In the tradition of *Persepolis*, *In the Shadow of No Towers*, and *Our Cancer Year*, an illustrated memoir of remarkable depth, power, and beauty Danny Gregory and his wife, Patti, hadn't been married long. Their baby, Jack, was ten months old; life was pretty swell. And then Patti fell under a subway train and was paralyzed from the waist down. In a world where nothing seemed to have much meaning, Danny decided to teach himself to draw, and what he learned stunned him. Suddenly things had color again, and value. The result is *Everyday Matters*, his journal of discovery, recovery, and daily life in New York City. It is as funny, insightful, and surprising as life itself.

Award-winning illustrator Gabriel Campanario first introduced his approach to drawing in *The Art of Urban Sketching*, a showcase of more than 500 sketches and drawing tips shared by more than 100 urban sketchers around the world. Now, he drills down into specific challenges of making sketches on location, rain or shine, quickly or slowly, and the most suitable techniques for every situation, in *The Urban Sketching Handbook* series. It's easy to overlook that ample variety of characters that walk the streets everyday. From neighbors, dog walkers and shoppers to dancers and joggers, the people that move through the cities and towns are fascinating subjects to study and sketch. In *The Urban Sketching Handbook: People and Motion* Gabriel lays out keys to help make the experience of drawing humans and movements fun and rewarding. Using composition, depth, scale, contrast, line and creativity, sketching out citizens and the way they move has never been more inspirational and entertaining. This guide will help you to develop your own creative approach, no matter what your skill level may be today. As much as *The Urban Sketching Handbook: People and Motion* may inspire you to draw more individuals, it can also help to increase your appreciation of the folks around you. Drawing our postal workers, shopkeepers and neighbors, is a great way to show your appreciation and creativity.

From a celebrated documentary artist, twelve portraits from the front lines of migration form an intimate record of why people leave behind the places they call home. It is an unusual feeling to walk into a place that everyone is leaving . . . Resisting his own urge to walk away, award-winning artist George Butler took his sketchbook and made, over the course of a decade, a series of remarkable pen-and-ink and watercolor portraits in war zones, refugee camps, and on the move. While he worked, his subjects--migrants and refugees in the Middle East, Europe, Africa, and Asia--shared their stories. Theirs are the human stories behind the headlines that tell of fleeing poverty, disaster, and war, and of venturing into the unknown in search of jobs, education, and security. Whether sketching by the hospital bed of a ten-year-old Syrian boy who survived an airstrike, drawing the doll of a little Palestinian girl with big questions, or talking with a Masai herdsman forced to abandon his rural Kenyan home for the Kibera slums, George Butler turns reflective art and sensitive reportage into an eloquent cry for understanding and empathy. Taken together and elegantly packaged, his beautiful portraits form a moving testament to our shared humanity--and the universal urge for safety and a better life.

A guide that shows painters, drawers, doodlers, and urban sketchers how to bring their drawings to life with colorful, bold, yet accessible painting methods. Watercolor sketching is a rapidly emerging technique that enlivens sketches done in pen or pencil with the expressive washes, glazes, and luminous hues of watercolor . This lushly illustrated resource teaches artists on the go how to sketch with watercolor, rendering subjects efficiently and without inhibitions. Readers are guided through all aspects of the medium, from fundamental techniques including wet-on-wet, glazing, and washes; materials and supplies; and little known tips and tricks for getting the most out of watercolor (for example, just sprinkling a little salt on your painting creates a texture that's impossible to achieve with a brush.) A strong focus color theory provides a solid foundation for enhancing drawings with vibrant hues.

Develop your own creative approach, no matter what your skill level with *The Urban Sketching Handbook: Reportage and Documentary Drawing*. The third volume in *The Urban Sketching Handbook* series, *Reportage and Documentary Drawing*, is about drawing as a form of journalism or documenting life. This includes drawings events such as parades, music performances, sporting events, speeches, and can include everything from newsworthy political events to simply documenting a day's adventures. It's about being attentive to your surroundings, and telling that story through your sketches. Artist Veronica Lawlor explains how to use art to find and tell the stories around you. From visual journalism to simply sharing your emotional experience of a place, a reportage illustrator has something to say to their audience. Just as there are all types of written stories to be told, mystery, horror, romance - this volume of *The Urban Sketching Handbook* series reminds artists, sketchers, doodlers, and illustrators that there are all types of visual stories waiting to be told. And the next step is to go out and tell them! Some of the key concepts explored in this volume are: - Observation - Context - History - Ritual - Understanding - Storytelling - Drama - Documentation

This book deals with a wide range of techniques used in the urban design process. It then goes on to relate these techniques to a unique, comprehensive account of method. A method of urban design is developed which has sustainability and environmental protection at the centre of its philosophy. Previously, literature regarding the urban design method has been almost totally neglected; this book introduces the topic to the reader. This revised Second Edition encompasses the latest techniques including the development of geographic information systems and financial techniques which help evaluate projects. A number of techniques are illustrated by example or case study. Where techniques are discussed they are located within the structure of the design process. The book develops a logical framework for a process, which includes problem definition, survey, analysis, concept

generation, evaluation and implementation. It is this framework which leads toward the development of an urban design method. This book is a practical guide for students or professionals in the early part of their careers. It is organized so that each chapter provides guidance which readers would have otherwise had to discover for themselves, often with some difficulty.

Once you understand perspective, it will change the way you see the world--you'll see perspective everywhere. The power of reportage drawing is in the immediacy of the images that are created and the feeling of the illustrator's presence on location. Comparable in some ways to photojournalism, reportage illustrators are acting as visual journalists, proactively creating narrative work about issues and subjects, translating what they witness into handmade imagery. There is evidence that illustrations connect to people in powerful ways whether they are drawings created while embedded with troops in Afghanistan, documenting during a courtroom trial or recreating the energy of the crowd at a rock concert. This area of applied illustration also provides career opportunities for students and takes them out of the classroom and into different environments and situations. With practical information about tools, techniques and coping in various situations as well as inspirational interviews and advice from reportage artists working in the field, this book will fill a gap in this growing market.
