and networks against malicious hackers? New technologies have provided both incredible convenience and new threats. The same kinds of digital networks that allow you to hail a ride using your smartphone let power grid operators control a country's electricity--and these personal, corporate, and government systems are all vulnerable. In Ukraine, unknown hackers shut off

electricity to nearly 230,000 people for six hours. North Korean hackers destroyed networks at Sony Pictures in retaliation for a film that mocked Kim Jong-un. And Russian cyberattackers leaked Democratic National Committee emails in an attempt to sway a U.S. presidential election. And yet despite such documented risks, government agencies, whose investigations and surveillance are stymied by encryption, push for a weakening of protections. In this accessible and riveting read, Susan Landau makes a compelling case for the need to secure our data, explaining how we must maintain cybersecurity in an insecure age.
