Self and Nation is a lively and accessible exploration of the issues related to nationhood, nationalism and national identity. The authors challenge common assumptions of what 'national identity' means by addressing key concepts of identity, national character, national history and nationalist psychology. How do constructions of national identity affect the way people act, are mobilized, transform societies, create nations and reshape nations where they already exist? This book shows how the central notion of national identity is used by politicians and activists in support of attempts to create different types of nations. Self and Nation will be essential reading for undergraduate and postgraduate students as well as researchers in social psychology, politics, sociology and social anthropology.

The question of consumption emerged as a major focus of research and scholarship in the 1990s but the breadth and diversity of consumer culture has not been fully enough explored. The SAGE Handbook of Propaganda tells a radical new story about propaganda, fake news and information warfare and their toxic impact on the communications revolution of the past twenty years. It explains how propaganda invades the human psyche, in what ways it does so, and in what contexts. As a beguiling tool of political persuasion in times of war, peace, and uncertainty, propaganda incites people to take, often violent, action, consciously or unconsciously. This pervasive influence is particularly prevalent in world politics and international relations today. In this interdisciplinary Handbook, the editors have gathered together a group of world-class scholars from Europe, America, Asia, and the Middle East, to discuss leadership propaganda, war propaganda, propaganda for peace marketing, propaganda as a psychological tool, terror-enhanced propaganda, and the contemporary topics of internet-mediated propaganda. This is the first book of its kind, shedding a harsh new light on many current forms and processes ranging from Islamist and Far Right, troll farms and fake news institutes, to the more salient everyday manipulative practices of corporations and brands as well as political parties. In its four parts, the Handbook offers researchers and academics of propaganda studies, peace and conflict studies, media and communication studies, political science and governance marketing, as well as intelligence and law enforcement communities, a comprehensive overview of the tools and context of the development and evolution of propaganda from the twentieth century to the present: Part One: Concepts, Precepts and Techniques in Propaganda Research Part Two: Methodological Approaches in Propaganda Research Part Three: Tools and Techniques in Counter-Propaganda Research Part Four: Propaganda in Context

The SAGE Handbook of Media Studies examines the theories, practices, and future of this fast-growing field. Editor John Downing and associate editors Denis McQuail, Philip Schlesinger, and Ellen Wartella have brought together a team of international contributors to provide a varied critical analysis of this intensely interesting field of study. The Handbook offers a comprehensive review within five interconnected areas: humanistic and social scientific approaches; global and comparative perspectives; the relation of media to economy and power; media users; and elements in the media mosaic ranging from popular music to digital technologies, from media ethics to advertising, and from Hollywood and Bollywood to alternative media.

'With its list of distinguished contributors and its wide range of topics, the handbook is surely destined to become an invaluable resource for all serious students of nationalism' - Michael Billig, Professor of Social Sciences at Loughborough University and author of 'Banal Nationalism' (SAGE 1995) 'The persistence - some would say: revival - of nationalism across the recent history of modernity, in particular the past two decades, has taken many scholars in the social sciences by surprise. In response, interest in the analysis of nationalism has increased and given rise to a great variety of new angles under which to study the phenomenon. What was missing in the cacophony of voices addressing nationalism was a volume that brought them together and confronted them with each other. This handbook does just that. It deserves particular praise for the wide range of approaches and topic included and for the systematic attempt at studying nationalism as a phenomenon of our time, not a remnant

from the past' - Peter Wagner, Professor of Social and Political Theory, European University Institute; and Professor of Sociology, University of Warwick 'For students concerned with the contemporary study of nationalism this will be an invaluable publication. The three-fold division into approaches, themes and cases is a very solid and sensible one. The editors have commissioned essays from leading scholars in the field [and]this handbook provides the best single-volume overview of contemporary nationalism' - John Breuilly, Professor of Nationalism and Ethnicity, London School of Economics Nationalism has long excited debate in political, social and cultural theory and remains a key field of enquiry among historians, anthropologists, sociologists as well as political scientists. It is also one of the critical media issues of our time. There are, however, surprisingly few volumes that bring together the best of this intellectual diversity into one collection. This Handbook gives readers a critical survey of the latest theories and debates and provides a glimpse of the issues that will shape their future. Its three sections guide the reader through the theoretical approaches to this field of study, its major themes - from modernity to memory, migration and genocide - and the diversity of nationalisms found around the globe. The overall aim of this Handbook is to relate theories and debates within and across a range of disciplines, illuminate themes and issues of central importance in both historical and contemporary contexts, and show how nationalism has impacted upon and interacted with other political and social forms and forces. This book provides a much-needed resource for scholars in international relations, political science, social theory and sociology. 'The SAGE Handbook of Conflict Resolution demonstrates the range of themes that constitute modern conflict resolution. It brings out its key issues, methods and dilemmas through original contributions by leading scholars in a dynamic and expanding field of inquiry. This handbook is exactly what it sets out to be: an indispensable tool for teaching, research and practice in conflict resolution' - Peter Wallensteen, Professor of Peace and Conflict Research, Uppsala University and University of Notre Dame 'Bercovitch, Kremenyuk and Zartman are among the most important figures in the conflict resolution field. They have pieced together, with the help of more than 35 colleagues from numerous countries, a state-of-the-art review of the sources of international conflict, available methods of conflict management, and the most difficult challenges facing the individuals and organizations trying to guide us through these conflict-ridden times. The collection is brimming with penetrating insights, trenchant analyses, compelling cases, and disciplined speculation. They help us understand both the promise of as well as the obstacles to theory-building in the new field of conflict resolution' - Lawrence Susskind, Professor and Director of the MIT - Harvard Public Disputes Program 'The last three sentences of this persuasive book: "We conclude this volume more than ever convinced that conflict resolution is not just possible or desirable in the current international environment. It is absolutely necessary. Resolving conflicts and making peace is no longer an option; it is an intellectual and practical skill that we must all possess." If you are part of that "we," intellectually or professionally, you will find this book a superb companion' - Thomas C Schelling, Professor Emeritus, Harvard University and University of Maryland Conflict resolution is one of the fastest-growing academic fields in the world today. Although it is a relatively young discipline, having emerged as a specialized field in the 1950's, it has rapidly grown into a self-contained, vibrant, interdisciplinary field. The SAGE Handbook of Conflict Resolution brings together all the conceptual, methodological and substantive elements of conflict resolution into one volume of over 35 specially commissioned chapters. The Handbook is designed to reflect where the field is today by drawing on the contributions of experts from different fields presenting, in a systematic way, the most recent research and practice. Jacob Bercovitch is Professor of International Relations, and Fellow of the Royal Society, at the University of Canterbury in Christchurch, New Zealand. Victor Kremenyuk is deputy director of the Institute for USA and Canada Studies, Russian Academy of Sciences, Moscow. He is also a research associate at IIASA. I. William Zartman is Jacob Blaustein Professor of Conflict Resolution and International

Organization at the Nitze School of Advanced International Studies of Johns Hopkins University

Chosen by Library Journal as one of the best reference texts of 2016. Occupy. Indignados. The Tea Party. The Arab Spring. Anonymous. These and other terms have become part of an emerging lexicon in recent years, signalling an important development that has gripped many parts of the world: millions of people are increasingly involved, whether directly or indirectly, in movements of resistance and protestation. However, resistance and its conceptual "companions", protest, contestation, opposition, disobedience and mobilization, all seem to be still mostly seen in public and private discourses as illegitimate and problematic forms of action. The time is, therefore, ripe to delve into the concerns, themes and legitimacy. The SAGE Handbook of Resistance offers theoretical essays enabling readers to forge their own perspectives of what "is" resistance and emphasizes the empirical and experiential dimension of resistance - making strong choices in terms of how contemporary topics related to resistance help to rethink our societies as "protest societies". The coverage is divided into six key sub-sections: Foundations Sites of Resistance Technologies of Resistance Languages of Resistance Geographies of Resistance Consequences of Resistance

This compelling book argues that it is wrong to assume that nations are culturally uniform. Hutchinson provocatively asserts that resting on older diverse ethnic identities, nations adapt from the unpredictable challenges of modernity, and such plurality makes them prone to cultural wars.

During the last two decades the study of European foreign policy has experienced remarkable growth, presumably reflecting a more significant international role of the European Union. The Union has significantly expanded its policy portfolio and though empty symbolic politics still exists, the Union's international relations have become more substantial and its foreign policy more focused. "Overall, its breaking of disciplinary isolation, enhancing of mutual understanding, and laying out of a transdisciplinary platform makes this Handbook a milestone in identity studies." - Sociology Increasingly, identities are the site for interdisciplinary initiatives and identity research is at the heart of many transdisciplinary research centres around the world. No single social science discipline 'owns' identity research which makes it a difficult topic to categorize. The SAGE Handbook of Identities systematizes this complex field by incorporating its interdisciplinary character to provide a comprehensive overview of its themes in contemporary research while still acknowledging the historical and philosophical significance of the concept of identity. Drawing on a global scholarship the Handbook has four parts: Frameworks: presents the main theoretical and methodological perspectives in identities research. Formations: covers the major formative forces for identities such as culture, globalisation, migratory patterns, biology and so on. Categories: reviews research on the core social categories central to identity such as ethnicity, gender, sexuality, disability and intersections between these. Sites and Context: develops a series of case studies of crucial sites and contexts where identity is at stake such as social movements, relationships, work-places and citizenship.

Global studies is a fresh and dynamic discipline area that promises to reinvigorate undergraduate and postgraduate education in the social sciences and humanities. In the Australian context, the interdisciplinary pedagogy that defines global studies is gaining wider acceptance as a coherent and necessary approach to the study of global change. Through the Global Studies Consortium (GSC), this new discipline is forming around an impressive body of international scholars who define their expertise in global

terms. The GSC paves the way for the expansion of global studies programs internationally and for the development of teaching and research collaboration on a global scale. Mark Juergensmeyer and Helmut Anheier's forthcoming Encyclopaedia of Global Studies with SAGE is evidence of this growing international collaboration, while the work of Professor Manfred Steger exemplifies the flourishing academic literature on globalization. RMIT University's Global Cities Institute represents a substantial institutional investment in interdisciplinary research into the social and environmental implications of globalization in which it leads the way internationally. Given these developments, the time is right for a book series that draws together diverse scholarship in global studies. This Handbook allows for extended treatment of critical issues that are of major interest to researchers and students in this emerging field. The topics covered speak to an interdisciplinary approach to the study of global issues that reaches well beyond the confines of international relations and political science to encompass sociology, anthropology, history, media and cultural studies, economics and governance, environmental sustainability, international law and criminal justice. Specially commissioned chapters explore diverse subjects from a global vantage point and all deliberately cohere around core "global" concerns of narrative, praxis, space and place. This integrated approach sets the Handbook apart from its competitors and distinguishes Global Studies as the most equipped academic discipline with which to address the scope and pace of global change in the 21st century.

A coordinated and comprehensive volume of international research on this subject edited by members of the well-established European Early Childhood Education Research Association Outdoor Play and Learning SIG (OPAL).

Migration moves people, ideas and things. Migration shakes up political scenes and instigates new social movements. It redraws emotional landscapes and reshapes social networks, with traditional and digital media enabling, representing, and shaping the processes, relationships and people on the move. The deep entanglement of media and migration expands across the fields of political, cultural and social life. For example, migration is increasingly digitally tracked and surveilled, and national and international policy-making draws on data on migrant movement, anticipated movement, and biometrics to maintain a sense of control over the mobilities of humans and things. Also, social imaginaries are constituted in highly mediated environments where information and emotions on migration are constantly shared on social and traditional media. Both, those migrating and those receiving them, turn to media and communicative practices to learn how to make sense of migration and to manage fears and desires associated with cross-border mobility in an increasingly porous but also controlled and divided world. The SAGE Handbook of Media and Migration offers a comprehensive overview of media and migration through new research, as well as a review of present scholarship in this expanding and promising field. It explores key interdisciplinary concepts and methodologies, and how these are challenged by new realities and the links between contemporary migration patterns and its use of mediated processes. Although primarily grounded in media and communication studies, the Handbook builds on research in the fields of sociology, anthropology, political science, urban studies, science and technology studies, human rights, development studies, and gender and sexuality studies, to bring to the forefront key theories, concepts and methodological approaches to the study of the movement of people. In seven parts, the

Handbook dissects important areas of cross-disciplinary and generational discourse for graduate students, early career researcher, migration management practitioners, and academics in the fields of media and migration studies, international development, communication studies, and the wider social science discipline. Part One: Keywords and Legacies Part Two: Methodologies Part Three: Communities Part Four: Representations Part Five: Borders and Rights Part Six: Spatialities Part Seven: Conflicts

The past two decades have been marked by a period of substantial and often fundamental change in public administration. Critically reflecting on the utility of scholarly theory and the extent to which government practices inform the development of this theory, the Handbook of Public Administration was a landmark publication which served as an essential guide for both the practice of public administration today and its on-going development as an academic discipline. The Concise Paperback Edition provides a selection of 30 of the original articles in an accessible paperback format and includes a new introduction by B. Guy Peters and Jon Pierre. It is an essential point of reference for all students of public administration.

This Handbook presents a comprehensive and contemporary compendium of the field of cross-cultural management (CCM). In recognition of current trends regarding migration, political ethnocentrism and increasing nationalism, the chapters in this volume not only cover the traditional domains of CCM such as expatriation, global (virtual) teamwork and leadership, but also examine emerging topics such as bi/multi-culturalism, migration, religion and more, all considered from a global perspective. The result is a Handbook that acknowledges and builds on a variety of research traditions (from mainstream to critical), updates existing knowledge in relation to current challenges, and sets the direction for future research and developments, making this an invaluable resource for researchers in the field, and across related areas of international business, management, and intercultural relations. Part 1: Multiple Research Paradigms for the Study of Culture Part 2: Research Methods in Cross-Cultural Management Part 3: Cross-Cultural Management and Intersecting Fields of Study Part 4: Individuals and Teams in Cross-Cultural Management Part 5: Global mobility and Cross-Cultural Management Part 6: Developing Intercultural Competence Spencer and Wollman seek to challenge fixed notions of national identity, ethnicity and culture to more fully explore and understand the contemporary complexities of citizenship and the genuine potential for a cosmopolitan democracy.

'The contributions of Woodiwiss, Lister and Sassen are outstanding but not unrepresentative of the many merits of this excellent collection'- The British Journal of Sociology From women's rights, civil rights, and sexual rights for gays and lesbians to disability rights and language rights, we have experienced in the past few decades a major trend in Western nation-states towards new claims for inclusion. This trend has echoed around the world: from the Zapatistas to Chechen and Kurdish nationalists,

social and political movements are framing their struggles in the languages of rights and recognition, and hence, of citizenship. Citizenship has thus become an increasingly important axis in the social sciences. Social scientists have been rethinking the role of political agent or subject. Not only are the rights and obligations of citizens being redefined, but also what it means to be a citizen has become an issue of central concern. As the process of globalization produces multiple diasporas, we can expect increasingly complex relationships between homeland and host societies that will make the traditional idea of national citizenship problematic. As societies are forced to manage cultural difference and associated tensions and conflict, there will be changes in the processes by which states allocate citizenship and a differentiation of the category of citizen. This book constitutes the most authoritative and comprehensive guide to the terrain. Drawing on a wealth of interdisciplinary knowledge, and including some of the leading commentators of the day, it is an essential guide to understanding modern citizenship. About the editors: Engin F Isin is Associate Professor of Social Science at York University. His recent works include *Being Political: Genealogies of Citizenship* (Minnesota, 2002) and, with P K Wood, *Citizenship and Identity* (Sage, 1999). He is the Managing Editor of *Citizenship Studies*. Bryan S Turner is Professor of Sociology at the University of Cambridge. He has written widely on the sociology of citizenship in *Citizenship and Capitalism* (Unwin Hyman, 1986) and *Citizenship and Social Theory* (Sage, 1993). He is also the author of *The Body and Society* (Sage, 1996) and *Classical Sociology* (Sage, 1999), and has been editor of *Citizenship Studies* since 1997.

The SAGE Handbook of Human Rights will comprise a two volume set consisting of more than 50 original chapters that clarify and analyze human rights issues of both contemporary and future importance. The Handbook will take an inter-disciplinary approach, combining work in such traditional fields as law, political science and philosophy with such non-traditional subjects as climate change, demography, economics, geography, urban studies, mass communication, and business and marketing. In addition, one of the aspects of mainstreaming is the manner in which human rights has come to play a prominent role in popular culture, and there will be a section on human rights in art, film, music and literature. Not only will the Handbook provide a state of the art analysis of the discipline that addresses the history and development of human rights standards and its movements, mechanisms and institutions, but it will seek to go beyond this and produce a book that will help lead to prospective thinking.

This extensive Handbook will bring together different aspects of critical pedagogy with the aim of opening up a clear international conversation on the subject, as well as pushing the boundaries of current understanding by extending the notion of a pedagogy to multiple pedagogies and perspectives.
