

The Wallcreeper Nell Zink Aliplayore

This book constitutes the refereed proceedings of the 8th International Workshop on OpenMP, held in Rome, Italy, in June 2012. The 18 technical full papers presented together with 7 posters were carefully reviewed and selected from 30 submissions. The papers are organized in topical sections on proposed extensions to OpenMP, runtime environments, optimization and accelerators, task parallelism, validations and benchmarks

** This is a New Adult Contemporary Romance intended for MATURE audiences and not for younger readers. Riviera Benson has a talent...one she discovered by accident. She's a painter, but canvas isn't her medium. She creates her lovely masterpieces on walls and ceilings of million dollar homes as murals and faux finishes. Her art is in high demand now, but life wasn't always that way. Riviera has secrets from her past she intends to keep tightly locked away...terrifying secrets that keep her awake at night...that prevent her from getting close to anyone...anyone that is, until she meets Shan. Benjamin Shandon, owner of Shandon Homes, works like a thousand demons are chasing him...because perhaps they are. His business has boomed, ever since the forest fire swept through the canyon and destroyed hundreds of million dollar homes. He demands excellence in everything...from his employees to his women. He slows down for nothing, keeping a schedule that no sane person would want. But Riviera interrupts everything, twisting his guts inside out, and wedging her way into his heart, destroying a promise he made to himself. Will they let their pasts control their future, or will they decide to let go and allow their hearts to discover each other's?

Unexpected MagicCollected StoriesHarper Collins

Mack begins her training at the mages' academy in the hope that, by complying, the stasis spell will be lifted from her old friend, Mrs. Alcoon. However, once there, she finds herself surrounded by unfriendly adults and petulant teenagers, the majority of whom seem determined to see her fail. Feeling attacked on all fronts, Mack finds it harder and harder to keep a rein on her temper. Forced to attend anger management classes and deal with the predatory attentions of Corrigan, the Lord Alpha of the shapeshifter world, her emotions start to unravel. But when she comes across a familiar text within the walls of the mages' library, which might just provide the clues she needs to unlock the secrets of her background and her dragon blood, she realises that her problems are only just beginning... This is the third book in the popular urban fantasy series, Blood Destiny.

A scrapbook traces the development of the internationally popular comic strip about life in corporate America, including the creator's thoughts about the formation of his characters' lives and a wealth of strips from the past seven years. Simultaneous. This book is not intended as a full detailed report on hypertension and related disorders, but instead focuses on particular issues in hypertension. It looks at emerging recently described forms of hypertension that are frequently encountered in clinical practice (prehypertension, white-coat and masked hypertension, hypertension in the elderly) and discusses novel aspects of target organ disease (for example, cognitive impairment, dementia, and sexual dysfunction), and changing concepts in the management of hypertension and antihypertensive pharmacotherapy. It also looks at specific topics that are rarely discussed in books, including hypertension control in postmenopausal women on hormonal replacement therapy, Ramadan fasting, painful inflammatory disorders, and aldosterone escape. Finally, it examines newer cardiovascular risk factors (for example, uric acid, circadian blood pressure changes, blood pressure variability).

UNDERSTANDING JAVA VIRTUAL MACHINE helps readers in gaining in-depth knowledge of underlying Java virtual machine architecture. Chapters in this book are outcome of author's understanding, developed while coding Java Virtual Machine. Initial chapters give the background of platform dependency and how platform independence can be achieved. It explains the building blocks of the Java Virtual Machine like heap, stacks and other storage areas. In subsequent chapters, it continues with algorithms that Java Virtual Machine performs. This book uses 'C' programming language for explaining the algorithms. Audience having background of 'C' or other language will have an advantage in understanding Java Virtual Machine algorithms. Final chapters help target audience in understanding the implementation of java native interface, multi-threading and garbage collection in Java Virtual Machine.

In the wake of a high school coach's shocking murder, homicide detective J. P. Beaumont begins to suspect that the victim's widow, who is about to give birth, is hiding a dangerous secret. Reissue.

Master storyteller Diana Wynne Jones presents a riveting collection of unpredictable tales, including: A cat tells how the kindhearted wizard she owns is suddenly called upon to defeat a horrific Beast. When Anne has mumps, her drawings come to life, and she must protect her home from them. Four children become involved in the intrigue surrounding an innocent prince, an evil count, and a brave outlaw. These fifteen stories and one novella will enchant, startle, and surprise!

While Jah worries about his stylist girlfriend Yoshi's possible relationships with her high-powered clients, True has finally made it as a musician, until he discovers that someone wants him dead, and Dena Jones, new to the streets, becomes caught up in the Harlem underworld and in the stable of notorious pimp Black Ice. Original. 75,000 first printing.

Can Islam be located on a map? Is Europe the center of the Christian world? Is India a Hindu nation? While decades ago these questions were often answered in the affirmative, the truth has never been that simple. Not only are adherents of particular faiths spread across the globe, but there are many variations of a particular faith practiced side by side. This has only become more true in recent years as the pace of globalization has quickened. The essays collected here provide brief and accessible introductions to the major world religions in their global contexts. The volume begins with an introduction to the globalization of religion by Mark Juergensmeyer, and is followed by individual essays on Christianity, Islam, Judaism, Hinduism, Buddhism, and local religious societies. The book concludes with three essays reflecting on the global religious scene. Taken together, these essays provide a concise, authoritative, and highly readable introduction to the state of worldwide religion in the 21st century.

In this authoritative and comprehensive volume, Claude Bardos and Andrei Fursikov have drawn together an impressive array of international contributors to present important recent results and perspectives in this area. The main subjects that appear here relate largely to mathematical aspects of the theory but some novel schemes used in applied mathematics are also presented. Various topics from control theory, including Navier-Stokes equations, are covered.

Scores of pastors and leaders testify: "THIS CHANGED MY LIFE AND MINISTRY." The author considers these critical questions: In the beginning, before God created Adam (mankind), what was His original purpose and plan for him? What could have happened in the Garden of Eden if Adam had not sinned and God's redemptive plan had not become necessary? We know that when God created Adam he received natural life, but how did God plan for Adam to receive Divine (uncreated life)? What is the difference between God's creating and begetting work? It is evident that God has given the Cross a central place in His redemptive working; what is the difference between the work of the Cross and the way of the Cross? Since God, in the fullness of time, will put on display His Divine masterpiece before all the universe, how can we fully cooperate with him if we do not understand His Ultimate Intention?
