What Does a Woman Want? Serge Andre,1999-03-17 Freud's question is at the root of his discoveries about the unconscious. Serge André says that a woman wants the truth, and, in this subtle and highly original comparison of Freud and Lacan, he explains why.

What Lacan Said About Women Colette Soler,2020-10-06 The definitive work on Lacan's theory of the feminine. With exquisite prose and penetrating insights, Colette Soler shares her theoretical and clinical expertise in this vibrant new text. She spins out seductive explications of Lacan's thought on the controversial question of sexual difference. With the subtlety that these topics deserve, she takes up Lacan's conception of woman and her relation to masochism, femininity and hysteria, love and death, and the impossible sexual relation. Following more than the usual suspects, What Lacan Said About Women also explores the mother's place in the unconscious, how Lacan understands depression, and why depressives feel unloved. Soler's analysis examines the cultural implications of the texts that Lacan produced from the 1950s to the 1970s, such as the effects of science on contemporary conceptions of the feminine. She gracefully bridges the gap still left open between psychoanalysis and cultural studies. Winner of the Prix Psyche for the best work published in the fields of psychology and psychoanalysis in 2003, this book will appeal to cultural critics, especially those in gender and women's studies, as well as to anyone involved in contemporary theory or clinical practice. This study will transform novices within the field of Lacanian theory into informed thinkers and it will substantially supplement and refine the knowledge of Lacanian veterans.

The "Sissy Boy Syndrome" and the Development of Homosexuality Richard Green,1987 Uses a 15-year study of two groups of boys and their parents to examine the impact of early sexual role behavior on the development of homosexuality

The excerpt of summaries by leading writers in the field assess the contributions of scale in areas including mental state examination, quality of life, patient satisfaction, needs assessments, measurement of service cost, global functioning scales, and social disability. These chapters provide a critical appraisal of how far such scales have been shown

to be reliable and valid, and provide valuable insights in to their ease of use. This book will provide an invaluable reference manual for those who want to take research on mental health services, and for those who need to interpret this research for policy, planning, and clinical practice.

Words, Thoughts, and Theories Alison Gopnik,Andrew N. Meltzoff,1998-09-01 *Words, Thoughts, and Theories* articulates and defends the theory theory of cognitive and semantic development, the idea that infants and young children, like scientists, learn about the world by forming and revising theories, a view of the origins of knowledge and meaning that has broad implications for cognitive science. Gopnik and Meltzoff interweave philosophical arguments and empirical data from their own and other's research. Both the philosophy and the psychology, the arguments and the data, address the same fundamental epistemological question: How do we come to understand the world around us? Recently, the theory theory has led to much interesting research. However, this is the first book to look at the theory in extensive detail and to systematically contrast it with other theories. It is also the first to apply the theory to infancy and early childhood, to use the theory to provide a framework for understanding semantic development, and to demonstrate that language acquisition influences theory change in children.The authors show that children just beginning to talk are engaged in profound restructurings of several domains of knowledge. These restructurings are similar to theory changes in science, and they influence children's early semantic development, since children's cognitive concerns shape and motivate their use of very early words. But, in addition, children pay attention to the language they hear around them and this too reshapes their cognition, and causes them to reorganize their theories.

Seven Conversations with Jorge Luis Borges Fernando Sorrentino,1982 These wide-ranging conversations have an exceptionally open and intimate tone, giving us a personal glimpse of one of the most fascinating figures in contemporary world literature. Interviewer Fernando Sorrentino, an Argentinian writer and anthologist, is endowed with literary acumen, sensitivity, urbanity, and an encyclopedic memory of Jorge Luis Borges' work (in his prologue, Borges jokes that Sorrentino knows his work much better than I do). Borges wanders from nostalgic reminiscence to literary criticism, and from philosophical speculation to political pronouncements. His thoughts on literature alone run the gamut from the Bible and Homer to Ernest Hemingway and Julio Cortázar. We learn that Dante is the writer who has impressed Borges most, that Borges considers Federico García Lorca to be a second-rate poet, and that he feels Adolfo Bioy Casares is one of the most important authors of this century. Borges dwells lovingly on Buenos Aires, too. From the preface: For seven afternoons, the teller of tales preceded me, opening tall doors which revealed unsuspected spiral staircases, through the National Library's pleasant maze of corridors, in search of a secluded little room where we would not be interrupted by the telephone...The Borges who speaks to us in this book is a courteous, easy-going gentleman who verifies no quotations, who does not look

back to correct mistakes, who pretends to have a poor memory; he is not the terse Jorge Luis Borges of the printed page, that Borges who calculates and measures each comma and each parenthesis. Sorrentino and translator Clark M. Zlotchew have included an appendix on the Latin American writers mentioned by Borges

There's No Such Thing as a Sexual Relationship Alain Badiou, Barbara Cassin, 2017-03-28 Published in 1973, *L'Étourdit* was one of the French philosopher Jacques Lacan's most important works. The book posed questions that traversed the entire body of Lacan's psychoanalytical explorations, including his famous idea that there is no such thing as a sexual relationship, which seeks to undermine our certainties about intimacy and reality. In *There's No Such Thing as a Sexual Relationship*, Alain Badiou and Barbara Cassin take possession of Lacan's short text, thinking with Lacan about his propositions and what kinds of questions they raise in relation to knowledge. Cassin considers the relationship of the real to language through a Sophist lens, while the Platonist Badiou unpacks philosophical claims about truth. Each of their contributions echoes back to one another, offering new ways of thinking about Lacan, his seminal ideas, and his role in advancing philosophical thought.

Maps and Monsters in Medieval England Asa Simon Mittman, 2013-09-13 This study centers on issues of marginality and monstrosity in medieval England. In the middle ages, geography was viewed as divinely ordered, so Britain's location at the periphery of the inhabitable world caused anxiety among its inhabitants. Far from the world's holy center, the geographic margins were considered monstrous. Medieval geography, for centuries scorned as crude, is now the subject of several careful studies. Monsters have likewise been the subject of recent attention in the growing field of monster studies, though few works situate these creatures firmly in their specific historical contexts. This book sits at the crossroads of these two discourses (geography and monstrosity), treated separately in the established scholarship but inseparable in the minds of medieval authors and artists.

Killing Freud Todd Dufresne, 2006-09-19 *Killing Freud* takes the reader on a journey through the 20th century, tracing the work and influence of one of its greatest icons, Sigmund Freud. A devastating critique, *Killing Freud* ranges across the strange case of Anna O, the hysteria of Josef Breuer, the love of dogs, the Freud industry, the role of gossip and fiction, bad manners, pop psychology and French philosophy, figure skating on thin ice, and contemporary therapy culture. A map to the Freudian minefield and a masterful negotiation of high theory and low culture, *Killing Freud* is a witty and fearless reevaluation of psychoanalysis and its real place in 20th century history. It will appeal to anyone curious about the life of the mind after the death of Freud.

Foundations of Psychodrama Adam Blatner, MD, 2004-01-01 A companion to his now-classic *Acting-In* (Springer, 1996), *Foundations of Psychodrama* presents a framework for integrating psychodrama with other methods of practice. The

third edition, developed from a 1985 monograph, had wide appeal to students and practitioners of psychodrama as well as functioning as a fresh stimulus to psychotherapy, education, pastoral counseling, and other helping roles. This fourth edition takes account of the increasing work in the field in the 12 years since the last edition and includes a good deal of new material designed to present a more specific rationale for the use of psychodramatic methods while constructing a more logical sequence of events. Dr. Blatner has made a great book even better. Please visit our Author's Website for more information.

The Persistence of Subjectivity Robert B. Pippin, 2005-05-02 The Persistence of Subjectivity examines several approaches to, and critiques of, the core notion in the self-understanding and legitimation of the modern, 'bourgeois' form of life: the free, reflective, self-determining subject. Since it is a relatively recent historical development that human beings think of themselves as individual centers of agency, and that one's entitlement to such a self-determining life is absolutely valuable, the issue at stake also involves the question of the historical location of philosophy. What might it mean to take seriously Hegel's claim that philosophical reflection is always reflection on the historical 'actuality' of its own age? Discussing Heidegger, Gadamer, Adorno, Leo Strauss, Manfred Frank, and John McDowell, Robert Pippin attempts to understand how subjectivity arises in contemporary institutional practices such as medicine, as well as in other contexts such as modernism in the visual arts and in the novels of Marcel Proust.

Beyond Phenomenology Gavin Flood, 1999-10-01 This book argues that the understanding and explanation of religion is always historically contingent. Grounded in the work of Bakhtin and Ricoeur, Flood positions the academic study of religion within contemporary debates in the social sciences and humanities concerning modernity and postmodernity, particularly contested issues regarding truth and knowledge. It challenges the view that religions are privileged, epistemic objects, argues for the importance of metatheory, and presents an argument for the dialogical nature of inquiry. The study of religion should begin with language and culture, and this shift in emphasis to the philosophy of the sign in hermeneutics and away from the philosophy of consciousness in phenomenology has far-reaching implications. It means a new ethic of practice which is sensitive to the power relationship in any epistemology; it opens the door to feminist and postcolonial critique, and it provides a methodology which allows for the interface between religious studies, theology, and the social sciences.

Principles of Developmental Sexology John Money, 1997 Since his study was the first of its kind, Money (pediatrics and medical psychology, Johns Hopkins U.) had to begin by devising a system of developmental categories and stages, which form the backbone of the structure. The Neighbor Slavoj Žižek, Eric L. Santner, Kenneth Reinhard, 2010-06-08 In Civilization and Its Discontents, Freud made abundantly clear what he thought about the biblical injunction, first articulated in Leviticus 19:18 and then elaborated in

Christian teachings, to love one's neighbor as oneself. Let us adopt a naive attitude towards it, he proposed, as though we were hearing it for the first time; we shall be unable then to suppress a feeling of surprise and bewilderment. After the horrors of World War II, the Holocaust, Stalinism, and Yugoslavia, Leviticus 19:18 seems even less conceivable—but all the more urgent now—than Freud imagined. In *The Neighbor*, three of the most significant intellectuals working in psychoanalysis and critical theory collaborate to show how this problem of neighbor-love opens questions that are fundamental to ethical inquiry and that suggest a new theological configuration of political theory. Their three extended essays explore today's central historical problem: the persistence of the theological in the political. In *Towards a Political Theology of the Neighbor*, Kenneth Reinhard supplements Carl Schmitt's political theology of the enemy and friend with a political theology of the neighbor based in psychoanalysis. In *Miracles Happen*, Eric L. Santner extends the book's exploration of neighbor-love through a bracing reassessment of Benjamin and Rosenzweig. And in an impassioned plea for ethical violence, Slavoj Žižek's *Neighbors and Other Monsters* reconsiders the idea of excess to rehabilitate a positive sense of the inhuman and challenge the influence of Levinas on contemporary ethical thought. A rich and suggestive account of the interplay between love and hate, self and other, personal and political, *The Neighbor* will prove to be a touchstone across the humanities and a crucial text for understanding the persistence of political theology in secular modernity.

A Mind that Found Itself Clifford Whittingham Beers, 1923 The publication of this work resulted in a public outcry in the 1900's that began an inquiry into the state of U.S. mental health care and psychiatric services. It contributed significantly to the mental hygiene movement and to establish the National Committee for Mental Hygiene

The Book of Marvels and Travels John Mandeville, 2012-09-13 'Another island in the Great Ocean has many sinful and malevolent women, who have precious gems in their eyes.' In his *Book of Marvels and Travels*, Sir John Mandeville describes a journey from Europe to Jerusalem and on into Asia, and the many wonderful and monstrous peoples and practices in the East. He tells us about the Sultan in Cairo, the Great Khan in China, and the mythical Christian prince Prester John. There are giants and pygmies, cannibals and Amazons, headless humans and people with a single foot so huge it can shield them from the sun. Forceful and opinionated, the narrator is by turns bossy, learned, playful, and moralizing, with an endless curiosity about different cultures. Written in the fourteenth century, the *Book* is a captivating blend of fact and fantasy, an extraordinary travel narrative that offers some revealing and unexpected attitudes towards other races and religions. It was immensely popular, and numbered among its readers Chaucer, Columbus, and Thomas More. Anthony Bale's new translation emphasizes the book's readability, and his introduction and notes bring us closer to Mandeville's medieval worldview.
