

## The Tide Tide Series Book 1

Wreathed in celestial cataclysm and child-like grandeur, *The Tide Will Erase All* hijacks your imagination to calculate the speed of light inside a dream. A transreality phenomenon known as the Mouth of God foams with star saliva as it eats myth and constellation alike to corrode our laws of nature and steal away the night sky. Dreams from spacetimes unknown prowl toxic and deranged while beings sent from the Mouth of God plumb an unseen treasure from a helpless, traumatized earth. The imagination of an eleven-year-old girl named Robot remains unphased by the astrocatastrophe. Having survived the emergence of the Mouth of God, Robot forms an expedition with a few surviving children and a lone astronomer to contact the world's last remaining telescope—an orbital observatory which they hope can puncture the exo-cosmic firmament and expose the core of all truth. But navigating a landscape of miracles and gore threatens to devastate the fabric of reality and their hearts all the same. As the Mouth of God descends upon the galaxy and its emissaries embolden, Robot uncovers a rationale for the calamity that transcends all material fortune and dominance. A glimpse of emotional floodsurf where monsters from pre-existence sleep in tropic swells, waiting to be released. Waiting to drown the Mouth of God. Waiting to drown everything. Balanced on the lip of extinction, Robot narrates her adventure through a walkie-talkie to astronauts aboard the orbital telescope, a story both contemplative and heartbreaking while soaked in the action influence of the best manga and anime. With wide-eyed lyricism and hyper optic imagery—*The Tide Will Erase All* curates the surreal annihilation of a dream apocalypse with all the sadness, hope, and wonder of a teardrop falling in reverse. The start of a saga which unfolds as a Miyazaki film at the end of the world, a science fiction that seeks to become aflame in your hands and return to the stars.

From internationally bestselling, acclaimed author Melinda Salisbury comes a darkly seductive story of murder, betrayal, love, and monsters in a small town in the Scottish Highlands. Here are the rules of living with a murderer. One: Do not draw attention to yourself. It's pretty self-explanatory -- if they don't notice you, they won't get any ideas about killing you. Be a ghost in your own home, if that's what it takes. After all, you can't kill a ghost. Of course, when you live with a murderer, sit opposite them for every meal, share a washroom and a kitchen, sleep a mere twelve feet and two flimsy walls away from them, this is impossible. Even the subtlest of spectres is bound to be noticed. Which leads to the next rule. Two: If you can't be invisible, be useful. Everyone in this quiet lakeside community knows that Alva's father killed her mother, all those years ago. There wasn't enough proof to arrest him, though, and with no other family, Alva's been forced to live with her mother's murderer, doing her best to survive until she can earn enough money to run away. One of her chores is to monitor water levels in the loch -- a task her father takes very seriously. His family has been the guardian of the loch for generations. It's a cold, lonely task, and a few times, Alva can swear she feels someone watching her. The more Alva investigates, the more she realizes that the truth can be more monstrous than lies. And while you might be able to outrun anything that emerges from the dark water, you can never escape your past . . .

The next book in the immersive fantasy *Song of the Current* series, set along the waterways of a magical world, perfect for fans of

Sabaa Tahir and Victoria Aveyard. Just as there's a god at the bottom of the river, there is a god who lies under the ocean. And she had other plans for me. Caro Oresteia spent her life waiting to be called by the river god, as those in her family had been for generations. But when she's swept away on an adventure to save the Akhaian royal prince, Markos, her destiny is sealed by the sea god instead. For now, Caro is landlocked, helping Markos reclaim his throne after nearly his entire family was assassinated in a political coup. Without any financial or military support, Markos is desperate for allies, and Caro has fought off more than one attempt on his life. When a powerful Archon offers his army in exchange for Markos's marriage to his daughter, Caro must choose: her love for Markos, or the fate of Akhaia? And more important: how much is she willing to risk to defy the sea god's wishes and chart her own course? With shipwrecks, lost treasure, old and new enemies, dark magic, and breathtaking romance, Sarah Tolcser weaves another epic story about chasing your fate.

The second book in a heart-stopping trilogy that follows the captain of an all-female ship intent on taking down a vicious warlord's powerful fleet. After nearly dying at the hand of a powerful foe, Caledonia is pulled from the sea and nursed back to health by a crew of former Bullets that call themselves Blades. The Blades escaped Aric Athair's clutches and now live a nomadic existence, ready to disappear at a moment's notice should trouble come their way. But Caledonia wants to do more than just hide. She wants to find the Mors Navis and her beloved sisters. She wants to continue fighting Aric's fleet and to take back the Bullet seas. She'll need to do everything in her power to convince the Blades that fighting is their only option, that there has to be a life better than the one under Aric Athair's reign, and that finding the women of the Mors Navis is the first step to revolution.

At long last Joanna Bennett is returning to her family's island, the childhood home that her heart has yearned for ever since she was forced to the mainland by catastrophe. At her side stands Nils Sorensen, her oldest friend, stalwart admirer, and new husband. Together they will restore Bennett's Island to its former glory: enticing former residents and other hardworking mainlanders to join their small community, repairing damaged buildings pummeled by the elements during five years of abandonment, and reclaiming the lobstering territory that was once the sole province of islanders but has been overrun by the nearby Brigporters. All the while, Joanna and Nils are setting the foundation of their future, one that will surely be stormy if Joanna tries to apply the rules of her previous marriage to her relationship with Nils. Joanna Bennett will always be a strong and fiercely independent woman, but without learning to trust and be vulnerable in her marriage, she will find herself proud and alone. This story, the second book in Elisabeth Ogilvie's beloved Tide Trilogy, transports readers to the beautiful and rugged Maine coast, where families must eke their livelihoods from the tempestuous ocean but in return they're afforded the daily splendor and simple pleasures of island life.

This postgraduate level text and reference treatise introduces readers to tides, tidal currents, storm-surges and sea level trends in coastal regions. The book is based on tidal waters of Maryland, Virginia, Chesapeake Bay and the Atlantic regions known to the author, and also provides international examples from the UK and different locations around the world, which allows readers to compare and contrast tidal regimes and to perform tidal analysis from data in their own environment. It is an important book for teachers, researchers, planners and engineers responsible for coastal defences as well as new infrastructure and waterway modification in ports and harbours. The wealth of informative detail and data provided makes this text worthwhile for readers who need a wider understanding of this increasingly important topic for coastal zone residents. MATLAB scientific programming language, simple-to-use Graphical User Interface (GUI) programs are introduced for students, researchers and engineering consultants, available at no cost from MATLAB Central file exchange (<http://www.mathworks.com/matlabcentral>). GUI programs provide the tools for analysing water level or water current observations, deriving the major tidal constituents, and showing first hand how tide and tidal current predictions are made in addition to producing unrivalled colour graphic visualisations. GUI is the author's tidal analysis and is particularly suited for the investigation of storm surge in coastal waters. Professor Boon has studied tidal behaviour in world coastal zones and here assembles information for public and private use from his capacity as advisor to

A secret mission. A horror beyond imagination. In the last months of World War Two, the German Navy premiered a new and terrifying weapon. A submarine of incredible range that could strike anywhere, anytime. And it did, prowling the shipping lanes night and day, and striking fear into the Allies. It was just what Hitler needed to turn the tide of war. Until it disappeared without a trace. Now, more than seven decades later, the wreck of a previously unknown U-Boat has been found off the South American coast. A submarine so well preserved that it shouldn't exist. Eager to learn its secrets, a team of marine archaeologists arrive at a unique seafloor habitat to study the wreck up close. But something has survived on the empty sub. A dark and terrifying presence. Answering the panicked researcher's distress call, CUSP sends John Decker to assess the situation. What he finds on the cold and lonely ocean floor is unlike anything he has seen before. A horror from the blackest days of the war. And it doesn't want them to leave. At least, not alive. This is book six in the John Decker series, but it can be read as a standalone novel.
