Utopia and Dystopia in the Age of Trump focuses on utopias and dystopias that either prefigure or suggest alternatives to the rise of individuals such as Donald J. Trump and the changing conditions of America we now see around us. These topical studies provide compelling reading for both the general reader and the specialist.

This book familiarizes personnel serving as Emergency Managers, Safety Officers, Assistant Safety Officers, and in other safety-relevant Incident Command System (ICS) roles with physical and psychosocial hazards and stressors that may impact the health and safety of workers and responders in an All-Hazards Response, and ways to minimize exposure. This book provides knowledge on regulations and worker safety practices to the Safety Officer with an emergency responder background, and provides the tools for the Safety Officer with an industrial hygiene or safety professional background that help them be successful in this role. In order to work together effectively, it is important that anyone responding to an emergency be familiar with all standards and protocols.

This book provides one of the first systematic in-depth studies on regional catastrophe risk pools. It explores the various goals of these new financial instruments, illustrating how they function on a conceptual, technical and practical level, and reconstructs their political genesis. With climate-related disasters increasing in frequency and severity, Insuring Against Climate Change explores how affected countries, especially those in the Global South, have increasingly turned

to innovative index insurance instruments, as demonstrated by the creation of the Caribbean Catastrophic Risk Insurance Facility (CCRIF), the African Risk Capacity (ARC) and the Pacific Catastrophe Risk Assessment and Financing Initiative Facility (PCRAFI Facility). Scherer scrutinizes the formation of this trend, exploring comparatively the goals, characteristics and histories of these tools, and argues that their attractiveness rests more on political than economic benefits and is, in fact, more supply than demand-driven. Making a significant contribution to current debates on the opportunities and limitations of what are sometimes described as indirect 'climate risk insurance', this book will be of great interest to political scientists with an interest in insurance instruments and climate-related disaster management politics as well as to practitioners working in the insurance, finance and the development sectors.

Psychologists turn their attention to *The Simpsons*, one of America's most popular and beloved shows, in these essays that explore the function and dysfunctions of the show's characters. Designed to appeal to both fans of the show and students of psychology, this unique blend of science and pop culture consists of essays by professional psychologists drawn from schools and clinical practices across the country. Each essay is designed to be accessible, thoughtful, and entertaining, while providing the reader with insights into both *The Simpsons* and the latest in psychological thought. Every major area of psychology is covered, from clinical psychology and cognition to abnormal and evolutionary psychology, while fresh views on eclectic show topics such as gambling addiction, Pavlovian conditioning, family therapy, and lobotomies are explored.

basics of ship stability as it has been enacted in international law. The assessment of ship stability has evolved considerably since the first SOLAS convention after the sinking of the RMS Titanic, and this book enables readers to familiarise themselves with the most up-to-date modern day methodology, as well as looking ahead to the effects on ship design over the next fifty years. The author not only explains the methodology of probabilistic ship damage as required by the International Maritime Organisation (IMO), but also details the new requirements to assess certain sizes and classes of ships to the seven second-generation ship stability requirements. Many textbooks that are currently used by undergraduates focus on the geometric-centric deterministic approach to the assessment of ship stability, whereas this book also includes material on the classes of ships that are now required to have probabilistic ship damage assessment, as has only recently been agreed by the IMO. Basic Naval Architecture: Ship Stability contains up-to-date information, making it ideal for university students studying ocean or marine engineering, as well as being of interest to students on naval architecture and ship science courses. Highly illustrated and including chapter studies for ease of learning, the book is an ideal one-volume textbook for students.

Building Resilience and Adaptation to Climate Change (BRACC) is a five year program whose main objective is to strengthen the resilience of poor and vulnerable households to withstand current and future weather and climate-related shocks and stresses in four districts in Southern Malawi: Balaka, Chikwawa, Mangochi and Phalombe. Resilience is operationalized as the ability of households to smooth consumption in response to shocks and stresses. This baseline report introduces the evaluation context and describes the BRACC program, details the evaluation design, summarizes main findings from the baseline household survey, and tests whether the randomizations successfully balanced baseline observable characteristics across the treatment arms.

In highlighting the unique features of focus groups, Cyr explains how they can help social science researchers effectively answer certain research questions.

This book explores several branches of the social sciences and their perspectives regarding their relations with decision-making processes: computer science, education, linguistics, sociology, and management. The decision-making process in social contexts is based on the analysis of sound alternatives using evaluative criteria. Therefore, this process is one that can be rational or irrational, and can be based on knowledge and/or beliefs. A decision-making process always

produces a final decision, which may or may not imply prompt action, and increases the chances of choosing the best possible alternative. The book is divided into four main parts. The concepts covered in the first part, on computer science, explore how the rise of algorithms and the growth in computing power over the years can influence decision-making processes. In the second part, some traditional and innovative ideas and methods used in education are presented: compulsory schooling, inclusive schools, higher education, etc. In turn, the third part focuses on linguistics aspects, and examines how progress is manifested in language. The fourth part, on sociology, explores how society can be influenced by social norms, human interactions, culture, and religion. Management, regarded as a science of the decision-making process, is explored in the last part of this book. Selected organizations' strategies, objectives and resources are presented, e.g., human resources, financial resources, and technological resources. The book gathers and presents, in a concise format, a broad range of aspects regarding the decision-making process in social contexts, making it a valuable and unique resource for the scientific community.

Table olives are a traditional fermented vegetable with many centuries of history, particularly in the Mediterranean basin, where this food has had a great influence on the culture and diet of many countries. Moreover, this fermented food is prepared with fruits obtained from cultivated *Olea europaea* subsp. *europaea* var. *europaea* trees and has been expanded for many countries all over the world. At present, the table olive is one of the major fermented vegetables, with an overall production above 2,500,000 tons/year. Thus, the table olive industry is increasingly demanding new biotechnological approaches, sensory characteristics and differentiation of the products. So scientists have to focus on solving problems and providing new tools in this fermented food process. In recent years, there is an increased interest in different nutritional and microbial aspects related to table olives. During the last five years, new fields have been implemented or developed, such as new probiotic strains to produce an enriched product, study of pathogen survival, NaCl content reduction, microbial resistant to stress conditions, microbial biofilms, predictive microbiology, use of NGS and metagenomics, use of bioactive compounds derived from

table olive processing and the treatment of effluents generated during olive processing. The diversity of research displayed in this Research Topic demonstrates the important potential of this product and its impact on the fermented vegetables economy.

A "Must" pick by Entertainment Weekly An A.V. Club "Best Books of June" selection A "New and Noteworthy" selection by USA Today In celebration of The Simpsons thirtieth anniversary, the show's longest-serving writer and producer offers a humorous look at the writing and making of the legendary Fox series that has become one of the most revered artistic achievements in television history. Four-time Emmy winner Mike Reiss—who has worked on The Simpsons continuously since episode one in 1989—shares stories, scandals, and gossip about working with America's most iconic cartoon family ever. Reiss explains how the episodes are created, and provides an inside look at the show's writers, animators, actors and celebrity guests. He answers a range of questions from Simpsons fans and die-hards, and reminisces about the making of perennially favorite episodes. In his freewheeling, irreverent comic style, Reiss reflects on his lifetime inside The Simpsons—a personal highlights reel of his achievements, observations, and favorite stories. Springfield Confidential exposes why Matt Groening decided to make all of the characters yellow; dishes on what it's like to be crammed in a room full of funny writers sixty hours a week; and tells what Reiss learned after traveling to seventy-one countries where The Simpsons is watched (ironic note: there's no electricity in many of

these places); and even reveals where Springfield is located! He features unique interviews with Judd Apatow, who also provided the foreword, and Conan O'Brien, as well as with Simpsons legends Al Jean, Nancy Cartwright, Dan Castellaneta, and more. Like Cary Elwes' *As You Wish*, Jennifer Keishin Armstrong's *Seinfeldia*, and Chris Smith's *The Daily Show: An Oral History*, *Springfield Confidential* is a funny, informational, and exclusive look at one of the most beloved programs in all of television land.

"Black women's heads of hair are galaxies unto themselves, solar systems, moonscapes, volcanic interiors." —Elizabeth Alexander, from the Introduction

Using advertising photographs of black women (and men) drawn from vintage issues of *Ebony* and *Jet* magazines, the exquisite and thought-provoking collages of world-renowned artist Lorna Simpson explore the richly nuanced language of hair. Surreal coiffures made from colorful ink washes, striking geological formations from old textbooks, and other unexpected forms and objects adorn the models to mesmerizingly beautiful effect. Featuring 160 artworks, an artist's statement, and an introduction by poet, author, and scholar Elizabeth Alexander, this volume celebrates the irresistible power of Simpson's visual vernacular.

Prestigious and authoritative, this fully updated fourteenth edition of Simpson's *Forensic Medicine* remains a classic; one of the world's leading introductory texts in the field of forensic medicine. It presents all that the generalist or student needs to know about the interface between medicine and the law.

This book examines how crop diversification strategies can help to ensure sustainable agricultural development across different land-size categories, with a focus on Malda District in West Bengal, India. Using Malda as the study area, a region with nearly 4 million people, the book assesses the extent, pattern, factors and future of crop diversification and its contribution to the development of agriculture in Malda and in India as a whole. The work presents data from 1995-2015 concerning changing cropping patterns at various land-size distributions, and analyzes the information over the twenty year period to understand the link between crop diversification and agricultural development, in order to combat major agricultural issues and make suitable policy recommendations at micro (rural) and macro (urban) levels of agricultural planning. The study is a unique contribution to the field of agricultural geography, and will be of use to students and researchers, as well as government organizations, city/community planners and agriculture managers.

This book presents sources of carbon dioxide emission, related environmental issues and methods for carbon dioxide utilization, storage, analysis, modeling and optimization. This first volume focused on biochemical methods of carbon dioxide sequestration such as forestry, biomineralization, geo-chemo-mechanical, mangrove plantation and biowaste.

Agriculture plays a central role in Bangladesh's economy, especially in rural areas, and further

progress in agriculture will remain important as Bangladesh's economy continues to evolve. Bangladesh has made significant agricultural policy reforms since the 1980s, which has largely contributed to achieving self-sufficiency in rice production. However, these policies are now creating headwinds, constraining the emergence of a more diversified production system. With rapid urbanization and income growth, dietary patterns are changing in Bangladesh and new market opportunities are emerging for diverse, safe, and nutritious foods. Thus, additional productive diversification in agriculture and modernization along the agri-food value chain are needed in order to allow the sector to seize the emerging domestic market opportunities. Promoting greater diversification and modernization of the agri-food sector in Bangladesh will require repurposing the country's agricultural support along with increasing private investment, both along the agri-food value chain and in support services to that chain. The agri-food ecosystem analysis in the report has identified critical constraints to the diversification and modernization of the agri-food sector. The major productivity constraints include land fragmentation and informality in the land rental markets; limited access to quality seeds for nonpaddy crops; limited knowledge of and adoption of good agricultural practices, reflected in unbalanced use and overuse

of inputs; and limited use of farmer aggregation models, which constrains the delivery of extension services, access to financing, and linking with markets. Other key constraints, which are preventing off-farm value addition and commercialization in the sector, include the limited number of formal off-takers; inadequate and costly marketing infrastructure and logistic services; inadequate upholding of appropriate food safety practices and product quality standards; and a poorly designed export subsidy policy. These constraints are exacerbated by other cross-sectoral issues, such as access to finance, and the overall challenges of the investment climate and competitiveness.

This book explores the potential of the Internet for enabling new and flexible political participation modes. It meticulously illustrates how the Internet is responsible for citizens' participation practices from being general, high-threshold, temporally constricted, and dependent on physical presence to being topic-centered, low-threshold, temporally discontinuous, and independent from physical presence. With its ethnographic focus on Icelandic and German online participation tools Betri Reykjavík and LiquidFriesland, the book offers plentiful advice for citizens, programmers, politicians, and administrations alike on how to get the most out of online participation formats.

Winner: Native American and Indigenous Studies Association's Best Subsequent Book 2017

Honorable Mention: Labriola Center American Indian National Book Award 2017 Across North America, Indigenous acts of resistance have in recent years opposed the removal of federal protections for forests and waterways in Indigenous lands, halted the expansion of tar sands extraction and the pipeline construction at Standing Rock, and

demanded justice for murdered and missing Indigenous women. In *As We Have Always Done*, Leanne Betasamosake Simpson locates Indigenous political resurgence as a practice rooted in uniquely Indigenous theorizing, writing, organizing, and thinking. Indigenous resistance is a radical rejection of contemporary colonialism focused around the refusal of the dispossession of both Indigenous bodies and land. Simpson makes clear that its goal can no longer be cultural resurgence as a mechanism for inclusion in a multicultural mosaic. Instead, she calls for unapologetic, place-based Indigenous alternatives to the destructive logics of the settler colonial state, including heteropatriarchy, white supremacy, and capitalist exploitation. This book elucidates the radiation therapy protocols and procedures for the management of adult patients presenting with primary benign and malignant central nervous system tumors. With the development of new treatment strategies and rapid advancement of radiation technology, it is crucial for radiation oncologists to maintain and refine their knowledge and skills. Dedicated exclusively to adult CNS radiation oncology, this textbook explores CNS tumors ranging from the common to the esoteric as well as secondary cancers of metastatic origin. The first half of the book is organized anatomically: tumors of the brain, spinal cord, leptomeninges, optic pathway, ocular choroid, and skull base. The second

half covers primary CNS lymphoma, rare CNS tumors, metastatic brain disease, vascular conditions of the CNS, radiation-associated complications, and radiation modalities. Each chapter provides guidance on treatment field design, target delineation, and normal critical structure tolerance constraints in the context of the disease being treated. Learning objectives, case studies, and Maintenance of Certification Self-Assessment Continuing Medical Education-style questions and answers are incorporated throughout the book. This is an ideal guide for radiation oncologists, residents, and fellows, but medical students may also find value in the text.

Trump Fiction: Essays on Donald Trump in Literature, Film, and Television examines depictions of Donald Trump and his fictional avatars in literature, film, and television, including works that took up the subject of Trump before his successful presidential campaign (in terms that often uncannily prefigure his presidency) as well as those that have appeared since he took office. Covering a range of texts and approaches, the essays in this collection analyze the place Trump has assumed in literary and popular culture. By investigating how authors including Bret Easton Ellis, Amy Waldman, Thomas Pynchon, Howard Jacobson, Mark Doten, Olivia Laing, and Salman Rushdie, along with films and television programs like *The Fresh Prince of Bel-Air*, *Sesame Street*, *Sex and the City*, *Two Weeks Notice*, *Our Cartoon President*, and *Pose* have approached and shaped the discourse surrounding Trump, the contributors collectively demonstrate the ways these cultural artifacts serve as sites through which the culture both resists and abets Trump and his rise to power.

It's hard to believe that the Simpsons have been around for more than a decade. Today, The Simpsons is the longest-running animated series of all time (dethroning The Flintstones in February 1997), and an intrinsic part of pop culture. The Simpsons Complete Guide to your Favourite Show is a celebration of this family's phenomenal decade. Arranged by season, the book covers each episode of the television show, with the special episodes (the annual Halloween show, "Who Shot Mr. Burns?" and "Krusty Gets Kancelled") receiving eyeball-busting two-page spreads. In addition, special sidebars are sprinkled throughout, showing: Simpsons firsts Bart's chalkboard lines Top Homerisms An Itchy & Scratchy filmography A Springfield timeline Things the audience may have missed Highlighting the best of every show, The Simpsons is the ultimate celebration of the cartoon family that has kept the world in stitches. It is the ultimate must-have for all Simpsons aficionados.

How have we come to depend so greatly on the words terror and terrorism to describe broad categories of violence? David Simpson offers here a philology of terror, tracking the concept's long,

complicated history across literature, philosophy, political science, and theology--from Plato to NATO. Introducing the concept of the "fear-terror cluster," Simpson is able to capture the wide range of terms that we have used to express extreme emotional states over the centuries--from anxiety, awe, and concern to dread, fear, and horror. He shows that the choices we make among such words to describe shades of feeling have seriously shaped the attribution of motives, causes, and effects of the word "terror" today, particularly when violence is deployed by or against the state. At a time when terror-talk is widely and damagingly exploited by politicians and the media, this book unpacks the slippery rhetoric of terror and will prove a vital resource across humanistic and social sciences disciplines.

The bioeconomy concept aims to add sustainability to the production, transformation, and trade of biological goods. Though implemented around the world, the development of national bioeconomies is uneven, especially in the global South, where major challenges exist in Sub-Saharan Africa. In this context, the international BiomassWeb project aimed to underpin the bioeconomy concept by applying the value web approach, which seeks to uncover complex interlinked value webs instead of linear value chains. The project also aimed to develop intervention options to strengthen and optimize the

synergies and trade-offs among different value chains. The Special Issue "Advances in Food and Non-Food Biomass Production, Processing and Use in Sub-Saharan Africa: Toward a Basis for a Regional Bioeconomy" compiles 23 articles produced in this framework. The articles are grouped in four sections: the value web approach; the production side; processing, transformation and trade; and global views.

Traffic-Related Air Pollution synthesizes and maps TRAP and its impact on human health at the individual and population level. The book analyzes mitigating standards and regulations with a focus on cities. It provides the methods and tools for assessing and quantifying the associated road traffic emissions, air pollution, exposure and population-based health impacts, while also illuminating the mechanisms underlying health impacts through clinical and toxicological research. Real-world implications are set alongside policy options, emerging technologies and best practices. Finally, the book recommends ways to influence discourse and policy to better account for the health impacts of TRAP and its societal costs. Overviews existing and emerging tools to assess TRAP's public health impacts Examines TRAP's health effects at the population level Explores the latest technologies and policies--alongside their potential effectiveness and adverse consequences--for mitigating TRAP Guides

Despite their considerable presence in Hollywood, extras and working actors have received scant attention within film and media studies as significant contributors to the history of the industry. Looking not to the stars but to these supporting players in film, television, and, recently, streaming programming, *Below the Stars* highlights such actors as precarious laborers whose work as freelancers has critically shaped the entertainment industry throughout the twentieth and twenty-first centuries. By addressing ordinary actors as a labor force, Kate Fortmueller proposes a media industry history that positions underrepresented and quotidian experiences as the structural elements of the culture and business of Hollywood. Resisting a top-down assessment, Fortmueller explores the wrangling of labor unions and guilds that advocated for collective action for everyday actors and helped shape professional norms. She pulls from archival research, in-person interviews, and firsthand observation to examine a history that cuts across industry boundaries and situates actors as a labor group at the center of industrial and technological upheavals, with lasting implications for race, gender, and labor relations in Hollywood.

Agricultural transformation and development are

critical to the livelihoods of more than a billion small-scale farmers and other rural people in developing countries. Extension and advisory services play an important role in such transformation and can assist farmers with advice and information, brokering and facilitating innovations and relationships, and dealing with risks and disasters. *Agricultural Extension: Global Status and Performance in Selected Countries* provides a global overview of agricultural extension and advisory services, assesses and compares extension systems at the national and regional levels, examines the performance of extension approaches in a selected set of country cases, and shares lessons and policy insights. Drawing on both primary and secondary data, the book contributes to the literature on extension by applying a common and comprehensive framework — the “best-fit” approach — to assessments of extension systems, which allows for comparison across cases and geographies. Insights from the research support reforms — in governance, capacity, management, and advisory methods — to improve outcomes, enhance financial sustainability, and achieve greater scale. *Agricultural Extension* should be a valuable resource for policymakers, extension practitioners, and others concerned with agricultural development.

*Marketing in a Digital World* consists of nine essays on how the digital revolution has affected marketing

theory and practice. Leading marketing scholars, including several editors of premier academic journals, provide fresh insights for both scholars and managers seeking to enhance their understanding of marketing in a digital world.

While students today have access to more sources of information than ever before, they are not necessarily equipped to make informed judgments about those sources. Teaching students to evaluate sources has become even more challenging in the last year, as issues regarding fake news and “alternative facts” have become a heated matter in conversations taking place in the public sphere. The book will present students with a set of tools that they can use to evaluate any source that they encounter. In addition to learning how to use sources in their writing, students who read *Who’s Your Source?* will become more savvy consumers of the sources they encounter in their daily lives.
