

The Silver Spitfire The Legendary Wwii Raf Fighter Pilot In His Own Words

This classic work of science fiction is widely considered to be the ultimate time-travel novel. When Daniel Eakins inherits a time machine, he soon realizes that he has enormous power to shape the course of history. He can foil terrorists, prevent assassinations, or just make some fast money at the racetrack. And if he doesn't like the results of the change, he can simply go back in time and talk himself out of making it! But Dan soon finds that there are limits to his powers and forces beyond his control.

Here, in his own words, is the true story of America's wildest flying hero, of his extraordinary heroism, and of his greatest battle of all—the fight to survive. The World War II air war in the Pacific needed tough men like Colonel Pappy Boyington and his Black Sheep Squadron. The legendary Marine Corps officer and his bunch of misfits, outcasts, and daredevils gave new definition to “hell-raising”—on the ground and in the skies. Pappy himself was a living legend—he personally shot down twenty-eight Japanese planes, and won the Congressional Medal of Honor and the Navy Cross. He broke every rule in the book doing so, but when he fell into the hands of the vengeful Japanese his real ordeal began.

303 Squadron is the thrilling story of the celebrated squadron of Polish fighter pilots whose superb skill in the air helped save England during its most desperate hours. Downing three times the average RAF score while incurring only one-third the average casualties over the course of the Battle of Britain, the squadron was celebrated by the King, and adored by the British public.

Instant National Bestseller The long-awaited autobiography by one of heavy metal's most revered icons, treasured vocalists, and front man for three legendary bands—Rainbow, Black Sabbath, and Dio. Prior to his tragic death in 2010, Ronnie James Dio had been writing his autobiography, looking back on the remarkable life that led him from his hometown in upstate New York to the biggest stages in the world, including the arena that represented the pinnacle of success to him—Madison Square Garden, where this book begins and ends. As Ronnie contemplates the achievement of a dream, he reflects on the key aspects that coalesced into this moment—the close gang of friends that gave him his start in music, playing parties, bars, frats, and clubs; the sudden transition that moved him to the microphone and changed his life forever; the luck that led to the birth of Rainbow and a productive but difficult collaboration with Ritchie Blackmore; the chance meeting that made him the second singer of Black Sabbath, taking them to new levels of success; the surprisingly tender story behind the birth of the Devil Horns, the lasting symbol of heavy metal; his marriage to Wendy, which stabilized his life, and the huge bet they placed together to launch the most successful endeavor of his career...his own band, Dio. Everything is described in great detail and in the frankest terms, from his fallout with Blackmore, to the drugs that derailed the resurrection of Black Sabbath, to the personality clashes that frayed each band. Written with longtime friend of thirty years and esteemed music writer, Mick Wall, who took up the mantle after Ronnie's passing, *Rainbow in the Dark* is a frank, startling, often hilarious, sometimes sad testament to dedication and ambition, filled with moving coming-of-age tales, glorious stories of excess, and candid recollections of what really happened backstage, at the hotel, in the studio, and back home behind closed doors far away from the road. (Black and white photos throughout plus an 8-page 4-color photo insert.)

Two months before the outbreak of the Second World War, eighteen-year-old Geoffrey Wellum becomes a fighter pilot with the RAF . . . Desperate to get in the air, he makes it through basic training to become the youngest Spitfire pilot in the prestigious 92 Squadron. Thrust into combat almost immediately, Wellum finds himself flying several sorties a day, caught up in terrifying dogfights with German Me 109s. Over the coming months he and his fellow pilots play a crucial role in the Battle of Britain. But of the friends that take to the air alongside Wellum many never return.

Imagine visiting Florence to study Italian and being swept off your feet by a charming chef who takes you speeding through the moonlit hills in his Fiat to visit the village of his childhood, and into the kitchens of his Tuscan restaurants where he teaches you to cook. So begins 'Amore and Amaretti', Victoria Cosford's story of her long love affair with Italy, seasoned with the mouth-watering recipes she has mastered along the way. Twenty years later Victoria is once again leaving her unfulfilled life in Australia to cook for the volatile Gianfranco, an addiction fraught with challenges that has proved difficult to shake. The time has come for her to discover where happiness lies.

Provides a portrait of the highly decorated R.A.F. fighter pilot feared by the Nazi Luftwaffe and who is one of only two men to receive a second bar to the Distinguished Flying Cross
NEW YORK TIMES BESTSELLER Paul Kennedy, award-winning author of *The Rise and Fall of the Great Powers* and one of today's most renowned historians, now provides a new and unique look at how World War II was won. *Engineers of Victory* is a fascinating nuts-and-bolts account of the strategic factors that led to Allied victory. Kennedy reveals how the leaders' grand strategy was carried out by the ordinary soldiers, scientists, engineers, and businessmen responsible for realizing their commanders' visions of success. In January 1943, FDR and Churchill convened in Casablanca and established the Allied objectives for the war: to defeat the Nazi blitzkrieg; to control the Atlantic sea lanes and the air over western and central Europe; to take the fight to the European mainland; and to end Japan's imperialism. Astonishingly, a little over a year later, these ambitious goals had nearly all been accomplished. With riveting, tactical detail, *Engineers of Victory* reveals how. Kennedy recounts the inside stories of the invention of the cavity magnetron, a miniature radar “as small as a soup plate,” and the Hedgehog, a multi-headed grenade launcher that allowed the Allies to overcome the threat to their convoys crossing the Atlantic; the critical decision by engineers to install a super-charged Rolls-Royce engine in the P-51 Mustang, creating a fighter plane more powerful than the Luftwaffe's; and the innovative use of pontoon bridges (made from rafts strung together) to help Russian troops cross rivers and elude the Nazi blitzkrieg. He takes readers behind the scenes, unveiling exactly how thousands of individual Allied planes and fighting ships were choreographed to collectively pull off the invasion of Normandy, and illuminating how crew chiefs perfected the high-flying and inaccessible B-29 Superfortress that would drop the atomic bombs on Japan. The story of World War II is often told as a grand narrative, as if it were fought by supermen or decided by fate. Here Kennedy uncovers the real heroes of the war, highlighting for the first time the creative strategies, tactics, and organizational decisions that made the lofty Allied objectives into a successful reality. In an even more significant way, *Engineers of Victory* has another claim to our attention, for it restores “the middle level of war” to its rightful place in history. Praise for *Engineers of Victory* “Superbly written and carefully documented . . . indispensable reading for anyone who seeks to understand how and why the Allies won.”—*The Christian Science Monitor* “An important contribution to our understanding of World War II . . . Like an engineer who pries open a pocket watch to reveal its inner mechanics, [Paul] Kennedy tells how little-known men and women at lower levels helped win the war.”—Michael Beschloss, *The New York Times Book Review*

“Histories of World War II tend to concentrate on the leaders and generals at the top who make the big strategic decisions and on the lowly grunts at the bottom. . . . [Engineers of Victory] seeks to fill this gap in the historiography of World War II and does so triumphantly. . . . This book is a fine tribute.”—The Wall Street Journal “[Kennedy] colorfully and convincingly illustrates the ingenuity and persistence of a few men who made all the difference.”—The Washington Post “This superb book is Kennedy’s best.”—Foreign Affairs

THE SUNDAY TIMES BESTSELLER 'An inspirational read celebrating the incredible young people who gave so much for this iconic British aircraft'. John Nichol, bestselling author of Spitfire: A Very British Love Story Despite the many films and television programmes over the decades since the end of the Second World War that portrays our allied heroes as grown-up men and women, the Battle of Britain was in the main actually fought and won by teenagers. The average age of an RAF fighter pilot was just twenty years old. Many of the men and women who designed and built their planes were even younger. Based on the hit BBC World Service podcast Spitfire: The People's Story, we use contemporary diaries and memoirs, many of them previously unpublished, to tell the story of the Spitfire through the voices of the teenagers who risked everything to design, build and fly her. This isn't a story of stiff-upper lips, stoical moustaches and aerial heroics; it's a story of love and loss, a story of young people tested to the very limits of their endurance. Young people who won a battle that turned a war.

Key title in the new Uniform Legends series. Up close and personal accounts of pilots who were there, first written in the 1960's when many of the surviving British and German airmen were in or entering their middle years

Finally the full-length memoir of Battle of Britain and Siege of Malta hero Tom Neil, one of the last fighter pilots alive today, who shot down fourteen enemy aircraft

Introduction to Protein Science provides a broad introduction to the contemporary study of proteins in health and disease, suitable for students on biological, biochemical, and biomedical degrees internationally. The book relates the study of proteins to the context of modern high-throughput data streams of genomics and proteomics.

From the palaces of pashas in seventeenth-century India to the scandalous court of James Stuart of England, one woman struggles against fate to find true love . . . Princess Yasaman has been blessed with rapturous beauty, fierce intelligence, and an innocent sensuality that captivates two formidable men—her scheming half-brother, Salim, and her loving husband, Prince Jamal. But her days of bliss and nights of steamy passion are shattered when Jamal is murdered, and Yasaman flees to England and the court of James I. Calling herself Jasmine, she is reunited with her beautiful mother, Velvet, and her grandmother, the legendary Skye O'Malley de Marisco. Before long, Jasmine is caught up in the tangled intrigues of the court of the Stuart king, James I, where she is admired by the most powerful men in England: Rowan Lindley, Marquess of Westleigh, her good-natured second husband; the Earl of Glenkirk, who tempts her with forbidden passion; and hot-blooded Henry Stuart, prince of England. It is here that she truly becomes Wild Jasmine, a woman who lives and loves with fierce abandon and who surrenders to the deepest pleasures of love. . . .

The Silver SpitfireThe Legendary WWII RAF Fighter Pilot in his Own WordsWeidenfeld & Nicolson

'The best book you will ever read about Britain's greatest warplane.' Patrick Bishop, bestselling author of Fighter Boys. 'A rich and heartfelt tribute to this most iconic British machine. By focussing on the men (and women) who flew the Spitfire, John Nichol has brought a fresh and powerful perspective to the story. And by recording their bravery, humility, camaraderie, tragedy and sheer joy in flying their beloved Spits he has done them - and us - a valuable service' Rowland White, bestselling author of Vulcan 606 'A superb and compelling book. Brilliantly written with some incredible and astonishing stories; it is gripping, moving, emotional and sometimes humorous - just perfect' Squadron Leader (Ret) Clive Rowley, former Officer Commanding RAF Battle Of Britain Memorial Flight 'A superb journey through the remarkable tale of that British icon, the Spitfire. Brilliantly and engagingly written, this is the most readable story of the aircraft and her pilots that I have ever had the pleasure to read in a period spanning some forty-odd years of personal study and research. Truly stunning.' Andy Saunders, Editor, Britain at War Magazine. 'This is not just a tale of heroism in the skies . . . This is a tale of victory . . . Magnificently told in lip-biting detail' - Daily Mail (The Red Line) The perfect complementary narrative to the bestselling memoir by Geoffrey Wellum - First Light. Achtung, Spitfire! The iconic Spitfire found fame during the darkest early days of World War II. But what happened to the redoubtable fighter and its crews beyond the Battle of Britain, and why is it still so loved today? In late spring 1940, Nazi Germany's domination of Europe had looked unstoppable. With the British Isles in easy reach since the fall of France, Adolf Hitler was convinced that Great Britain would be defeated in the skies over her southern coast, confident his Messerschmitts and Heinkels would outclass anything the Royal Air Force threw at them. What Hitler hadn't planned for was the agility and resilience of a marvel of British engineering that would quickly pass into legend - the Spitfire. Bestselling author John Nichol's passionate portrait of this magnificent fighter aircraft, its many innovations and updates, and the people who flew and loved them, carries the reader beyond the dogfights over Kent and Sussex. Spanning the full global reach of the Spitfire's deployment during WWII, from Malta to North Africa and the Far East, then over the D-Day beaches, it is always accessible, effortlessly entertaining and full of extraordinary spirit. Here are edge-of-the-seat stories and heart-stopping first-hand accounts of battling pilots forced to bail out over occupied territory; of sacrifice and wartime love; of aristocratic female flyers, and of the mechanics who braved the Nazi onslaught to keep the aircraft in battle-ready condition. Nichol takes the reader on a hair-raising, nail-biting and moving wartime history of the iconic Spitfire populated by a cast of redoubtable, heroic characters that make you want to stand up and cheer. 'A rich and heartfelt tribute to this most iconic British machine. By focussing on the men (and women) who flew the Spitfire, John Nichol has brought a fresh and powerful perspective to the story.' - Rowland White - author of Vulcan 607

When The Big Show was first published, paper rationing meant that the text had to be heavily cut. Now, for the first time, this international bestseller has been returned to its

complete, and breathtaking, original state. Pierre Clostermann was a Free French fighter ace who flew with the RAF during the Second World War. Over the course of five years he engaged in hundreds of dog-fights, shot down scores of Luftwaffe planes, escorted American bombers on some of the most dangerous raids of the war, and watched many of his friends falling to their deaths in the skies over the Channel. The Big Show, his incredible account of the air war over Britain and France, has become one of the most famous memoirs of the Second World War. Now in its original state, it contains everything one could wish for in a war memoir: wonderfully observed descriptions of wartime Britain, frighteningly evocative stories of in-the-cockpit action, an amazing cast of characters, and all the drama and bravery of a man fighting a desperate war thousands of feet above the ground. An undeniable classic.

"An unabridged republication of the following works originally published by Marvel Comics, New York: A Sailor's Story (1987) and A Sailor's Story, Book Two: Winds, Dreams, and Dragons (1989)"--Title page verso.

Presents a collection of facts and stories covering the history of aviation.

A dive caption chronicles his experiences diving for sunken treasure in the dangerous waters off Nova Scotia's Atlantic coast, which have hosted numerous shipwrecks since the 1700s due to the area's powerful currents and jagged reefs.

"Since its earliest days, flight has been about pushing the limits of technology and, in many cases, pushing the limits of human endurance. The human body can be the limiting factor in the design of aircraft and spacecraft. Humans cannot survive unaided at high altitudes. There have been a number of books written on the subject of spacesuits, but the literature on the high-altitude pressure suits is lacking. This volume provides a high-level summary of the technological development and operational use of partial- and full-pressure suits, from the earliest models to the current high altitude, full-pressure suits used for modern aviation, as well as those that were used for launch and entry on the Space Shuttle. The goal of this work is to provide a resource on the technology for suits designed to keep humans alive at the edge of space."--NTRS Web site.

This new, updated edition of The Battle of Britain on Screen examines in depth the origins, development and reception of the major dramatic screen representations of 'The Few' in the Battle of Britain produced over the past 75 years. Paul MacKenzie explores both continuity and change in the presentation of a wartime event that acquired and retains near-mythical dimensions in popular consciousness and has been represented many times in feature films and television dramas. Alongside relevant technical developments, the book also examines the social, cultural, and political changes occurring in the second half of the 20th century and first decade of current century that helped shape how the battle came to be framed dramatically. This edition contains a new chapter looking at the portrayal of the Battle of Britain at the time of its 70th anniversary. Through its perceptive demonstration of how our memory of the battle has been constantly reshaped through film and television, The Battle of Britain on Screen provides students of the Second World War, 20th-century Britain and film history with a thorough and complex understanding of an iconic historical event.

A larger-than-life narrative of the making of the classic film, marking the rise of America as a superpower, the ascent of Hollywood celebrity, and the flowering of Texas culture as mythology. Featuring James Dean, Rock Hudson, and Elizabeth Taylor, Giant is an epic film of fame and materialism, based around the discovery of oil at Spindletop and the establishment of the King Ranch of south Texas. Isolating his star cast in the wilds of West Texas, director George Stevens brought together a volatile mix of egos, insecurities, sexual proclivities, and talent. Stevens knew he was overwhelmed with Hudson's promiscuity, Taylor's high diva-dom, and Dean's egotistical eccentricity. Yet he coaxed performances out of them that made cinematic history, winning Stevens the Academy Award for Best Director and garnering nine other nominations, including a nomination for Best Actor for James Dean, who died before the film was finished. In this compelling and impeccably researched narrative history of the making of the film, Don Graham chronicles the stories of Stevens, whose trauma in World War II intensified his ambition to make films that would tell the story of America; Edna Ferber, a considerable literary celebrity, who meets her match in the imposing Robert Kleberg, proprietor of the vast King Ranch; and Glenn McCarthy, an American oil tycoon; and Errol Flynn lookalike with a taste for Hollywood. Drawing on archival sources Graham's Giant is a comprehensive depiction of the film's production showing readers how reality became fiction and fiction became cinema.

The amazing story of one of 'the Few', Spitfire fighter pilot Gordon Olive, who shot down ten enemy aircraft during the Battle of Britain.

D-Day, June 6, 1944, and the seventy-six days of bitter fighting in Normandy that followed the Allied landing, have become the defining episode of World War II in the west—the object of books, films, television series, and documentaries. Yet as familiar as it is, as James Holland makes clear in his definitive history, many parts of the OVERLORD campaign, as it was known, are still shrouded in myth and assumed knowledge. Drawing freshly on widespread archives and on the testimonies of eye-witnesses, Holland relates the extraordinary planning that made Allied victory in France possible; indeed, the story of how hundreds of thousands of men, and mountains of materiel, were transported across the English Channel, is as dramatic a human achievement as any battlefield exploit. The brutal landings on the five beaches and subsequent battles across the plains and through the lanes and hedgerows of Normandy—a campaign that, in terms of daily casualties, was worse than any in World War I—come vividly to life in conferences where the strategic decisions of Eisenhower, Rommel, Montgomery, and other commanders were made, and through the memories of paratrooper Lieutenant Dick Winters of Easy Company, British corporal and tanker Reg Spittles, Thunderbolt pilot Archie Maltbie, German ordnance officer Hans Heinze, French resistance leader Robert Leblanc, and many others. For both sides, the challenges were enormous. The Allies confronted a disciplined German army stretched to its limit, which nonetheless caused tactics to be adjusted on

the fly. Ultimately ingenuity, determination, and immense materiel strength—delivered with operational brilliance—made the difference. A stirring narrative by a pre-eminent historian, Normandy '44 offers important new perspective on one of history's most dramatic military engagements and is an invaluable addition to the literature of war.

Forty-six accurate, authentic renderings of fighters, bombers, transports, etc. Includes "Enola Gay," Japanese Zero, British Spitfire, German Komet jet fighter, many others. Captions include detailed coloring information, military role and affiliation of plane, manufacturer, other data. All illustrations copyright-free. 13 planes in color on covers. Publisher's Note.

One of 'The 30 Best Travel and Adventure Books of All Time', as selected by Gear Patrol, Winner 2015 US Travel and Adventure website. Fighter Pilot was written from the immediate and unfettered personal journal that 23-year-old Flying Officer Paul Richey began on the day he and No. 1 Squadron landed their Hawker Hurricanes on a grass airfield in France. Originally published in September 1941, it was the first such account of air combat against the Luftwaffe in France in the Second World War, and it struck an immediate chord with a British public enthralled by the exploits of its young airmen. It is the story of a highly skilled group of young volunteer fighter pilots who patrolled, flew and fought at up to 30,000 feet in unheated cockpits, without radar and often from makeshift airfields, and who were finally confronted by the overwhelming might of Hitler's Blitzkrieg. It tells how this remarkable squadron adapted its tactics, its aircraft and itself to achieve a brilliant record of combat victories – in spite of the most extreme and testing circumstances. All the thrills, adrenalin rushes and the sheer terror of dog-fighting are here: simply, accurately and movingly described by a young airman discovering for himself the deadly nature of the combat in which he is engaged.

The arrival of the Spitfire in Burma came at a crucial time as the RAF struggled against the Japanese to support the Chindit operation on the ground. Proving a huge boost to morale, the Spitfire played a large part in defeating the enemy, and covering the subsequent Allied advance through Burma, protecting the ground troops and providing vital supplies. Covering this little documented aerial war, this book tells the stories of the 54 aces who flew against the Japanese, and also those who fought in India and Australia. Full-colour artwork reveals the markings and paint schemes of this most-famous of British planes, whilst first-hand accounts and archive photographs bring the aerial battles of Burma, India and Australia to life.

Antonio Carluccio and Gennaro Contaldo embark on a journey to explore Italy's distinct and varied terrains, and to find out how these have shaped the produce and, in turn, the peoples and their traditions. MUSTANG ACE Memoirs of a P-51 Fighter Pilot by Robert J. Goebel When Robert Goebel left home to join the Army Air Corps in 1942, he was a 19 years old and a high-school graduate. The only previous time he had traveled far from his native Racine, Wisconsin, was an epic trip in the summer of 1940, when he and a pal had ridden the rails to Texas and back to visit two of Bob's brothers who were in the service. Even during his weeks in Pre-flight training, young Goebel found that he felt at home in the service, and he looked forward to the great adventure on which he had embarked out of a sense of patriotism and yearning to see the wide world. Easygoing and quick to learn, Cadet Goebel worked his way steadily through the Basic, Primary, and Advanced phases of military flight training, and found in himself an aptitude for flight. However, like nearly all of his comrades, Goebel could not learn how to hit a flying target with the guns mounted on the trainers he flew. Nevertheless, he and they graduated to fighter school and, after earning their wings and commissions, were sent on to join an operational fighter unit - in Panama. The months of rigorous operational flying in Panama seasoned Lieutenant Goebel and his young companions, and made better aviators of them, but it did little to advance their gunnery skills. When a new crop of novices arrived, Goebel and his companions found themselves on their way to Europe to join the fight. They wound up in North Africa in the Spring of 1944 with orders to join the 31st Fighter Group in Italy. Just as Goebel and his young companions were about to join the leading fighter group in the Mediterranean Theater of Operations, the 31st turned in its British-made Spitfire fighters for new P-51 Mustang fighters. Within weeks, Bob Goebel had flown his first combat missions and had lost his element leader, who was shot down in a swirling dogfight. But master the job he did. A steady succession of bomber-escort missions over southeastern Europe slowly and then more rapidly forced Lieutenant Goebel to settle in and master aerial gunnery and the mentally taxing high-speed dogfights in which he became engaged. At last, he shot down his first German fighter. And he advanced to positions of leadership, in due course leading the entire 31st Fighter Group deep into enemy territory. At length, he shot down a fifth German and thus became an ace-a Mustang Ace. And then he shot down three Germans in one day on a mission to Ploesti, Rumania. He flew to Russia and back, and supported the invasion of southern France. In the end, by September 1944, he had eleven confirmed victories to his credit and was one of the 308th Fighter Squadron's most respected combat leaders. When he was sent home at the end of his combat tour, Captain Bob Goebel was not yet 22 years old.

"For fans of Hilary Mantel and The Tudors, this is the dramatic story of the concluding episode in England's War of the Roses, featuring three brothers, two of whom became kings, Edward IV and Richard III, famous from Shakespeare's great history play Richard III"--

Many World War Two fighter pilots have written their wartime biographies, Tom Neil included, but most of these accounts are tempered by 60 years of hindsight along with concern for the feelings of others. Tom Neil decided that it was now time to tell the stories that previously he couldn't; and came up with a unique approach. By writing them in a short story format, and modifying various aspects for both dramatic effect and also to protect the identities of the individuals involved, he has produced a series of moving and fascinating stories, the first four of which are published in Flight into Darkness. Illustrated with over 30 specially commissioned pencil sketches by award-winning aviation artist Mark Postlethwaite.

An illuminating and authoritative account, greatly expanded from a 13-part television series, of the history of western civilization from its earliest roots. J.M. Roberts uncovers what it was that gave European culture its confident energy for so many centuries while exposing its flaws and its irreversible impact on the rest of the world.

A brilliantly vivid Second World War memoir by one of 'the Few' Spitfire fighter pilots. Following the D-Day landings, Battle of Britain hero Tom Neil was assigned as an RAF liaison to an American fighter squadron. As the Allies pushed east, Neil commandeered an abandoned Spitfire as his own personal aeroplane. Erasing any evidence of its provenance and stripping it down to bare metal, it became the RAF's only silver Spitfire. Alongside his US comrades, he took the silver Spitfire into battle until, with the war's end, he was forced to make a difficult decision. Faced with too many questions about the mysterious rogue fighter, he contemplated increasingly desperate measures to offload it, including bailing out mid-Channel. He eventually left the Spitfire at Worthy Down, never to be seen again. THE SILVER SPITFIRE is the first-hand, gripping story of Neil's heroic experience as an RAF fighter pilot and his reminiscences with his very own personal Spitfire.

It takes two. Even if men aren't from Mars and women aren't from Venus, they still have different takes on what makes a relationship work. In this he says--she says book, Bishop Joseph Walker and his wife Dr. Stephaine Walker tell you how to know when you're in love and ready to take that next step of commitment. This dynamic and successful couple will also dialogue about the place of intimacy, carving out time for each other, and the importance of creating a spiritual life together in order to make significant and lasting decisions. They will also talk about the values necessary to keep couples together in this temptation-laden culture.

'The epic story of an iconic aircraft and the breathtaking courage of those who flew her' Andy McNab, bestselling author of Bravo Two Zero 'Compelling, thrilling and rooted in quite extraordinary human drama' James Holland, author of Normandy 44 From John Nichol, the Sunday Times bestselling author of Spitfire, comes a passionate and profoundly moving tribute to the Lancaster bomber, its heroic crews and the men and women who kept her airborne during the country's greatest hour of need. 'The Avro Lancaster is an aviation icon; revered, romanticised, loved. Without her, and the bravery of those who

flew her, the freedom we enjoy today would not exist.' Sir Arthur Harris, the controversial chief of Royal Air Force Bomber Command, described the Lancaster as his 'shining sword' and the 'greatest single factor in winning the war'. RAF bomber squadrons carried out offensive operations from the first day of the Second World War until the very last, more than five and a half years later. They flew nearly 300,000 sorties and dropped around a million tons of explosives, as well as life-saving supplies. Over 10,000 of their aircraft never returned. Of the 7,377 Lancasters built during the conflict, more than half were lost to enemy action or training accidents. The human cost was staggering. Of the 125,000 men who served in Bomber Command, over 55,000 were killed and another 8,400 were wounded. Some 10,000 survived being shot down, only to become prisoners of war. In simple, brutal terms, Harris's aircrew had only a 40 per cent chance of surviving the war unscathed. Former RAF Tornado Navigator, Gulf War veteran and bestselling author John Nichol now tells the inspiring and moving story of this legendary aircraft that took the fight deep into the heart of Nazi Germany.

New York Times bestselling author Karen Hawkins's first historical romance, originally titled ONE LUCKY LORD and written as Kim Bennett, has been rewritten to tie into both her "MacLeans" series and her new "Hurst Amulet" series. Fearless English earl Thomas Wentworth scoffs at failure, trusting in the legendary Wentworth luck to safeguard his spy mission to Scotland. But a single encounter with saucy Scotswoman Fia Maclean turns Thomas's mission topsy-turvy. All-too-innocently entangling him in his enemy's trap, the beautiful Fia gives Thomas no escape but to marry her. But Thomas doesn't know just what he's marrying into. With an ancient amulet in Fia's possession, she wields even more power than her sharp tongue and quick wit. Her cousin, Douglas Maclean stole the magical amulet from the White Witch, Maeve Hurst, and gave it to Fia for safekeeping. But now, with Fia in London with Thomas, the amulet falls into the hands of Queen Elizabeth. Thinking it will be safe in the queen's hands, Fia leaves it be and focuses on bedeviling her newly betrothed!
