We live in a world where seemingly everything can be measured. We rely on indicators to translate social phenomena into simple, quantified terms, which in turn can be used to guide individuals, organizations, and governments in establishing policy. Yet counting things requires finding a way to make them comparable. And in the process of translating the confusion of social life into neat categories, we inevitably strip it of context and meaning—and risk hiding or distorting as much as we reveal. With *The Seductions of Quantification*, leading legal anthropologist Sally Engle Merry investigates the techniques by which information is gathered and analyzed in the production of global indicators on human rights, gender violence, and sex trafficking. Although such numbers convey an aura of objective truth and scientific validity, Merry argues persuasively that measurement systems constitute a form of power by incorporating theories about social change in their design but rarely explicitly acknowledging them. For instance, the US State Department's Trafficking in Persons Report, which ranks countries in terms of their compliance with antitrafficking activities, assumes that prosecuting traffickers as criminals is an effective corrective strategy—overlooking cultures where women and children are frequently sold by their own families. As Merry shows, indicators are indeed seductive in their promise of providing concrete knowledge about how the world works, but they are implemented most successfully when paired with context-rich qualitative accounts grounded in local knowledge.

Amoral, cunning, ruthless, and instructive, this multi-million-copy New York Times bestseller is the definitive manual for anyone interested in gaining, observing, or defending against ultimate control – from the author of *The Laws of Human Nature*. In the book that *People* magazine proclaimed “beguiling” and “fascinating,” Robert Greene and Joost Elffers have distilled three thousand years of the history of power into 48 essential laws by drawing from the philosophies of Machiavelli, Sun Tzu, and Carl Von Clausewitz and also from the lives of figures ranging from Henry Kissinger to P.T. Barnum. Some laws teach the need for prudence (“Law 1: Never Outshine the Master”), others teach the value of confidence (“Law 28: Enter Action with Boldness”), and many recommend absolute self-preservation (“Law 15: Crush Your Enemy

Totally”). Every law, though, has one thing in common: an interest in total domination. In a bold and arresting two-color package, *The 48 Laws of Power* is ideal whether your aim is conquest, self-defense, or simply to understand the rules of the game.

In this volume Thomas Dozeman presents a fresh translation of the Hebrew text of Exodus along with a careful, critical interpretation of its central themes, literary structure, and history of composition. He explores two related themes in the formation of the book of Exodus: the identity of Yahweh, the God of Israel, and the authority of Moses, the leader of the Israelite people. / Dozeman clarifies the multiple literary genres within the text, identifies only two separate authors in the book's composition, and highlights the rich insights that arise from the comparative study of the ancient Near Eastern literary tradition. Also treating the influence of Exodus in the history of Jewish and Christian interpretation, Dozeman's comprehensive commentary will be welcomed by Old Testament scholars.

In this witty and perceptive debut, a former editor at *Psychology Today* shows us how magical thinking makes life worth living. Psychologists have documented a litany of cognitive biases- misperceptions of the world-and explained their positive functions. Now, Matthew Hutson shows us that even the most hardcore skeptic indulges in magical thinking all the time-and it's crucial to our survival. Drawing on evolution, cognitive science, and neuroscience, Hutson shows us that magical thinking has been so useful to us that it's hardwired into our brains. It encourages us to think that we actually have free will. It helps make us believe that we have an underlying purpose in the world. It can even protect us from the paralyzing awareness of our own mortality. In other words, magical thinking is a completely irrational way of making our lives make rational sense. With wonderfully entertaining stories, personal reflections, and sharp observations, Hutson reveals our deepest fears and longings. He also assures us that it is no accident his surname contains so many of the same letters as this imprint.

"The Seven Laws of Love is insightful, compelling, inspiring, grounded, and immeasurably practical. We love this book! Everyone needs to read it. Don't miss out on its powerful message." —Drs. Les & Leslie Parrott, authors of *Saving Your Marriage Before It Starts* In our fast-paced, success-obsessed culture, we're constantly tempted to chase after things that don't matter. We've been conditioned to value possessions over people, status over relationships, and ourselves over God. But the reality is this: God created love to be the centerpiece of our lives. In *The Seven Laws of Love*, Dave Willis makes the case for a love revival and proves that in returning to a life of love we have no greater model than the one who is love himself. In Dave's humorous, touching, down-to-earth style, *The Seven Laws of Love* takes you on a journey through the ins and outs of everyday relationships—with your spouse, your children, your friends, and your coworkers—using practical, applicable examples and guiding principles that demonstrate what a life of love actually looks like. There is no higher calling on earth than to love and be loved. It's time to learn *The Seven Laws of Love*, and to make loving a priority over all other pursuits. Anything else isn't really living.

NAMED A BOOK OF THE YEAR BY THE ECONOMIST AND ONE OF THE BEST BOOKS OF 2021 BY THE TIMES AND THE SUNDAY TIMES "Irreversible Damage . . . has caused a storm. Abigail Shrier, a Wall Street Journal writer, does something simple yet devastating: she rigorously lays out the facts." —Janice Turner, The Times of London Until just a few years ago, gender dysphoria—severe discomfort in one's biological sex—was vanishingly rare. It was typically found in less than .01 percent of the population, emerged in early childhood, and afflicted males almost exclusively. But today whole groups of female friends in colleges, high schools, and even middle schools across the country are coming out as “transgender.” These are girls who had never experienced any discomfort in their biological sex until they heard a coming-out story from a speaker at a school assembly or discovered the internet community of trans “influencers.” Unsuspecting parents are awakening to find their daughters in thrall to hip trans YouTube stars and “gender-affirming” educators and therapists who push life-changing interventions on young girls—including medically unnecessary double mastectomies and puberty blockers that can cause permanent infertility. Abigail Shrier, a writer for the Wall Street Journal, has dug deep into the trans epidemic, talking to the girls, their agonized parents, and the counselors and doctors who enable gender transitions, as well as to “detransitioners”—young women who bitterly regret what they have done to themselves. Coming out as transgender immediately boosts these girls' social status, Shrier finds, but once they take the first steps of transition, it is not easy to walk back. She offers urgently needed advice about how parents can protect their daughters. A generation of girls is at risk. Abigail Shrier's essential book will help you understand what the trans craze is and how you can inoculate your child against it—or how to retrieve her from this dangerous path.

The Torah, the Bible, the Tree of Life—God's Word is a set of instructions for everyone who wants to live a victorious, joyful, and abundant life. *The Seven Laws of Abundant Living* explains a parable relating to the Tree of Life that the Lord spoke to Eric Walker—a Messianic Rabbi. The parable opens wide the unique components of the Word and the physical Tree of Life that is introduced in Genesis and again in Revelation. The LORD God made all kinds of trees grow out of the ground—trees that were pleasing to the eye and good for food. In the middle of the garden was the tree of life... (Genesis 2:9). The parable reveals seven aspects of the Tree of Life: The ground, the seed, the roots, the trunk, the branches, the leaves, and the fruit. Each of these components brings seven life-changing conclusions to light that stimulate spiritual growth and maturity. The simple yet profound image is powerful and compels you into self-examination to assure your spiritual health and growth in each of the areas God wanted Eric Walker to share with you. Whoever has ears, let them hear what the Spirit says to the churches. To the one who is victorious, I will give the right to eat from the tree of life, which is in the paradise of God (Revelation 2:7).

Robert Greene is a master guide for millions of readers, distilling ancient wisdom and philosophy into essential texts for seekers of power, understanding and mastery. Now he turns to the most important subject of all - understanding people's drives and motivations, even when they are unconscious of them themselves. We are social animals. Our very lives depend on our relationships with people. Knowing why people do what they do is the most important tool we can possess, without which our other talents can only take us so far. Drawing from the ideas and examples of Pericles, Queen Elizabeth I, Martin Luther King Jr, and many others, Greene teaches us how to detach ourselves from our own emotions and master self-control, how to develop the empathy that leads to insight, how to look behind people's masks, and how to resist conformity to develop your singular sense of purpose. Whether at work, in relationships, or in shaping the world around you, *The Laws of Human Nature* offers brilliant tactics for success, self-improvement, and self-defense.

By now, the business world is probably familiar with Robert Greene's best-selling book, *The 48 Laws of Power*. Despite the book's success, there is something deeply unsettling and dishonest about its advice. What would happen if we reversed each of Robert Greene's Laws? What would that strategy look like? Whether you are an aspiring tyrant or an unassuming poet, this new book, *The 48 Laws of Power Reversal* takes a closer look at the dynamics of power. This concise edition clocks in around 60 pages and is only a taste of what will be included in the expanded edition of the same name. Using excerpts from history, film, popular culture, and famous villains, the expanded edition of *The 48 Laws of Power Reversal* will be about 500 pages in length, much like the Robert Greene book readers are familiar with. Look for the expanded edition coming soon, and in the meantime, skim through this concise edition and see if it suits you. *** Are honest people justified in praising honesty? You decide.

Benjamin Constant (1767-1830) was born in Switzerland and became one of France's leading writers, as well as a journalist, philosopher, and politician. His colourful life included a formative stay at the University of Edinburgh; service at the court of Brunswick, Germany; election to the French Tribunate; and initial opposition and subsequent support for Napoleon, even the drafting of a constitution for the Hundred Days. Constant wrote many books, essays, and pamphlets. His deepest conviction was that reform is hugely superior to revolution, both morally and politically. While Constant's fluid, dynamic style and lofty eloquence do not always make for easy reading, his text forms a coherent whole, and in his translation Dennis O'Keeffe has focused on retaining the 'general elegance and subtle rhetoric' of the original. Sir Isaiah Berlin called Constant 'the most eloquent of all defenders of freedom and privacy' and believed to him we owe the notion of 'negative liberty', that is, what Bianca Maria Fontana describes as "the protection of individual experience and choices from external interferences and constraints." To Constant it was relatively unimportant whether liberty was ultimately grounded in religion or metaphysics -- what mattered were the practical guarantees of practical freedom -- "autonomy in all those aspects of life that could cause no harm to others or to society as a whole." This translation is based on Etienne Hofmann's critical edition of *Principes de politique* (1980), complete with Constant's additions to the original work.

Doing well with money isn't necessarily about what you know. It's about how you behave. And behavior is hard to teach, even to really smart people. Money—investing, personal finance, and business decisions—is typically taught as a math-based field, where data and formulas tell us exactly what to do. But in the real world people don't make financial decisions on a spreadsheet. They make them at the dinner table, or in a meeting room, where personal history, your own unique view of the world, ego, pride, marketing, and odd incentives are scrambled together. In *The Psychology of Money*, award-winning author Morgan Housel shares 19 short stories exploring the strange ways people think about money and teaches you how to make better sense of one of life's most important topics.

It's a troubled world we live in. It was meant to be utopia, yet we are busy messing it up. At all levels of government we seem to do our best to throw a monkey wrench at the system we devised for our good, not our own hurt. The legislators are ever busy opposing each other, yet expect to run the day-to-day affairs smoothly. The American fathers of the constitution chose the "least of evil" of all forms of government, but the element of human nature seems to make it, at best, a dysfunctional system on many levels. Without an agreed upon system of values, accepted by all members of society, it's impossible to run a smooth government as it is prerequisite for the function of life. Since education is the basis that determines the outcome of life, we shall concentrate on this dimension that leads to either success or failure in all areas. the young plants – our children. Finally, we shall address the roll of the society at large. In these three areas we shall find the causes of success and failures of life. Then, we shall proceed to the solutions that will insure the way to success in all areas – the dreamed of utopia. Utopia is possible! We don't have to be ridden with the ills of society, with crime, with violence, with wars, with political corruption. In the beginning it was not so, in the end it can, and will, be different – if we are willing to submit to the process of re-education, all is possible.
