The historical roots, key practitioners, and artistic, theoretical, and technological trends in the incorporation of new media into the performing arts.

The past decade has seen an extraordinarily intense period of experimentation with computer technology within the performing arts. Digital media has been increasingly incorporated into live theater and dance, and new forms of interactive performance have emerged in participatory installations, on CD-ROM, and on the Web. In *Digital Performance*, Steve Dixon traces the evolution of these practices, presents detailed accounts of key practitioners and performances, and analyzes the theoretical, artistic, and technological contexts of this form of new media art. Dixon finds precursors to today's digital performances in past forms of theatrical technology that range from the *deus ex machina* of classical Greek drama to Wagner's *Gesamtkunstwerk* (concept of the total artwork), and draws parallels between contemporary work and the theories and practices of Constructivism, Dada, Surrealism, Expressionism, Futurism, and multimedia pioneers of the twentieth century. For a theoretical perspective on digital performance, Dixon draws on the work of Philip Auslander, Walter Benjamin, Roland Barthes, Jean Baudrillard, and others. To document and analyze contemporary digital performance practice, Dixon considers changes in the representation of the body, space, and time. He considers virtual bodies, avatars, and digital doubles, as well as performances by artists including Stelarc, Robert Lepage, Merce Cunningham, Laurie

Anderson, Blast Theory, and Eduardo Kac. He investigates new media's novel approaches to creating theatrical spectacle, including virtual reality and robot performance work, telematic performances in which remote locations are linked in real time, Webcams, and online drama communities, and considers the "extratemporal" illusion created by some technological theater works. Finally, he defines categories of interactivity, from navigational to participatory and collaborative. Dixon challenges dominant theoretical approaches to digital performance—including what he calls postmodernism's denial of the new—and offers a series of boldly original arguments in their place. Exploring Theatre focuses on the development of the total student, which includes developing personal resources, self-confidence, the ability to work well with others, and a life-long appreciation of theater; learning to bolster self-concepts, build an ensemble, observe people and places more closely, move expressively, and become more aware of the senses; learning basic acting skills such as improvisation, characterization, role preparation, and stage movement; exploring a range of career or avocational opportunities in theater and theater education; understanding the various aspects of the production process; and studying special topics such as storytelling, clowning, oral interpretation, readers theater, and puppetry. This text is an ideal

introductory theater text for both middle and high school.

Author/teacher Michael Burns knows from experience how to develop new original theatre pieces on topics that matter to today's kids, from substance abuse, teen sexuality, and violence prevention to respect for the differently abled. This lively introduction to theatre offers equal measures of appreciation of theatrical arts, history of performance, and descriptions of the collaborative theatrical crafts. The author's enthusiasm for and knowledge of the current theatre, highlighted by contemporary production shots from around the world, put the students in the front row. The text includes extensive excerpts from seven plays: Prometheus Bound, Oedipus Tyrannos, The York Cycle, Romeo and Juliet, The Bourgeois Gentleman, The Three Sisters, and Happy Days. Righteously angry, riotously funny, and wise to the

tensions between abstract policy and lived experience, Ike Holter's play *Exit Strategy* centers on vivid, unforgettable characters struggling to maintain faith in a vocation that is being determinedly undermined. Drawing from the headlines, *Exit Strategy* is set in Chicago and tells the story of a fictional public high school slated for closure at the end of the year. Despite funding cuts, bureaucrats run amok, apathy, and a rodent infestation, a small, multiracial group of teachers launch a last-minute effort to save the school, and put their careers, futures, and safety in the hands of a fast-talking administrator who may be in over his head. The tenuous situation also raises fears and anxieties among students, and within the volcanic neighborhood that is home to the school. Holter has said that *Exit Strategy* was inspired by the 2013 mass closure of forty-nine Chicago public schools, which displaced nearly 12,000 children—the majority of directly impacted students were African American and Latinx. Hailed as "riveting," "sharp," and "richly metaphoric" by critics, the play indicts how we educate our children in big American cities, and shows why gaps between haves and have-nots continue to grow. *Exit Strategy* is one of seven plays in Ike Holter's cycle of works set in Chicago or Chicago-inspired neighborhoods.

Deviant Behavior offers an engaging and wide-ranging discussion of deviant behavior, beliefs, and conditions. It examines how the society defines, labels, and reacts to whatever, and whoever, falls under this stigmatizing process—thereby providing a distinctly sociological approach to the phenomenon. The central focus in defining what and who is deviant is the audience—members of the influential social collectivities that determine the outcome of this process. The discussion in this volume encompasses both the explanatory (or positivist) approach and the constructionist (or labeling) perspectives, thereby lending a broad and inclusive vista on deviance. The central chapters in the book explore specific instances or forms of deviance, including crime, substance abuse, and mental disorder, all of which share the quality that they and their actors, believers, or bearers may be judged by these influential parties in a negative or derogatory fashion. And throughout Deviant Behavior, the author emphasizes that, to the sociologist, the term "deviant" is completely non-pejorative; no implication of inferiority or inherent stigma is implied; what the author emphasizes is that specific members of the society—social circles or collectivities—define and treat certain parties in a derogatory fashion; the sociologist does not share in this stigmatizing process but observes and describes it.

Builders Association, an award-winning intermedia performance company, with detailed accounts of its major productions. This book begins with the building of a house, and the building of a company while building the house. It expands to look at the ideas found in various rooms, some of which expanded into virtual space while they still were grounded in the lives of the artists in the house. —from the preface by Marianne Weems

The Builders Association, an award-winning intermedia performance company founded in 1994, develops its work in extended collaborations with artists and designers, working through performance, video, architecture, sound, and text to integrate live performance with other media. Its work is not only cross-media but cross-genre—fiction and nonfiction, unorthodox retellings of classic tales and multimedia stagings of contemporary events. This book offers a generously illustrated history and critical appraisal of The Builders Association, written by Shannon Jackson, a leading theater scholar, and Marianne Weems, the founder and artistic director of the company. It also includes critical meditations from such artists and scholars as Elizabeth Diller, Pico Iyer, Saskia Sassen, Kate Valk, and many others. Technological wizardry in the theater has a long history, going back to the *deus ex machina* of ancient Greek drama. The Builders Association makes its technological dependence visible, putting backstage technologies center stage and presenting architectural assemblies of screens and bodies. Jackson and Weems explore a series of major productions—from *MASTER BUILDER* (Ibsen by way of Gordon Matta-Clark) to *SUPERVISION* (an exploration of dataveillance) to *HOUSE/DIVIDED* (the foreclosure crisis juxtaposed with the Joads of Steinbeck's *The Grapes of Wrath*). Each work is described through a series of steps, including “R&D,” “Operating Systems,” “Storyboard,” and “Rehearsal/Assembly.” The Builders Association not only

traces the evolution of an intermedial aesthetic practice but also tells a story about how a group makes the risky decision to make art in the first place.

This is the personal and deeply passionate story of a life devoted to reclaiming the timeless power of an ancient artistic tradition to comfort the afflicted. For years, theater director Bryan Doerries has led an innovative public health project that produces ancient tragedies for current and returned soldiers, addicts, tornado and hurricane survivors, and a wide range of other at-risk people in society. The originality and generosity of Doerries's work is startling, and *The Theater of War*--wholly un sentimental, but intensely felt and emotionally engaging--is a humane, knowledgeable, and accessible book that will both inspire and enlighten. Tracing a path that links the personal to the artistic to the social and back again, Doerries shows us how suffering and healing are part of a timeless process in which dialogue and empathy are inextricably linked.

In the tenth edition, *Theatre: The Lively Art* remains the best-selling program for Theatre Appreciation courses. Heralded as “The best new musical of the season,” by *The Wall Street Journal*, and “Sumptuous. Gorgeous. As good as it gets,” by *The New York Times*, the show was a breakout hit, with its poignant social commentary, and spellbinding music and lyrics. In this book, Anaïs Mitchell takes readers inside her more than decade’s-long process of building the musical from the ground up—detailing her inspiration, breaking down the lyrics, and opening up the process of creation that gave birth to *Hadestown*. Fans and newcomers alike will love this deeply thoughtful, revealing look at how the songs from “the underground” evolved, and became the songs we sing again and again.

How we can harness cutting-edge biology and manufacturing to fight waste and pollution. In *Nature*, there is little chemical waste; nearly every atom is a resource to be utilized by organisms, ensuring that all the available matter remains in a perpetual cycle. By contrast, human systems of energy production and manufacturing are linear; the end product is waste. In *Brave Green World*, Chris Forman and Claire Asher show what our linear systems can learn from the efficient circularity of ecosystems. They offer an unblinkered yet realistic and positive vision of a future in which we can combine biology and manufacturing to solve our central problems of waste and pollution.

The Cambridge Shakespeare was published in nine volumes between 1863 and 1866. Its careful editorial principles, attractive page design and elegant typography have withstood the test of time. This text was based on a thorough collation of the four Folios and of all the Quarto editions of the separate plays, the base text being the 1623 Folio. The critical apparatus appears at the foot of the page, but for passages where the Quarto differs significantly the entire Quarto text appears in small type after the received text. Notes at the end of each play explain variants, emendations, and passages of unusual difficulty or interest. Grammar and metre were generally left unchanged by the editors, but punctuation was normalised and nineteenth-century orthography was adopted instead of the variable Elizabethan spelling. In a bold move for a Victorian edition, the editors restored various 'profane' expressions where metre or sense demanded it.
