The Visual Story Bruce A. Block, 2013

The Visual Story Bruce A. Block, 2001 *The Visual Story* offers students and professionals in cinematography, production design, directing and screenwriting a clear view of the relationship between the story/script structure and the visual structure of a film or video. An understanding of the visual components will serve as the guide in the selection of locations, set dressing, props, wardrobe, lenses, camera positions, lighting, actor staging, and editorial choices. *The Visual Story* divides what is seen on screen into tangible sections: contrast and affinity, space, line and shape, tone, color, movement, and rhythm. The vocabulary as well as the insight is provided to purposefully control the given components to create the ultimate visual story. For example: know that a saturated yellow will always attract a viewer's eye first; decide to avoid abrupt editing by mastering continuum of movement; and benefit from the suggested list of films to study rhythmic control. *The Visual Story* shatters the wall between theory and practice, bringing these two aspects of the craft together in an essential connection for all those creating visual stories. *Encourages the filmmaker to develop a visual vocabulary *Shows the filmmaker how to structure visuals, communicating moods and emotions with style and variety

If It's Purple, Someone's Gonna Die: The Power of Color in Visual Storytelling Patti Bellantoni, 2012-10-02 If it's

Purple, *Someone's Gonna Die* is a must-read book for all film students, film professionals, and others interested in filmmaking. This enlightening book guides filmmakers toward making the right color selections for their films, and helps movie buffs understand why they feel the way they do while watching movies that incorporate certain colors. Guided by her twenty-five years of research on the effects of color on behavior, Bellantoni has grouped more than 60 films under the spheres of influence of six major colors, each of which triggers very specific emotional states. For example, the author explains that films with a dominant red influence have themes and characters that are powerful, lusty, defiant, anxious, angry, or romantic and discusses specific films as examples. She explores each film, describing how, why, and where a color influences emotions, both in the characters on screen and in the audience. Each color section begins with an illustrated Home Page that includes examples, anecdotes, and tips for using or avoiding that particular color. Conversations with the author's colleagues-- including award-winning production designers Henry Bumstead (*Unforgiven*) and Wynn Thomas (*Malcolm X*) and renowned cinematographers Roger Deakins (*The Shawshank Redemption*) and Edward Lachman (*Far From Heaven*)--reveal how color is often used to communicate what is not said. Bellantoni uses her research and experience to demonstrate how powerful color can be and to increase readers awareness of the colors around us and how they make us feel, act, and react. *Learn how your choice of color can influence an audience's moods, attitudes, reactions, and interpretations of your movie's plot *See your favorite films in a new light as the author points out important uses of color, both instinctive and intentional *Learn how to make good color choices, in your film and in your world.

Cinematic Storytelling Thomas Robotham,2021-08-25 This book presents a new, story-based approach to cinematic

coverage and storytelling in film and video. It breaks from the conventional idea that shots are the fundamental unit of filmmaking, instead exploring the specifics of determining coverage. Keyframes in patterns are introduced, delivering scripted material in a context-rich presentation that supports the storytelling. All the analysis, interpretation, and creative decision making is done first, with shots derived as the very last step. Scripted material is divided into six categories with associated patterns. Like cinematic building blocks, these can freely stack up and interconnect, supporting creativity and avoiding rigid formulas. This approach enables filmmakers to tap into the film language that audiences already understand and put it to practical use, helping the audience to feel the storytelling deeply. Dozens of film examples are provided throughout, plus conceptual and camera diagrams to contextualize the methods presented, and exercises are provided to reinforce concepts. Emphasis is placed on supporting performance and story meaning through a cinematic context. With all the concepts and decision-making options described and shown in examples, a scripted scene is analyzed and developed through an eight-step process, illustrated with storyboard, camera diagrams, and ultimately shot list descriptions. The book is ideal for filmmaking students interested in directing and cinematography, as well as aspiring and early-career filmmakers, cinematographers, and directors.
